Records (or information contained in records) in this system may include identifying information (e.g., name, address, telephone number, social security number, military service number, VA claim number, date of birth); information related to medical examination or treatment (e.g., location of VA medical facility where examination was performed or treatment provided, treatment dates, medical conditions treated or noted on examination, information describing any birth defects in the natural children of the veteran); information concerning VA claims for compensation on the basis of a disability which may be associated with the exposure to ionizing radiation; and, information related to the estimate of the dose of radiation to which the veteran was exposed while on active military duty. The system includes copies of computer files from the military departments that include exposure measurements for military personnel.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

Sec. 232 of Pub. L. 99–576

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

1. The record of an individual who is covered by this system may be disclosed to a member of Congress or staff person acting for the member when the member or staff person requests the record on behalf of and at the request of that individual.

2. Disclosure of VA records as deemed necessary and proper to accredited service organizations, agents, and attorneys recognized under a power of attorney or declaration of representation to assist in the preparation, presentation, and prosecution of claims.

VOL 52 ISS 196 OC 9 1987 UMI

3. A record containing the name(s) and address(es) of present or former members of the armed services and/or their dependents may be released from this system of records under certain circumstances: (1) to any nonprofit organization if the release is directly connected with the conduct of programs and the utilization of benefits under Title 38, and (2) to any criminal or civil law enforcement governmental agency or instrumentality charged under applicable law with the protection of the public health or safety if a qualified representative of such organization, agency or instrumentality has made a written request that such name(s) or address(es) be provided for a purpose authorized by law; provided, further, that the record(s) will not be used for any purpose other than that stated in the request and that the organization, agency or instrumentality is aware of the penalty provisions of 38 U.S.C. 3301(f).

4.Disclosure of information, excluding name and address, (unless name and address is furnished by the requester) for research purposes determined to be necessary and proper, to epidemiological and other research facilities approved by the Chief Medical Director.

5. In order to conduct Federal research necessary to accomplish a statutory purpose of an agency, at the written request of the head of the agency, or designee of the head of that agency, the name(s) and address(es) of present or former personnel of the Armed Services and/or their dependents may be disclosed (a) to a Federal department or agency or (b) directly to a contractor of a Federal department or agency. When a disclosure of this information is to be made directly to the contractor, the VA may impose applicable conditions on the department, agency, and/or contractor to insure the appropriateness of the disclosure to the contractor.

6. Disclosure may be made to the NARA (National Archives and Records Administration) in records management inspections conducted under authority of 44 U.S.C. 2904 and 2906.

7. Any information in this system may be disclosed to a Federal grand jury, a Federal court or a party in litigation, or a Federal agency or party to an administrative preceeding being conducted by a Federal agency, in order for the VA to respond to and comply with the issuance of a Federal subpoena.

8. Any information in this system may be disclosed to a State or municipal grand jury, a State or municipal court or a party in litigation, or to a State or municipal administrative agency functioning in a quasi-judicial capacity or a party to a proceeding being conducted by such agency, in order for the VA to respond to and comply with the issuance of a State or municipal subpoena; provided, that any disclosure of claimant information made under this routine use must comply with the provisions of 38 CFR 1.511.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Records (or information contained in records) are maintained on paper documents, microfilm, microfiche, magnetic tape and magnetic disks.

RETRIEVABILITY:

Records are indexed by name and social security number.

SAFEGUARDS:

Access to records in VA Central Office is only authorized to VA personnel on a "need-to-know" basis. Records are maintained in manned rooms during working hours. During nonworking hours, there is limited access to the building with visitor control by security personnel. Information in the computer file at the Austin VA Data Processing Center may be accessed and updated by authorized VA Central Office personnel via modem. Access is limited to authorized employees by individually unique access codes which are changed periodically. Access to the VA Data Processing Center is generally restricted to center employees, custodial personnel, Federal Protective Service and other security personnel. Access to computer rooms is restricted to authorized operational personnel through electronic locking devices. All other persons gaining access to computer rooms are escorted.

RETENTION AND DISPOSAL:

Records will be maintained and disposed of in accordance with records disposition authority approved by the Archivist of the United States.

SYSTEM MANAGER(S) AND ADDRESS:

Director, Radiology Service (114), Veterans Administration Central Office, Washington, DC 20420.

NOTIFICATION PROCEDURES:

An individual who wishes to determine whether a record is being maintained in this system under his or her name or other personal identifier, or wants to determine the contents of such record, should submit a written request or apply in person to the Director, Radiology Service (114). Inquiries should include the veteran's name, social security number and return address.

RECORD ACCESS PROCEDURES:

An individual who seeks access to records maintained under his or her name in this system may write or visit the Director, Radiology Service (114).

CONTESTING RECORD PROCEDURES:

(See Record Access Procedures above.)

RECORD SOURCE CATEGORIES.

VA patient medical records, various automated record systems providing clinical and managerial support to VA health care facilities, the veteran, family members, and records from the Department of Veterans Benefits, Department of Defense, Defense Nuclear Agency of the Department of Defense, Department of the Army, Department of the Air Force, Department of the Navy, and other Federal agencies.

FEDERAL DEPOSIT INSURANCE CORPORATION

Agency Meeting

Pursuant to the provisions of the "Government in the Sunshine Act" (5 U.S.C. 552b), notice is hereby given that at 5:25 p.m. on Monday, October 5, 1987, the Board of Directors of the Federal Deposit Insurance Corporation met in closed session, by telephone conference call, to consider: (1) Matters relating to the possible failure of certain insured banks; (2) a recommendation regarding an administrative enforcement proceeding initiated against an insured bank; and (3) a recommendation regarding the Corporation's assistance agreement with an insured bank.

In calling the meeting, the Board determined, on motion of Director C.C. Hope, Jr. (Appointive), seconded by Director Robert L. Clarke (Comptroller of the Currency), concurred in by Chairman L. William Seidman, that Corporation business required its consideration of the matters on less than seven days' notice to the public; that no earlier notice of the meeting was practicable; that the public interest did not require consideration of the matters in a meeting open to public observation; and that the matters could be considered in a closed meeting pursuant to subsections (c)(4), (c)(6), (c)(8), (c)(9)(A)(ii), and (c)(9)(B) of the "Government in the Sunshine Act" (5 U.S.C. 552b(c)(4), (c)(6), (c)(9)(A)(ii), and (c)(9)(B)).

Dated: October 6, 1987.

Federal Deposit Insurance Corporation.
Margaret M. Olsen,
Deputy Executive Secretary.

FEDERAL DEPOSIT INSURANCE CORPORATION

Agency Meeting

Pursuant to the provisions of the "Government in the Sunshine Act" (5 U.S.C. 552b), notice is hereby given that that the Federal Deposit Insurance Corporation's Board of Directors will meet in open session at 2:00 p.m. on Tuesday, October 13, 1987, to consider the following matters:

Summary Agenda: No substantive discussion of the following items is anticipated. These matters will be resolved with a single vote unless a

member of the Board of Directors requests that an item be moved to the discussion agenda.

Disposition of minutes of previous meetings.

Reports of the actions approved by the standing committees of the Corporation and by officers of the Corporation pursuant to authority delegated by the Board of Directors.

Discussion Agenda:

Memorandum and resolution re: Final amendments to Part 337 of the Corporation's rules and regulations, entitled "Unsafe or Unsound Banking Practices," which amendments, with respect to securities activities of subsidiaries of insured nonmember banks and the affiliate relationships of insured nonmember banks with securities companies, concern (1) the use of a common name or logo; (2) the requirement for separate entrances; and (3) disclosure requirements.

Proposed policy statement which would address the issue of whether an insured bank that has received assistance from the Federal Deposit Insurance Corporation should be eligible to participate as a bidder in connection with purchase and assumption transactions involving failed banks or as a party to acquire, on an open bank basis, another insured bank with FDIC assistance.

Proposed standards of conduct for bank directors.

The meeting will be held in the Board Room on the sixth floor of the FDIC Building located at 550–17th Street, NW., Washington, DC.

Requests for further information concerning the meeting may be directed to Mr. Hoyle L. Robinson, Executive Secretary of the Corporation, at (202) 898–3813.

Dated: October 6, 1987.

Federal Deposit Insurance Corporation.

Hoyle L. Robinson,

Executive Secretary.

BILLING CODE 6714–01–M

FEDERAL DEPOSIT INSURANCE CORPORATION

Agency Meeting

Pursuant to the provisions of the "Government in the Sunshine Act" (5 U.S.C. 552b), notice is hereby given that at 2:30 p.m. on Tuesday, October 13, 1987, the Federal Deposit Insurance Corporation's Board of Directors will meet in closed session, by vote of the Board of Directors, pursuant to sections 552b(c)(2), (c)(4), (c)(6), (c)(8), (c)(9)(A)(ii), and (c)(9)(B) of Title 5, United States Code, to consider the following matters:

Summary Agenda: No substantive discussion of the following items is anticipated. These matters will be resolved with a single vote unless a member of the Board of Directors requests that an item be moved to the discussion agenda.

Recommendations with respect to the initiation, termination, or conduct of administrative enforcement proceedings (cease-and-desist proceedings, termination-of-insurance proceedings, suspension or removal proceedings, or assessment of civil money penalties) against certain insured banks or officers, directors, employees, agents or other persons participating in the conduct of the affairs thereof:

Names of persons and names and locations of banks authorized to be exempt from disclosure pursuant to the provisions of subsections (c)(6), (c)(8), and (c)(9)(A)(ii) of the "Government in the Sunshine Act" (5 U.S.C. 552b(c)(6), (c)(8), and (c)(9)(A)(ii)).

Note. Some matters falling within this category may be placed on the discussion agenda without further public notice if it becomes likely that substantive discussion of those matters will occur at the meeting.

Discussion Agenda:

Requests for financial assistance pursuant to section 13(c) of the Federal Deposit Insurance Act.

Personnel actions regarding appointments, promotions, administrative pay increases, reassignments, retirements, separations, removals, etc.:

Names of employees authorized to be exempt from disclosure pursuant to the provisions of subsections (c)(2) and (c)(6) of the "Government in the Sunshine Act" (5 U.S.C. 5552b(c)(2) and (c)(6)).

Matters relating to the possible closing of certain insured banks:

Names and locations of banks authorized to be exempt from disclosure pursuant to the provisions of subsections (c)(8), (c)(9)(A)(ii), and (c)(9)(B) of the "Government in the Sunshine Act" (5 U.S.C. 552b(c)(8), (c)(9)(A)(ii), and (c)(9)(B)).

The meeting will be held in the Board Room on the sixth floor of the FDIC Building located at 550 17th Street, NW., Washington, DC.

Requests for further information concerning the meeting may be directed to Mr. Hoyle L. Robinson, Executive Secretary of the Corporation, at (202) 898–3813.

Dated: October 6, 1987.

FEDERAL RESERVE SYSTEM BOARD OF GOVERNORS

TIME AND DATE: 10:00 a.m., Wednesday, October 14, 1987.

PLACE: Marriner S. Eccles Federal Reserve Board Building, C Street entrance between 20th and 21st Streets NW., Washington, DC 20551.

STATUS: Open.

MATTERS TO BE CONSIDERED:

Summary Agenda

Because of their routine nature, no substantive discussion of the following items is anticipated. These matters will be voted on without discussion unless a member of the Board requests that an item be moved to the discussion agenda.

1. Proposed guidelines for financial institutions to implement the Bank Bribery Amendments Act of 1985. (Proposed earlier for public comment; Docket No. R–0603)
2. Proposals regarding the cost-sharing ratios of the Board employees' health insurance premiums.

Discussion Agenda

3. Proposed organization and budget of the Board's Office of the Inspector General.
4. Any items carried forward from a previously announced meeting.

Note.—This meeting will be recorded for the benefit of those unable to attend. Cassettes will be available for listening in the Board's Freedom of Information Office, and copies may be ordered for $5 per cassette by calling (202) 452–3684 or by writing to: Freedom of Information Office, Board of Governors of the Federal Reserve System, Washington, DC 20551.

CONTACT PERSON FOR MORE INFORMATION: Mr. Joseph R. Coyne, Assistant to the Board; (202) 452–3204.

Date: October 7, 1987.

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

Office of Assistant Secretary for Community Planning and Development

[Docket No. 87-1725; FR-2400]

Urban Development Action Grants; Revised Minimum Standards for Small Cities

AGENCY: Office of the Assistant Secretary for Community Planning and Development, HUD.

ACTION: Notice.

SUMMARY: In accordance with 24 CFR 570.452(b)(l), the Department is providing Notice of the most current minimum standards of physical and economic distress for small cities for the Urban Development Action Grant (UDAG) program.

This Notice supersedes the Notice published October 22, 1985 (50 FR 42822).

The minimum standards of distress have change generally as a result of applying new data from the Bureau of the Census, and the Employment Training Administration within the Department of Labor.

This Notice contains four lists. The first list (see Part II of this Notice) identifies all those cities which qualify as distressed communities based upon the new minimum standards. The second list (see Part III of this Notice) identifies those cities which did not qualify when the October 22, 1985 list was published but which do qualify now. The third list (see Part IV of this Notice) identifies those cities which were classified as distressed on the October 22, 1985 list, but which no longer qualify under the new minimum standards. The fourth and last list (see Part V of this Notice) identifies those towns, townships, and Puerto Rican municipios which qualify as distressed communities based upon the new minimum standards.

EFFECTIVE DATE: October 1, 1987.

FOR FURTHER INFORMATION CONTACT: Jean Samuels, Office of Urban Development Action Grants, Department of Housing and Urban Development, 451 Seventh Street, SW. Washington, DC 20410, Telephone: 202/755–6784. For information on minimum distress standards or the data used to determine whether a community qualifies as distressed contact: Larry Blume Telephone: 202/755–7390.

SUPPLEMENTARY INFORMATION: In an October 22, 1985 Notice, we provided the minimum standards of physical and economic distress which were applicable up to the effective date of this Notice for small cities which met the standards published at that time.

Part I of this Notice specifies the new minimum standards of physical and economic distress. Parts II through V contain the lists enumerated in the Summary section of this Notice. Part II contains a revised list of all the small cities which meet the new standards. Part III of this Notice lists those small cities which, based upon the new minimum standards, appear on the list in Part II but did not qualify when the October 22, 1985 list was published. Part IV is a list of those cities which were classified as distressed on the October 22, 1985 list, but which no longer qualify under the new minimum standards. These cities listed in Part IV have a period of time, as specified in Part IV, during which they may submit UDAG applications. Part V is a revised list of eligible towns, townships, and Puerto Rican municipios.

The new minimum standards are based on updated data from the Bureau of the Census and Employment Training Administration. The data cover units of government incorporated through June 1986. The updated Census data are 1984 population, 1983 per capita income, 1980 housing and poverty (adjusted for boundary changes through 1983), and retail and manufacturing jobs created from 1977 to 1982. The previous Census data were 1982 population, 1981 per capita income, 1980 housing and poverty (reflecting boundary changes through the 1982), and 1977–1982 retail and manufacturing jobs. The updated data from the Employment Training Administration are Labor Surplus Areas designated as of April 1, 1987. A list of eligible labor surplus areas was published in the **Federal Register** on March 26, 1987 (52 FR 9727). The previous Labor Surplus Areas were designated as of October 1, 1984.

Part I

A small city must pass three minimum standards of physical and economic distress for the categories appropriate to their size, except that if the percentage of poverty is less than half the minimum standard, the city must pass four standards. The most current minimum standards of physical and economic distress are:

A. *Age of Housing.* At least 20.2 percent of the applicant's year-round housing units must have been constructed prior to 1940, based on 1980 Census data, in order to meet this minimum standard;

B. *Per Capita Income Change.* The net increase in per capita income for the period of 1969–1983 must have been $6,203 or less, based on Census Bureau data, in order to meet this minimum standard;

C. *Population Growth Lag/Decline.* For the period 1970–1984 the percentage rate of population growth (based on corporate boundaries as of 1983) must have been 4.6 percent or less, based on Census Bureau data, in order to meet this minimum standard;

D. *Job Lag/Decline.* The rate of growth in retail and manufacturing employment for the period 1977–1982 must have increased by 3.3 percent or less, based on Census Bureau data, in order to meet this minimum standard. The standard is only applicable to cities of 25,000 population or more. For communities where only retail data were available, a job lag percentage for the retail sector was computed. For communities where only manufacturing data were available, a job lag percentage for the manufacturing sector was computed. The retail job lag threshold is 8.5 percent and the manufacturing job lag threshold is 0.0 percent. If neither data source is available, this standard will not be considered;

E. *Poverty.* The percentage of persons within the applicant's jurisdiction at or below the poverty level must be 12.3 percent or more, based on 1980 Census data, in order to meet this minimum standard;

F. *Labor Surplus Area.* The small city must either be entirely within or partially within an area which meets the criteria for designation as a Labor Surplus Area as of April 1, 1987. These areas include counties or county balances (after excluding cities with populations of 50, 000 or more) with an unemployment rate of 9 percent or more for calendar years 1984–1985.

Part II

The following small cities meet the current minimum standards of physical and economic distress appropriate to their class

Alabama

Abbeville	Auburn
Addison	Autaugaville
Akron	Baileyton
Albertville	Banks
Aliceville	Bay Minette
Altoona	Bayou La Batre
Andalusia	Bear Creek

Part V

The following list contains the names of towns, townships and Puerto Rican municiplos which meet the minimum standards for physical and economic distress, and which are in States where towns and townships generally have powers comparable to the powers of municipalities. Towns and townships in states which are not listed should apply to the local HUD field for assistance in determining whether they have appropriate powers. The towns and townships are not listed with places in Section II because their eligibility as cities has not been fully determined under the criteria of 24 CFR 570.3(e), which require that they (1) have powers and perform functions comparable to municipalities, (2) are closely settled and (3) have corporation agreements with all incorporated places within their boundaries. Requests for waivers of the closely settled requirements may be granted by the Secretary on a case by case basis. The asterisk shown in front of the name of some towns or townships indicates that those towns or townships contain an incorporated place within their boundaries.

FEDERAL REGISTER Published daily, Monday through Friday, (not published on Saturdays, Sundays, or on official holidays), by the Office of the Federal Register, National Archives and Records Administration, Washington, DC 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402.

The **Federal Register** provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders and Federal agency documents having general applicability and legal effect, documents required to be published by act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The **Federal Register** will be furnished by mail to subscribers for $340.00 per year, or $170.00 for 6 months, payable in advance. The charge for individual copies is $1.50 for each issue, or $1.50 for each group of pages as actually bound. Remit check or money order, made payable to the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402.

There are no restrictions on the republication of material appearing in the **Federal Register**.

Questions and requests for specific information may be directed to the telephone numbers listed under INFORMATION AND ASSISTANCE in the READER AIDS section of this issue.

How To Cite This Publication: Use the volume number and the page number. **Example: 52 FR 12345.**

Title 3—

The President

Proclamation 5723 of October 8, 1987

National Down Syndrome Month, 1987

By the President of the United States of America

A Proclamation

National Down Syndrome Month affords all Americans an opportunity to take note of the progress science has made over the past two decades in understanding developmental disabilities, especially Down Syndrome. An accumulation of new research, a body of knowledge represented by thousands of published scientific papers, has meant fresh help for mentally handicapped people and the establishment of a strong information base for future efforts. One of the most important benefits of this research is that people everywhere are becoming increasingly sensitive to the achievements, needs, and potential of the mentally handicapped.

Our society is stronger and healthier because a new situation now prevails for those in our midst who are developmentally disabled. Today, people with Down Syndrome often take part in special education classes within mainstreamed programs in schools, vocational training, and living arrangements that promote as much independence as possible. In addition, parents of babies with Down Syndrome are receiving the education and support they need to understand this condition and to plan for the future of their children with new confidence and hope.

These strides have been possible thanks to the tireless work of concerned researchers, parents' groups, physicians, teachers, and service providers. Private organizations such as the National Down Syndrome Congress and the National Down Syndrome Society have worked in concert with the Public Health Service, the President's Committee on Mental Retardation, and other government agencies to increase public awareness of this condition and of the capabilities of those with Down Syndrome.

These developments are brightening the outlook for people born with Down Syndrome. That outlook will continue to brighten the more we acknowledge that all of us share the same God-given rights, dignity, and worth, and the more we realize that the sanctity of every human life is both a matter of principle and a call to action. As the late Terence Cardinal Cooke of New York said so eloquently:

> The gift of life, God's special gift, is no less beautiful when it is accompanied by illness or weakness, hunger or poverty, mental or physical handicaps, loneliness or old age. Indeed, at these times, human life gains extra splendor as it requires our special care, concern, and reverence. It is in and through the weakest of human vessels that the Lord continues to reveal the power of His love.

The Congress, by Senate Joint Resolution 84, has designated the month of October 1987 as "National Down Syndrome Month" and authorized and requested the President to issue a proclamation in observance of this month.

NOW, THEREFORE, I, RONALD REAGAN, President of the United States of America, do hereby proclaim the month of October 1987 as National Down Syndrome Month. I invite all concerned citizens, agencies, and organizations to unite during October with appropriate observances and activities directed toward assisting affected individuals and their families to enjoy to the fullest the blessings of life.

IN WITNESS WHEREOF, I have hereunto set my hand this eighth day of October, in the year of our Lord nineteen hundred and eighty-seven, and of the Independence of the United States of America the two hundred and twelfth.

Ronald Reagan

Proclamation 5724 of October 8, 1987

National Job Skills Week, 1987

By the President of the United States of America

A Proclamation

America's remarkable ability to create new jobs attests to the ingenuity and vitality of our people and to the fundamental strength and effectiveness of the free market economy. More Americans are working now than ever, and millions of new jobs are being created each year, including many by small business. Our observance of National Job Skills Week reminds us that training for new job skills is of critical importance to our economy and to our entire society.

The Department of Labor's Workforce 2000 study indicates a continuing vital need for job skills training. Trends suggest that the rate of labor force growth will diminish significantly and that the pool of workers, particularly at the entry level, will be smaller. This situation may afford unique opportunities for people from groups that historically have not entered the labor market. It challenges schools, business, community-based organizations, and government at all levels—Federal, State, and local—to continue to train people in the skills they will need to find and keep good jobs as the requirements of the workplace change. And it reminds us to pay careful attention to the implications of changes underway in the nature of the workplace and the composition of the work force.

To focus national attention on job training's role in maintaining a competitive work force, the Congress, by Senate Joint Resolution 72, has designated the week of October 11 through October 17, 1987, as "National Job Skills Week" and authorized and requested the President to issue a proclamation in observance of this week.

NOW, THEREFORE, I, RONALD REAGAN, President of the United States of America, do hereby proclaim the week of October 11 through October 17, 1987, as National Job Skills Week, and I urge all Americans and interested groups to observe this week with appropriate programs and activities.

IN WITNESS WHEREOF, I have hereunto set my hand this eighth day of October, in the year of our Lord nineteen hundred and eighty-seven, and of the Independence of the United States of America the two hundred and twelfth.

Proclamation 5725 of October 8, 1987

National School Lunch Week, 1987

By the President of the United States of America

A Proclamation

The National School Lunch Program was founded 41 years ago. Through it the Federal government works with State governments and local communities to provide food assistance each day for more than 20 million students in 90,000 schools. During National School Lunch Week the American people take time to salute this program and the hardworking citizens whose participation makes it so effective.

This successful program is constantly improving. For instance, food service managers have reached out to the community to involve parents and have promoted good management practices. Many school cafeterias offer new choices such as salad bars to make the lunch period more enjoyable for students. The National School Lunch Program represents the cooperative efforts of parents, teachers, community leaders, and food service specialists in behalf of the students of our Nation, and that is good reason for all of us to celebrate.

By joint resolution approved October 9, 1962, the Congress designated the week beginning on the second Sunday of October in each year as "National School Lunch Week" and authorized and requested the President to issue a proclamation in observance of that week.

NOW, THEREFORE, I, RONALD REAGAN, President of the United States of America, do hereby proclaim the week beginning October 11, 1987, as National School Lunch Week, and I call upon all Americans to give special and deserved recognition to those people at the State and local level whose dedication and innovation contribute so much to the success of the school lunch program.

IN WITNESS WHEREOF, I have hereunto set my hand this eighth day of October, in the year of our Lord nineteen hundred and eighty-seven, and of the Independence of the United States of America the two hundred and twelfth.

Proclamation 5726 of October 8, 1987

National Farm-City Week, 1987

By the President of the United States of America

A Proclamation

For the past 33 years during Thanksgiving week, the American people have observed National Farm-City Week to express gratitude for the bounty with which God has blessed our land and to recognize the achievements of the farmers, rural townspeople, and city residents who make our Nation's agricultural production and distribution system so successful. Truly this cooperation between rural and city dwellers for mutual benefit helps ensure our country's well-being.

America's farmers have provided food and fiber to sustain our people throughout decade after decade of progress. Farmers' productivity has increased steadily, thanks largely to their initiative in supporting and adopting the methods and materials developed by scientific research. Yield per acre has grown tremendously, with the result that American farmers are able not only to meet the Nation's basic needs for foodstuffs, but also to produce agricultural goods for export and for a wide variety of specialty markets here in the United States and around the world.

American agriculture, and the many service industries that depend upon it in cities and towns and along all the routes in between, is a story of extraordinary labor creating extraordinary abundance. At this time of year, it is only fitting that all Americans should offer some special sign of thanks to those who grow, harvest, and bring to our Nation's tables the fruits of sun, seed, and soil.

NOW, THEREFORE, I, RONALD REAGAN, President of the United States of America, by virtue of the authority vested in me by the Constitution and laws of the United States, do hereby proclaim the week of November 20 through November 26, 1987, as National Farm-City Week. I call upon all Americans, in rural areas and cities alike, to join in recognizing the accomplishments of our productive farmers and of our urban residents, who cooperate to create abundance, wealth, and strength for our Nation.

IN WITNESS WHEREOF, I have hereunto set my hand this eighth day of October, in the year of our Lord nineteen hundred and eighty-seven, and of the Independence of the United States of America the two hundred and twelfth.

Rules and Regulations

Federal Register
Vol. 52, No. 197
Tuesday, October 13, 1987

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect, most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.
The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each week.

DEPARTMENT OF AGRICULTURE

Agricultural Marketing Service

7 CFR Part 981

Almonds Grown in California; Expenses and Assessment Rate and Administrative Rules and Regulations Concerning Crediting for Marketing Promotion and Paid Advertising Expenditures

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Final rule.

SUMMARY: This final rule changes administrative rules and regulations established under the Federal marketing order for California almonds to: (1) Allow handlers of California almonds to receive credit against their annual advertising assessments for their unreimbursed media expenses for advertising in any foreign market pursuant to a contract with the California Department of Food and Agriculture; (2) add Australia, Korea, New Zealand, the People's Republic of China, the Philippines, and Taiwan to a list of foreign markets where handler media expenditures for brand advertising of almonds are eligible for credit; (3) delete a limitation which provides that credit for media expenditures for brand advertising in a foreign market shall not exceed 20 percent of a handler's advertising assessments or $500,000 for each crop year, whichever is greater; and (4) extend the date by which handlers must submit documented proof in order to receive credit for the distribution of sample packages of almonds to charitable or educational outlets. These changes are designed to give handlers additional flexibility in meeting their assessment obligations.

EFFECTIVE DATE: October 13, 1987.

FOR FURTHER INFORMATION CONTACT: Ronald L. Cioffi, Chief, Marketing Order Administrative Branch, F&V, AMS, USDA, Room 2523, South Building, P.O. Box 96456, Washington, DC 20090–6456; telephone: (202) 447–5697.

SUPPLEMENTARY INFORMATION: This final rule has been reviewed under Executive Order 12291 and Departmental Regulation 1512–1 and has been determined to be a "non-major" rule under criteria contained therein.

Pursuant to requirements set forth in the Regulatory Flexibility Act (RFA), the Administrator of the Agricultural Marketing Service (AMS) has determined that this action will not have a significant or adverse economic impact on a substantial number of small entities.

The purpose of the RFA is to address regulatory actions to the scale of business subject to those actions in order that small businesses will not be unduly or disproportionately burdened. Marketing orders issued pursuant to the Agricultural Marketing Agreement Act (the "Act," 7 U.S.C. 601 through 674), as amended, and rules issued thereunder, are unique in that they are brought about through group action of essentially small entities acting on their own behalf. Thus, both statutes have small entity orientation and compatibility.

It is estimated that 102 handlers of almonds under the marketing order for California almonds are subject to regulation during the course of the current season. There are about 7,500 almond producers in the regulated area. Small agricultural producers have been defined by the Small Business Administration (13 CFR 121.2 (1985)) as those having average annual gross revenues for the last three years of less than $100,000, and small agricultural service firms are defined as those whose annual gross receipts are less than $3,500,000. The majority of handlers and producers of almonds may be classified as small entities.

This rule will provide handlers with several new opportunities to receive credit against their annual advertising assessments under the order. In addition, it will give handlers in the industry more time to submit documentation to support credit claims for the distribution of sample packages to almonds to charitable or educational outlets and, thereby, provide a uniform method for filing claims for all marketing, promotion and paid advertising activity. Therefore, it is the Agency's view that the rule will relieve restrictions on handlers and will not impose any added costs or expenses upon them.

Information collection requirements in these regulations have been approved by the Office of Management and Budget under the provisions of 44 U.S.C. Chapter 35 and have been assigned OMB No. 0581–0071.

This action revises § 981.441 of Subpart—Administrative Rules and Regulations issued under marketing agreement and Order No. 981 (7 CFR Part 981), both as amended, regulating the handling of almonds grown in California. The order is effective under the Act. This final rule is based on unanimous recommendations of the Almond Board of California (Board), which is responsible for local administration of the order, and upon other available information.

Notice of this action was published in the **Federal Register** (52 FR 28270) on July 29, 1987. Written comments were invited from interested persons until August 28, 1987. No comments were received.

Section 981.41(c) of the order provides that the Board, with the approval of the Secretary, may allow handlers to receive credit for their direct marketing promotion expenditures, including paid advertising, against their annual advertising assessments. That paragraph also provides that a handler shall not receive credit for allowable expenditures that would exceed that portion of such handler's assessment obligation which is designated for maketing promotion, including paid advertising. Section 981.41(e) provides that before crediting is undertaken the Secretary shall prescribe appropriate rules and regulations as are necessary to effectively administer provisions for creditable advertising expenditures.

Section 981.441 currently prescribes rules and regulations to regulate the crediting of payments to advertising media, for distribution of sample packages of almonds to charitable and educational outlets, for promotional materials purchased from the Board, and for certain costs related to mail order promotions. The proposal would revise § 981.441(c)(4), concerning crediting of

VOL
52
ISS
197
OC
13
1987
UMI

payments to advertising media in foreign markets, and § 981.441(d)(1)(i), concerning the distribution of sample packages of almonds to charitable or educational outlets.

Section 981.441(c)(4)(1) currently prescribes credit for a handler's unreimbursed media expenditures for advertising in any foreign market pursuant to a contract with the Foreign Agriculture Service (FAS), U.S. Department of Agriculture, provided the advertisements meet requirements provided for in § 981.441. This final rule revises § 981.441(c)(4)(i) to also allow handlers credit for such expenditures pursuant to a contract with the California Department of Food and Agriculture (CDFA). In 1986, the CDFA initiated a program similar to the FAS export assistance program, whereby the CDFA contributes funds to handler projects to promote agricultural commodities abroad. This rule will allow credit only for those funds contributed by handlers themselves and not reimbursed by the CDFA. Also, credit would only be allowed for handler funds used for paid media advertising.

Section 981.441(c)(4)(ii) currently allows a handler to receive credit for media expenditures for brand advertising in 16 foreign countries. This credit is in addition to the previously discussed credit for advertising pursuant to a contract with the FAS. The total of this additional foreign credit may not exceed 20 percent of a handler's advertising assessments or $500,000 for each crop year, whichever is greater. The 16 countries are Great Britian, France, Italy, West Germany, Denmark, Belgium, Ireland, Luxembourg, The Netherlands, Sweden, Norway, Finland, Switzerland, Singapore, Hong Kong, Japan. Such claims for credit must be substantiated by applicable rate cards. The relevant administrative provisions of this section applicable to domestic advertising also apply to the crediting of advertising in these countries.

This rule revises § 981.441(c)(4)(ii) to add Australia, Korea, New Zealand, the People's Republic of China, the Philippines, and Taiwan to the list of 16 foreign countries where a handler's media expenditures for advertising may receive foreign advertising credit. It is believed that standard schedules of rates for media advertising are available in these countries to allow the Board to substantiate claims for credit as reasonable and appropriate. These countries are increasingly important markets for California almonds, and handlers should be encouraged to develop the market potential in these countries through advertising.

Section 981.441(c)(4)(ii) is also revised by deleting the limitation which provides that credit for media expenditures for brand advertising in designated foreign markets shall not exceed 20 percent of a handler's advertising assessments or $500,000 for each crop year, whichever is greater. Thus, handlers will be eligible for 100 percent of their brand advertising media expenditures in designated foreign markets subject to limitations applicable to credit for domestic advertising.

Many handlers market all or most of their crop in export. While most handlers incur an annual advertising, assessment of less than $500,000 and are, therefore, not limited in the amount of credit they may receive for foreign brand advertising, a few handlers are limited. This rule will give all handlers opportunities to receive credit for brand advertising in foreign markets which are comparable to opportunities for credit in domestic markets. Section 981.441(d)(1)(i)(F) currently provides that no credit shall be granted for the distribution of sample packages containing one-half ounce or less of almonds to charitable or educational outlets without receipt by the Board of acceptable proof of distribution. This proof shall consist of a signed statement from the organization to which the sample packages were distributed, on that organization's letterhead, stating: (1) The name and address of the handler from whom the packages were received; (2) the date of the receipt; (3) the volume of packages received; (4) how such packages will be used; and (5) a statement that such packages will not be used for resale. This proof must be submitted to the Board no later than July 15 of the crop year succeeding the crop year during which the packages are distributed and for which credit is requested except as provided in § 981.441(b). Section 981.441(b) provides that a handler may receive credit up to a maximum of 40 percent of such handler's annual advertising obligation for expenditures for advertisements published, broadcast, or displayed and other marketing promotion activities (including the distribution of sample packages) conducted no later than December 31 of the succeeding crop year if the required documentation is submitted to the Board no later than the following January 31. The crop year under the order is the 12 months from July 1 to the following June 30, inclusive.

Section 981.441(d)(1)(i)(F) is revised to give handlers until October 15 to submit documented proof of their distribution of sample packages. Handlers will be required to file preliminary claims on ABC Form 31 on or before July 15 of the succeeding crop year, stating that proof of distribution will be submitted as expeditiously as possible, but no later than October 15. Handlers will have until October 15 to file final claims on ABC Form 31 with appropriate proof of distribution. The rule does not affect the 40 percent deferment provided for in § 981.441(b).

This change requires handlers to file for credit for the distribution of sample packages at the same time and in the same manner as claims for credit for advertising expenditures and costs related to mail order promotions. The action corrects a previous oversight to ensure that filing procedures for claiming credit for various types of authorized marketing promotion and paid advertising activities are uniform.

It is further found that good cause exists for not postponing in the effective date of this action until 30 days after publication in the **Federal Register** (5 U.S.C. 553) in that: (1) The regulation provides handlers with additional flexibility in crediting advertising and promotion expenditures, and handlers should have the opportunity to utilize this increased flexibility as soon as possible; (2) handlers are aware of this action and need no additional time to comply; and (3) no useful purpose would be served by delaying the effective date of this action.

List of Subjects in 7 CFR Part 981

Marketing agreements and orders, Almonds, California.

For the reasons set forth in the preamble, 7 CFR Part 981 is amended as follows:

PART 981—ALMONDS GROWN IN CALIFORNIA

Subpart—Administrative Rules and Regulations

1. The authority citation for 7 CFR Part 981 continues to read as follows:

Authority: Secs. 1–19, 48 Stat. 31, as amended; 7 U.S.C. 601–674.

2. Amend § 981.441 by revising paragraphs (c)(4)(i), (c)(4)(ii), and (d)(1)(i)(F) to read as follows:

§ 981.441 Crediting for marketing promotion including paid advertising.

* * * * *

(c) * * *

(4) * * *

(i) For handler's unreimbursed media expenditures for advertising in any foreign market pursuant to a contract

with the Foreign Agricultural Service, U.S. Department of Agriculture, and/or the California Department of Food and Agriculture provided the advertisements meet the requirements of paragraphs (c)(2) and (3) if this section and the limitation of paragraphs (c)(5) (i) and (ii) of this section.

(ii) For a handler's media expenditures for brand advertising in Australia, Belgium, Denmark, Finland, France, Great Britain, Hong Kong, Ireland, Italy, Japan, Korea, Luxembourg, the Netherlands, New Zealand, Norway, the Philippines, the People's Republic of China, Singapore, Sweden, Switzerland, Taiwan, and West Germany, credit shall be allowed when claims are substantiated by applicable rate cards. The provisions of this section applicable to domestic advertising shall also apply to the crediting of advertising in these markets.

(i) * * *

(F) Handlers must file claims with the Board in order to receive credit for the distribution of sample packages. Except as provided in paragraph (b) of this section, no credit shall be granted unless a preliminary claim is filed on or before July 15 of the succeeding crop year and a final claim is filed on or before October 15 of the succeeding crop year. Each preliminary claim must be filed on an ABC Form 31 (claim for advertising credit), stating that proof of distribution will be submitted as expeditiously as possible, but no later than October 15. If this preliminary claim is not filed on or before July 15, there will be no consideration of the claim under any circumstances. Each final claim must be submitted on ABC Form 31 and accompanied by appropriate proof of performance. This proof shall consist of a signed statement from the organization to which sample packages were distributed, on that organization's letterhead, stating:

(1) The name and address of the handler from whom the packages were received;

(2) The date of receipt;

(3) The volume of packages received;

(4) How such packages will be used; and

(5) A statement that such packages will not be used for resale.

BILLING CODE 3410-02-M

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Docket No. 87-CE-18-AD; Amdt. 39-5741]

Airworthiness Directives; Gulfstream (Aero Commander) Models 500, 500A, 500B, 500S, 500U, 520, 560, 560A, 560E, 560F, 680, 680E, 680F, 680FL, 680F(P), 680FL(P), 685, 700, and 720 Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment adopts a new Airworthiness Directive (AD), applicable to certain Gulfstream (Aero Commander) Models 500, 500A, 500B, 500S, 500U, 520, 560, 560A, 560E, 560F, 680, 680E, 680F, 680FL, 680F(P), 680FL(P), 685, 700, and 720 airplanes, equipped with reciprocating engines herein referred to as "500/600/700 series" airplanes, which requires the modification of the fuel filler port to prevent inadvertent filling of the fuel tanks with jet fuel. The NTSB has reported four accidents where airplane misfueling was found to have contributed to the accidents. The modification is necessary to prevent further misfueling and thereby preclude in-flight engine failure.

EFFECTIVE DATE: November 12, 1987.

Compliance: As prescribed in the body of the AD.

ADDRESSES: Gulfstream Aerospace Corp., Service Information No. SI-209 dated July 15, 1986, applicable to this AD may be obtained from Gulfstream Aerospace Corporation, Wiley Post Airport, P.O. Box 22500, Oklahoma City, Oklahoma 73123. This information may be examined at the Rules Docket, FAA, Central Region, Office of the Regional Counsel, Room 1558, 601 East 12th Street, Kansas City, Missouri 64106.

FOR FURTHER INFORMATION CONTACT: Alma Ramirez-Hodge, Aerospace Engineer, Airplane Certification Branch, ASW-150, Department of Transportation, Federal Aviation Administration, Forth Worth, Texas 76193-0150; Telephone (817) 624-5147.

SUPPLEMENTARY INFORMATION: A proposal to amend Part 39 of the Federal Aviation Regulations to include an AD requiring the modification of the fuel filler port on certain Gulfstream 500/600/700 series airplanes equipped with reciprocating engines was published in the **Federal Register** on June 8, 1987, (52 FR 21574). The proposal responded to an NTSB Recommendation which reported four accidents as a result of in-flight engine failures on Gulfstream Model 500/600/700 series airplanes. These airplanes have reciprocating engines in which misfueling with jet fuel caused the engine failures. Further, the NTSB report indicates that most cases of misfueling occur with light, twin-engine, piston-powered airplanes which are similar in appearance to turbine engine-powered airplanes.

In recent years, the frequency of accidents involving misfueling with jet fuel has increased significantly despite efforts of the FAA and other interested parties. On September 17, 1982, and October 5, 1984, the FAA issued two Advisory Circulars (AC) Nos. 20-116 and 20-122, "Marking Aircraft Fuel Filler Openings with Color Coded Decals," and "Anti-Misfueling Devices: Their availability and Uses." Both recommend methods to prevent airplane misfueling. However, the level of response to these AC's appears low considering the nature of the problem and the number of airplanes involved. Therefore, in the interest of aviation safety, the modification to the fuel filler port was recommended by the NTSB.

Interested persons have been afforded an opportunity to comment on the proposal. Five commenters responded. Three commenters concurred with the proposal.

A fourth commenter asserts that it will cost the manufacturer millions of dollars to comply with the proposed AD. The commenter further suggests that instead of paying for airplane modifications, the monies be used on initial education and recurrent training of airplane fueling operators. The FAA agrees that additional training could benefit the fueling operations but disagrees on withdrawing the AD. Although, well trained personnel should be the goal of all fueling facilities, it is not the only avenue to safe fueling that should be pursued. The FAA has determined that it is appropriate to require installation of fuel filler port restrictors on Gulfstream 500/600/700 series airplanes.

A fifth commenter restated the comments submitted to the FAA as comments to Docket No. 24911 of the **Federal Register** dated March 27, 1986, "Petition to Require That Fueling Ports in Piston Engine Powered Civil Aircraft be Restricted to Less Than 2.5 Inches in Diameter" and the subsequent NTSB recommendation which has been incorporated in this AD. The commenter stated that it is reasonable to apply the AD to a few airplane models which have similar turbin variants but questions the omission of the Beech Model 65 which

VOL 52 ISS 197 OCT 13 1987 UMI

was originally equipped with piston engines but subsequently retrofitted with turbine engines. The commenter also questions the disparity in estimated cost between the petition published in March 27, 1986, and the expected cost of modifying Gulfstream 500/600/700 series airplanes. The commenter stated that the issuance of the AD is only one answer to the multifaceted problem and encourages the industry to continue educating operators on airplane fueling safety.

FAA concurs with the need for continuing education. In addition, FAA will consider the commenter's recommendation to include other airplanes in the modification requirements and may initiate separate rulemaking action. The FAA has reviewed the cost discrepancies and does not believe that this constitutes sufficient justification to withdraw the AD. The cost statements in the petition were based on general aviation industry information and not the manufacturers actual modification cost. The AD allows other equivalent means to compliance to be used if approved.

Therefore the AD is being adopted without change.

The FAA has determined there are approximately 1,995 airplanes affected by this rule. The cost of modifying these airplanes would depend on the number of fuel filler caps on the airplane. For all model airplanes except the Model 700, the approximate one-time cost per tank is $105. The approximate one-time cost for the Model 700 is $228.

Gulfstream Models 500, 500A, 500B, 500U, 500S, 520, 560, and 560A airplanes have only one filler cap. Gulfstream Models 560E, 560F, 680, 680F, 680FP, 680FL, 680FLP, and 720 airplanes have three filler caps. Model 700 airplanes have two filler caps and two optional filler caps. The total cost to modify the fleet will be $405,830. The cost of complying with this AD therefore will not have a significant financial impact on any small entities owning affected airplanes.

Therefore, I certify that this action (1) is not a "major rule" under the provisions of Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) will not have significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act. A copy of the draft regulatory evaluation has been prepared for this action. A copy of it may be obtained by contacting the Rules Docket at the location provided under the caption **ADDRESSES.**

List of Subjects in 14 CFR Part 39

Air transportation, Aviation safety, Aircraft, Safety.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration amends § 39.13 of Part 39 of the FAR as follows:

PART 39—[AMENDED]

1. The authority citation for Part 39 continues to read as follows:

Authority: 49 U.S.C. 1354(a), 1421, and 1423; 49 U.S.C. 106(g) (Revised, Pub. L. 97–449, January 12, 1983); and 14 CFR 11.89

§ 39.13 [Amended]

2. By adding the following new AD:

Gulfstream: Applies to Models 500, 500A, 500B, 500U, 520, 560, 560A, 560E, 560F, 680, 680E, 680F, 680F(P), 680FL(P), and 720 (S/N 1 through 1854); and Models 500S (S/N 1755 through 3323), 680FL (S/N 1261 through 1853), 685 (S/N 12001 through 12066), and 700 (S/N 70001 through 70032) airplanes equipped with reciprocating engines certificated in any category.

Compliance: Required as indicated unless already accomplished.

To preclude misfueling of the airplane resulting in engine failure, accomplish the following:

(a) Within the next 12 calendar months after the effective date of this AD, unless already accomplished, modify all fuel filler opening(s) in accordance with the instructions contained in Gulfstream Service Information No. SI–209, dated July 15, 1986.

Note: AD 73–6–2 (38 FR 6989; March 15, 1973), applicable to certain of the above-referenced airplanes, is a prerequisite to the accomplishment of the actions prescribed in this AD.

(b) Airplanes may be flown in accordance with FAR 21.197 to a location where this AD may be accomplished.

(c) In accordance with FAR Part 43, Appendix A, item (c)29, the modifications required by this AD are preventative maintenance and may be performed by the holder of a pilot certificate issued under FAR Part 61 on airplanes owned or operated by him, subject to the limitations of FAR 43.3(g). The maintenance record entries required by FAR's 43.9 and 91.173 must be accomplished.

(d) An equivalent means of compliance with this AD may be used if approved by the Manager, Airplane Certification Branch, Southwest Region, Department of Transportation, Federal Aviation Administration, Fort Worth, Texas 76193–0150, Telephone (817) 624–5150.

All persons affected by this directive may obtain copies of the document(s) referred to herein upon request to the Gulfstream Aerospace Corporation, Wiley Post Airport, P.O. Box 22500, Oklahoma City, Oklahoma 73123; or FAA, Office of the Regional Counsel, Room 1558, 601 East 12th Street, Kansas City, Missouri 64106.

This amendment becomes effective on November 12, 1987.

Issued in Kansas City, Missouri, on September 17, 1987.

Jerold M. Chavkin,

Acting Director, Central Region.

Pricing of Pipeline-Produced Natural Gas

Issued: October 7, 1987.

AGENCY: Federal Energy Regulatory Commission, DOE.

ACTION: Order granting rehearing solely for the purpose of further consideration.

SUMMARY: In Order No. 391–B, 40 FERC ¶ 61,174 (1987), the Federal Energy Regulatory Commission, on remand from the United States Court of Appeals for the District of Columbia Circuit, reaffirmed its interpretation of section 104 of the NGPA to allow pipeline production from old wells on old leases to be priced on a par with independent producer's gas. The Commission is issuing an order granting rehearing solely for the purpose of further consideration of requests by Mid-West Energy, Inc. for rehearing and by Wexpro Company for rehearing or clarification of Order No. 351–B.

EFFECTIVE DATE: October 7, 1987.

FOR FURTHER INFORMATION CONTACT: Richard A. White, Office of the General Counsel, Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, (202) 357–8696.

SUPPLEMENTARY INFORMATION:

Before Commissioners: Martha O. Hesse, Chairman; Anthony G. Sousa, Charles G. Stalon, Charles A. Trabandt and C.M. Naeve.

Order Granting Rehearing Solely for the Purpose of Further Consideration

On August 10, 1987, the Commission issued Order No. 391–B in response to the court remand of Order Nos. 391 and 391–A. Order No. 391–B upheld the Commission's prior determination that pipeline production previously priced on

a cost-of-service basis qualifies for the same ceiling price under the NGPA as gas sold by independent producers.

On September 9, 1987, Midwest Energy, Inc. filed a request for rehearing of Order No. 391–B asserting that the Commission's order is a clearly erroneous construction of the NGPA.

On September 9, 1987, Wexpro Company filed a request for rehearing or clarification of Order No. 391–B seeking clarification as to whether the independent producer rate also applies to Wexpro's unique situation. Wexpro Company states that because its predecessor, Mountain Fuel, operated as a producer, an interstate pipeline, and a local distribution company, there was no sale for resale and no just and reasonable rate established by the Commission although its dedicated gas was subject to cost-of-service rate regulation through state regulation of retail sales.

Under Rule 713(f) of the Commission's rules of practice and procedure, these requests will be denied by operation of law if not acted on by the Commission within 30 days. In order to afford additional time for consideration of the issues raised in the requests for rehearing, the Commission will grant rehearing of the August 10, 1987 order for the limited purpose of further consideration.

The Commission Orders

Midwest Energy Inc's and Wexpro Company's requests for rehearing are granted solely for the purpose of further consideration. As provided in Rule 713(d) of the Commission's rules of practice and procedure, 18 CFR 385.713(d), no answers to the requests for rehearing are permitted.

By the Commission.

Kenneth F. Plumb,

Secretary.

[Docket Nos. RM86–2–002, –003, –004; Order No. 469–A]

Revision of the Billing Procedures for Annual Charges for Administering Part I of the Federal Power Act and to the Methodology for Assessing Federal Land Use Charges

Issued: October 7, 1987.

AGENCY: Federal Energy Regulatory Commission, DOE.

ACTION: Order denying rehearing.

SUMMARY: On May 8, 1987, the Federal Energy Regulatory Commission (Commission) issued Order No. 469, a final rule that amended Part 11 of its regulations under the Federal Power Act (Act) revising the billing procedures for annual charges for administering Part I of the Act, the billing procedures for charges for Federal dam and land use, and the methodology for assessing Federal land use charges. Three commenters on the final rule filed separate requests for rehearing of the above-captioned proceeding, pursuant to 18 CFR 385.713 (1987). The applicants all argue, *inter alia,* that the final rule went beyond the scope of the notice. The Commission is denying rehearing of Order No. 469.

EFFECTIVE DATE: October 7, 1987.

FOR FURTHER INFORMATION CONTACT: James R. Keegan, Office of the General Counsel, Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, (202) 357–8542.

Order Denying Rehearing

Before Commissioners: Martha O. Hesse, Chairman; Anthony G. Sousa, Charles G. Stalon, Charles A. Trabandt and C.M. Naeve.

I. Introduction

The Commission is denying rehearing of Order No. 469,[1] a final rule that amended Part 11 of its regulations under the Federal Power Act (FPA) (16 U.S.C. 791 through 825). The final rule revised the billing procedures for annual charges for administering Part I of the FPA, the billing procedures for charges for Federal dam and land use, and the methodology for assessing Federal land use charges.

II. Background

Prior to the Commission's revisions in Order No. 469, since 1942, annual charges for government land used by hydroelectric licensees were based on a national average land value multiplied by a rate of return. The national average land value used by the Commission had remained at $150 an acre since 1976. The rate of return was based on the rate used by the United States Water Resources Council, but this rate is barred by statute from being changed more than one-quarter of a percent in any year.

On December 30, 1985, the Commission issued a notice of proposed rulemaking (NOPR) proposing to change the methodology used in computing charges for the use of Federal lands to correct an undercollection of charges, in response to recommendations of the Inspector General.[2] The Inspector General had concluded that the land value and the interest rate employed by the Commission's then current regulations were outdated, resulting in an undercharging of licensees by approximately $15.2 million each year for the use of about 168,000 acres of Federal land. The Inspector General recommended revising the Commission's regulations to base these land use charges on the current fair market value of the land being used and the current long-term government borrowing rate. The Inspector General also recommended replacing the national average land value with State-by-State averages.[3]

The Commission originally proposed in the NOPR to remedy this undercollection of charges by revising the existing methodology to reflect a more current value of lands and a more precise rate of return. The NOPR noted that the USFS and the Bureau of Land Management of the United States Department of the Interior (BLM) were jointly conducting a market survey to establish representative market values for various types of linear rights-of-way crossing lands administered by the two agencies, and that the market survey data would be used by USFS and BLM to establish geographical zones of similar land values from which to develop a rental schedule for linear rights-of-way. The Commission proposed adopting the fees established by the USFS methodology for linear rights-of-way. Finally, the Commission requested comment on whether it should continue to assess lands used for transmission line rights-of-way at one half the rate of other Federal lands.[4]

The Commission issued a supplemental request for comments on December 23, 1986, on its proposal to base the land use charges on the USFS's recently published index of values of linear rights-of-way, since the index had not yet been published when the NOPR was issued. In its request, the Commission proposed to use the per-acre fee for electric transmission line

VOL 52 ISS 197 OCT 13 1987 UMI

rights-of-way as published by the USFS both for the Commission charges for transmission line rights-of-way and for the charges for Federal lands for other than transmission line uses.[5]

In brief, the USFS methodology is based upon a survey of market values for the various types of land that it has allowed to be occupied by linear rights-of-way. The schedule is divided into regional zones and provides per-acre rental fees by state and county. These fees are arrived at by multiplying the raw value of the land in each zone by a rate of return. The fees were adjusted downward to reflect the value difference between rights-of-way authorization granted by private landowners and those issued by the government for electrical transmission, electrical distribution, telephone and other linear rights-of-way (70 percent of the zone right-of-way value); and energy pipelines, ditches, canals, and road rights-of-way (80 percent).[6] The final rule adopted the USFS methodology, applying the 70 percent adjusted rate for transmission line rights-of-way and assessing all other Federal land at twice the transmission line rate.

III. Discussion

The Edison Electric Institute (EEI), Southern California Edison Company (SCE), and Pacific Gas and Electric Company (PG&E) filed requests for rehearing of the final rule. The applicants raise no objections to the change in billing procedures established in the final rule. However, they oppose some aspects of the new methodology for assessing Federal land use charges. These issues are address below.

A. Scope of Notice

EEI, SCE, and PG&E argue that they were not provided with an opportunity to comment on the rule as adopted, because the rule went beyond the scope of the NOPR and the supplemental notice. They contend that establishing charges for non-transmission line project land use that are double the USFS per-acre fees, and not adopting USFS methodology in its entirety (including subclasses of charges for telephone and distribution lines, and for canals, roads, ditches, and pipelines) went beyond the proposal.

The Commission rejects this argument. The Administrative Procedure Act [7] requires only that the NOPR include a description of the subjects and issues involved in the proposal, rather than the specifics of every proposal the Commission may ultimately adopt.[8] A NOPR serves to fairly apprise interested persons of the subject and issues of the rulemaking. A final rule need not be an exact replica of the proposal. The final rule must only be a logical outgrowth of the proposal.[9]

In this instance, the NOPR was adequate to provide the public with notice of the possible alternatives to the proposal. The NOPR proposed adopting the USFS methodology as a method of assessing Federal land use charges. The USFS methodology specifically applies to transmission line rights-of-way. The NOPR also proposed discontinuing the practice of assessing charges for lands used for purposes other than transmission line rights-of-way at twice the rate for lands used for transmission line rights-of-way.[10] The Commission adopted the USFS methodology but, partly in response to the comments received requesting that the 50-percent differential be maintained,[11] did not adopt the proposal to eliminate the discount for transmission line rights-of-way.

In fact, in order to ensure that all interested parties had an opportunity to comment on the proposal, the Commission issued a notice requesting additional comments once the USFS methdology a had become final. Here, the notice proposed using the USFS methodology for both classes of land. The fact that the Commission did not adopt the proposal to eliminate the discount is not an indication that the final rule exceeded the scope of the notice; it is inherent in the notice and comment procedure that the Commission may decide on the basis of the comments to adopt or not to adopt a proposal, or to modify a proposal.[12] The Commission adopted the USFS methodology for the type of lands for which it was intended to represent, and chose to continue billing twice that amount for other lands, as suggested by the commenters. Therefore, the final rule was a logical outgrowth of the NOPR.

In addition, the Commission is not pursuaded by the argument that, by not adopting the USFS methodology in full to create new classes of land charges for telephone lines, ditches, canals, and other such uses, the commenters were deprived of notice of what was proposed. This new subclassification was never proposed or even mentioned. The NOPR indicated that the Commission has only two classifications of types of land associated with hydropower projects, a fact that is clearly evident in the regulations.[13] Therefore, the final rule clearly did not go beyond the scope of the NOPR and the supplemental notice.

B. Basis for the 50-Percent Reduction for Transmission Line Rights-of-Way

EEI argues that neither the comments received nor the USFS's policy behind their methodology support the Commission's rationale for doubling the USFS per-acre fee for non-transmission line land use.

First, EEI asserts that the USFS methodology was based on market values adjusted downward by 30 percent, and that doubling these charges for non-transmission line lands results in charging 140 percent of the actual land value. EEI recommends eliminating the 30 pecent adjustment for non-transmission line lands rather than doubling the USFS fees. EEI alleges that this will base non-linear land charges on actual land values. Second, EEI argues that the comments that support retaining the 50-percent discount for transmission-line land-use were not relevant to the USFS methodology the Commission adopted, since they were responding to a proposed methodology based on agricultural land values and were intended to ameliorate the deficiencies in that methodology. Finally, EEI questions the Commission's reliance on the Inspector General (IG) Report's assertion that the national land values were outdated, resulting in an undercharging for land use, when the final rule also found the Report to be flawed. EEI claims that the Commission applied reasoning that it had rejected as deficient in the same order. Each of these arguments is addressed below.

The Commission is not persuaded by EEI's suggestion that charges for transmission line lands should be assessed using the USFS fees, and charges for other lands should be assessed about 42 percent higher (to

[13] 18 CFR 11.02 (1987). The Commission also assessed charges differently for land adjoining Government dams (18 CFR 11.03), but these lands were not the subject of this rulemaking.

reflect the fact that under the USFS methodology transmission-line lands were allegedly valued at 30 percent below the market value of other lands). The USFS methodology was intended specifically for linear rights-of-way use of Federal lands, and the base land values were based on market values for linear rights-of-way. The 30 percent differential in these rates reflects the difference in the value of linear rights-of-way on Federal lands and those on non-Federal lands, and not a difference between the market value of transmission line lands and non-transmission line lands. Therefore, the Commission will not be assessing charges at 140-percent of their market value, as EEI alleges.

In response to EEI's second argument, the Commission notes that the comments on eliminating at 50-percent reduction for transmission line lands were not made to ameliorate the inequity of the proposed use of farm values in assessing lands charges. Eight commenters submitted substantive comments on the issue of charging for nontransmission line lands at twice the value of transmission line lands. All eight, including EEI, objected to elimination of the different treatment of the two types of lands to encourage multiple uses of the lands, because of the limited use of the licensees, and to be consistent with right-of-way compensation and appraisal practices in the private sector. No commenter argued that retaining the discount was necessary because of the proposed use of the farm-values index. The Commission relied on these comments and on the USFS's suggestion that the Commission apply its transmission-line lands-fees to the linear rights-of-way, using different factors for other lands, in retaining the 50 percent differential.

Finally, EEI's claim that the IG's Report could not be rejected and relied upon in the same order ignores the fact that the Commission rejected that part of the report that was related to the use of farm values to assess charges for hydropower projects. Commenters unanimously agreed with the Commission. The Commission relied on the report only to show that the national-average land value was outdated.

C. Other Subclasses of Lands

The applicants argue that the Commission should also adopt the USFS charges for other uses of lands, such as telephone lines, distribution lines, ditches, and canals.

The Commission rejects this suggestion. Such a proposal would require the Commission to appraise every project, a procedure it abandons by promulgating the final rule. Currently, the Commission has a billing index which contains a breakdown of each project according to how many acres of Federal lands are used for transmission line rights-of-way, and how many acres are used for other purposes. If the Commission were to adopt the applicants suggestion, it would have to undertake the burdensome task of reappraising every project that uses Federal lands in order to determine how many acres are being used for each of the USFS described uses. SCE also urges that the Commission adopts a subclassification for project uses that would have little adverse impact on the land (SCE cites buried powerhouses as an example of such a use). The Commission also rejects this suggestion because it, too, would require it to reevaluate hundreds of hydroelectric projects.

By the Commission.

Kenneth F. Plumb,

Secretary.

AGENCY: Federal Energy Regulatory Commission, DOE.

ACTION: Final rule, notice of OMB control number.

SUMMARY: On June 23, 1987, the Federal Energy Regulatory Commission, issued a final rule (Order No. 473) in Docket No. RM86-7-000, 52 FR 21660 (June 9, 1987), amending its regulations governing compression allowances and protest procedures under section 110 of the Natural Gas Policy Act of 1978. The information collection provisions were submitted to the Office of Management and Budget (OMB) for approval under the Paperwork Reduction Act. OMB has provided an OMB control number.

EFFECTIVE DATE: August 10, 1987.

FOR FURTHER INFORMATION CONTACT: Arthur W. Iler, Office of the General Counsel, Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, DC 20426 (202) 357-5275.

SUPPLEMENTARY INFORMATION: The Paperwork Reduction Act, 44 U.S.C. 3501 through 3520 (1982), and the Office of Management and Budget's (OMB) regulations, 5 CFR Part 1320 (1987) require that OMB approve information collection requirements imposed by agency rule. OMB has approved the information collection requirements of the NGPA Section 110 Protest Procedures in Order No. 473. OMB issued Control Number 1902-0057 for § 154.94(k) of the Commission's regulations. The control number is effective August 10, 1987.

Accordingly, Part 389, Chapter I, Title 18, Code of Federal Regulations, is amended as set forth below.

Kenneth F. Plumb,

Secretary.

PART 389—OMB CONTROL NUMBERS FOR COMMISSION INFORMATION COLLECTION REQUIREMENTS

1. The authority citation for Part 389 continues to read as follows:

Authority: Paperwork Reduction Act of 1980 (44 U.S.C. 3501-3520) (1982).

§ 389.101 [Amended]

2. The table of OMB control numbers in § 389.101(b) is amended by inserting "154.94(k)" in numerical order in the "section" column and "0057" in the corresponding position in the "OMB control number" column.

Revision of Rules Governing Postmarketing Reporting of Adverse Drug Reactions

AGENCY: Food and Drug Administration.

ACTION: Final rule.

SUMMARY: The Food and Drug Administration (FDA) is revising the regulations governing the postmarketing reporting of adverse drug reactions in order to improve patient safety. Specifically, the agency is modifying requirements for the submission of 15-day Alert reports and clarifying the reporting obligations of a drug firm conducting a study with a marketed drug. The changes are intended to improve the effectiveness of the adverse drug reaction reporting system by focusing FDA's prompt review on reports of truly serious adverse reactions.

EFFECTIVE DATE: These final regulations are effective November 12, 1987.

FOR FURTHER INFORMATION CONTACT: Philip L. Paquin, Center for Drugs and Biologics (HFN–362), Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857, 301–295–8049.

SUPPLEMENTARY INFORMATION:

1. Introduction

In the **Federal Register** of December 30, 1986 (51 FR 47028), FDA proposed several changes to the rules governing the reporting of adverse drug experiences associated with the use of marketed new drug products and marketed prescription drugs for human use without approved new drug applications. FDA proposed these changes to increase patient safety by improving the effectiveness of FDA's postmarketing surveillance of drug products. The agency provided until March 2, 1987, for interested persons to submit written comments on these proposed changes.

Highlights of this final rule and a discussion of related issues are contained in the following sections. The remainder of the preamble is devoted to an analysis of comments received and the agency's responses to them.

II. Highlights of the Final Rule

1. Revision of the Definition of "serious" Adverse Experience

The current regulations require the marketer of a new drug product to report to FDA any adverse drug experience that is both serious and unexpected no later than 15 days after learning of the experience. A serious adverse experience is defined as "an adverse drug experience that is life-threatening, is permanently disabling, requires inpatient hospitalization, or requires prescription drug therapy." In addition, an adverse drug experience with one of the following outcomes is always considered serious: death, congenital anomaly, cancer, or overdose. Thus, an adverse drug experience is "serious" if it results in any of the outcomes listed in the definition.

The agency is deleting "requires prescription drug therapy" from the definition of "serious" adverse drug experience. As explained in the proposal, the agency has found that the "requires prescription drug therapy" element of the definition has resulted in the submission of large numbers of 15-day Alert reports for events that are not sufficiently severe to warrant agency review as a 15-day Alert report. In addition, because almost all important and severe reactions requiring prescription drug therapy also satisfy other criteria of serious (in that, for example, they result in hospitalization or death), nearly all significant reactions will continue to be reported to FDA as 15-day Alert reports even in the absence of the prescription drug therapy criterion. In the very few cases where this is not so, it is anticipated that there will be instances of the same reaction in other patients that do meet other criteria for "serious." Moreover, spontaneous reports of domestic reactions to new drugs with approved new drug applications that do not satisfy any of the criteria of "serious" will still be reported to FDA in periodic reports (quarterly during the first 3 years of marketing a new drug), and become part of the agency's data base concerning the drug.

2. Obligations of a Sponsor of a Postmarketing Study

Currently, the holder of an approved marketing application for a drug product who sponsors a postmarketing study of that drug under an investigational new drug application (IND) is subject to the adverse drug reaction reporting requirements of both the IND regulations (21 CFR Part 312) and the new drug regulations (21 CFR Part 314). In this final rule, the agency is minimizing unnecessary dual reporting to the IND and new drug application (NDA) files by providing that adverse events from clinical investigations and other postmarketing studies be reported under § 314.80 (21 CFR 314.80) only if there is a reasonable possibility that the event is causally related to the drug exposure. Otherwise these events will be reported solely to the IND files. This revision in the reporting requirements also applies to postmarketing studies that are not conducted under an IND. Therefore, reports of adverse experiences from such studies need to be reported under § 314.80 only if they satisfy the criteria of a 15-day Alert report and there is a reasonable possibility that the event is causally related to the drug exposure.

3. Elimination of Periodic Reporting of Adverse Drug Experience Information Obtained From Postmarketing Studies

The agency is revising § 314.80(c)(2)(iii) to eliminate periodic reporting requirements for adverse drug experience information obtained from postmarketing epidemiological/surveillance studies (except for information regarding 15-day Alert reports). Routine information derived from such studies has proven to be of little help to the agency's postmarketing surveillance program. This revision does not affect the requirement that applicants submit postmarketing studies pertinent to safety, including epidemiological studies, in their annual reports under 21 CFR 314.81(b)(2)(vi).

4. Conforming Amendment

In the **Federal Register** of July 3, 1986 (51 FR 24476), FDA adopted a rule requiring 15-day Alert reporting for marketed prescription drugs not the subject of approved applications (21 CFR 310.305). Those rules were patterned after the adverse drug experience reporting provisions in § 314.80. To ensure consistency between these two sets of rules, the agency is revising the reporting requirements in § 310.305 to adopt changes identical to those made in this document for adverse drug reaction reporting on approved new drugs.

III. Comments on the Proposed Rule and FDA Responses

1. Comments on the Proposed Revision of the Definition of "serious" Adverse Experiences

Thirteen comments concurred with or supported this proposed revision. One comment objected, contending that the use of a prescription drug, even in the absence of other criteria of serious, should be considered serious and should be reported to FDA as a 15-day Alert report. The comment argued further that submission of such reports as 15-day Alert reports is necessary in order for FDA to assess the frequency of a reaction as rapidly as possible. The comment discussed adverse reaction reporting experiences with two drugs, reports of kidney damage (flank pain) with suprofen (Suprol) and reports of anaphylaxis with zomepirac (Zomax), in support of its view that without the prescription drug therapy criterion many serious drug reactions will not be reported to the agency in a timely manner.

Contrary to the comment's assertions, analysis of suprofen and zomepirac reporting reveals that FDA's reporting experiences for these two drugs support the current revision. In the case of suprofen, the comment stated that 75 percent of 300 cases of reported flank pain lacked one of the other criteria and probably received a prescription drug. The comment argued that if the prescription drug criterion were dropped, therefore, these cases of flank pain would not have been promptly reported. However, an FDA review of suprofen reports reveals that of 328 case reports of flank pain for the drug about 25 percent came directly to FDA and not through the manufacturer. The critical

reports of flank pain were the first 16 reports received by the agency prior to April 29, 1986, the date on which the first "Dear Doctor" letter concerning flank pain was issued. Of these 16 reports, 7 involved hospitalization while 3 others were direct reports that would have been received by FDA regardless of the regulation. These 10 reports, 7 of hospitalization and 3 direct reports, were received in the first 2 weeks of March 1986 and triggered an FDA request to the manufacturer for expedited submission of all future flank pain reports and for the issuance of the "Dear Doctor" letter that was the main stimulus for subsequent reporting. Only 1 of the 16 initial suprofen reports had treatment with a prescription drug as the sole basis for submission. No outcome was identified in the other 5 reports, which were expedited to FDA by the manufacturer for unknown reasons, apparently prior to FDA's request. Thus, the cited example of suprofen actually supports the proposed change because it shows that the prescription drug therapy criterion did not add significantly to early detection of and FDA's response to the signal of a flank pain reaction.

The comment also contended that the zomepirac reporting experience illustrates the need to receive reports involving prescription drug therapy as 15-day Alert reports. The comment noted that all persons experiencing severe allergic reaction to zomepirac no doubt received prescription medication but that many such reactions may not have qualified as serious under the other criteria. However, of the 1,105 reports of anaphylactoid reaction received by FDA for zomepirac, 341 involved death or hospitalization. Thus, a clear signal of zomepirac's anaphylactic side effect was apparent without the prescription drug therapy criterion.

It must be appreciated that the reason for the distinction made between 15-day Alert reports and other reports is to allow FDA to devote specific resources to early, intense examination of adverse drug reaction reports most likely to contain important new safety information about a drug. Large numbers of reports are not required to trigger this type of intense examination. The system is designed to provide "early warning" signals and the agency follows up even on very small numbers of reports. While periodic reporting of less serious events may be important in a confirmatory sense and improve the agency's understanding of the spectrum of effects which may be associated with the drug, requiring 15-day reporting of events that lead only to prescription drug therapy is not necessary and may actually impede the effective operation of the agency's postmarketing study system. If the definition of serious is too broad, therefore, thus capturing many nonserious events in an attempt to avoid missing any potentially serious event, early triaging is impossible and effective patient protection is diminished. The proposed change is intended to facilitate such triaging and thereby enhance patient safety. Data presented in the preamble to the proposed rule (51 FR 47028) as well as a review of the suprofen and zomepirac reporting experiences support the revision. Therefore, consistent with the proposal, the final rule amends the definition of serious to remove the prescription drug therapy criteria.

2. Other Comments on the Definition of Serious

The current definition of serious adverse drug experience includes overdose as an outcome that is always considered serious. The December 30, 1986, proposal (51 FR 47028) did not propose any revision to this aspect of the definition of serious. Nevertheless, a number of comments were received concerning overdose. One comment noted that overdoses were deemed always serious by the regulation but that a prior letter issued by the agency on September 12, 1985, indicated that: (i) An overdose without resultant signs or symptoms need not be reported, (ii) an overdose resulting in labeled consequences should be reported in the periodic report, and (iii) an overdose resulting in consequences not in the label requires a 15-day Alert report. Five comments suggested the need to clarify the requirement that it is the consequences of an overdose, not the act of overdose itself (without adverse effects), that must be reported. Another comment suggested deleting the requirement for a 15-day Alert report for an overdose. Another comment suggested that there is no need to specifically identify overdose as serious since it should be the medical consequences of the overdose (e.g., hospitalization or death) that constitute the reportable event.

The agency agrees that it is the medical consequences of overdose that trigger the 15-day reporting requirement, but believes that the regulation on the reporting of overdoses is clear in light of the 1985 agency guidance and sees no need for further revisions, at this time, to the definition of serious. When an overdose results in unlabeled consequences, it should be reported as a 15-day Alert report so that FDA can give it immediate attention. FDA believes that overdose should continue to be specifically identified as a serious adverse reaction in the regulation to give the event appropriate visibility and priority. The agency's position on the reporting of overdoses described in the September 12, 1985, letter referred to in the comments continues to reflect FDA's position on this requirement.

Several comments were made about the "life-threatening" criterion in the definition of serious, noting that the term is "judgmental, arbitrary, subjective, vague, confusing, unnecessary" and will result in the submission of too many 15-day Alert reports. One comment suggested that Form FDA–1639 be modified to include the term "life-threatening." Another comment suggested that one of the other criterion for serious would almost always be met in a life-threatening situation.

The term "life-threatening" cannot be defined with great precision but must, of necessity, involve some judgment. In the adverse drug reaction reporting context, a "life-threatening" adverse reaction means that the patient was, in the view of the initial reporter, at *immediate* risk of death from the reaction (emphasis added). The absence of a checkoff box for life-threatening on Form FDA–1639 should no more inhibit reporting of events qualifying for reporting under the life-threatening criteria than of events determined to be serious because they represent reports of cancer, overdose, or congenital anomaly. Applicants should indicate in item 7 of Form FDA–1639 the criterion for the classification of serious other than those included as checkoff boxes.

Four comments asked for clarification of the terms "hospitalization" and "disability." The agency advises that "hospitalization" includes prolongation of existing hospitalization. "Disability" means permanent and substantial disruption of one's ability to carry out normal life functions.

FDA plans to issue "Guideline for Reporting Adverse Drug Reactions (ADR's)" to provide further clarification of the agency's position on the issues addressed by these and other comments.

3. Reporting Obligations For Adverse Drug Reactions From Postmarketing Studies

One comment objected to imposing on the applicant the requirement of making an assessment of possible causality for reports derived from postmarketing studies. This comment contends that whenever a drug precedes an adverse experience, causality is possible and, as a result, the proposed revision will not

reduce the number of uninformative reports submitted to FDA.

FDA disagrees with this comment. Requiring a causality assessment of serious unexpected events found during postmarketing investigations clearly will reduce some uninformative reporting. Only experiences meeting the 15-day Alert criteria and for which there is a reasonable possibility that the drug caused the adverse experience must be reported for events found during postmarketing studies. Although it may be possible, as the comment contends, to consider any adverse event following drug administration as possibly causally related to the drug, not all such possibilities are "reasonable;" those events which are not reasonably causally related to drug exposure may be excluded under this criterion. Currently, if the use of a marketed drug in a study setting results in a serious event, the event must be reported even if it clearly was not caused by the drug. For example, if an antibiotic is being tested for its ability to control postoperative infections and the patient dies from bleeding at the wound site due to mechanical factors, the bleeding death is reportable under current requirements. Under the revised regulation, such an event would not be reportable, because the event is not reasonably attributable to the drug.

One comment stated that causality judgments should be made by the investigator rather than the applicant.

FDA would not object to an applicant's receiving assistance in making a causality assessment from the investigators who are conducting the investigation. However, the responsibility for reporting such adverse drug reactions ultimately remains with the applicant.

One comment recommended that, to avoid duplication, reports of adverse drug reactions from postmarketing studies should be submitted only to the NDA files, and not to the IND files.

Reporting to IND and NDA files serves somewhat different purposes and differing types of reviews and evaluations are performed on the files by the agency. For example, IND safety files are primarily used to determine if a trial should continue and to assemble a specific safety profile for the population and indication being tested. NDA files, on the other hand, are used to identify new information that could affect product labeling for all existing approved uses. IND data almost always require comparison with a control group, while postapproval data require other types of comparison. Thus, some dual reporting is necessary because of the differing approaches and purposes involved. However, the revisions made in this final rule have sought to minimize such duplication.

Two comments objected to cross-referencing NDA reporting requirements with the IND regulations. One comment noted that the preamble to the proposed revision exempts an applicant from the obligation to report an adverse drug experience obtained from a postmarketing clinical study of the drug to its approved NDA file unless the experience represents both a reportable finding within the meaning of § 312.1(a)(6) (now § 312.32, published in the **Federal Register** of March 19, 1987; 52 FR 8837) and a finding that must be reported under § 314.80. The comment stated that, as described in the preamble, the exemption would only apply to IND studies and asks if this was the intent of the proposed revision. The comment recommends that "unless the experience is also reportable under § 312.1 * * *" be revised to state "unless the applicant concludes that there is a reasonable possibility that the drug caused the adverse experience."

The agency agrees with this comment that there is no need to cross reference portions of the IND rule. Consequently, the final rule replaces references to the IND regulations with the phrase "applicant concludes that there is a reasonable possibility that the drug caused the adverse experience." Further, it was not the agency's intention to limit the proposed revisions in reporting requirements to studies conducted under an IND. The agency stated clearly in the proposed rule that the revisions also apply to studies not conducted under an IND.

Two comments objected to the application of causality assessments to reports from postmarketing trials for purposes of reporting to the NDA file. One comment contended that requiring an assessment of the possibility that an adverse event is causally related to the drug exposure in a study setting before requiring the reporting of the event will weaken protection of the American consumer. This comment contended that, in postmarketing studies, events are not monitored as intensely as they are in premarketing studies so that reports from postmarketing studies do not differ substantially from spontaneous reports. One comment stated that the agency places too much reliance on the distinction between use of a drug in clinical practice and its use in a study. The comments concluded that, as a consequence, the same reporting criteria should apply to both settings.

The agency thinks that these comments fail to recognize several important differences between the study setting, including epidemiological and surveillance studies, and the practice setting from which spontaneous reports arise. In a study setting reports of adverse events—even minor ones— are specifically sought routinely, often with no attempt to include only those events that are plausibly drug related and often with such encouragements to reporting such as questionnaires. Moreover, in formal clinical studies, postmarketing or premarketing, it is usual for all adverse events to be reported. It is common, even in placebo groups, to have adverse events of some kind reported in 25 to 50 percent of the patients. Spontaneous reports, on the other hand, occur at a much lower rate and generally involve an assessment by the reporter of the "drug-relatedness" of the adverse experience. Thus, there are significant differences between reports from postmarketing studies and spontaneous reports from a clinical practice setting.

Further, analysis of adverse event rates within a study is informative because the placebo group serves as a control, correcting for the increased intensity of event seeking and allowing the analyst to identify those events that are more common in the treated group. If, however, all such events are submitted to a spontaneous reporting system, they distort that system by giving the impression that the drug under investigation is associated with a higher frequency of common events than would be reported spontaneously, thus generating a spurious signal.

Similarly, intensive postmarketing surveillance, such as that accompanying monitored release programs, produce frequencies of reported events far higher than would be reported spontaneously. Again, such surveillance, analyzed separately, can provide useful information, but the high numbers of events, if added to the spontaneous reports, can distort the spontaneous system. This distortion results in an implication that the drug under study has a higher event rate than drugs not subject to surveillance. In fact, it may be only the likelihood that events will be reported, not the actual incidence of drug reactions, that is different. It is critical to the signal-generating function of spontaneous reporting systems that such distortions be avoided where possible.

One comment contended that the proposal would make reporting from postmarketing studies totally discretionary, that important reactions will, therefore, not be reported, and that, as a result, important information

allowing for development of rates of adverse reactions will be unavailable.

The revision does not make a manufacturer's reporting discretionary. If there is a reasonable possibility that the observed event was caused by the drug, it must be reported.

One comment urged that IND and NDA reporting criteria remain separate and that the NDA reporting criteria for study reports not be modified because the implications of reporting under the NDA and IND reporting regulations are different. That is, currently under § 314.80 reporting decisions are made without an assessment of causation and that consideration of labeling revisions are made as separate and distinct decisions depending on medical evaluation and possible epidemiologic evaluation by the sponsor and FDA. The comment continued that if a serious adverse drug event report for a marketed product also meets the proposed possible causality criterion, the sponsor would be under extreme pressure to consider making a labeling change. The comment analogized to the changes made in investigators' brochures after a "prompt report" is submitted under the IND regulations.

With respect to the concern expressed about a potential increase in pressure for labeling revisions in response to safety information submitted to the agency under the revised criteria for submission of 15-day Alert reports from postmarketing studies, the agency intends that requests for labeling revisions will continue to be made only after the same careful evaluation that is described by the comment.

One comment objected to FDA's proposal to eliminate the periodic reporting requirements for adverse drug experience information obtained from postmarketing epidemiological/surveillance studies. The comment stated that FDA must receive all adverse drug reaction reports, including those from postmarketing epidemiological/surveillance studies, so that the agency can evaluate the incidence of adverse reactions and respond appropriately to protect the American consumer.

Important information will not be lost by eliminating the requirement for periodic reporting from postmarketing epidemiological, surveillance studies. If such studies are conducted under an IND, the data will be submitted and analyzed under the IND requirements. Further, if an increased frequency of a serious, labeled reaction, or if a serious, unlabeled reaction occurs and has a reasonable possibility of being caused by the drug, it must still be reported under 21 CFR 314.80. Moreover, under § 314.81(b)(2)(vi), reports of postmarketing studies pertinent to safety, including epidemiological studies, are required to be submitted to the NDA file in the annual report.

One comment stated that a disclaimer of "admitted" causation included on a Form FDA–1639 submitted under the revised regulation would by definition be inaccurate.

The agency disagrees with this comment. The standard for submission of a 15-day Alert report of an adverse drug experience from a postmarketing study that satisfies the other criteria for 15-day submission, is that there is a reasonable possibility that the adverse event is causally related to drug exposure and not that the drug actually caused the adverse event. Further, identical disclaimer language is present in the IND reporting regulations at § 312.32(e) which also use the reasonable possibility standard. (See § 312.32(a) (21 CFR 312.32(a)) (defining "associated with the use of drug" to mean a reasonable possibility that the experience may have been caused by the drug.)

One comment stated that it was not clear whether the proposed revision applies to the determination whether there has been an increased frequency of adverse experiences.

However, the proposed and final regulation is clear that reports from postmarketing studies are to be submitted under § 314.80(c) only if, in addition to meeting the other criteria for submission as a 15-day Alert report, there is a reasonable possibility that the adverse event was causally related to the drug exposure. Therefore, with respect to 15-day Alert reports of increased frequency, adverse experiences from postmarketing studies should be included in the calculation of increased frequency if, in addition to meeting the criteria for submission as a 15-day Alert report under § 314.80(c)(1)(ii) (e.g., serious, labeled) there is a reasonable possibility that the adverse event is causally related to the drug exposure. To facilitate the agency's evaluation of such reports, § 314.80(e)(2) also requires reports derived from postmarketing studies to be clearly marked and distinguished from spontaneous reports.

4. Other Comments

Two comments objected to the use of the title "adverse reaction report" instead of "drug experience report" for Form FDA–1639. The major concern expressed in the comments is that this title change will expose manufacturers to allegations of prior knowledge about reactions and will create inappropriate pressure for labeling changes. FDA has emphasized that reports are preliminary and do not necessarily constitute an assertion or acceptance of causality. Further, the agency believes that the terminology "adverse reaction report" is more meaningful to medical practitioners than is the term "drug experience report." However, under the provisions of § 314.80(f)(3) that allow alternate report formats, FDA permits manufacturers to substitute the title "drug experience report" on the report form.

Several comments proposed that deaths which are coincidental to drug exposure not be reportable. FDA believes that, for spontaneous reports of deaths, it can be presumed that the reporting physician had some basis for suspicion of a drug relationship and such reports must be submitted. However, reports of death occuring in clinical studies are required to be submitted to FDA only when the deaths are possibly causally related to the drug exposure. This revision will eliminate most of the reporting of coincidental or noncausal events. It should be noted that FDA urges manufacturers to determine the exact circumstances and cause of death.

One comment requested clarification of the reporting requirements for a lack of a therapeutic effect. If the result of the lack of therapeutic effect is an event that is both serious and unlabeled, then a 15-day Alert report must be submitted.

IV. Economic Impact

In accordance with Executive Order 12291, FDA has previously considered the potential economic effects of this final rule. As announced in the proposal, the agency has determined that the rule is not a major rule as determined by the Order. Similarly, under the Regulatory Flexibility Act, the agency previously considered the potential effects that this rule would have on small entities, including small businesses. In accordance with section 605(b) of the Regulatory Flexibility Act, the agency has determined that no significant impact on a substantial number of small entities would derive from this action. FDA has not received any new information or comments that would alter its previous determinations.

V. Environmental Impact

The agency has determined under 21 CFR 25.24(a)(8) that this action is of a type that does not individually or cumulatively have a significant effect on the human environment. Therefore, neither an environmental assessment

VOL 52 ISS 197 OCT 13 1987 UMI

nor an environmental impact statement is required.

List of Subjects

21 CFR Part 310

Administrative practice and procedure, Drugs, Reporting and recordkeeping requirements.

21 CFR Part 314

Administrative practice and procedure, Drugs.

Therefore, under the Federal Food, Drug, and Cosmetic Act and under authority delegated to the Commissioner of Food and Drugs, Parts 310 and 314 are amended as follows:

PART 310—NEW DRUGS

1. The authority citation for 21 CFR Part 310 is revised to read as follows:

Authority: Secs. 501, 502, 503, 505, 701, 704, 705, 52 Stat. 1049–1053 as amended, 52 Stat. 1055–1056 as amended, 67 Stat. 477 as amended, 52 Stat. 1057–1058 (21 U.S.C. 351, 352, 353, 355, 371, 374, 375); 5 U.S.C. 553; 21 CFR 5.10 and 5.11.

2. Section 310.305 is amended by revising paragraph (b)(4) and redesignating existing paragraph (c)(1) as paragraph (c)(1)(i) and adding new paragraph (c)(1)(ii) to read as follows:

§ 310.305 Records and reports concerning adverse drug experiences on marketed prescription drugs for human use without approved new drug applications.

* * * * *

(b) * * *

(4) "Serious" means an adverse drug experience that is fatal or life-threatening, is permanently disabling, requires inpatient hospitalization, or is a congenital anomaly, cancer, or overdose.

* * * * *

(c) *Reporting requirements—15-day "Alert reports."*

(1) * * *

(ii) A person identified in paragraph (c)(1)(i) of this section is not required to submit a 15-day "Alert report" for an adverse drug experience obtained from a postmarketing study (whether or not conducted under an investigational new drug application) unless the applicant concludes that there is a reasonable possibility that the drug caused the adverse experience.

* * * * *

PART 314—APPLICATIONS FOR FDA APPROVAL TO MARKET A NEW DRUG OR AN ANTIBIOTIC DRUG

3. The authority citation for 21 CFR Part 314 continues to read as follows:

Authority: Secs. 501, 502, 503, 505, 506, 507, 701, 52 Stat. 1049–1053 as amended, 1055–1056 as amended, 55 Stat. 851, 59 Stat. 463 as amended (21 U.S.C. 351, 352, 353, 355, 356, 357, 371); 21 CFR 5.10, 5.11.

4. Section 314.80 is amended in paragraph (a) by revising the definition of "Serious," in the introductory text of paragraph (c) by revising the address to which reports are submitted to read "Central Document Room, Park Bldg., Rm. 214, 12420 Parklawn Dr., Rockville, MD 20852," in paragraphs (c)(1), (c)(2)(ii)(*b*), and (f)(1) by revising "(Drug Experience Report)" to read "(Adverse Reaction Report)," in paragraphs (d)(2), (f) (3) and (4) by revising "Drug and Biological Product Experience" to read "Epidemiology and Surveillance," and by revising paragraphs (c)(2)(iii) and (e) to read as follows:

§ 314.80 Postmarketing reporting of adverse drug experiences.

(a) * * *

"Serious" means an adverse drug experience that is fatal or life-threatening, is permanently disabling, requires inpatient hospitalization, or is a congenital anomaly, cancer, or overdose.

* * * * *

(c) * * *

(2) * * *

(iii) Periodic reporting, except for information regarding 15-day Alert reports, does not apply to adverse drug experience information obtained from postmarketing studies (whether or not conducted under an investigational new drug application), from reports in the scientific literature, and from foreign marketing experience.

* * * * *

(e) *Postmarketing studies.* (1) An applicant is not required to submit a 15-day Alert report under paragraph (c) of this section for an adverse drug experience obtained from a postmarketing study (whether or not conducted under an investigational new drug application) unless the applicant concludes that there is a reasonable possibility that the drug caused the adverse experience.

(2) The applicant shall separate and clearly mark reports of adverse drug experiences that occur during a postmarketing study as being distinct from those experiences that are being reported spontaneously to the applicant.

* * * * *

Dated: September 12, 1987.

Frank E. Young,

Commissioner of Food and Drugs.

[FR Doc. 87–23542 Filed 10–9–87; 8:45 am]

BILLING CODE 4160–01–M

21 CFR Part 520

Oral Dosage Form New Animal Drugs Not Subject to Certification; Pyrantel Pamoate Chewable Tablets

AGENCY: Food and Drug Administration.

ACTION: Final rule.

SUMMARY: The Food and Drug Administration (FDA) is amending the animal drug regulations to reflect approval of a new animal drug application (NADA) filed by Purina Mills, Inc., providing for the use of pyrantel pamoate chewable tablets as an anthelmintic in dogs.

EFFECTIVE DATE: October 13, 1987.

FOR FURTHER INFORMATION CONTACT: Marcia K. Larkins, Center for Veterinary Medicine (HFV–112), Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857, 301–443–3430.

SUPPLEMENTARY INFORMATION: Purina Mills, Inc., 835 South Eighth St., St. Louis, MO 63102, is sponsor of NADA 139–191 providing for use of pyrantel pamoate chewable tablets as an anthelmintic in dogs. The NADA provides for use of the product for removal of ascarids (*Toxocara canis; Toxascaris leonina*) and hookworms (*Ancylostoma caninum; Uncinaria stenocephala*) in dogs and puppies; and to prevent reinfection of *Toxocara canis* in puppies, adult dogs, and in lactating bitches after whelping. The NADA is approved and new 21 CFR 520.2041 is added to reflect the approval.

In accordance with the freedom of information provisions of Part 20 (21 CFR Part 20) and § 514.11(e)(2)(ii) (21 CFR 514.11(e)(2)(ii)), a summary of safety and effectiveness data and information submitted to support approval of this application may be seen in the Dockets Management Branch (HFA–305), Food and Drug Administration, Room 4–62, 5600 Fishers Lane, Rockville, MD 20857, from 9 a.m. to 4 p.m., Monday through Friday.

The agency has determined under 21 CFR 25.24(d)(1)(iii) that this action is of a type that does not individually or cumulatively have a significant effect on the human environment. Therefore, neither an environmental assessment nor an environmental impact statement is required.

List of Subjects in 21 CFR Part 520

Animal drugs.

Therefore, under the Federal Food, Drug, and Cosmetic Act and under authority delegated to the Commissioner of Food and Drugs and redelegated to

the Center for Veterinary Medicine, Part 520 is amended as follows:

PART 520—ORAL DOSAGE FORM NEW ANIMAL DRUGS NOT SUBJECT TO CERTIFICATION

1. The authority citation for 21 CFR Part 520 continues to read as follows:

Authority: Sec. 512(i), 82 Stat. 347 (21 U.S.C. 360b(i)); 21 CFR 5.10 and 5.83.

2. By adding new § 520.2041 to read as follows:

§ 520.2041 Pyrantel pamoate chewable tablets.

(a) *Specifications.* Each tablet contains pyrantel pamoate equivalent to 22.7 or 113.5 milligrams pyrantel base.

(b) *Sponsor.* See No. 017800 in § 510.600(c) of this chapter.

(c) *Conditions of use*—(1) *Amount.* Provides at least 2.27 milligrams pyrantel base per pound body weight for dogs weighing more than 5 pounds, and at least 4.54 milligrams of pyrantel base per pound body weight for dogs weighing 5 pounds or less.

(2) *Indications for use.* (i) In dogs and puppies. For removal of ascarids (*Toxocara canis; Toxascaris leonina*) and hookworms (*Ancylostoma caninum; Uncinaria stenocephala*).

(ii) In puppies and adult dogs and in lactating bitches after whelping. To prevent reinfection of *Toxocara canis.*

(3) *Limitations.* Administer to puppies at 2, 3, 4, 6, 8, and 10 weeks of age. Administer to lactating bitches 2 to 3 weeks after whelping. Retreatment of adult dogs may be necessary at monthly intervals as determined by laboratory fecal examinations. Consult your veterinarian for assistance in the diagnosis, treatment, and control of parasitism.

Dated: September 29, 1987.

Gerald B. Guest,

Director, Center for Veterinary Medicine.

BILLING CODE 4160-01-M

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

Office of the Assistant Secretary for Housing-Federal Housing Commissioner

24 CFR Parts 203 and 204

[Docket No. R-87-965; FR-2147]

Temporary Mortgage Assistance Payments and Assignment of Mortgages to HUD

AGENCY: Office of the Assistant Secretary for Housing-Federal Housing Commissioner, HUD.

ACTION: Technical amendment.

SUMMARY: A final rule was published on March 5, 1987 (52 FR 6908), to establish a new program of foreclosure avoidance for FHA-insured homebuyers. It stated that various administrative tasks would have to be completed before it could be made effective. This document is being published before an effective date for that rule is announced, to correct erroneous cross-references and to delete material that would have made mortgagors with mortgages coinsured by the lender ineligible for both the Temporary Mortgage Assistance Payments program and the program of assignment with forbearance.

EFFECTIVE DATE: The Department must complete revisions to HUD Handbook 4330.2 and must finish the process of selecting a contractor to administer the nationwide processing of payments under the Temporary Mortgage Assistance Payments program before the rule published on March 5, 1987, as amended by this rule can be made effective. The effective date will be announced by publication in the **Federal Register**.

FOR FURTHER INFORMATION CONTACT: Curtis Myron, Single Family Servicing Division, Office of Single Family Housing, Department of Housing and Urban Development, 451 Seventh Street SW., Washington, DC 20410, telephone (202) 755-6664. (This is not a toll-free number.)

SUPPLEMENTARY INFORMATION: The changes to §§ 203.641 and 203.643 are needed to correct references to the provision (paragraph (b) of § 203.641) that limits the required payment, during the period of reduced or suspended payments, to a maximum of 35 percent of the mortgagor's income. The amendment to § 204.400 (the coinsurance provision that cross-references applicable provisions of Part 203) is necessary in order properly to reflect the Department's obligation under the National Housing Act to consider coinsured mortgagors for mortgage foreclosure relief. Section 230(b) of the National Housing Act (12 U.S.C. 1715u), provides that upon notice of a default "of "*any* mortgage covering a one-, two-, three or four-family residence insured under [the National Housing] Act," HUD is to consider the mortgagor for foreclosure relief (whether or not the mortgage is coinsured).

Under the rule now in effect, § 204.400 provides that the servicing responsibilities of mortgagees stated in Subpart C of Part 203 apply to mortgagees with respect to coinsured mortgages except for certain sections requiring a mortgagee to consider a defaulted mortgagor for eligibility for the assignment program. Therefore, the rule now in effect provides that mortgages insured by HUD under section 203(b) of the National Housing Act, 12 U.S.C. 1709, pursuant to section 244 of the Act, 12 U.S.C. 1715z-9, are ineligible during the coinsurance period (the first five years of the mortgage) for the only HUD program of foreclosure avoidance now available—the assignment program. (HUD Handbook 4330.2 also states this conclusion.) The final rule published on March 5, 1987, but not yet made effective, would have changed § 204.400 to make the new program of foreclosure relief, the Temporary Mortgage Assistance Payments (TMAP) program, also inapplicable to coinsured mortgages during the period of coinsurance.

We have determined that this automatic disqualification of coinsured mortgagors for any form of HUD foreclosure avoidance assistance is not authorized under section 230 of the National Housing Act. Under that Act, assistance in the form of the assignment program, at least, must be made available to all eligible mortgagors of insured one- to four-family residences insured under the Act. Therefore, the language of § 204.400 now precluding coinsured mortgagors from consideration for the assignment program is ineffective and in conflict with the statute.

The Department also has determined to make TMAP available to eligible coinsured mortgagors. To assure that eligible coinsured mortgagors will be considered for both programs when the rule creating TMAP becomes effective, this technical amendment is being made to eliminate the exclusion in advance of the announcement of an effective date for the rule published on March 5, 1987.

Additional changes to Part 204 may be necessary (§§ 204.280 through 204.381) to clarify how the process for considering a mortgagor for TMAP and assignment applies in the case of a coinsured mortgage—where the coinsuring mortgagee is responsible for adsorbing a percentage of the loss in event of payment of an insurance claim. In the meantime, HUD Field Offices and FHA-approved mortgagees are being instructed to follow the procedures found in Subpart C of Part 203 (§ 203.606 and §§ 203.640 through 203.665) for handling defaulted coinsured mortgages, and to consult HUD Headquarters if a question should arise.

VOL 52 ISS 197 OCT 13 1987 UMI

Findings and Certifications

Final Rule

It is the policy of this Department to publish for comment, rules relating to public property, loans, grants benefits, or contracts, despite the exemption for these rules contained in 5 U.S.C. 553 from the requirement to solicit public comment. However under 24 CFR Part 10, in a particular case, the Department may omit solicitation of public comment before publishing a final rule if such comment is not required by statute and solicitation and consideration of public comment are "impracticable, unnecessary or contrary to the public interest."

In this case, one of the amendments is in the nature of correction of a typographical error, on which public comment is clearly unnecessary. The other amendment is needed in order to conform the regulation to the requirements of section 230 of the National Housing Act, 12 U.S.C. 1715u. Without the amendment, the rule would be inconsistent with the statute. Since the issue of whether or not foreclosure relief should apply to coinsured mortgages (the subject of this amendment) is not legally open to question, solicitation and consideration of public comment on that change is unnecessary. The type of comments likely to be submitted on this amendment would be suggestions on the details of processing mortgage insurance claims in the case of defaulted coinsured mortgages.The Department plans to handle the details of claims processing in a subsequent rulemaking, in which public comment will be solicited.

Environmental Review

A Finding of No Significant Impact with respect to the environment has been made in accordance with HUD regulations at 24 CFR Part 50 that implement section 102(2)(C) of the National Environmental Policy Act of 1969, 42 U.S.C. 4332. The Finding of No Significant Impact is available for public inspection and copying during regular business hours in the Office of the Rules Docket Clerk, Room 10276, 451 Seventh Street SW., Washington, DC 20410.

Regulatory Impact

This rule does not constitute a "major rule" as that term is defined in section 1(b) of the Executive Order on Federal Regulation issued by the President on February 17, 1981. Analysis of the rule indicates that it does not: (1) Have an annual effect on the economy of $100 million or more; (2) cause a major increase in costs or prices for consumers, individual industries, Federal, State or local government agencies or geographic regions; or (3) have a significant adverse effect on competiton, employment, investment, productivity, innovation or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

Impact on Small Entities

Under 5 U.S.C. 605(b) (the Regulatory Flexibility Act), the undersigned hereby certifies that this rule does not have a significant economic impact on a substantial number of small entities, because it consists of technical refinements to an already published rule and merely requires mortgagees of coinsured mortgages to consider them for mortgage foreclosure relief as they would consider fully insured mortgages.

Regulatory Agenda

The rule that this serves as a correction for was listed as sequence number 958 under the Office of Housing in the Department's Seminannual Regulatory Agenda published on April 27, 1987 (52 FR 14362, 14387), under Executive Order 12291 and the Regulatory Flexibility Act.

Paperwork Reduction Act

This rule contains no information collection requirements subject to approval by the Office of Management and Budget under the provisions of the Paperwork Reduction Act of 1980 (42 U.S.C. 3501 through 3520).

List of Subjects

24 CFR Part 203

Home improvement, Loan programs: Housing and community development, Mortgage insurance.

24 CFR Part 204

Mortgage insurance.

Accordingly, 24 CFR Parts 203 and 204, as amended in the final rule on Temporary Mortgage Assistance Payments published in the **Federal Register** on March 5, 1987, (52 FR 6908), is amended as follows:

PART 203—MUTUAL MORTGAGE INSURANCE AND REHABILITATION LOANS

1. The authority citation for Part 203 continues to read as follows:

Authority: Secs. 203 and 211, National Housing Act (12 U.S.C. 1709, 1715b); sec. 7(d), Department of Housing and Urban Development Act (42 U.S.C. 3535(d)). In addition, subpart C also issued under sec. 230, National Housing Act (12 U.S.C. 1715u).

§ 203.641 [Amended]

2. Section 203.641(c) is amended by removing the words "paragraph (a) of this section" and substituting in their place the words "paragraph (b) of this section".

§ 203.643 [Amended]

3. Section 203.643(c)(3) is amended by removing the reference to "§ 203.641(a)" and substituting in its place the reference "§ 203.641(b)".

PART 204—COINSURANCE

4. The authority citation for Part 204 continues to read as follows:

Authority: Secs. 244 and 211, National Housing Act (12 U.S.C. 1715z–9 and 1715b); sec. 7(d), Department of Housing and Urban Development Act (42 U.S.C. 3535(d)).

§ 204.400 [Amended]

5. Section 204.400 is amended by removing the words "and §§ 203.640 through 203.665" and revising the words "do not apply" to read "does not apply".

Dated: October 5, 1987.

Thomas T. Demery,

Assistant Secretary for Housing—Federal Housing Commissioner.

BILLING CODE 4210–27–M

DEPARTMENT OF THE TREASURY

Internal Revenue Service

26 CFR Part 601

Internal Revenue Practice; Statement of Procedural Rules

AGENCY: Internal Revenue Service, Treasury.

ACTION: Final rule.

SUMMARY: This document contains final regulations, amending the Statement of Procedural Rules (SPR). The SPR sets forth the procedural rules of the Internal Revenue Service for all taxes administered by the Service as well as certain rules that apply to the Bureau of Alcohol, Tobacco and Firearms. These amendments update the SPR and make

certain changes in the Service's procedure, including changes necessitated by recent legislation, to conform to changes in corresponding Department of the Treasury regulations, and to update organizational titles and addresses.

DATES: *Effective:* November 12, 1987.

FOR FURTHER INFORMATION CONTACT: Margo Stevens of the Office of Chief Counsel, Internal Revenue Service, 1111 Constitution Avenue, NW., Washington, DC 20224, Attn: CC:D. Telephone 202–566–3074 (not a toll-free number).

SUPPLEMENTARY INFORMATION:

Background

This document contains final regulations to amend the SPR (26 CFR 601.702), issued under the authority contained in 5 U.S.C. 301 and 552. The principal amendments update the SPR to reflect changes in the fee and fee waiver provisions of the Freedom of Information Act, as enacted by the Freedom of Information Reform Act of 1986 (Pub. L. 99–570). Some amendments update the SPR to reflect changes in nomenclature and to eliminate references to a particular gender. The Disclosure Operations Division is now the Office of Disclosure. The Civil Service Commission is now the Special Counsel. The Director, Foreign Operations District, is now the Assistant Commissioner (International). The SPR is also updated to reflect changes of addresses to be contacted for Freedom of Information requests. The SPR also incorporates provisions for processing requests involving records of submitters of business information, in conformance with corresponding Department of the Treasury regulations, 31 CFR 1.6, and to satisfy Executive Order 12600, 52 FR 23781 (June 25, 1987). The other amendments are described in the order of the sections of the SPR being amended.

The Internal Revenue Service published proposed amendments to the Freedom of Information Act subpart of its Statement of Procedural Rules on July 27, 1987, 52 FR 28000. The Internal Revenue Service received comments from only one organization. Because the proposed amendments were drafted to conform to Treasury's Departmental final regulations, published on July 14, 1987 (52 FR 26302), the Internal Revenue Service is constrained from making any changes in two of the areas addressed by the commentator: The definition of "representative of the news media" and the referral policy for documents created by other agencies located in Internal Revenue Service files. The revisions proposed by the commentator would be inconsistent with, and therefore superceded by, Treasury Departmental regulations. With respect to the final area, fee waivers, the commentator recommends that the Internal Revenue Service simply reiterate the language of the statute regarding waiver of fees, rather than incorporate any of the Justice Department's guidance. Although the commentator stated that the inclusion of Justice's guidance makes it more difficult for requesters to qualify for fee waivers, we do not agree and such is not our intent. Particularly because the Freedom of Information Act holds individual officials responsible for "arbitrary and capricious" actions, it becomes incumbent upon the agency to establish measurable criteria for its officials to consider in the exercise of their discretion under the statute. The Internal Revenue Service believes that the criteria included in these regulations reaches a reasonable balance between the agency's interest in a "self-sustaining" Freedom of Information Act program (as intended by Congress) and the public's interest in optimal access to government records. Accordingly, no changes have been made to these sections.

An editorial amendment is made to paragraphs (a)(1), (b)(1), and (c)(1) to change "paragraph (b) of § 601.701" to "paragraph (b)(1) of § 601.701."

An amendment is made to paragraphs (a)(1) and (c)(3)(v) to change "Internal Revenue Code of 1954" to "Internal Revenue Code of 1986."

Paragraph (b)(2), relating to deletion of identifying details, is amended to substitute section 6103 of the Internal Revenue Code as a statutory provision for disclosure in lieu of section 7213.

Paragraph (c)(2), relating to requests for records not in control of the Internal Revenue Service, is amended to conform to corresponding Department of the Treasury regulations.

Paragraph (c)(4) is amended to conform to IRC 6103(e)(1)(D) of the Internal Revenue Code: to enable the president or chief executive officer of a corporation to gain access to records without supplying additional proof of authority; to enable other officers or employees of a corporation to gain access to records with an appropriate certification of authority; to enable other persons to gain access to records with a board of directors' resolution of authority.

Paragraph (c)(11) is amended to eliminate the reference to 5 U.S.C. 552(a)(4)(D), relating to expedited judicial proceedings under the Freedom of Information Act, which was eliminated by the Federal Courts Civil Priorities Act (Pub. L. 98–620) in 1984.

Paragraph (c)(12) is redesignated (c)(13); and new paragraph (c)(12) is inserted to conform to corresponding Department of the Treasury regulations.

Paragraphs (d) (1), (3), and (4) are amended to reflect the requirement for a written request prior to public inspection of tax returns, return information and applications for tax exempt status, and to update certain cross references.

Paragraph (d)(2) is amended to clarify the records relating to seizure and sale of real estate that are open to public inspection.

Paragraph (d)(5) is redesignated (d)(8) and is amended to conform to IRC 6103(k)(1), which authorizes full disclosure of accepted offers in compromise, notwithstanding the confidentiality requirements of 18 U.S.C. 1905, relating to trade secrets, processes, operations, style of work, etc.

Paragraph (d)(8) is redesignated (d)(5) and to update certain cross references.

Paragraph (f) is amended to reflect changes necessitated by the Freedom of Information Reform Act (Pub. L. 99–570). Other changes and additions necessitated by the Freedom of Information Reform Act may be found in paragraphs (c)(3) (viii) and (ix); (c)(5)(i), (c)(6), and (c)(7)(ii).

Paragraph (g) is amended to reflect changes in nomenclature and addresses and to clarify that Regional and District Counsel records are under the jurisdiction of the Regional Commissioner and District Director, respectively.

New paragraph (h) is added to conform to corresponding Department of the Treasury regulations concerning the processing of requests of submitters of business information, 31 CFR 1.6, and to satisfy Executive Order 12600.

Special Analyses

The Commissioner of Internal Revenue has determined that this rule is not a major rule as defined in Executive Order 12291 and that a Regulatory Impact Analysis is therefore not required. Although procedural rules do not normally require notices of proposed rulemaking pursuant to 5 U.S.C. 553, the Freedom of Information Reform Act required agencies to promulgate final regulations after publication of proposed regulations pursuant to notice and public comment. Proposed regulations were published on July 27, 1987, at 52 FR 28000, for any comments received on or before August 7, 1987.

Drafting Information

The principal author of these final amendments to the Statement of

VOL 52 ISS 197 OCT 13 1987 UMI

Procedural Rules is Margo Stevens of the Disclosure Litigation Division of the Office of Chief Counsel, Internal Revenue Service. However, personnel from other offices of the Internal Revenue Service participated in developing these amendments, both on matters of substance and style.

List of Subjects in 26 CFR Part 601

Administrative practice and procedure, Aged, Alcohol and alcoholic beverages, Arms and munitions, Cigars and cigarettes, Claims, Freedom of Information, Taxes.

Adoption of Amendments to Statement of Procedural Rules

Accordingly, 26 CFR Part 601 is amended as follows:

PART 601—[AMENDED]

Paragraph 1. The authority for Part 601 continues to read as follows:

Authority: 5 U.S.C. 301 and 552.

§ 601.702 [Amended]

Par. 2. Section 601.702 (a)(1) is amended as follows:

1. In the first sentence, the language "paragraph (b) of § 601.701" is removed and the language "paragraph (b)(1) of § 601.701" is added in its place.

2. In the flush material immediately following (v), the language "Internal Revenue Code of 1954" is removed and the language "Internal Revenue Code of 1986" is added in its place.

Par. 3. Section 601.702(b)(1) is amended by removing from the first sentence the language "paragraph (b) of § 601.701" and adding the language "paragraph (b)(1) of § 601.701" in its place.

Par. 4. Section 601.702(b)(2) is amended by removing from the last sentence the language "7213, dealing with disclosure of information obtained from members of the public." and adding the language "6103 of the Internal Revenue Code." in its place.

Par. 5. Section 601.702(b)(3) is amended as follows:

1. Paragraph (ii) is revised to read as set forth below.

2. In paragraph (iii), the language "paragraph (f)(4)" is removed and the language "paragraph (f)(5)(iii)" is added in its place.

3. The first sentence of paragraph (iv) is revised to read as set forth below.

(3) *Public reading rooms*—(i) *In general.* * * *

(ii) *Addresses of public reading rooms.* The addresses of the reading rooms are as follows:

National Office

Mailing address: Freedom of Information Reading Room, Internal Revenue Service, 1111 Constitution Avenue, NW., Washington, DC 20224.

Location: Same as mailing address.

North Atlantic Region

Mailing address: Freedom of Information Reading Room, Internal Revenue Service, 120 Church Street, 11th Floor, New York, NY 10007.

Location: Same as mailing address.

Mid-Atlantic Region

Mailing address: Freedom of Information Reading Room, Internal Revenue Service, 600 Arch Street, Philadelphia, PA 19105.

Location: Same as mailing address.

Southeast Region

Mailing address: Freedom of Information Reading Room, Internal Revenue Service, 275 Peachtree Street, NE., Room 342, Atlanta, GA 30043.

Location: Same as mailing address.

Midwest Region

Mailing address: Freedom of Information Reading Room, Internal Revenue Service, 230 Dearborn Street, Room 1980, Chicago, IL 60604.

Location: Same as mailing address.

Central Region

Mailing address: Freedom of Information Reading Room, Internal Revenue Service, 201 W. Fourth Street, Covington, KY 41019.

Location: Same as mailing address.

Southwest Region

Mailing address: Freedom of Information Reading Room, Internal Revenue Service, 1100 Commerce Street, Room 11B15, Dallas, TX 75242.

Location: Same as mailing address.

Western Region

Mailing address: Freedom of Information Reading Room, Internal Revenue Service, 450 Golden Gate Avenue, Room 2307, San Francisco, CA 94102.

Location: Same as mailing address.

(iv) *Inability to use public reading rooms.* If persons are unable or unwilling to visit a reading room in person but wish to inspect identifiable reading room material, they may request permission to inspect such material at any office of the Internal Revenue Service. * * *

Par. 6. Section 601.702(c)(1) is amended by removing from the first sentence the language "paragraph (b) of § 601.701" and adding the language "paragraph (b)(1) of § 601.701" in its place.

Par. 7. Section 601.702 (c) (2) is amended as follows:

1. In paragraph (i), the third sentence, the language "31 CFR Part 1.5 (g) and (h)" is removed and the language "31 CFR Part 1.5 (g), (h), and (i)" is added in its place.

2. Paragraph (ii) is revised to read as set forth below.

3. A new paragraph (iii) is added immediately following paragraph (ii) to read as set forth below.

(2) *Requests for records not in control of the Internal Revenue Service.* (i) * * *

(ii) Where the record requested was created by another agency or Department of the Treasury constituent unit (*i.e.*, in its control) and a copy thereof is in the possession of the Internal Revenue Service, the Internal Revenue Service official to whom the request is delivered shall refer the request to the agency or constituent unit which originated the record for direct reply to the requester. The requester shall be informed of such referral. This referral shall not be considered a denial of access within the meaning of these regulations. However, where the record is determined to be exempt from disclosure under 5 U.S.C. 552, the referral need not be made, but the Internal Revenue Service shall inform the originating agency or constituent unit of its determination. Where notifying the requester of its referral may cause a harm to the originating agency or constituent unit which would enable the originating agency or constituent unit to withhold the record under 5 U.S.C. 552, then such referral need not be made. In both of these circumstances, the Internal Revenue Service official to whom the request is delivered shall process the request in accordance with the procedures set forth in this subpart.

(iii) When a request is received for a record created by the Internal Revenue Service (*i.e.*, in its possession and control) that includes information originated by another agency or Department of the Treasury constituent unit, the record shall be referred to the originating agency or constituent unit for review, coordination, and concurrence. The Internal Revenue Service official to whom the request is delivered shall not issue its determination with respect to that record without prior consultation with the originating agency or constituent unit.

Par. 8. Section 601.702(c)(3) is amended as follows:

1. In paragraph (v), the language "sections 6103 and 7213 of the Internal Revenue Code of 1954" is removed and the language "section 6103 of the Internal Revenue Code of 1986" is added in its place.

2. In paragraph (vii), the final "and" is removed.

3. In paragraph (viii), "." is removed at the end and ", and" is added in its place.

4. A new paragraph (ix) is added to read as set forth below.

5. The flush language is revised to read as set forth below.

(3) *Form of request.* The initial request for records must—

(i) * * *

(ix) Identify the category of the requester and state how the records will be used, as required by paragraph (f)(3) of this section.

Where the initial requests, rather than stating a firm agreement to pay the fees ultimately determined in accordance with paragraph (f) of this section, place an upper limit on the amount the requesters agree to pay, which upper limit is deemed likely to be lower than the fees estimated to ultimately be due, or where the requesters ask for an estimate of the fees to be charged, the requesters shall be promptly advised of the estimate of fees and asked to agree to pay such amount. Where the initial requests include a request for reduction or waiver of fees, the Internal Revenue Service officials responsible for the control of the requested records (or their delegates) will determine whether to grant the requests for reduction or waiver in accordance with paragraph (f) of this section and notify the requesters of their decisions and, if their decisions result in the requesters being liable for all or part of the fees normally due, ask the requesters to agree to pay the amounts so determined. The requirements of this subparagraph will not be deemed met until the requesters have explicitly agreed to pay the fees applicable to their requests for records, if any, or have made payment in advance of the fees estimated to be due. In addition, requesters are advised that only requests for records which fully comply with the requirements of this subparagraph can be processed in accordance with this section. Requesters will be promptly notified in writing of any requirements which have not been met or any additional requirements to be met. However, every effort will be made to comply with the requests as written.

Par. 9. Section 601.702(c)(4) is amended as follows:

1. In paragraph (i)(A), the second and fourth sentences are revised to read as set forth below.

2. In paragraph (i)(B), first sentence, the language "601.701(b)" is removed and the language "601.701(b)(1)" is added in its place.

3. Paragraph (ii) is revised to read as set forth below.

(4) *Reasonable description of records; identity and right of the requester.* (i)(A) * * * While no specific formula for a reasonable description of a record can be established, the requirement will generally be satisfied if the requester gives the name, subject matter, location, and years at issue, of the requested records. If the request seeks records pertaining to pending litigation, the request should indicate the title of the case, the court in which the case was filed, and the nature of the case. * * * Where the requester does not reasonably describe the records being sought, the requester shall be afforded an opportunity to refine the request. * * *

(ii) In the case of records containing information with respect to particular persons the disclosure of which is limited by statute or regulations, persons making requests shall establish their identity and right to access to such records. Persons requesting access to such records which pertain to themselves may establish their identity by—

(A) The presentation of a single document bearing a photograph (such as a passport or identification badge), or the presentation of two items of identification which do not bear a photograph but do bear both a name and signature (such as a driver's license or credit card), in the case of a request made in person,

(B) The submission of the requester's signature, address, and one other identifier (such as a photocopy of a driver's license) bearing the requester's signature, in the case of a request by mail, or

(C) The presentation in person or the submission by mail of a notarized statement swearing to or affirming such person's identity.

Additional proof of persons' identity shall be required before the requests will be deemed to have met the requirement of paragraph (c)(3)(v) of this section if it is determined that additional proof is necessary to protect against unauthorized disclosure of information in a particular case. Persons who have identified themselves to the satisfaction of Internal Revenue Service officials pursuant to this subdivision shall be deemed to have established their right to access records pertaining to themselves. Persons requesting records on behalf of or pertaining to another person must provide adequate proof of the legal relationship under which they assert the right to access the requested records before the requirement of paragraph (c)(3)(v) of this section will be deemed met. In the case of an attorney-in-fact, the requester shall furnish an original of a properly executed power of attorney together with one other identifier bearing the signature of the person executing such power of attorney. In the case of a corporation, if the requester has the authority to legally bind the corporation under applicable state law, such as its president or chief executive officer, then a written statement that the person making the request on behalf of the corporation, on corporate letterhead, shall be sufficient. If the requester is an officer or an employee of a corporation, then such person shall furnish a certification by one of the corporation's officers (other than the requester) that the person making the request on behalf of the corporation is properly authorized to make such request. If the requester is other than one of the above, then such person shall furnish a resolution by the corporation's board of directors providing that the person making the request on behalf of the corporation is properly authorized to make such a request. A person requesting access to records of a one-man corporation or a partnership shall provide a notarized statement that the requester is in fact an officer or official of the corporation or a member of the partnership.

Par. 10. Section 601.702(c)(5) is amended as follows:

1. In the first sentence, the language "official responsible for the control of the records requested (or his delegate)" is removed and the language "officials responsible for the control of the records requested (or their delegates)" is added in its place.

2. In the flush material following paragraph (iii), the language "he may expect a response" is removed and the language "a response may be expected" is added in its place.

3. In paragraph (i), the language "search and duplication" is removed and the language "search, duplication, and review" is added in its place.

Par. 11. Section 601.702(c)(6) is amended by adding the following two, new sentences between the first and second sentences:

(6) *Search for records requested.* * * * Search time includes any and all time spent looking for material responsive to the request, including

VOL

1987
UMI

page-by-page or line-by-line identification of material within records. However, where duplication of an entire record would be less costly than a line-by-line identification, duplication should be substituted for this kind of search.
* * *

Par. 12. Section 601.702(c)(7) is amended by revising (i), (ii), and (iv) to read as follows:

(7) *Initial determination*—(i) *In general.* The Director of the Office of Disclosure or his/her delegate shall have the authority to make initial determinations with respect to all requests for records of the Internal Revenue Service. With the exception of records which are controlled by the Assistant Commissioner (Inspection), the Director of the Internal Revenue Service Data Center, the Assistant Commissioner (International), or the Director of Practice, the Director of the Office of Disclosure or his/her delegate shall have the sole authority to make such determinations with respect to records controlled by the National Office. Except where the Director of the Office of Disclosure or his/her delegate has such sole authority, the initial determination as to whether to grant the request for records may be made either by the Director of the Office of Disclosure or by the Internal Revenue Service officials responsible for the control of the records requested or their delegates (see paragraph (g) of this section), including those officials mentioned in the preceding sentence. The initial determination will be made and notification thereof mailed within 10 days (excepting Saturdays, Sundays, and legal public holidays) after the date of receipt of the request, as determined in accordance with paragraph (c)(5) of this section or the requester otherwise agrees to an extension of the 10-day time limitation.

(ii) *Granting of request.* If it is determined that the request is to be granted, and if the person making the request desires a copy of the requested records, a statement of fees, if any, in accordance with paragraph (f) of this section, will be mailed to the requester, requesting such payment prior to release of the records determined to be available. Upon receipt of such fees, the Internal Revenue Service official responsible for the control of the records (or his/her delegate) will promptly mail such copies to the requester, with any explanation of the deletions or withholdings, as applicable. However, if no fees are due, then a copy of the available records will be promptly mailed to the requester. In the case of a request for inspection the requester will be notified in writing of the determination, when and where the requested records may be inspected and of the fees involved in complying with the request. Any fees involved in complying with the request for inspection of records shall be submitted prior to making the records available for inspection.

The records will promptly be made available for inspection, at the time and place stated, normally at the appropriate office where the records requested are controlled. However, if the person making the request has expressed a desire to inspect the records at another office of the Internal Revenue Service, every reasonable effort will be made to comply with the request. Records will be made available for inspection at such reasonable and proper times as not to interfere with their use by the Internal Revenue Service or to exclude other persons from making inspections. In addition, reasonable limitations may be placed on the number of records which may be inspected by a person on any given date. The person making the request will not be allowed to remove the records from the office where inspection is made. If, after making inspection, the person making the request desires copies of all or a portion of the requested records, copies will be furnished upon payment of the established fees prescribed by paragraph (f) of this section.
* * * * *

(iv) *Inability to locate and evaluate within time limits.* Where the records requested cannot be located and evaluated within the initial 10-day period or any extension thereof in accordance with paragraph (c)(9) of this section, the search for the records or evaluation will continue, but the requesters will be so notified, advised that they may consider such notification a denial of their requests for records, and provided with the address to which an administrative appeal may be delivered. However, the requesters may also be invited, in the alternative, to agree to a voluntary extension of time in which to locate and evaluate the records. Such voluntary extension of time will not constitute a waiver of the requesters' right to appeal any denial of access ultimately made or their right to appeal in the event of failure to comply with the time extension granted.

Par. 13. Section 601.702(c)(8) is amended as follows:

1. The introductory text of paragraph (c)(8) is revised to read as set forth below.

2. Paragraph (v) is revised to read as set forth below.

3. In the flush material following paragraph (vi), the language "Commissioner or his delegate" is removed from the first sentence and the language "Commissioner or his/her delegate" is added in its place; and the word "appellant" is removed from the fifth sentence and the word "requester" is added in its place.

(8) *Administrative appeal.* The requester may submit an administrative appeal to the Commissioner at any time within 35 days after the date of any notification described in paragraph (c)(7) (iii) or (iv) of this section or after receipt of an adverse determination of the requester's category described in paragraph (f)(3) of this section, or the date of the letter transmitting the last records released, whichever is later. The letter of appeal shall— * * *

(v) Specify the date of the request, and the office to which the request was submitted and, where possible, enclose a copy of the initial request and the initial determination being appealed, and

Par. 14. Section 601.702(c)(9) is amended as follows:

1. In paragraph (i)(B), the language "or related requests" is added following "single request," and before "or".

2. In paragraph (i)(C), the language "Disclosure Operations Division" is removed and the language "Office of Disclosure" is added in its place.

Par. 15. Section 601.702(c)(10) is revised to read as follows:

(10) *Failure to comply.* If the Internal Revenue Service fails to comply with the time limitations specified in paragraphs (c) (7), (8), or (9)(i) of this section, any persons making requests for records satisfying the requirements of subdivisions (i) through (ix) of paragraph (c)(3) of this section, shall be deemed to have exhausted their administrative remedies with respect to such requests. Accordingly, these persons may initiate suit in accordance with paragraph (c)(11) of this section.

Par. 16. Section 601.702(c)(11) is revised to read as follows:

(11) *Judicial review.* If a request for records is denied upon appeal pursuant to paragraph (c)(8) of this section, or if no determination is made within the 10-day or 20-day periods specified in paragraphs (c) (7) and (8) of this section, or the period of any extension pursuant to paragraph (c)(9)(i) of this section, or by grant of the requester, respectively, the person making the request may commence an action in a U.S. district court in the district in which the requester resides, in which the requester's principal place of business is

located, in which the records are situated, or in the District of Columbia, pursuant to 5 U.S.C. 552(a)(4)(B). The statute authorizes an action only against the agency. With respect to records of the Internal Revenue Service, the agency is the Internal Revenue Service, not an officer or an employee thereof. Service of process in such an action shall be in accordance with the Federal Rules of Civil Procedure (28 U.S.C. App.) applicable to actions against an agency of the United States. Delivery of process upon the Internal Revenue Service must be directed to the Commissioner of Internal Revenue, Attention: CC:GLS, 1111 Constitution Avenue, NW., Washington, DC 20224. The Internal Revenue Service will serve an answer or otherwise plead to any complaint made under this paragraph within 30 days after service upon it, unless the court otherwise directs for good cause shown. The district court will determine the matter *de novo*, and may examine the contents of the Internal Revenue Service records in question in camera to determine whether such records or any part thereof shall be withheld under any of the exemptions described in paragraph (b)(1) of § 601.701. The burden will be upon the Internal Revenue Service to sustain its action in not making the requested records available. The court may assess against the United States reasonable attorney fees and other litigation costs reasonably incurred by the person making the request in any case in which the complainant has substantially prevailed.

Par. 17. Section 601.702(c)(12) is amended as follows'

1. The language "Civil Service Commission" is removed from the first and third sentences and the word "Commission" is removed from the second sentence, and the language "Special Counsel" is added in each such place.

2. The language "his representative" is removed at the end of the second sentence and the language "his/her representative" is added in its place.

3. Paragraph (12) is redesignated paragraph (13).

4. A new paragraph (12) is added to read as follows:

(12) *Preservation of records.* All correspondence relating to the requests received by the Internal Revenue Service under this chapter, and all records processed pursuant to such requests, shall be preserved, until such time as the destruction of such correspondence and records is authorized pursuant to Title 44 of the United States Code. Under no circumstances shall records be destroyed while they are the subject of a pending request, appeal, or lawsuit under 5 U.S.C. 552.

Par. 18. Section 601.702(d)(1) is amended by adding the following sentence at the end of the paragraph:

(d) *Rules for disclosure of certain specified matters*—(1) *Inspection of tax returns and return information.* * * * Written requests for this information shall be made in accordance with Rev. Proc. 66–3, as modified by Rev. Proc. 84–71, 1984–2 C.B. 735 and Rev. Proc. 85–56, 1985–2 C.B. 739.

Par. 19. Section 601.702(d)(2) is amended as follows:

1. The language "Part 2," is added following "Record 21,".

2. The following sentence is added at the end of the paragraph.

(2) *Record of seizure and sale of real estate.* * * * However, Record 21 does not list real estate seized for forfeiture under the internal revenue laws (see IRC 7302).

Par. 20. Section 601.702(d)(3) is revised to read as follows:

(3) *Information returns of certain tax-exempt organizations and certain trusts.* Information furnished on Form 990, Form 1041–A, and on the annual report by private foundations pursuant to sections 6033, 6034, 6056 (as in effect before its repeal by Pub. L. 96–603), is open to public inspection. This information will be made available for public inspection in the Freedom of Information Reading Room, Internal Revenue Service, 1111 Constitution Avenue, NW., Washington, DC 20224, as well as in the office of any district director. Copies of these records may, upon written request, be obtained from these offices or from the office of any service center director. The applicability of this subparagraph is subject to the rules on disclosure set forth in section 6104(b) and § 301.6104(b)–1.

Par. 21. Section 601.702(d)(4) is revised to read as follows:

(4) *Applications of certain organizations for tax exemption.* Subject to the rules on disclosure set forth in section 6104(a) and § 301.6104 (a)–1, (a)–5, and (a)–6, applications and certain papers submitted in support of such applications, filed by organizations described in section 501 (c) or (d) and determined to be exempt from taxation under section 501(a), and any letter or other document issued by the Internal Revenue Service with respect to such applications, will be made available for public inspection, upon written request, in the Freedom of Information Reading Room, Internal Revenue Service, 1111 Constitution Avenue, NW., Washington, DC 20224, or the office of any district director.

Par. 22. Section 601.702(d)(5) is removed.

Par. 23. Section 601.702(d)(7) is revised to read as follows:

(7) *Comments received in response to a notice of proposed rule making.* Written comments received in response to a notice of proposed rule making may be inspected, upon written request, by any person upon compliance with the provisions of this paragraph. Comments which may be inspected are located in the Freedom of Information Reading Room, Internal Revenue Service, 1111 Constitution Avenue, NW., Washington, DC 20224. The request to inspect comments must be in writing and signed by the person making the request and should be addressed to the Commissioner of Internal Revenue, Attention: CC:LR:T, Washington, DC 20224. Upon delivery of such a written request to the place where the comments are located during the regular business hours of that office, the person making the request may inspect those comments that are the subject of the request. Copies of comments may be made in the Freedom of Information Reading Room by the person making the request or may be requested, in writing, to the Commissioner of Internal Revenue, Attention: CC:LR:T, Washington, DC 20224. The person making the request for copies should allow a reasonable time for processing the request. The provisions of paragraph (f)(5) of this section, relating to fees, shall apply with respect to requests made in accordance with this subparagraph.

Par. 24. Section 601.702(d)(8) is amended as follows:

1. In the last sentence, the language "§ 301.6104–1" is removed and the language "§ 301.6104 (a)–1 through (a)–6" is added in its place.

2. Section 601.702(d)(8) is redesignated § 601.702(d)(5).

Par. 25. A new § 601.702(d)(8) is added to read as follows:

(8) *Accepted offers in compromise.* A copy of the Abstract and Statement and the attached narrative report for each accepted offer in compromise with respect to any liability for a tax imposed by Title 26 will be made available for inspection and copying in the following locations:

(i) Except for Exempt Organizations, in the district office (or the Office of the Assistant Commissioner (International))

having jurisdiction over the place in which the taxpayer resides and

(ii) For Exempt Organizations, in the key district which has jurisdiction over the particular organization.

Par. 26. Section 601.702(f) is revised to read as follows:

(f) *Fees for services*—(1) *In general.* The fees to be charged for search, duplication, and review services performed by the Internal Revenue Service, whether or not such services are performed pursuant to the Freedom of Information Act or the regulations thereunder, shall be determined and collected in accordance with the provisions of this paragraph. A fee shall not be charged for monitoring a requester's inspection of records which contains exempt matter. The Internal Revenue Service may recover the applicable fees even if there is ultimately no disclosure of records. Should services other than the services described in this paragraph be requested and rendered, appropriate fees will be established by the Commissioner or his/her delegate, and imposed and collected pursuant to 31 U.S.C. 483(a), subject, however, to the constraint imposed by 5 U.S.C. 552(a)(4)(A).

(2) *Waiver or reduction of fees.* The fees authorized by this paragraph may be waived or reduced—

(i) At the discretion of any Internal Revenue Service official—

(A) Who is authorized to make the initial determination pursuant to paragraph (c)(7) of this section, in the case of a record which is not located for any reason, or

(B) Who determines any portion of the requested record to be exempt from disclosure; or

(ii) On a case-by-case basis in accordance with this subdivision by any Internal Revenue Service official who is authorized to make the initial determination pursuant to paragraph (c)(7) of this section, provided such waiver or reduction has been requested in writing. Fees will be waived or reduced by such official when it is determined that disclosure of the requested information is in the public interest because it is likely to contribute significantly to public understanding of the operations or activities of the Internal Revenue Service and is not primarily in the commercial interest of the requester. Such officials shall consider several factors, including, but not limited to, those set forth below, in determining requests for waiver or reduction of fees—

(A) Whether the subject of the releasable records concerns the agency's operations or activities;

(B) Whether the releasable records are likely to contribute to an understanding of the agency's operations or activities;

(C) Whether the releasable records are likely to contribute to the general public's understanding of the agency's operations or activities (*e.g.*, how will the requester convey the information to the general public);

(D) The significance of the contribution to the general public's understanding of the agency's operations or activities (*e.g.*, is the information contained in the releasable records already available to the general public);

(E) The existence and magnitude of the requester's commercial interest, as that term is used in paragraph (f)(3)(i)(A) of this section, being furthered by the releasable records; and

(F) Whether the magnitude of the requester's commercial interest is sufficiently large in comparison to the general public's interest.

(iii) Requesters asking for reduction or waiver of fees must state the reasons why they believe disclosure meets the standards set forth in paragraph (f)(2)(ii) of this section.

(iv) Requesters who base their request for reduction or waiver of fees solely on the basis of their indigency will not be entitled to a reduction or waiver of fees.

(v) Normally, no charge will be made for providing records to Federal, state, or foreign governments, international governmental organizations, or local governmental agencies or offices thereof. The initial request for waiver or reduction of fees should be addressed to the official of the Internal Revenue Service to whose office the request for disclosure is delivered pursuant to paragraph (c)(3)(iii) of this section. Appeals from denials of requests for waiver or reduction of fees shall be decided by the Commissioner in accordance with the criteria set forth in subdivision (iii) of this subparagraph. Appeals shall be addressed in writing to the Office of the Commissioner within 35 days of the denial of the initial request for waiver or reduction and shall be decided promptly. See paragraph (c)(8) of this section for the appropriate address. Upon receipt of the determination on appeal to deny a request for waiver of fees, the requester may initiate an action in U.S. district court to review the request for waiver of fees. In such actions, the courts will consider the matter *de novo,* except that the court's review of the matter shall be limited to the record before the Internal Revenue Service official to whose office the request for waiver is delivered. Upon receipt of the determination on appeal to deny a request for reduction of fees, the requester may initiate an action in U.S. district court to review the request for reduction of fees. In such actions, the courts will consider the matter under the arbitrary and capricious standard.

(3) *Categories of requesters*—(i) *In general.* A request for records under this section shall include an attestation, under penalty of perjury, as to the status of the requester solely for use by the Internal Revenue Service official to whose office the request is delivered in determining the appropriate fees to be assessed. Requesters shall attest that they fall into one of the categories set forth below—

(A) *Commercial use requester.* Any person who seeks information for a use or purpose that furthers the commercial, trade, or profit interests of the requester or the person on whose behalf the request is made.

(B) *Media requester.* Any person actively gathering news for an entity that is organized and operated to publish or broadcast news (*i.e.*, information about current events or of current interest to the public) to the public. News media entities include, but are not limited to, television or radio stations broadcasting to the public at large, publishers of periodicals, to the extent they disseminate news, who make their periodicals available for purchase or subscription by the general public, and telecommunications. Free lance journalists shall be included as media requesters if they can demonstrate a solid basis for expecting publication through a qualifying news entity (*e.g.*, publication contract, past publication record). Specialized periodicals, although catering to a narrower audience, may be considered media requesters so long as they are available to the public generally, via newsstand or subscription.

(C) *Educational institution requester.* Any person who, on behalf of a preschool, public or private elementary or secondary school, institution of undergraduate or graduate higher education, institution or professional or vocational education, which operates a program or programs of scholarly research, seeks records in furtherance of the institution's scholarly research and is not for a commercial use.

(D) *Noncommercial scientific institution requester.* Any person on behalf of an institution that is not operated on a commercial basis, that is operated solely for the purpose of conducting scientific research whose results are not intended to promote any particular product or industry.

VOL 52 ISS 197 OC 13 1987 UMI

(E) *Other requester.* Any requester who falls outside the above categories.

(ii) Allowable charges—

(A) *Commercial use requesters.* Records shall be provided for the cost of search, duplication, and review (including doing all that is necessary to excise and otherwise prepare records for release) of records. Commercial use requesters are not entitled to 2 hours of free search time or 100 pages of duplication.

(B) *Media requesters.* Records shall be provided for the cost of duplication alone, excluding fees for the first 100 pages.

(C) *Educational institution requesters.* Records shall be provided for the cost of duplication alone, excluding fees for the first 100 pages.

(D) *Noncommercial scientific institution requesters.* Records shall be provided for the cost of duplication alone, excluding fees for the first 100 pages.

(E) *Other requesters.* Requesters who do not fit into any of the above categories shall be charged fees that will cover the full direct cost of searching for and duplicating records, except that the first 2 hours of search time and first 100 pages of duplication shall be furnished without charge.

(4) *Avoidance of unexpected fees.* In order to protect requesters from unexpected fees, all requests for records shall state the agreement of the requesters to pay the fees determined in accordance with paragraph (f)(5) of this section or state the upper limit they are willing to pay to cover the costs of processing their requests. When the fees for processing requests are estimated by the Internal Revenue Service to exceed that limit, or when requesters have failed to state a limit and the costs are estimated to exceed $250, and the Internal Revenue Service has not then determined to waive or reduce the fees, a notice shall be sent to the requesters. This notice shall—

(i) Inform the requester of the estimated costs;

(ii) Extend an offer to the requester to confer with agency personnel in an attempt to reformulate the request in a manner which will reduce the fees and still meet the needs of the requester;

(iii) If the requester is not amenable to reformulation, which would reduce fees to under $250, then advance payment shall be required; and

(iv) Inform the requester that the time period, within which the Internal Revenue Service is obliged to make a determination on the request, will not begin to run, pending a reformulation of the request or the receipt of advance payment from the requester, as appropriate.

(5) *Fees for services.* The fees for services performed by the Internal Revenue Service shall be imposed and collected as set forth in this paragraph. No fees shall be charged if the costs of routine collecting and processing the fees allowable under 5 U.S.C. 552(a)(4)(A) are likely to equal or exceed the amount of the fee.

(i) *Search services.* Fees charged for search services are as follows—

(A) Searches other than for computerized records—$17.00 for each hour or fraction thereof for time spent by each clerical, professional, and supervisor in finding the records and information within the scope of the request.

(B) Searches for computerized records—Actual direct cost of the search. The fee for computer printouts will be actual costs.

(C) Searches requiring travel or transportation—Shipping charges to transport records from one location to another, or for the transportation of an employee to the site of requested records when it is necessary to locate rather than examine the records, shall be at the rate of the actual cost of such shipping or transportation.

(D) Other services and materials requested, pursuant to the Freedom of Information Act, which are not covered by this part are chargeable at the actual cost to the Internal Revenue Service.

(ii) *Review services.* (A) Review is the process of examining records in response to a commercial use requester, as that term is defined in paragraph (f)(3)(i)(A) of this section, upon initial consideration of the applicability of an exemption described in paragraph (b)(1) of § 601.701 to the requested records, be it at the initial request or administrative appeal level, to determine whether any portion of any record responsive to the request is permitted to be withheld. Review includes doing all that is necessary to excise and otherwise prepare the records for release. Review does not include the time spent on resolving general legal or policy issues regarding the applicability of exemptions to the requested records.

(B) Fees charged for review services—$21.00 for each hour or fraction thereof for time spent by each clerical, professional, and supervisor in reviewing the records for disclosure.

(iii) *Duplication other than for returns and related documents.* Fees charged for duplication other than for returns and related documents are as follows—(A) $.15 per copy of each page, up to 8½" x 14", made by photocopy or similar process.

(B) Photographs, films, and other materials—actual cost of duplication.

(C) Records may be released to a private contractor for copying and the requester will be charged for the actual cost of duplication charged by the private contractor, so long as the cost to the requester is not higher than if the Internal Revenue Service had duplicated the records itself.

(D) When other duplications not specifically identified above are requested and provided pursuant to the Freedom of Information Act their direct cost to the Internal Revenue Service shall be charged.

(iv) *Charges for copies of returns and related documents.* Charges for furnishing copies of returns and related documents are as follows:

(A) A charge of $4.25 will be made for each request for a copy of a return or other related documents (other than Employee Plans and Exempt Organization returns). Payments are to be submitted in advance using IRS Form 4506, Request for Copy of Tax Form.

(B) A charge of $1.00 for the first page and $.15 for each subsequent page will be made for copies of Employee Plans and Exempt Organizations tax returns and related documents. Payments will be submitted subsequent to receipt of IRS Form 2860, Document Transmittal and Bill.

(6) *Printed material.* Certain relevant government publications which will be placed on the shelves of the reading rooms and similar public inspection facilities will not be sold at these locations. However, copies of pages of these publications may be duplicated on the premises and a fee for such services may be charged in accordance with paragraph (f)(5)(iii) of this section. A person desiring to purchase the complete publication, for example, an Internal Revenue Bulletin, should contact the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402.

(7) *Search and deletion services with respect to records open to public inspection pursuant to section 6110 of the Code.* Fees charged for searching for and making deletions in records open to public inspection pursuant to section 6110 of the Code only upon written request shall be at actual cost, as the Commissioner may from time to time establish.

(8) *Form of payment.* Payment shall be made by check or money order, payable to the order of the Treasury of the United States or the Internal Revenue Service.

(9) *Advance payments.* (i) If previous search, review, or duplication fees have

not been paid in a timely fashion as defined in paragraph (f)(10) of this section by a person making a request for records, the Internal Revenue Service shall require that person to remit any outstanding balance plus interest as authorized in paragraph (f)(10) of this section, plus payment of estimated fees in advance before processing the request. The "person making the request" for purposes of this paragraph is the person in whose name a request is made, except that if such person is making the request on behalf of another person whose identity is apparent on the face of the request (including attached documents), such other person is considered the "person making the request." The person who made the prior request to which fees are outstanding is identified in the same manner.

(ii) Where it is estimated or determined that allowable fees required to be paid by a requester are likely to exceed $250, the requester will be required to make an advance payment of the entire fee before the Internal Revenue Service official to whom the request is delivered will begin to process the request.

(iii) When the Internal Revenue Service acts pursuant to paragraphs (f)(9) (i) or (ii) of this section, the administrative time limits prescribed in paragraphs (c)(7) and (8) of this section, plus permissible extensions of these time limits as prescribed in paragraph (c)(9)(i) of this section, will begin only after the Internal Revenue Service official to whom the request is delivered has received the fees described above.

(10) *Interest.* Interest shall be charged to requesters who fail to pay the fees in a timely fashion; that is, within 30 days following the day on which the statement of fees as set forth in paragraph (c)(7)(i) of this section was sent by the Internal Revenue Service official to whom the request was delivered. Interest accrues from the date the statement of fees was mailed to the requester. Interest will be at the rate prescribed in 31 U.S.C. 3717. Pursuant to the Debt Collection Act of 1982, Pub. L. 97-365, the Internal Revenue Service may take all steps authorize by the Debt Collection Act of 1982, including administrative offset, disclosure to consumer reporting agencies, and use of collection agencies, as otherwise authorized by law to encourage repayment.

(11) *Aggregating requests.* When the Internal Revenue Service official to whom a request is delivered reasonably believes that a requester or group of requesters is attempting to break down a request into a series of requests for the purpose of evading the assessment of fees, the Internal Revenue Service shall aggregate such requests and charge accordingly, upon notification to the requester and/or requesters.

Par. 27. Section 601.702(g) is revised to read as follows:

(g) *Responsible officials and their addresses.* For purposes of this section, the Internal Revenue Service officials responsible for the control of records are the following officials, in the case of records under their jurisdiction: The Assistant Commissioner (Inspection), Assistant Commissioner (International), the Director of Practice, Regional Commissioners, District Directors, Service Center Directors, and the Director of the Internal Revenue Service Data Center. In the case of records of the National Office not under the jurisdiction of one of the officials referred to in the preceding sentence (including records of the National Office of the Chief Counsel), the Director, Office of Disclosure is the responsible official. Records of a Regional Counsel's Office shall be deemed to be under the jurisdiction of the Regional Commissioner; records of a District Counsel's office shall be deemed to be under the jurisdiction of the District Director. The addresses of these officials are:

Par. 28. A new § 601.702(h) is added to read as follows:

(h) *Business information procedures*—(1) *In general.* Business information provided to the Internal Revenue Service by a business submitter shall not be disclosed pursuant to a Freedom of Information Act request except in accordance with this paragraph.

(2) *Definition.* Business information is any trade secret or other financial, commercial (including research) information.

(3) *Notice to business submitters.* The official having control over the requested records, which includes business information, shall provide a business submitter with prompt written notice of a request encompassing its business information whenever required in accordance with paragraph (h)(4) of this section. Such written notice shall either describe the exact nature of the business information requested or provide copies of the records or portions thereof containing the business information.

(4) *When notice is required.* (i) For business information submitted to the Internal Revenue Service prior to October 13, 1987, the official having control over the requested records shall provide a business submitter with notice of a request whenever—

(A) The business information is less than 10 years old;

(B) The business information was submitted to the Internal Revenue Service upon a commitment of confidentiality; or

(C) The Internal Revenue Service has reason to believe that disclosure of the information may result in commercial or financial injury to the business submitter.

(ii) For business information submitted to the Internal Revenue Service on or after October 13, 1987, the Internal Revenue Service shall provide a business submitter with notice of a request whenever—

(A) The business submitter has in good faith designated the information as commercially or financially sensitive information; or

(B) The official has reason to believe that disclosure of the information may result in commercial or financial injury to the business submitter.

Notice of a request for business information falling within paragraph (h)(4)(ii)(A) of this section shall be required for a period of not more than ten years after the date of submission unless the business submitter requests, and provides acceptable justification for, a specific notice period of greater duration. Whenever possible, the business submitter's claim of confidentiality should be supported by a statement or certification by an officer or authorized representative of the business that the information in question is, in fact, confidential commercial or financial information and has not been disclosed to the public.

(5) *Opportunity to object to disclosure.* Through the notice described in paragraph (h)(3) of this section, the official having control over the requested records shall afford a business submitter ten working days within which to provide the official with a detailed statement of any objection to disclosure. Such statement shall specify all grounds for withholding any of the information, with particular attention to why the information is claimed to be a trade secret or commercial or financial information that is privileged and confidential. Information provided by a business submitter pursuant to this paragraph may itself be subject to disclosure under 5 U.S.C. 552.

(6) *Notice of intent to disclose.* The Internal Revenue Service shall carefully consider a business submitter's objections and specific grounds for nondisclosure prior to determining whether to disclose business information. Whenever the official having control over the requested records decides to disclose business information over the objection of a business submitter, the official shall forward to the business submitter a written notice which shall include—

(i) Statement of the reasons for which the business submitter's disclosure objections were not sustained;

(ii) A description of the business information to be disclosed; and

(iii) A specified disclosure date, which is ten working days after the notice of the final decision to release the requested records has been mailed to the submitter. A copy of the disclosure notice shall be forwarded to the requester at the same time.

(7) *Judicial review.* (i) The Internal Revenue Service's disposition of the request and the submitter's objections shall be subject to judicial review under paragraph (c)(11) of this section. A requester is not required to exhaust administrative remedies if a complaint has been filed under this subparagraph by a business submitter of the information contained in the requested records. Likewise, a business submitter is not required to exhaust administrative

remedies if a complaint has been filed by the requester of these records.

(ii) *Notice of FOIA lawsuit.* Whenever a requester brings suit seeking to compel disclosure of business information covered by paragraph (h)(4) of this section, the official having control over the requested records shall promptly provide the business submitter with written notice thereof.

(iii) *Exception to notice requirement.* The notice requirements of this paragraph shall not apply if—

(A) The official having control over the records determines that the business information shall not be disclosed;

(B) The information lawfully has been published or otherwise made available to the public;

(C) Disclosure of the information is required by law (other than 5 U.S.C. 552); or

(D) The information was acquired in the course of a lawful investigation of a possible violation of the internal revenue laws and notice would interfere with ongoing law enforcement proceedings.

(8) *Appeals.* Procedures for administrative appeals from denials of requests for business information are to be processed in accordance with paragraph (c)(8) of this section.

Lawrence B. Gibbs,

Commissioner of Internal Revenue.

BILLING CODE 4830-01-M

PANAMA CANAL COMMISSION

35 CFR Part 103

General Provisions Governing Vessels

AGENCY: Panama Canal Commission.

ACTION: Interim rule with request for comments.

SUMMARY: The Panama Canal Commission is amending its regulations in 35 CFR 103.8, concerning preference in transit schedulings and order of transiting vessels. The changes take into account the agency's experience with the Panama Canal Transit Booking System over the last year and the corresponding needs of the shipping community. The purpose of this document is to make several changes to the booking system regulations based on numerous requests from Canal users that the Canal Commission revise the tie-breaking procedures, relax the arrival time for restricted vessels and change the cancellation provision in the present rules.

DATES: The amendments made herein are effective October 13, 1987. Written comments should be submitted on or before November 12, 1987.

ADDRESSES: Comments should be sent to Secretary, Panama Canal Commission, 2000 "L" Street, NW., Suite 550, Washington, DC 20036-4996 or Panama Canal Commission, Office of General Counsel, APO Miami 34011-5000.

FOR FURTHER INFORMATION CONTACT: Mr. Michael Rhode, Jr., Secretary, Panama Canal Commission, telephone: (202) 634-6441, or Mr. John L. Haines, Jr., General Counsel, telephone in Balboa Heights, Republic of Panama, 011-507-52-7511.

SUPPLEMENTARY INFORMATION: By a document published on March 4, 1983 (48 FR 27406), the Panama Canal Commission adopted a voluntary system by which a limited number of vessels may be assured a timely transit of the Canal, upon payment of a special charge.

The present regulations, in § 103.8(d), require that in the event requests exceed the number of bookings available, first priority will be to vessels carrying primarily perishable cargo; second, preference will be given in the order of frequency of transit during a specified period; and third, if two vessels are found to have an equal number of transits, then preference will be given to the vessel having transited most recently. This section is being revised to take into consideration only booked transits rather than all prior transits.

The present regulations, in § 103.8(f)(1) as amended in 51 FR 45883 on December 23, 1986 require that restricted vessels arrive at 0100. This section is being revised to allow arrival time for restricted vessels not later than 0200.

The present regulations in 35 CFR 103.8(g) require a 2-day notice of cancellation of transit bookings. This section is being revised by deleting the 2-day period and requiring only that notice be provided prior to the required arrival time. It also revises the schedule of cancellation fees by providing a sliding scale depending on the length of the advance notice of cancellation.

The Commission has determined that these rules do not constitute a major change within the meaning of Executive Order 12291 dated February 17, 1981 (47 FR 13193). The bases for that determination are, first, that the rule, when implemented would not have an annual effect on the economy of $100 million or more per year, and secondly, that the rule would not result in a major increase in costs or prices for consumers, individual industries, local government agencies or geographic regions. Further, the agency has determined that implementation of the rule will have no adverse effect on competition, employment, investment, productivity, innovation or the ability of United States based enterprises to compete with foreign-based enterprises in domestic or export markets.

Finally, the Commission has determined that this rule is not subject to the requirements of sections 603 and 604 of Title 5, United States Code, in that its promulgation will not have a significant impact on a substantial number of small entities, and the Administrator of the Commission so certifies pursuant to 5 U.S.C. 605(b).

List of Subjects in 35 CFR Part 103

Panama Canal, Vessels, Booking system, Navigation (water).

PART 103—GENERAL PROVISIONS GOVERNING VESSELS

Accordingly, 35 CFR Part 103 is amended as follows:

1. The authority citation for Part 103 continues to read as follows:

Authority: 22 U.S.C. 3811, E.O. 12215, 45 FR 36043 and 44 U.S.C. 3501.

2. Sections 103.8(d) (2) and (3), and § 103.8(g) are revised, § 103.8(d)(4) is added, and the first two sentences of § 103.8(f)(1) are revised to read as follows:

§ 103.8 Preference in the transit schedule; order of transiting vessels.

* * * * *

(d) * * *

(2) Second, all other vessels in the order of frequency of booked transits during a specified period.

(3) If two or more vessels are found to have equal number of booked transits under the procedure above, then preference will be given in the order of frequency of transit during a specified period.

(4) If two or more vessels are still found to have equal number of transits under the procedures above, then preference will be given to the vessel having transited most recently.

* * * * *

(f) * * *

(1) When a vessel that is subject to transit restrictions (e.g., clear-cut; clear-cut daylight), has been booked for transit and does not arrive at a terminus of the Canal by 0200 hours of the day of the transit, the booking fee will be forfeited. Similarly, the fee will be forfeited if a booked vessel, that is not subject to such transit restrictions, does

not arrive by 1300 hours on the day of the transit. * * *

* * * * *

(g) *Cancellation.* A transit that is booked may be canceled if notice of cancellation is received by the Canal authorities prior to the required arrival time. A charge will be assessed for such cancellations, however, in accordance with the following schedule.

Date of cancellation	Cancellation charge (the greater of)
Over 10 days prior to transit	20% of booking fee or $500
10 to 7 days prior to transit	40% of booking fee or $750
6 to 2 days prior to transit	60% of booking fee or $1,000
1 day or less	80% of booking fee or $1,250

Failure to cancel prior to scheduled arrival time on the date of intended transit will result in forfeiture of the booking fee.

Failure to cancel prior to scheduled arrival time on the date of intended transit will result in forfeiture of the booking fee.

* * * * *

Dated: September 1, 1987.

D.P. McAuliffe,

Administrator, Panama Canal Commission.

[FR Doc. 87-23531 Filed 10-9-87; 8:45 am]

BILLING CODE 3640-04-M

FEDERAL EMERGENCY MANAGEMENT AGENCY

44 CFR Part 65

Changes in Flood Elevation Determinations; Arkansas, et al.

AGENCY: Federal Insurance Administration, Federal Emergency Management Agency.

ACTION: Final rule.

SUMMARY: Modified base (100-year) flood elevations are finalized for the communities listed below.

These modified elevations will be used in calculating flood insurance premium rates for new buildings and their contents and for second layer coverage on existing buildings and their contents.

DATES: The effective dates for these modified base flood elevations are indicated on the following table and amend the Flood Insurance Rate Map(s) (FIRM) in effect for each listed community prior to this date.

ADDRESSES: The modified base flood elevations for each community are available for inspection at the office of the Chief Executive Officer of each community. The respective addresses are listed on the following table.

FOR FURTHER INFORMATION CONTACT: Mr. John L. Matticks, Chief, Risk Studies Division, Federal Insurance Administration, Federal Emergency Management Agency, Washington, DC 20472, (202) 646-2767.

SUPPLEMENTARY INFORMATION: The Federal Emergency Management Agency gives notice of the final determinations of modified flood elevations for each community listed. These modified elevations have been published in newspaper(s) of local circulation and ninety (90) days have elapsed since that publication. The Administrator, has resolved any appeals resulting from this notification.

Numerous changes made in the base (100-year) flood elevations on the FIRMs for each community make it administratively infeasible to publish in this notice all of the changes contained on the maps. However, this rule includes the address of the Chief Executive Officer of the community, where the modified base flood elevation determinations are available for inspection.

The modifications are made pursuant to section 206 of the Flood Disaster Protection Act of 1973 (Pub. L. 93-234) and are in accordance with the National Flood Insurance Act of 1968, as amended (Title XIII of the Housing and Urban Development Act of 1968, (Pub. L. 90-448), 42 U.S.C. 4001 through 4128, and 44 CFR Part 65.

For rating purposes, the revised community number is shown and must be used for all new policies and renewals.

The modified base (100-year) flood elevations are the basis for the floodplain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or to remain qualified for participation in the National Flood Insurance Program.

These modified elevations, together with the floodplain management measures required by 60.3 of the program regulations, are the minimum that are required. They should not be construed to mean that the community must change any existing ordinances that are more stringent in their floodplain management requirements. The community may at any time enact stricter requirements of its own, or pursuant to policies established by other Federal, State or regional entities.

These modified base flood elevations shall be used to calculate the appropriate flood insurance premium rates for new buildings and their contents and for second layer coverage on existing buildings and their contents.

The changes in the base flood elevations are in accordance with 44 CFR 65.4.

Pursuant to the provisions of 5 USC 605(b), the Administrator, to whom authority has been delegated by the Director, Federal Emergency Management Agency, hereby certifies that this rule, if promulgated, will not have a significant economic impact on a substantial number of small entities. This rule provides routine legal notice of technical amendments made to designated special flood hazard areas on the basis of updated information and imposes no new requirements or regulations on participating communities.

BILLING CODE 6718-03-M

44 CFR Part 65

[Docket No. FEMA-6919]

Changes in Flood Elevation Determinations; Arkansas et al.

AGENCY: Federal Emergency Management Agency.

ACTION: Interim rule.

SUMMARY: This rule lists those communities where modification of the base (100-year) flood elevations is appropriate because of new scientific or technical data. New flood insurance premium rates will be calculated from the modified base (100-year) elevations for new buildings and their contents and for second layer insurance on existing buildings and their contents.

DATES: These modified elevations are currently in effect and amend the Flood Insurance Rate Map (FIRM) in effect prior to this determination.

From the date of the second publication of notice of these changes in a prominent local newspaper, any person has ninety (90) days in which he can request through the community that the Administrator, reconsider the changes. These modified elevations may be changed during the 90-day period.

ADDRESSES: The modified base (100-year) flood elevation determinations are available for inspection at the office of the Chief Executive Officer of the community, listed in the fifth column of the table.

Send comments to that address also.

FOR FURTHER INFORMATION CONTACT: Mr. John L. Matticks, Chief, Risk Studies Division, Federal Insurance Administration, Federal Emergency Management Agency, Washington, DC 20472, (202) 646-2767.

SUPPLEMENTARY INFORMATION: The numerous changes made in the base (100-year) flood elevations on the FIRM(s) make it administratively infeasible to publish in this notice all of the modified base (100-year) flood elevations contained on the map. However, this rule includes the address of the Chief Executive Officer of the community where the modified base (100-year) flood elevation determinations are available for inspection.

Any request for reconsideration must be based on knowledge of changed conditions, or new scientific or technical data.

These modifications are made pursuant to section 206 of the Flood Disaster Protection Act of 1973 (Pub. L. 93-234) and are in accordance with the Naitonal Flood Insurance Act of 1968, as amended, (Title XIII of the Housing and Urban Development Act of 1968 (Pub. L. 90-448)), 42 U.S.C. 4001 through 4128, and 44 CFR 65.4.

For rating purposes, the revised community number is listed and must be used for all new policies and renewals.

These base (100-year) flood elevations are the basis for the floodplain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program.

These elevations, together with the floodplain management measures required by § 60.3 of the program regulations are the minimum that are required. They should not be construed to mean the community must change any existing ordinances that are more stringent in their floodplain management requirements. The community may at any time, enact stricter requirements on its own, or pursuant to policies established by other Federal, State or regional entities.

The changes in the base (100-year) flood elevations listed below are in accordance with 44 CFR 65.4.

Pursuant to the provisions of 5 U.S.C. 605(b), the Administrator, to whom authority has been delegated by the Director, Federal Emergency Management Agency, hereby certifies that this rule if promulgated will not have a significant economic impact on a substantial number of small entities.

This rule provides routine legal notice of technical amendments made to designated special flood hazard areas on the basis of updated information and imposes no new requirements or regulations on participating communities.

BILLING CODE 6718-03-M

44 CFR Part 67

Final Flood Elevation Determinations; California, et al.

AGENCY: Federal Insurance Administration, Federal Emergency Management Agency.

ACTION: Final rule.

SUMMARY: Modified base (100-year) flood elevations are finalized for the communities listed below.

These modified elevations are the basis for the floodplain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program.

EFFECTIVE DATE: The date of issuance of the Flood Insurance Rate Map (FIRM) showing modified base flood elevations, for the community. This date may be obtained by contacting the office where the maps are available for inspection indicated in the table below.

ADDRESSES: See table below.

FOR FURTHER INFORMATION CONTACT: Mr. John L. Matticks, Chief, Risk Studies Division, Federal Insurance Administration, Federal Emergency Management Agency, Washington, DC 20472, (202) 646-2767.

SUPPLEMENTARY INFORMATION: The Federal Emergency Management Agency gives notice of the final determinations of flood elevations for each community listed. Proposed base flood elevations or proposed modified base flood elevations have been published in the **Federal Register** for each community listed.

This final rule is issued in accordance with section 110 of the Flood Disaster Protection Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 (Pub. L. 90-448)), 42 U.S.C. 4001-4128, and 44 CFR Part 67. An opportunity for the community or individuals to appeal the proposed determination to or through the community for a period of ninety (90) days has been provided.

The Agency has developed criteria for floodplain management in flood-prone areas in accordance with 44 CFR Part 60.

Pursuant to the provisions of 5 U.S.C. 605(b), the Administrator, to whom authority has been delegated by the Director, Federal Emergency Management Agency, hereby certifies for reasons set out in the proposed rule that the final flood elevation determinations, if promulgated, will not have a significant economic impact on a substantial number of small entities. Also, this rule is not a major rule under terms of Executive Order 12291, so no regulatory analyses have been proposed. It does not involve any collection of information for purposes of the Paperwork Reduction Act.

List of Subjects in 44 CFR Part 67

Flood insurance, Floodplains.

PART 67—[AMENDED]

The authority citation for Part 67 continues to read as follows:

Authority: 42 U.S.C. 4001 *et seq.*, Reorganization Plan No. 3 of 1978, E.O. 12127.

Interested lessees and owners of real property are encouraged to review the proof Flood Insurance Study and FIRM available at the address cited below for each community.

The modified base flood elevations are finalized in the communities listed below. Elevations at selected locations in each community are shown. Any appeals of the proposed base flood elevations which were received have been resolved by the Agency.

BILLING CODE 6718-03-M

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Office of the Secretary

45 CFR Part 96

Block Grant Programs

AGENCY: Office of the Secretary, HHS.

ACTION: Final rule.

SUMMARY: These final regulations amend the regulation on block grant programs to implement legislation enacted by Congress, including Pub. L. 99-117, the Health Services Amendments of 1985; Pub. L. 98-509, the Alcohol Abuse, Drug Abuse, and Mental Health Amendments of 1984; Pub. L. 98-555 the Preventive Health Amendments of 1984; and Pub. L. 98-558, the Human Services Reauthorization Act of 1984. In addition, the regulations clarify certain requirements regarding audits and reporting under the block grant programs.

EFFECTIVE DATE: November 12, 1987.

FOR FURTHER INFORMATION CONTACT: Robert C. Raymond, 202-245-7316.

SUPPLEMENTARY INFORMATION: The Omnibus Budget Reconciliation Act of 1981 established seven block grants to be administered by the Department of Health and Human Services. Interim final regulations to implement the block grant were published in the **Federal Register** on October 1, 1981 (46 FR 48582). Based upon the Department's review of the comments on the interim final regulations, final regulations were issued on July 6, 1982 (47 FR 29472). Recent legislation changed some of the provisions for the block grants. Certain of these provisions require changes in the regulations for the block grants. To implement these changes a notice of proposed rulemaking was published in the **Federal Register** on July 3, 1986 (51 FR 24402) and a 60-day comment period was provided. We received 110 letters providing comments on the proposed rule. The overwhelming majority of these were directed to the proposed changes in the provisions applying to the low-income home energy assistance program. Of these, most addressed the provision on administrative costs. Based on our evaluation of the comments, the regulations have been revised, as appropriate, and are now being made final. The provisions, together with the comments that we received, are discussed below.

Eligible Entities Under the Community Services Block Grant

The definition of "eligible entity" contained in section 673(1) of the Omnibus Budget Reconciliation Act of 1981 was expanded by Section 202 of the Human Services Reauthorization Act of 1984 to include any organization that received a grant from a state based on a waiver approved by the Secretary under the Appropriations Act of 1984, Pub. L. 98-139. Thus, the organizations or political subdivisions funded by the states of Colorado, Wyoming and Utah in fiscal year 1984 based on a waiver from the Secretary are now recognized as "eligible entities."

Section 202 also defines circumstances under which the governor of a state may designate an orgnaization or a political subdivision to serve a new area and thus qualify as an "eligible entity."

The Human Services Reauthorization Act of 1986 also expanded the definition of an eligible entity to cover certain successors in interest to a community action agency.

We received several comments which requested that we provide a definition of "eligible entity". We agree that a definition of the term would be helpful. An "eligible entity" is an organization that:

(1) Was officially designated as a community action agency or a community action program under the provisions of section 210 of the Economic Opportunity Act of 1964 for fiscal year 1981 and did not lose its designation; or

(2) Was a limited purpose agency under Title II of the Economic Opportunity Act of 1964 for fiscal year 1981 which served the general purposes of a community action agency under Title II of the Economic Opportunity Act and did not lose its designation; or

(3) Received financial assistance under section 222(a)(4) of the Economic Opportunity Act in fiscal year 1981; or

(4) Received a grant in fiscal year 1984 under the waiver provision of Pub. L. 98-139; or

(5) Was created, under section 6723(1)(C) of the Community Services Block Grant Act, to serve a geographic area not previously served; or

(6) Came into existence during fiscal year 1982 as a direct successor in interest to a community action agency or community action program and meets all the requirements under section 675(c)(3) of the Community Services Block Grant Act.

VOL 52 ISS 197 OCT 13 1987 UMI

Earmarks and Other Funding Limitations Under the Alcohol and Drug Abuse and Mental Health Services Block Grant ("ADMS")

Title XIX, Part B of the Public Health Service Act now has eight earmarks—percentage restrictions or requirements—that govern state expenditure of funds under the alcohol and drug abuse and mental health services block grant. These are as follows:

1. Section 1915(d) prohibits a State from using more than ten percent of the amount it is paid under the block grant for the cost of administering the block grant.

2. Section 1916(c)(6)(A) requires a State to use certain proportions of its nondiscretionary funds allocated under the fiscal year 1982 block grant for mental health activities and for substance abuse activities.

3. Section 1916(c)(6)(B) requires a State to divide at least 75 percent of its block grant allotment for fiscal years beginning after fiscal year 1984 into the percentages specified in section 1916(c)(6)(A), with the remainder available for discretionary use.

4. Section 1916(c)(7)(A) requires that, of the ADMS block grant funds required to be made available under 1916(c)(6), at least 35 percent shall be used for programs and activities relating to alcoholism and alcohol abuse.

5. Section 1916(c)(7)(B) requires that, of the ADMS block grant funds required to be made available by a State under 1916(c)(6), at least 35 percent shall be used for programs and activities relating to drug abuse.

6. Section 1916(c)(8) requires that, of the funds to be used by a State for alcohol and drug abuse activities, at least 20 percent shall be used for prevention and early intervention programs designed to discourage the abuse of alcohol or drugs, or both.

7. Section 1916(c)(14) requires a state to use not less than three percent in fiscal year 1985 and not less than five percent in any other fiscal year of its total block grant allotment to initiate and provide new or expanded alcohol and drug abuse services for women.

8. Section 1916(c)(15) requires that, of the amounts to be used in any fiscal year for mental health activities, a state shall use at least ten percent of such funds to initiate and provide (A) in fiscal year 1985 new comprehensive community mental health services for underserved areas or for underserved populations, with special emphasis on new mental health services for severely disturbed children and adolescents and (B) in any other fiscal year new or expanded services as set out in clause (A) above.

In addition to the limitations set out above, section 1915(c) allows a state to transfer not more than seven percent of its block grant allotment out of the block for the support of other activities specified by law. Not more than three percent of the allotment can be transferred in the first three quarters of a fiscal year.

Contact Persons for Block Grants

The contact persons for the block grants are as follows:

Alcohol and Drug Abuse and Mental Health Services

For information and assistance related to program matters: Gary L. Palsgrove, Deputy Director, Division of Intergovernmental Activities, Alcohol, Drug Abuse and Mental Health Administration, 5600 Fishers Lane, Room 13–C–05, Rockville, Maryland 20857 (301) 443–4564. Requests for programmatic technical assistance will be referred to the Institutes, as appropriate. For information and assistance related to fiscal and grants management matters: Thomas M. Reynolds, Grants Management Officer, Division of Grants and Contracts Management, Alcohol, Drug Abuse and Mental Health Administration, 5600 Fishers Lane, Room 13–C–20, Rockville, Maryland 20857 (301) 443–3334.

Preventive Health and Health Services

For information and assistance related to program matters: Jerry Spyke, Senior Public Health Advisor, Center for Preventive Services, Centers for Disease Control, 1600 Clifton Road, NE., Atlanta, Georgia 30333, (404) 329–1804. For information and assistance related to fiscal matters and grants management: Leo A. Sanders, Chief, Grants Management Branch, Centers for Disease Control, 255 E. Paces Ferry Road, NW., Room 107A, Atlanta, Georgia 30305, (404) 262–6576.

Maternal and Child Health Services

James Corrigan, Associate Director, Bureau of Community Health Services, 5600 Fishers Lane, Room 7–05, Rockville, Maryland 20857, (301) 443–2380.

Social Services

Janet Hartnett, Office of Policy, Planning and Legislation, Human Development Services, Room 318E, Humphrey Building, 200 Independence Avenue, SW., Washington, DC. 20201, (202) 245–2892. For information and assistance related to fiscal matters and grants management: David Ramos, Office of Management Services, Room 330E, Humphrey Building, 200 Independence Avenue, SW., Washington, DC 20201, (202) 472–3243.

Low-Income Home Energy Assistance and Community Serices Block Grant

David Kirker, Director, Office of Community Services, Room 427D Humphrey Building, 200 Independence Avenue SW., Washington, DC 20201, (202) 475–0373.

Section-by-Section Analysis of Changes in the Regulations

Section 96.14 Time period for obligation and expenditure of grant funds.

Prior to passage of the Human Services Reauthorization Act (Pub. L. 98–558), states receiving funds to administer the low-income home energy assistance program were permitted to hold available for obligation in the succeeding fiscal year up to 25 percent of their allotment. Beginning with fiscal year 1985 funds that are held available for fiscal year 1986, only 15 percent of funds payable to a State for a fiscal year and not transferred to another block grant may be held available for obligation in the following fiscal year. The amendments in Pub. L. 98–558 specify that funds payable to a State are those funds remaining after any portion of the state's allotment has been set aside for direct grants to applicant Indian tribes and tribal organizations. Section 96.14, which addresses the time period for the use of funds, has been changed accordingly.

Section 96.15 Waivers.

In accordance with Pub. L. 98–558, the Secretary's authority to waive application assurances for the low-income home energy assistance program is repealed, effective at the beginning of fiscal year 1986. Section 96–15, which lists the officials to whom applications for waivers should be sent, has been changed accordingly.

Section 96.17 Annual and biennial reports.

The notice of proposed rulemaking included a provision requiring the annual or biennial reports (except those for the low-income home energy assistance program and the community services block grant) to be made public and transmitted to the Secretary within six months of the end of the block grant reporting periods. (Submission of reports for the low-income home energy assistance program is governed by an existing regulation published at 45 CFR 96.82. No separate annual or biennial report is required for the community services block grant. Rather, the statute

authorizing that block grant requires that the annual report on State activities and expenditures be included as a part of the State's application for the succeeding year's funding.)

Annual reports are required for the health block grants: (preventive health and health services, 42 U.S.C. 300w–5(a)(1); alcohol and drug abuse and mental health services (42 U.S.C. 300x–5(a)(1)), and maternal and child health services (42 U.S.C. 706(a)(1)). A report at least every two years is required for the social services block grant (42 U.S.C. 1397e(a)). Although the statutes do not expressly require that the reports be transmitted within a particular period of time, a requirement that this be done within a reasonable period of time is implicit in those provisions. The reports are intended to provide information on the use of block grant funds for use by the States, their citizens and legislatures, and by the Department and Congress. The reports can only serve these functions if they are prepared, made public, and transmitted in a timely fashion.

We received five comments on the proposed provision. One State asked that we clarify the term "reporting period". In response, we wish to make clear that, for the health block grants, the reporting period is the same as the program year determined by the State to be the basis for administering activities funded under the block grants. In the case of the social service block grant the reporting period consists of two consecutive program years. A second State supported the change but interpreted it to mean that we were requiring annual (or biennial) reports in the case of block grants that do not have a statutory requirement for such reports. We wish to make clear that we are not imposing a requirement that States provide reports where they are not statutorily required to do so. Rather this provision sets a due date for reports for which there is already a statutory requirement.

Another State urged that we modify the rule to clarify that we are requiring that the State make the report *available* to the public and not requiring that the State publish the report. We agree and have modified the provision accordingly.

Two States objected to the due date as it applied to the social services block grant. One of the two States indicated that six months did not allow them sufficient time to prepare the report since the State relied on reports from local providers. The second State indicated that they have included reports on social service block grant expenditures in their applications for the following year and that the proposed six-month deadline would require preparation of a separate report. There are fourteen States that follow this practice.

In consideration of these comments and further consultation with States, we have modified this provision. The provision still requires States to submit reports within six months of the end of the reporting period. However, a State may submit its annual as a part of its application for funding for the year following the end of the six-month period. The deadline for the reports responds to State requests for a clearly specified due date for these reports. However, it allows certain States to continue their practice of including the annual report in their application for funds. The deadline does not ensure the public availability of a description of State block grant activities before the State finalizes plans for the subsequent year's program. However, the block grant statutes stress administrative flexibility and we believe that this outweighs the need for an earlier report. This is supported by the fact that Congress did not set a due date for any of the reports. Clearly, States may choose to make the required information available earlier than the deadline established in this rule. Although we are setting a particular deadline, we encourage States to consider how the timing of the report can contribute to an informed public discussion of future State activities. It should be noted that the establishment of a deadline for these reports does not alter the current policy of allowing States to determine the form and content of the report.

Section 96.30 Fiscal and administrative requirements.

Existing paragraph (b) of this section governs block grant audits. The revision being adopted removes that paragraph and transfers provisions relating to block grant audits to a new § 96.31—Audits.

Section 96.31 Audits.

The Single Audit Act, Pub. L. 98–502, requires units of State and local government to conduct a single audit of all Federal financial assistance received in a fiscal year. By the express terms of the Act, these "single audits" are to be conducted in lieu of the separate program audits required by other provisions of Federal law. Consequently, the Single Audit Act generally overrides the separate audit requirements of the block grant statutes.

The Department has concluded that the Single Audit Act takes precedence over all the block grant audit requirements despite the fact that some of the separate block grant audit requirements were amended several days after the Single Audit Act was enacted. Although the general rule of statutory construction is that the more recent of two conflicting statutes controls, Congress gave no indication of an intent to provide a limited repeal of the Single Audit Act by creating an exception for several block grants. In light of the strong presumption against implied repeals and the manifest congressional intent to impose a single, uniform and consistent audit requirement on recipients of Federal funds, the Department has determined that the Single Audit Act overrides the separate audit requirements in the block grant statutes.

There are two limitations on the applicability of the Single Audit Act. First, the Single Audit Act does not apply to any recipient's fiscal year that began before January 1, 1985. Second, a recipient that receives between $25,000 and $100,000 in total Federal financial assistance from any or all sources has the option of either conducting a single audit or conducting an audit in accordance with the terms of the specific Federal assistance program to be audited. (Any State, local government, or Indian tribe that receives less than $25,000 in total Federal financial assistance from any or all sources is, under the terms of the Single Audit Act, exempt from Federal audit requirements.)

The regulations set out requirements for audits conducted under the Single Audit Act and under the separate block grant programs. Single audits must be conducted in accordance with the Single Audit Act as interpreted by the Office of Management and Budget in Circular A–128, published at 50 FR 19114 (May 6, 1985).

The regulation also establishes reporting deadlines for audits that are conducted under some authority other than the Single Audit Act. While these dates are not expressly established by the relevant statutory provisions, a reasonable audit report deadline is implicit in the need to ensure timely assimilation of audit findings. As provided in OMB Circular A–128, audit reports for audits conducted under the Single Audit Act are required to be submitted within one year of the end of the audit period. We are requiring the some submission date for the audits that are conducted under an authority other than the Single Audit Act.

Audits conducted for state fiscal years that began prior to January 1, 1985, must be submitted within one year of the

VOL 52 ISS 197 OCT 13 1987 UMI

publication of this rule.

Section 96.32 Financial settlement.

This section of the final rule refers to the statutory requirement that states repay to the Department funds that have been determined by audit and audit resolution to have been expended improperly. Each block grant program is subject to a statutory provision that requires grantees to repay funds that have not been expended in accordance with the applicable block grant provisions: (Community services, 42 U.S.C. 9904(g); preventive health and health services, 42 U.S.C. 300w–5(b)(3); alcohol and drug abuse and mental health services, 42 U.S.C. 300x–5(b)(3); maternal and child health services (42 U.S.C. 706(b)(2), social services 42 U.S.C. 1397e(b); low-income home energy assistance, 42 U.S.C. 8624(g)). If an audit uncovers improper expenditures, the state is obligated to repay the Department. If repayment is not made voluntarily, the Department may obtain recovery through offset against other funds due the state. This will be undertaken in accordance with this rule and 45 CFR Part 30, "Claims Collection."

Section 96.33 Referral of cases to the Inspector General.

A new section has been added to identify the Regional Office of Investigations (of the Department's Office of the Inspector General) as the agency to which States and tribes should report information relating to possible fraud or other offenses against the United States.

Section 96.42 General procedures and requirements.

Current regulations at 45 CFR 96.42(b) set a deadline of September 1 for tribes to submit applications for direct grants. The deadline was imposed because states are responsible for serving tribal households if the tribe does not apply for a direct grant, and States need an early indication of which tribal households they must plan to serve. On the other hand, if a State has no objection to having additional funds set aside for a tribal application that is submitted after September 1, we have no objection. We have amended paragraph (b) of § 96.42 to allow for such circumstances.

Section 96.44 Community services.

We have amended § 96.44(e) to make clear that Indian tribes or tribal organizations do not have to comply with the assurance regarding termination of funding to a community action agency or a farmworker organization. This provision is not relevant in the case of Indian tribes and tribal organizations.

We have also added a new § 96.44(f) concerning the costs that Indian tribes and tribal organizations incur in administering the community services block grant. Congress amended section 675(c)(2)(B) of the community services block grant to permit States to expend the greater of $55,000 or five percent of the State's allotment on administrative expenses at the State level. In the notice of proposed rulemaking we indicated that the optional $55,000 ceiling did not apply to tribes or tribal organizations, because we were of the opinion that application of this provision to these entities would allow them to expend a disproportionate amount on administration.

We received one comment on this provision from a National Indian organization. The comment supported the proposed change in administrative costs for tribes under the low-income home energy assistance program and recommended that we provide similar flexibility for the administrative costs of small tribes under the community services block grant. The commenter agreed that the $55,000 amount would allow small tribes to expend too much on administrative costs, but suggested that we attempt to find other formulations that would carry out the intent of Congress to allow more flexibility while still keeping a reasonable limit on administrative costs. We agree with the comment. We have added § 96.44(f) to apply the limit on administrative cost to small tribes and tribal organizations in a manner that achieves the flexibility provided to States and small territories.

The section provides that Indian tribes and tribal organizations may spend for administrative expenses up to the greater of (1) five percent of their allotment or (2) the percent represented by the ratio of $55,000 to the smallest State allotment (excluding territorial allotments) for the fiscal year in question. The Office of Community Services will notify tribes and tribal organizations of the alternative percentage as soon as State and tribal allotments have been determined for the fiscal year.

Section 96.50 Complaints.

The change in this section clarifies that complaints regarding the health block grants should be submitted to either the Assistant Secretary for Health or to the administrator of the office responsible for administering the block grant.

Section 96.51(a) Hearings.

The revision of paragraph (a) clarifies the instances in which a State is entitled to a hearing on repayment of block grant funds. The section now states that no opportunity for a hearing will be offered if the State agrees to the repayment of block grant funds. This is in accordance with the clearly established principle that hearings are intended only to provide an opportunity to resolve disputed issues of law or fact.

Subpart H Low-Income Home Energy Assistance Program ("LIHEAP")

Section 96.81 Reallotment report.

Under the low-income home energy assistance program, the Secretary is required to reallot funds that are unused at the end of each fiscal year. States may request that a portion of their unused funds not be reallotted, but rather held available for use in the next fiscal year. Section 96.81 requires a grantee to submit a report that identifies those funds that are to be held available for use in the succeeding fiscal year and those funds that will be unspent and available for reallotment. Section 606(a) of Pub. L. 98–558 requires grantees to explain why funds were not expended during the fiscal year and to describe the types of assistance to be provided with those funds in the following fiscal year. Therefore, we have revised the reporting requirement at § 96.81 to require that States provide this information as part of their report due August 1 of each year.

Section 606(b)(1)(A) of Pub. L. 98–558 reduces the percentage of funds a State may request be held available for the subsequent fiscal year from 25% to 15% of those funds payable to the State and not transferred. This limit applies beginning with fiscal year 1985 funds held available for fiscal year 1986.

We received no comments on this section of the proposed regulation.

Section 96.82 Required report.

Section 96.82 requires grantees to submit an end-of-year report stating the total number of households assisted by income level. This revision to that section adds a requirement that grantees must report the number of households that contain one or more individuals who are 60 years or older and the number that contain one or more handicapped individuals. We received two comments on this section, one supporting and one opposing this proposed revision. The opposing comment suggested that the word "60 years or older" be replaced with the word "elderly" and indicated that this

would be more consistent with the intent of Congress under the block grants to provide States with maximum administrative flexibility. The comments also indicated that the proposed language would establish an arbitrary Federal definition of elderly and would substantially increase administrative expenses of those States that would be required to bring their administrative practice into compliance.

Congress mandated, by section 2610 of the statute, that the Department report to it annually the number of assisted households that contain "one or more individuals who are 60 years or older or are handicapped * * *" Consistent with this statutory requirement, we provided for the collection of data, including the number of households which received such assistance and included one or more individuals who are 60 years or older or handicapped.

This definition of elderly is for reporting purposes only and does not extend to program implementation. We understand that having two definitions, e.g., one for eligibility determinations and one for Federal reporting, may cause grantees some difficulty. However, the statute is quite specific. As we have no other source for this information at the State and tribal level, we have no alternative but to extend this reporting requirement to grantees. If this requirement creates significant difficulty for a particular grantee, we will, upon request, attempt to assist that grantee meet the requirement in the most efficient manner possible.

Section 96.83 Direct payments to SSI recipients

We have eliminated the section of the regulations which allowed States to request that the Federal government make LIHEAP payments to recipients of the Federal Supplemental Security Income program. The statutory provision allowing this method of payment was repealed by section 603(c) of Pub. L. 98–558.

We received one comment supporting the revision.

Section 96.86 State plans.

Section 605(c) of Pub. L. 98–558 amended the LIHEAP statute to require grantees to expend LIHEAP funds in accordance with the plan submitted as part of the grantee's application for funding. Consequently, the LIHEAP plan, as well as the statute and regulations, now governs the grantee's use of funds and provides standards of compliance. HHS, in exercising its statutory oversight and enforcement activities, and the State or independent tribal auditors, in carrying out their audit functions, must be able to ascertain the standard of compliance contained in the plan for each statutory provision and for each type of assistance provided by the grantee under its LIHEAP program.

Our review of State plans and programs over the past five years has indicated that many States have misinterpreted the statutory requirement in section 2605(c)(1) that grantees describe how they will carry out the assurances in section 2605(b) of Pub. L. 97–35.

Section 96.86 of the regulations clarifies the statutory requirement that all of the assurances in section 2605(b) apply to each form of assistance provided by the grantee, e.g., heating assistance, cooling assistance, crisis assistance and low-cost residential weatherization and energy-related home repairs. The assurance in section 2605(b)(15) is an exception to this rule. Clearly, on its terms it applies only to energy crisis intervention activities. That assurance, because of changes to the LIHEAP statute, is in effect only for fiscal years 1986 and 1987.

One comment suggested that if LIHEAP funds are expended under an approved Department of Energy (DOE) weatherization plan, the DOE plan should have precedence if its requirements conflict with LIHEAP provisions.

The Department does not have the authority to adopt this suggestion. We are aware that the provisions of the DOE Low Income Weatherization Assistance Program (LIWAP) and LIHEAP statutes differ in some ways. However, the Human Services Reauthorization Act of 1984 amended the LIHEAP statute by eliminating the Secretary's authority to waive LIHEAP provisions.

The areas of conflict are relatively few, related primarily to appropriate modifications, the treatment of owners and renters, and the provision of a fair hearing to applicants whose applications are denied or not acted upon with reasonable promptness. It appears that grantees have been able to successfully meet the requirements under both statutes.

Section 96.87 Prevention of waste, fraud and abuse.

Section 605(a)(9) of Pub. L. 98–558 requires that the Secretary issue regulations to prevent waste, fraud and abuse in the LIHEAP program. We have addressed this requirement in § 96.87, which requires grantees to have in place systems and procedures for preventing, detecting and correcting instances of waste, fraud, and abuse in the low-income home energy assistance program. The regulations also requires that these systems and procedures address waste, fraud, and abuse of vendors, clients, and administering agencies. We will review these systems and procedures in the course of the compliance reviews conducted by the Department under 42 U.S.C. 8627. Examples of activities that grantees may use to prevent, detect, and correct instances of waste, fraud, and abuse, include appropriate warning statements on beneficiary applications and vendor vouchers, computer screens, audits, and memoranda of understanding with investigative organizations.

One comment supported this provision but requested clarification as to whether the Department intended to further define the terms waste, fraud, and abuse. We believe the legislative history related to this provision clearly supports broad discretion as to how grantees will comply with the provision. Consequently, we declined to further define the terms by regulation.

Asserting that present administrative funds are inadequate, one comment requested that the Department increase the administrative cost limitation to allow for additional activities that may be required to prevent waste, fraud, and abuse. The administrative cost limitation is imposed on States by statute. The Secretary has no authority to waive any of the statutory provisions imposed on States. The Department is not imposing requirements in this area beyond those contained in the statute and regulation.

We received one comment from a State willing to share its experiences in the area of preventing waste, fraud and abuse and requesting suggestions from other State agencies. We believe this approach, rather than extensive Federal regulations, is the better way to identify appropriate measures to prevent waste, fraud and abuse. The Department conducted a round table discussion on the subject in February 1986. Copies of the proceedings are available from the American Public Welfare Association. Where possible, the Department will continue to provide for the exchange of information among grantees on issues of concern, including preventing waste, fraud, and abuse.

Section 96.88 Limitations on LIHEAP administrative costs.

(a) *Costs of planning and administration.* The statute for the low-income home energy assistance program includes an express limitation on the percent of funds that may be used for

planning and administering the program. In our final rules of July 6, 1982, we declined to define administrative costs for the block grants. Rather, in accordance with the intent of the block grant statutes, the regulation allows States to determine in the first instance which expenses constitute administrative costs chargeable to block grant funds.

While the final rule did not provide a detailed definition of planning and administrative costs, it did include guidance to grantees regarding the determination of administrative costs.

First, § 6.30 refers to State laws and procedures as governing the expenditure of block grant funds.

> Except where otherwise required by Federal law or regulation, a State shall obligate and expend block grant funds in accordance with the laws and procedures applicable to the obligation and expenditure of its own funds.

Guidance issued by the Office of Management and Budget on September 22, 1981 to States indicated that the State's usual definition of administrative costs would apply to the block grant.

Second, the preamble to the block grant regulations of July 6, 1982, established a standard of review for grantee interpretations of block grant provisions.

> Accordingly, when an issue arises as to whether a State has complied with * * * the statutory provisions, * * * the Department will ordinarily defer to the State's interpretation of * * * the statutory provisions. Unless the interpretation is clearly erroneous, State action based on that interpretation will not be challenged by the Department.

In late 1982, responding to an inquiry from a governor who requested an interpretation of administrative costs, the Secretary stated:

> * * * any reasonable interpretation by the states will be acceptable. Our standard for this and other interpretations is whether the state practice is clearly erroneous. It is difficult to imagine that a definition of administrative costs that is consistent with state practice could be considered clearly erroneous.

Third, the preamble to the block grant regulations of July 6, 1982 states:

> In the final analysis, the state must determine which expenses constitute administrative costs chargeable to grant funds on a case-by-case basis, subject to review on the same basis as other state interpretations of the block grant statutes. This decision will be based upon the intrinsic nature of each program and the standard accounting procedures followed by each state. As a general matter, administrative costs are all the costs of program administration,whether they could be considered direct or indirect costs under categorical grants.

This guidance provided grantees with maximum flexibility to define administrative costs consistent with the broad statutory guidelines. The Department declined to provide additional guidance in the regulations because we believed that the meaning of the statute was sufficiently clear.

Since that time, in carrying out the compliance function assigned to the Department by statute, we have learned of misunderstandings on the part of some states and tribes as to (1) whether the costs of planning and administration incurred by subgrantees, local administering agencies and contractors must be considered in assessing compliance with the statutory limits on administrative costs, and (2) what costs are normally associated with the administration of a public assistance program.

We have been addressing these issues in enforcement proceedings. This is a lengthy process which could lead to withholding or ordering repayment of funds found not to have been expended in accordance with the statute. Currently, the Department is reviewing decisions of several grantees to exclude certain costs from the administrative cost limitation. We are concerned that a number of grantees are incurring substantial costs that may eventually be subject to repayment under section 2605(g) of the LIHEAP statute.

Based on these concerns, we decided to clarify this provision by regulation, rather than through audit or compliance reviews of individual grantees.

The notice of proposed rulemaking included a § 96.88 that stated:

Section 96.88 Administrative costs

> (a) *Costs of planning and administration.* Any expenditure for governmental functions normally associated with administration of a public assistance program, such as taking applications, determining eligibility and benefits, and monitoring the assistance provided, must be included in determining administrative costs subject to the statutory limitation on administrative costs, regardless of whether the expenditure is incurred by the state, a subrecipient, a grantee, or a contractor of the state.

The section was intended to clarify the administrative cost limitation in two ways. First, it stated that the limit applied to costs incurred in administration of the program, regardless of whether they were incurred by the state, a subrecipient, a grantee, or a contractor of the state. Second, it defined administrative costs as those expenditures normally associated with administration of a public assistance program, including taking applications, determining eligibility and benefits, and monitoring the assistance provided.

The Department received approximately 100 comments on the proposed language. Only a few comments contested the aspect of the proposed language that required administrative costs from all program levels to be included in the determination of state adherence with the statutory limit on administrative costs. One comment stated that since Congress did not specifically include subrecipients, grantees, and contractors of states in the definition of "state" in section 2603(6) of the LIHEAP statute, it must not have intended that these entities be included under the administrative cost limitation.

We disagree. There is no indication in the statute or legislative history that Congress intended this interpretation. Where Congress has intended to apply the administrative cost limits to expenditures at the State level only, it has done so explicitly. For example, the limitation on administrative costs under the community services block grant clearly applies only to the State level expenditures. By failing to include similar language in the LIHEAP statute, we conclude that Congress intended to limit aggregate administrative costs, regardless of whether they are incurred at the State or subrecipient level. We have maintained that aspect of the proposed rule in the final rule.

Almost all of the remaining comments on this section objected to our attempt to clarify functions that are administrative. The comments demonstrated considerable variation in the kinds of activities that might be included in the functions listed in the proposed regulation. Because the inclusion of these functions in regulation might unintentionally have infringed on state prerogatives to define administrative costs in a manner consistent with the statute, we are removing from the final rule the reference to the specific functions.

We are concerned, however, that many of the comments reflected a lack of understanding of the strict limits placed on administrative costs by the statute. While we are not including the list of specific functions in the final rule, nonetheless, we believe that the costs associated with those functions, i.e., taking applications, determining eligibility and benefit levels, and monitoring the assistance provided, are normally administrative in a predominantly cash assistance program, such as LIHEAP. Consequently, we will

VOL 52 ISS 197 OC 13 1987 UMI

carefully assess any other categorization of these costs in our compliance reviews and in our reviews of audit findings.

We recognize that a grantee's program may include a variety of benefits and administrative structures. For example, a grantee may provide cash assistance, services, and in-kind benefits. Certain activities associated with one type of benefit may be administrative, while a similar activity associated with another may not be. We will continue to examine grantee programs on a case-by-case basis, looking in particular to other State programs that provide analogous benefits to determine the appropriateness of the State's definition of administrative costs for LIHEAP.

Some comments mistakenly assumed that "outreach" was included in our proposed definition of administrative costs and asserted that outreach is directly related to service delivery rather than to administration. We agree that outreach activities are not intrinsically administrative and therefore we excluded this term from the proposed list. In some cases, the term refers to providing general information to the public about the existence of the LIHEAP program. In others, cited in a number of comments, the term includes such activities as budget counselling, energy education, arranging deferred or budget payment arrangements with energy providers, and other services directly related to the purpose of the statute. The term encompasses activities that are administrative and others that are not. We will review the appropriateness of a grantee's definition of outreach costs during compliance reviews and audits.

Several comments objected to the issuance of any Departmental regulation in the area of administrative costs. Several cited the Secretary's letter of July 15, 1982 (see above) as stating a policy not to regulate block grant administrative costs. The Secretary's letter indicates that the Department at that time had decided against further definition of administrative costs. However, for the reasons stated above, we believe that clarification of the issue of administrative costs is clearly warranted.

Two comments apparently held that all costs incurred by subrecipients, subgrantees, and contractors are program costs because they are closely associated with the delivery of services. Similarly, a number of comments asserted that expenditures related to the functions listed in the proposed rule are directly related to serving clients and are, therefore, "program" or "program support" rather than administration.

We disagree with these comments for three reasons. First, this interpretation is inconsistent with the preamble to the final block grant regulations. This stated that the grantees' determination of administrative costs is based upon the intrinsic nature of each program and the standard accounting procedures followed by each grantee, rather than on the type of agency.

Second, these comments characterize LIHEAP as a service program. While we recognize that certain aspects of LIHEAP involve the delivery of services, in fact, the largest expenditure of LIHEAP funds is for cash assistance. As we indicated earlier, a grantee must determine which expenses constitute administrative costs chargeable to the grant funds based upon the nature of the program and the standard accounting procedures for analogous programs followed by the grantee.

Third, costs associated with determining whether an applicant may receive assistance or assessing whether subgrantees or contractors are following the grantee's plan and procedures are intrinsically administrative in the context of a public assistance program. As noted in the preamble to the block grant regulations of July 6, 1982, the limit upon administrative expenditures is indicative of congressional intent that a very high percentage of a grantee's funds be paid to recipients as benefits or direct services to carry out the purpose of the statute.

A number of comments assumed that the regulatory definition would require expenditure of ninety percent of a grantee's funds for cash assistance and weatherization materials and ten percent for all other costs, and that as a consequence the subrecipients would not have the financial resources to properly or effectively operate their programs. These comments also contended that such an interpretation would hurt the most vulnerable clients, including the elderly and handicapped, and necessitate operation of LIHEAP as a centralized, "pass-through welfare program" and a subsidy for utility companies.

The LIHEAP statute imposes a strict limit on administrative costs. Our compliance reviews and review of audits demonstrate that most grantees are implementing their programs successfully within the statutory limit on administrative costs. A few grantees are not in compliance with this provision and may have to modify their programs to meet the statutory limitation on administrative costs or to fund the excess administrative cost from non-Federal funds. This is unavoidable under the current statute. As noted in the preamble to the July 6, 1982 final regulation:

> There is some indication that Congress intended that states use non-Federal funds to administer block grant programs where necessary. For example, section 2605(b)(9)(B) of the Act expressly requires that states use non-federal funds for planning and administering the low-income home energy assistance program where a state's costs for those activities exceed 10 percent of the state's allotment.

Several comments appeared to assume that only the costs of materials could be considered as non-administrative costs under the Low-Income Weatherization Assistance Program of the Department of Energy. As a matter of practice, the Department usually will not question the categorization of costs used by a grantee for weatherization under section 2605(k) when such funds are expended by a grantee under an approved Low-Income Weatherization Assistance Program plan—provided that such expenditures are otherwise consistent with the LIHEAP statute. (See our comments concerning § 96.86 of these regulations.)

Several local service providers assumed that the limit on administrative costs was imposed by regulation, rather than statute. They claimed that they could not properly operate energy assistance programs under this limitation. As previously indicated, the Department has no discretion to vary the limitation on administrative costs for states. Most States are operating within these limits and we do not believe that the statute has imposed an unreasonable limit. We have several activities under way to assist States and tribes to exchange information on ways to reduce administrative costs.

A number of comments cited dictionary definitions of "administration" as "management of affairs" in contesting the proposed definition. When a dictionary definition frequently is relevant to clarifying congressional intent, it must be considered in context with other relevant statutory and regulatory guidance.

Several comments contended that our definition of administrative costs would limit the resources available to prevent error, fraud, and abuse. As we indicated above, the limit on administrative funds is imposed by statute. Even though the statute imposes requirements on grantees that may necessitate the expenditure of additional funds, the Department does not have the legal authority to alter the amount available for administering LIHEAP.

VOL
52
ISS
197
OC
13
1987
UMI

A number of comments referred to certain other Federal programs or regulations and claimed that policies or regulations applicable to these programs supported the exclusion of the activities we cited in the proposed regulation from consideration as administrative costs. We contacted the Federal agency responsible for administering each of the programs cited in the comments, e.g., Job Training Partnership Act, Urban and Mass Transit Authority, Federal Highway Administration, Head Start, Medicaid, and Aid to Families with Dependent Children. Most of the programs cited are not cash assistance programs and therefore do not provide adequate basis for defining administrative costs. Under the AFDC program, which as a cash assistance program may be analogous to LIHEAP, the activities cited in the proposed rule—taking applications, determining eligibility and benefits, monitoring assistance provided—are, in fact, considered administrative costs.

Finally, we note that none of the comments cited grantee laws and procedures or administrative cost definitions in analogous State-funded asssitance programs (e.g., general assistance) in support of the position that the functions cited in the proposed rule are administrative in nature. Section 96.30 clearly establishes that the laws and procedures that govern the use of a grantee's own funds will determine the appropriateness of the obligation and expenditure of block grant funds, unless those laws and procedures are inconsistent with the block grant statute or regulations. As we indicated earlier, in reviewing grantee compliance with the statutory limit on administrative costs, we will continue to rely substantially upon the laws and procedures of the grantee.

(b) *Administrative costs of territories and Indian tribes.* Experience has shown that each grantee incurs certain basic administrative costs in developing and implementing a LIHEAP program. The statute requires that each state limit these planning and administrative expenditures to no more than 10 percent of the funds payable to it and not transferred for use under other block grants. As the LIHEAP allotments to the States are substantial, the 10 percent ceiling on planning and administrative costs allows each State sufficient funds for these purposes.

Some tribes and territories, however, receive relatively small LIHEAP allotments and the flat 10 percent limitation on planning and administrative expenditures may not be sufficient to cover the basic costs of developing and implementing their program. Accordingly, we have concluded that the 10 percent limitation on planning and administrative expenditures is not appropriate to tribal grantees. *See* 45 CFR 96.42(a). Similarly, with respect to certain territorial grantees, we have concluded that a different limitation on planning and administrative expenditures would, pursuant to 42 U.S.C. 8623(b)(2), be consistent with the statutory limitation on planning and administrative expenditures. Consequently, we are modifying the limitations on planning and administrative expenditures for tribal and territorial grantees. For tribal and territorial grantees whose funds payable are $20,000 or less, the limitation on the cost of planning and administering the program is 20 percent of the funds payable under the LIHEAP program and not transferred for use under another block grant. For tribal and territorial grantees whose funds payable are over $20,000, the limitation is $4,000 plus 10 percent of the amount of the funds payable and not transferred that exceed $20,000.

The revised limit is based upon estimates for costs associated with audit, personnel, plan development, and overhead. Audit costs considered the cost of an audit apportioned among Federal programs audited by a tribe under the Single Audit Act, allowing a minimum of $300. Personnel costs were based on two hours of processing time per application at a salary of $7 per hour. A figure equal to fifteen percent of personnel costs was allowed for overhead and costs associated with completing and submitting the grant application.

We received several comments suggesting that the administrative limitation be increased for all grantees or for all small grantees, including States. The administrative cost limitation is imposed on States by statute and the Secretary has no authority to waive any of the statutory provisions for States. The Department does have authority under the statute to define the rights and responsibilities of territories and Indian tribes.

We believe this regulation provides the increased flexibility necessary for small grantees to administer their LIHEAP programs.

SUBPART I—COMMUNITY SERVICES

Section 96.92 Termination of funding.

Section 675(c)(11) of the Community Services Block Grant Act, as added by section 203(a)(3) of Pub. L. 98–558, requires a State to provide assurances that it will not end present or future funding of certain entities unless, after issuing notice of the proposed termination and affording an opportunity for a hearing on the record, the State determines that there is cause for terminating funding. Section 676A of the Community Services Block Grant Act, as added by section 203(d) of Pub. L. 98–558, further provides that upon request, the Secretary will review the record of the State's decision to terminate funding. If such a review is requested, the State's decision cannot take effect unless and until the Secretary confirms the State's finding of cause for terminating funding. The grantee has 30 days in which to request a review. The proposed regulation sets out these requirements and indicates that the Department will, upon request for a review of the State's determination, review the State's hearing record and confirm or reject the State's finding of cause for termination. Normally this will take 90 days from receipt of the request.

Several comments suggested that the regulation provide an opportunity for interested parties to make written comments to the Department on the State's final decision before the Department confirms or rejects the State's finding of cause. We have not changed the regulation in this regard. Affected parties will have an opportunity to provide information and their views to the State. This will be part of the State's hearing record and will be submitted to the Department by the State, if there is an appeal of the State's decision to terminate. We believe that the record will provide sufficient information to enable the Department to confirm or reject the State's finding of cause for termination and that the interests of the affected parties are adequately protected by Departmental review of that record.

SUBPART L—ALCOHOL AND DRUG ABUSE AND MENTAL HEALTH SERVICES BLOCK GRANT

Section 96.111 Earmarks.

Pub. L. 98–509 added, and Pub. L. 99–117 subsequently modified, two new earmark requirements to the alcohol and drug abuse and mental health services block grant. Section 1916(c)(14) requires States to use in fiscal year 1985 not less than three percent and in any other fiscal year not less than five percent of its total block grant allotment to initiate and provide new or expanded alcohol and drug abuse services for women. Section 1916(c)(15) requires that, of the amounts to be used in any fiscal year for mental health activities, a State shall

use at least 10 percent of such funds to initiate and provide (a) in fiscal year 1985 new comprehensive community mental health services for underserved areas or for underserved populations, with special emphasis on new mental health services for severely disturbed children and adolescents and (b) in any other fiscal year new or expanded services as set out in clause (a) above.

The conference report for Pub. L. 98–509 makes clear that each State should target earmarked services based on local needs. The legislative history of Pub. L. 99–117 expresses congressional intent to "allow the States somewhat more flexibility by allowing them to create new treatment opportunities through expansion of existing services as well as through the initiation of entirely new ones."

Consistent with the intent of Congress to allow the States flexibility in implementation of the law, the Department has determined that the baseline for deciding whether services are "new" or "expanded" is fiscal year 1984.

Using fiscal year 1984 as a baseline for determining whether services are "new" or "expanded" avoids cumulating the earmarks in fiscal years after fiscal year 1985. The negative aspects of such a cumulative effect are that over time an excessively large portion of a state's total allotment would be used to satisfy the two earmarks, thus significantly negating the extensive planning and public participation process the statute requires States to undertake in deciding how to spend their allotments and diminishing the State's flexibility in implementing the law.

Technical Corrections

The revision of § 96.2 indicates that, for each block grant program, the regulations apply to any entity defined as a "state" by the applicable block grant statutory provisions. This revision is intended to make clear that references to "states" apply to eligible territories and other non-State jurisdictions.

Section 96.16, Applicability of Title XVII of the Reconciliation Act, has been revised to add appropriate citations to the codification of the Act in the United States Code.

These rules also correct two citations in § 96.46(c) relating to funding applications from Indian tribes under the alcohol and drug abuse and mental health services block grant.

Executive Order 12291

The regulation implements a series of legislative changes which are minor or technical in nature. None will involve a substantial cost. Therefore, this is not a major rule under Executive Order 12291.

Regulatory Flexibility Act

The Department of Health and Human Services certifies that this regulation will have no significant impact on a substantial number of small entities, small businesses, small organizational units, and small governmental jurisdictions. The rules principally affect state administration of block grant funds. States are not "small entities" for purposes of the Act, and the regulation would not have any substantial or significant effects on other entities.

One comment asserted that the regulation as proposed violates the requirements of Executive Order 12291 and the Regulatory Flexibility Act by not providing statements of the impact on local governments or small entities of the § 96.88 (LIHEAP administrative costs) of the proposed rule.

We disagree. The administrative cost limit is imposed by statute upon States. Neither the statute nor the regulation provide an express limit on the administrative costs incurred by subrecipients of the State. Furthermore, States are provided with substantial discretion as to how to structure their program so as to meet the 10 percent limit on administrative costs. This includes choosing service delivery mechanisms that have lower administrative costs and providing additional State funds to provide for administration of the program should they choose mechanisms that exceed the administrative limit imposed by the statute.

List of Subjects in 45 CFR Part 96

Administrative practice and procedure, Aged, Alcoholism, Child welfare, Community action program, Drug abuse, Energy, Grant programs-energy, Grant programs-health, Grant programs-Indians, Grant programs-social programs, Health, Indians, Investigations, Low and moderate income housing, Maternal and child health, Mental health programs, Public health, Reporting and recordkeeping requirements, Social Security.

For the reasons set forth in the preamble, Part 96 of Title 45 of the Code of Federal Regulations is amended as follows:

PART 96—[AMENDED]

1. The authority for Part 96 of Title 45 is revised to read as follows:

Authority: 42 U.S.C. 300w *et seq.*; 42 U.S.C. 300x *et seq.*; 42 U.S.C. 300y *et seq.*; 42 U.S.C. 701 *et seq.*; 42 U.S.C. 8621 *et seq.*; 42 U.S.C. 9901 *et seq.*; 42 U.S.C. 1397 *et seq.*; 31 U.S.C. 1243 *note.*

Subpart A—Introduction

2. In § 96.2, by adding a new paragraph (d) to read as follows:

§ 96.2 Definitions.

* * * * *

(d) "State" includes the fifty states the District of Columbia and, as appropriate with respect to each block grant, the Commonwealth of Puerto Rico, the Virgin Islands, Guam, American Samoa, the Commonwealth of the Northern Mariana Islands, and the Trust Territory of the Pacific Islands.

Subpart B—General Procedures

3. By revising paragraph (a) introductory text and (a)(2) of § 96.14 to read as follows:

§ 96.14 Time period for obligation and expenditure of grant funds.

(a) *Obligations.* Amounts unobligated by the State at the end of the fiscal year in which they were first allotted shall remain available for obligation during the succeeding fiscal year for all block grants except:

* * * * *

(2) *Low-income home energy assistance.* Amounts are available only in accordance with 42 U.S.C. 8626(b)(2)(B). From allotments for fiscal year 1982 through fiscal year 1984, a maximum of 25 percent may be held available for the following fiscal year. Beginning with fiscal year 1985, a maximum of 15 percent of the amount payable to a State and not transferred to another block grant according to 42 U.S.C. 8623(f) may be held available for the next fiscal year. No funds may be obligated after the end of the fiscal year following the year for which they were allotted.

* * * * *

4. By revising § 96.15 to read as follows:

§ 96.15 Waivers.

Applications for waivers that are permitted by statute for the block grants should be submitted to the Assistant Secretary of Health in the case of the preventive health and health services, alcohol and drug abuse and mental health services, and maternal and child health services block grants; to the Director, Office of Community Services in the case of the community services block grant; and to the Assistant Secretary for Human Development Services in the case of the social services block grant. Beginning with

VOL 52 ISS 197 OC 13 1987 UMI

fiscal year 1986, the Secretary's authority to waive the provisions of 42 U.S.C. 8624(b) under the low-income home energy assistance program is repealed.

5. Section 96.16 is revised to read as follows:

§ 96.16 Applicability of Title XVII of the Reconciliation Act (31 U.S.C. 7301–7305).

This section interprets the applicability of the general provisions governing block grants set forth in Title XVII of the Reconciliation Act (31 U.S.C. 7301–7305):

(a) Except as otherwise provided in this section or unless inconsistent with provisions in the individual block grant statutes, 31 U.S.C. 7301–7305 apply to the community services, preventive health and health services, and alcohol and drug abuse and mental health services block grants.

(b) The requirement in 31 U.S.C. 7303(b) relating to public hearings does not apply to any of the block grants governed by this part. Instead, the provisions in the individual block grant statutes apply.

(c) The maternal and child health services block grant is not subject to any requirements of 31 U.S.C. 7301–7305.

(d) The social services and low-income home energy assistance programs are subject only to 31 U.S.C. 7304.

(e) The audit provisions of 31 U.S.C. 7305 have, in most cases, been overridden by the Single Audit Act. Pub. L. 98–502, 31 U.S.C. 75, et seq., and do not apply to the block grants. Pursuant to § 96.31(b)(2), certain entities may, however, elect to conduct audits under the block grant audit provisions. For entities making this election, the provisions of 31 U.S.C. 7305 apply to the community services block grant.

(f) The applicability of 31 U.S.C. 7303(a) relating to the contents of a report on proposed uses of funds is specified in § 96.10.

6. By adding a new § 96.17 to Subpart B to read as follows:

§ 96.17 Annual and biennial reporting deadlines.

Except for the low-income home energy assistance program activity reports, a State must make public and submit to the Department, each annual and biennial report required by statute:

(a) Within six months of the end of the period covered by the report; or

(b) At the time the State submits its application for funding for the Federal fiscal year which begins subsequent to the expiration of that six-month period. These reports are required annually for preventive health and health services (42 U.S.C. 300w–5(a)(1)), alcohol and drug abuse and mental health services (42 U.S.C. 300x–5(a)(1)), and maternal and child health services (42 U.S.C. 706(a)(1)), and biennially for the social services block grant (42 U.S.C. 1397e(a)). See § 96.82 for requirements governing the submission of activity reports for the low-income home energy assistance program.

Subpart C—Financial Management

§ 96.30 [Amended]

7. By removing paragraph (b) of § 96.30 and removing the designation "(a)" from the first paragraph of that section.

8. By adding new § 96.31 to Subpart C to read as follows:

§ 96.31 Audits.

(a) *Fiscal periods beginning before January 1, 1985.* All block grant funds received in any grantee fiscal year beginning before January 1, 1985, are subject to the audit requirements set forth in each of the respective block grant statutes. Reports on the audit results for all fiscal years subject to this paragraph must be submitted to the Department within one year of the date of publication of this rule.

(b) *Fiscal periods beginning on or after January 1, 1985.* (1) Each State, local government, and Indian tribe or tribal organization that receives $100,000 or more (during the grantee's fiscal year) in all types of Federal financial assistance provided through the block grants and all other Federal programs must conduct an audit in accordance with the Single Audit Act, Pub. L. 98–502, 31 U.S.C. 75 *et seq.* The Office of Management and Budget has implemented the Single Audit Act through publication of OMB Circular A–128, which is set out in full at 45 CFR Part 74, Appendix J of the Department's Grant Administration Regulations. Grantees must comply with the requirements of 45 CFR Part 74, Appendix J.

(2) Each State, local government, or Indian tribe or tribal organization that receives at least $25,000 and less than $100,000 in total Federal financial assistance from all sources must, at its option, audit block grant funds under either the Single Audit Act or the separate audit requirements set out in each respective block grant statute (or, in the case of the community services block grant, the requirements in 31 U.S.C. 7305). Any audit that is conducted under the block grant audit requirements must be conducted in accordance with standards that are consistent with the Comptroller General's standards for the audit of governmental organizations, programs, activities, and functions. Reports on the results of any such audit must be submitted to the Department within one year of the date of publication.

(c) *Submission of audit reports.* Reports of audits conducted under either the Single Audit Act or the block grant statutes shall, if required to be submitted to the Department, be submitted to the Regional Inspector General for Audit responsible for the Federal region in which the block grant recipient is located.

9. By adding new § 96.32 to Subpart C to read as follows:

§ 96.32 Financial settlement.

The State must repay to the Department amounts found after audit resolution to have been expended improperly. In the event that repayment is not made voluntarily, the Department will undertake recovery.

10. By adding new § 96.33 to Subpart C to read as follows:

§ 96.33 Referral of cases to the Inspector General.

State or tribal officials who have information indicating the commission or potential commission of fraud or other offenses against the United States involving block grant funds should promptly provide the information to the appropriate Regional Office of Investigations of the Department's Office of the Inspector General.

Subpart D—Direct Funding of Indian Tribes and Tribal Organizations

11. By revising § 96.42(e) to read as follows:

§ 96.42 General procedures and requirements.

* * * * *

(e) Beginning with fiscal year 1983, any request by an Indian tribe or tribal organization for direct funding by the Secretary must be submitted to the Secretary, together with the required application and related materials, by September 1 preceding the Federal fiscal year for which funds are sought. A separate application is required for each block grant. After the September 1 deadline, tribal applications will be accepted only with the concurrence of the State (or States) in which the tribe or tribal organization is located.

* * * * *

12. By amending § 96.44 to add paragraph (e)(4) to read as follows:

§ 96.44 Community services.

(e) * * *

(4) Section 675(c)(11) (42 U.S.C. 9904(c)(11)).

13. By adding new paragraph (f) to § 96.44 to read as follows:

§ 96.44 Community services.

* * * * *

(f) In each fiscal year, Indian tribes and tribal organizations may expend for administrative expenses—comparable to the administrative expenses incurred by State at the State level—an amount not to exceed the greater of the amounts determined by: (1) Multiplying their allotment under section 674 of the Reconciliation Act (42 U.S.C. 9903) by five percent; or (2) multiplying the allotment by the percentage represented by the ratio of $55,000 to the smallest State allotment (excluding territorial allotments) for that fiscal year.

14. By revising § 96.46(c) to read as follows:

§ 96.46 Alcohol and drug abuse and mental health services.

* * * * *

(c) An Indian tribe or tribal organization is not required to comply with section 1916(b) (42 U.S.C. 300x–5(b) or to provide the certifications required by section 1916(c)(2) through (8) and (13) through (15) of the Public Health Service Act (42 U.S.C. 300x–4 (c)(2) through (c)(8) and (c)(13) through (c)(15)). Also, the service identified in section 1915(a)(1) (42 U.S.C. 300x–3 (a)(1)) need not be provided by means of grants to community mental health centers.

Subpart E—Enforcement

15. By revising § 96.50(b) to read:

§ 96.50 Complaints.

* * * * *

(b) Complaints with respect to the health block grants must be submitted in writing to either the Assistant Secretary for Health or: for the preventive health and health services block grant, the Director, Centers for Disease Control; for the alcohol and drug abuse and mental health services block grant, the Administrator, Alcohol, Drug Abuse, and Mental Health Administration; for the maternal and child health services block grant, the Administrator, Health Resources and Services Administration. Complaints with respect to the social services block grant must be submitted in writing to the Assistant Secretary for Human Development Services. Complaints with respect to the low-income home energy assistance program and the community services block grant must be submitted in writing to the Director, Office of Community Services. (The address for the Director, Center for Disease Control is 1600 Clifton Road, NE., Atlanta, Georgia 30333. For each of the other officials cited above the address is 200 Independence Avenue SW., Washington, DC 20201.) The complaint must identify the provision of the act, assurance, or certification that was allegedly violated; must specify the basis for the violations it charges; and must include all relevant information known to the person submitting it.

* * * * *

16. By revising paragraph (a) of § 96.51 to read as follows:

§ 96.51 Hearings.

(a) The Department will order a State to repay amounts found not to have been expended in accordance with law of the certifications provided by the State only after the Department has provided the state notice of the order and an opportunity for a hearing. Opportunity for a hearing will not be provided, however, when the State, in resolving audit findings or at another time, has agreed that the amounts were not expended in accordance with law or the certifications. The hearing will be governed by Subpart F of this part and will be held in the State if required by statute.

* * * * *

Subpart H—Low-Income Home Energy Assistance Program

17. By revising § 96.81 to read:

§ 96.81 Reallotment report.

As a part of the reallotment procedure established by 42 U.S.C. 8626, beginning with funds to be held available for fiscal year 1986, each recipient of funds must submit a report to the Secretary by August 1 of each year containing the following information.

(a) The amount of funds that the State desires remain available for obligation in the succeeding fiscal year, not to exceed 15 percent of the funds payable to the State and not transferred pursuant to 42 U.S.C. 8623(f);

(b) A statement of the reasons that this amount to remain available will not be used in the fiscal year for which it was allotted;

(c) A description of the types of assistance to be provided with the amount held available; and

(d) The amounts of funds, if any, to be subject to reallotment.

(Approved by the Office of Management and Budget under control Number 0960–0446)

18. Section 96.82 is revised to read as follows:

§ 96.82 Required report.

In accordance with 42 U.S.C. 8629(a), each State receiving funds shall submit to the Department by October 31 of each year a report of:

(a) The number and income levels of the households assisted by LIHEAP funds during the preceding fiscal year; and

(b) The number of households assisted by LIHEAP funds during the preceding fiscal year that contain one or more individuals who are 60 years or older and the number which contain one or more individuals who are handicapped.

(Approved by the Office of Management and Budget under control Number 0960–0446)

§ 96.83 [Removed]

19. Part 96 is amended by removing § 96.83.

20. By adding a new § 96.86 to read as follows:

§ 96.86 State plans.

The assurances in section 2605(b) of Pub. L. 97–35, as

The assurances in section 2605(b) of Pub. L. 97–35, as amended, pertain to all forms of assistance provided by the State.

21. By adding a new § 96.87 to Subpart H to read as follows:

§ 96.87 Prevention of waste, fraud and abuse.

States and Indian tribes must establish appropriate systems and procedures to prevent, detect and correct waste, fraud and abuse in activities funded under the low-income home energy assistance program. The systems and procedures are to address possible waste, fraud and abuse by clients, vendors and administering agencies.

22. By adding a new § 96.88 to Subpart H to read as follows:

§ 96.88 Administrative costs.

(a) *Costs of planning and administration.* Any expenditure for governmental functions normally associated with administration of a public assistance program must be included in determining administrative costs subject to the statutory limitation on administrative costs, regardless of whether the expenditure is incurred by the State, a subrecipient, a grantee, or a contractor of the State.

(b) *Administrative costs for territories and Indian tribes.* For Indian tribes, tribal organizations and territories with allotments of $20,000 or less, the limitation on the cost of planning and administering the low-income home

VOL 52 ISS 197 OCT 13 1987 UMI

energy assistance program shall be 20 percent of funds payable and not transferred for use under another block grant. For tribes, tribal organizations and territories with allotments over $20,000, the limitation on the cost of planning and administration shall be $4,000 plus 10% of the amount of funds payable (and not transferred for use under another block grant) that exceeds $20,000.

Subpart I—Community Services Block Grant

23. By adding a new § 96.92 to Subpart I to read as follows:

§ 96.92 Termination of funding.

Where a state determines pursuant to section 675(c)(11) of the Community Services Block Grant Act that it will terminate present or future funding of any community action agency or migrant and seasonal farmworker organization which received funding in the previous fiscal year, the State must provide the organization with notice and an opportunity for hearing on the record prior to terminating funding. If a review by the Secretary of the State's final decision to terminate funding is requested pursuant to section 676A, the request must be made in writing, within 30 days of notification by the State of its final decision to terminate funding. The Department will confirm or reject the State's finding of cause, normally within 90 days. If a request for a review has been made, the State may not discontinue present or future funding until the Department confirms the State's finding of cause. If no request for a review is made within the 30-day limit, the State's decision will be effective at the expiration of that time.

24. A new Subpart L consisting of §§ 96.110 and 96.111 is added to read as follows:

Subpart L—Alcohol and Drug Abuse and Mental Health Services Block Grant

§ 96.110 Scope.

This subpart applies to the alcohol and drug abuse and mental health services block grant.

§ 96.111 Earmarks.

For the purposes of determining whether a state has initiated a new or expanded service within the meaning of the earmarks set out in sections 1916(c)(14) and 1916(c)(15) of the Public Health Service Act, a service will be considered "new" or "expanded" to the extent that it exceeds funds expended by the state in fiscal year 1984.

Otis R. Bowen,

Secretary.

FEDERAL COMMUNICATIONS COMMISSION

47 CFR Part 31

[CC Docket No. 79-105; RM-3017; FCC 87-221]

Uniform System of Accounts for Class A and Class B Telephone Companies

AGENCY: Federal Commnications Commission.

ACTION: Memorandum opinion and order vacating decision.

SUMMARY: The order vacates the Commission decision in 92 FCC 2d 864 (1983), published on January 19, 1983, 48 FR 2324 that held that Communications Act of 1934 did not permit State regulatory commissions to require telephone companies to use depreciation methods and rates that are different from those we prescribe for the same equipment unless we had expressly granted exemptions from this requirement for those companies, or, alternatively, that use of different depreciation methods and rates by state commissions would frustrate the goals we sought to achieve when we adopted new depreciation policies. This action is taken to comply with the decision of the United States Supreme Court that reversed the decision of the Fourth Circuit that affirmed the Commission Order, holding that the Commissions Act "denies the FCC the power to preempt state regulation of depreciation for intrastate ratemaking purposes." *Louisiana Public Service Comm'n* v. *FCC*, 106 S. Ct. 1890, 1901 (1986).

BILLING CODE 6712-01-M

47 CFR Part 73

[MM Docket No. 86-223; RM-5083]

Radio Broadcasting Services; Crosby, MN

AGENCY: Federal Communications Commission.

ACTION: Final rule.

SUMMARY: This document allocates FM Channel 269A to Crosby, Minnesota, in response to a petition filed by William L. Connor. The allocation could provide Crosby with its first FM broadcast service. There is a site restriction 7.9 kilometers northeast of the community for the allocation of Channel 269A at Crosby. Canadian concurrence has been obtained since Crosby is within 320 kilometers of the common U.S.-Canadian border. With this action, this proceeding is terminated.

DATES: Effective November 23, 1987; The window period for filing applications will open on November 24, 1987, and close on December 24, 1987.

FOR FURTHER INFORMATION CONTACT: Kathleen Scheuerle, Mass Media Bureau, (202) 634-6530.

SUPPLEMENTARY INFORMATION: This is a summary of the Commission's Report and Order, MM Docket No. 86-223, adopted September 11, 1987, and released October 7, 1987. The full text of this Commission decision is available for inspection and copying during normal business hours in the FCC Dockets Branch (Room 230), 1919 M Street NW., Washington, DC. The complete text of this decision may also be purchased from the Commission's copy contractors, International Transcription Service, (202) 857-3800, 2100 M Street NW., Suite 140, Washington, DC. 20037.

[MM Docket No. 86-356; RM-5351 and RM-5644]

Radio Broadcasting Services; Webb City and Ash Grove, MO

AGENCY: Federal Communications Commission.

ACTION: Final rule.

SUMMARY: This document allocates FM Channel 236A to Webb City, Missouri, in response to a petition filed by Don Stubblefield, as that community's second FM broadcast service. We shall also allocate FM Channel 281A to Ash Grove, Missouri, in response to a counterproposal filed by Hooter Exploration Company in this proceeding. The allotment could provide a first local service to Ash Grove. There is a site restriction 12.1 kilometers southwest of the community. With this action, this proceeding is terminated.

DATES: Effective November 23, 1987; the window period for filing applications will open on November 24, 1987, and close on December 24, 1987.

FOR FURTHER INFORMATION CONTACT: Kathleen Scheuerle, Mass Media Bureau, (202) 634-6530.

Radio Broadcasting Services; Hilton Head Island, Bluffton, SC; Darien, GA

AGENCY: Federal Communications Commission.

ACTION: Final rule.

SUMMARY: This document allocates Channel 299C2 to Darien, Georgia, as the community's first local FM service, at the request of Clarence E. Jones. Channel 299C2 can be allocated to Darien in compliance with the Commission's minimum distance separation requirements with a site restriction of 23.9 kilometers (14.8 miles) southwest to avoid a short-spacing to the proposed substitution of Channel 300C2 at Hilton Head Island at the transmitter site used jointly by Station WHHR, Channel 292A, Hilton Head Island, Jesse N. Williams, permittee of a new station on Channel 288A at Hilton Head Island, and Dohara Associates, Inc., permittee of Station WLOW, Channel 296A, Bluffton. The proposals to substitute Channels 291C2 and 300C2 for Channels 288A and 292A, respectively, at Hilton Head and the modification of the license of Station WHHR and the construction permit of Jesse N. Williams to specify either of the Class C2 channels as well as the substitution of Channel 293C2 or 295C for Channel 296A of Bluffton, South Carolina, and the modification of the permit of Station WLOW to specify either higher powered channel will be the subject of a *Further Notice of Proposed Rule Making* in this docket.

DATES: Effective November 23, 1987. The window period for filing applications for Channel 299C at Darien will open on November 24, 1987, and close on December 24, 1987.

FOR FURTHER INFORMATION CONTACT: Leslie K. Shapiro, Mass Media Bureau, (202) 634-6530.

INTERSTATE COMMERCE COMMISSION

49 CFR Part 1039

[Ex Parte No. 346 (Sub-No. 19A)]

Delaware Otsego Corp.; Petition for Exemption; Boxcar Provisions

AGENCY: Interstate Commerce Commission.

ACTION: Final rule.

SUMMARY: The Commission adopts a proposed amendment to its boxcar exemption and rules stating that seven named Class III railroads will no longer be regarded as Class III or unaffiliated Class II carriers for the purpose of the exemption and rules. The seven railroads and Delaware Otsego Corporation, which controls them, asked that they not be afforded the special treatment for Class III and unaffiliated Class II carriers contained in the exemption and rules. The effect of the adopted amendment will be to exempt boxcar traffic transported by the seven railroads from joint rate regulation, to enable them to exercise the empty car provisions of the rules, and to allow other carriers to exercise the empty car provisions with respect to the cars of the seven railroads.

EFFECTIVE DATE: November 12, 1987.

FOR FURTHER INFORMATION CONTACT: Joseph H. Dettmar, (202) 275–7245. [TDD for hearing impaired: (202) 275–1721].

SUPPLEMENTARY INFORMATION: In a decision served August 11, 1987, the Commission proposed to grant a request by Delaware Otsego Corporation and the seven Class III railroads that it controls to remove these railroads from the special provisions for small carriers contained in our boxcar exemption and rules (49 CFR 1039.14). An amendment to the boxcar exemption and rules to carry out this request was published as a proposed rule August 12, 1987, at 52 FR 29873 and a 20-day period ending September 1, 1987, was allowed for comments.

No comments have been received. Therefore, the amendment is adopted as proposed, for the reasons stated in our decision served August 11, 1987. Copies of that decision are available from the Office of the Secretary, Room 2215, Interstate Commerce Commission Building, Washington, DC 20423, or call (202) 275–7428.

This action will not significantly affect either the quality of the human environment or energy conservation.

List of Subjects in 49 CFR Part 1039

Agricultural commodities, Intermodal transportation, Railroads.

For the reasons set out in the preamble and explained fully in the decision, Part 1039 of Title 49, Code of Federal Regulations, is amended as set forth below:

PART 1039—CONTRACTS AND EXEMPTIONS

1. The authority citation for Part 1039 continues to read as follows:

Authority: 49 U.S.C. 10321, 10505, 10713 10762, 11105, and 11122; and 5 U.S.C. 553.

2. Section 1039.14 is amended by adding paragraph (c)(6) as follows:

§ 1039.14 Boxcar transportation exemption and rules.

Proposed Rules

Federal Register
Vol. 52, No. 197
Tuesday, October 13, 1987

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

DEPARTMENT OF AGRICULTURE

Farmers Home Administration

7 CFR Part 1944

Revision of Section 502 Rural Housing Loan Policies, Procedures and Authorizations

AGENCY: Farmers Home Administration, USDA.

ACTION: Advance notice of proposed rule.

SUMMARY: The Farmers Home Administration (FmHA) is considering whether to propose a revision of its policies for issuance of Conditional Commitments in the Single Family Rural Housing (RH) loan program. This action is being considered in order to reduce the cost of housing by enabling builders to better control their costs including holding time. The agency is soliciting comments from interested parties in the development of a regulation for this purpose.

DATES: Commeents must be received on or before November 12, 1987.

ADDRESSES: Submit written comments to the Office of the Chief, Directives Management Branch, Farmers Home Administration, U.S. Department of Agriculture, Room 6348, South Agriculture Building, 14th and Independence Avenue, SW., Washington DC 20250. All written comments will be available for public inspection during regular working hours at the above address.

FOR FURTHER INFORMATION CONTACT: Michael S. Feinberg, Senior Loan Speciaiist, at Farmers Home Administration, USDA, Room 5334–S, South Agriculture Building, 14th and Independence SW., Washington, DC 20250, Telephone (202) 382–1474.

SUPPLEMENTARY INFORMATION: The Farmers Home Administration (FmHA) is considering a revision to its regulations that will enable builders, dealer-contractors and sellers of modest dwellings to apply for and receive "firm" conditional commitments for financing from FmHA. The agency will propose to actually set aside loan funds to finance a certain dwelling that FmHA has determined to be acceptable under the 502 program for qualified applicants. We believe that this action will help reduce costs by reducing the builder's, dealer-contractor's or seller's holding time.

The agency is considering two different methods of implementing this approach. The first method would involve a specific allocation of funds for these commitments. A competitive bidding process in which the competitors would make a proposal to the agency to provide housing at a significant savings to the potential homeowner. The agency would evaluate the proposals and award a commitment to the best bidder.

The agency invites comments on this and, specifically, invites suggestions answering the following questions:

What criteria should be used to compare the bids made under this proposal?

Given limited availability of loan funds, should FmHA attempt to limit the number of commitments to any one bidder and if so, how should this be done?

A second approach would allow any potential seller of a dwelling to be financed under the FmHA program to apply for a conditional commitment for financing. The difference between this approach and the preent method is that FmHA would now reserve funds for a certain period of time for those properties under a conditional commitment.

This program/activity is listed in the Catalog of Federal Domestic Assistance under No. 10.410. For the reasons set forth in the final rule related notice to 7 CFR Part 3015, Subpart V, 48 FR 29115, June 24, 1983, this program/activity is excluded from the scope of Executive Order 12372. This action does not directly affect any FmHA programs or projects which are subject to intergovernmental consultation.

Date October 2, 1987.

Vance L. Clark,

Administrator, Farmers Home Administration.

BILLING CODE 3410–07–M

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

15 CFR Part 971

[Docket No. 50712–7186]

Deep Seabed Mining; Supplemental Proposed Regulations for Commercial Recovery and Revision of Regulations for Exploration

AGENCY: National Oceanic and Atmospheric Administration, Commerce.

ACTION: Extension of comment period for supplemental proposed rule.

SUMMARY: Public Law 96–283, the Deep Seabed Hard Mineral Resources Act (the Act), authorizes the Administrator of the National Oceanic and Atmospheric Administration (NOAA) to issue to eligible United States citizen applicants, licenses for exploration for and permits for the commercial recovery of deep seabed hard mineral resources. The Act also requires that NOAA issue regulations with respect to deep seabed mining licenses and permits.

On July 25, 1986, at 51 FR 26794, NOAA proposed regulations to govern commercial recovery activities of U.S. citizens, and to consolidate parts of the exploration regulations. After review of the public comments on the regulations, NOAA determined that several proposed modifications were sufficiently different from the proposed rule to warrant additional opportunity for public comment prior to promulgation of final regulations. Supplemental proposed regulations were published on September 14, 1987, at 52 FR 34748, seeking further public comment on these provisions.

In order to provide additional time for potential commentors to examine the supplemental proposed rules, NOAA is extending the comment period from October 29, 1987, to November 13, 1987.

DATE: Comments must be received on or before November 13, 1987.

ADDRESS: Submit comments to Ocean Minerals and Energy Division, Office of Ocean and Coastal Resource Management, National Ocean Service, NOAA, 1825 Connecticut Avenue, NW., Suite 710, Washington, D.C. 20235.

FOR FURTHER INFORMATION CONTACT: James P. Lawless, Chief, Ocean Minerals and Energy Division (202) 673–5121, or John W. Padan, Program Manager, Deep Seabed Mining, (202) 673–5117, at the above address.

James P. Blizzard,

Acting Director, Office of Ocean and Coastal Resource Management.

[FR Doc. 87–23588 Filed 10–9–87; 8:45 am]

BILLING CODE 3510–12–M

DEPARTMENT OF LABOR

Occupational Safety and Health Administration

29 CFR Part 1910

Hazardous Waste Operations and Emergency Response

AGENCY: Occupational Safety and Health Administration (OSHA), Department of Labor

ACTION: Proposed rules; changes in hearing location and schedule.

SUMMARY: This notice announces changes in one of the hearing locations for the hearings on the proposed standard for Hazardous Waste Operations and Emergency Response (50 FR 29620; August 10, 1987). The hearing scheduled for San Francisco, California, October 27–30, 1987, has been changed to Seattle, Washington, October 27 and 28, 1987, at the address below. Notices of intention to appear were due September 21, 1987. All parties who filed a notice requesting to testify in San Francisco have been rescheduled to testify in Seattle and are being notified individually of the date.

Alternatively, parties who filed a notice of intention to appear in San Francisco may choose to testify in Washington, DC, on October 20 or 21, 1987, by notifying Mr. Thomas Hall or Ms. Theresa Berry by telephone or letter at the address below by October 16, 1987. As a second alternative such parties may submit their testimony in writing to the Docket Office by October 30, 1987. Such parties will continue to have the right to file post hearing comments.

The Washington, DC, hearings commence as scheduled October 13, 1987. Parties who timely filed notices of intention to appear in Washington, DC, are being notified of the date scheduled for their testimony by mail. The hearing period has been shortened from October 13–16 and 20–22, 1987 to October 13–16 and 20–21, 1987. It should be noted that notices of intention to appear were due September 21, 1987, and comments and written copies of testimony longer than 10 minutes were due October 5, 1987. This notice does not change those dates.

Dates: 1. The informal public hearings will begin at 9:30 a.m. and are scheduled as follows:

October 13–16 and 20–21, 1987, at Washington, DC; October 27–28, 1987, at Seattle, Washington;

Or until the completion of testimony at each location.

2. Requests to change location of testimony from Seattle, Washington, to Washington, DC, must be made by October 16, 1987.

Addresses: 1. The informal public hearings will be held in the following locations:

a. Washington, DC—Frances Perkins Department of Labor Building Auditorium, 3rd St., and Constitution Avenue NW., Washington, DC 20210.

b. Seattle, Washington—Stouffer-Madison Hotel, 515 Madison St., Seattle, Washington 98104. Tel. (206) 583–0300.

2. Docket Office, Docket No. S-760A, Occupational Safety and Health Administration, Room N-3670, U.S. Department of Labor, 200 Constitution Avenue NW., Washington, DC 20210.

3. Requests to change location of testimony from Seattle, Washington, to Washington, DC—Mr. Thomas Hall or Ms. Theresa Berry, U.S. Department of Labor, Occupational Safety and Health Administration, Division of Consumer Affairs, Room N-3649, 200 Constitution Avenue NW., Washington, DC 20210. Tel. (202) 523–8615.

FOR FURTHER INFORMATION CONTACT: Proposed Rule: Mr. James F. Foster, U.S. Department of Labor, Occupational Safety and Health Administration, Division of Consumer Affairs, Room N-3647, 200 Constitution Avenue NW., Washington, DC 20210, (202) 523–8151.

Public Hearing: Mr. Thomas Hall, U.S. Department of Labor, Occupational Safety and Health Administration, Division of Consumer Affairs, Room N–3647, 200 Constitution Avenue NW., Washington, DC 20210, (202) 523–8615.

Signed at Washington, DC, this 7th day of October, 1987.

John A. Pendergrass,

Assistant Secretary of Labor.

[FR Doc. 87–23664 Filed 10–9–87; 8:45 am]

BILLING CODE 4510–26–M

VETERANS ADMINISTRATION

38 CFR Part 36

Loan Guaranty; Collection of Late Fees and Interest Penalties on VA Funding Fees

AGENCY: Veterans Administration.

ACTION: Proposed regulatory amendments.

SUMMARY: Veterans Administration (VA) is proposing to amend its loan guaranty regulations (38 CFR Part 36) to provide for timely collection and deposit of loan guaranty funding fees. These proposed regulatory amendments enable the VA to bring its loan guaranty program into conformance with other Federal loan programs.

DATES: Comments must be received on or before November 12, 1987. Comments will be available for public inspection until November 27, 1987. The VA proposes to make these regulatory amendments effective 30 days after publication of the final regulation.

ADDRESSES: Interested persons are invited to submit written comments, suggestions or objections regarding this proposal to the Administrator of Veterans Affairs, 810 Vermont Avenue NW., Washington, DC 20420. All written comments received will be available for public inspection only in the Veterans Services Unit, Room 132, of the above address between the hours of 8:00 a.m. and 4:30 p.m., Monday through Friday (except holidays) until November 27, 1987.

FOR FURTHER INFORMATION CONTACT: Mr. George Moerman, Assistant Director for Loan Policy (264), Loan Guaranty Service, Department of Veterans Benefits, (202) 233–3042.

SUPPLEMENTARY INFORMATION: The VA recently amended its procedures to require the submission of VA-guaranteed home loan funding fees within 15 days from the date of loan closing by means of a lockbox depository. This 15-day limit changed the requirement under which lenders did not have to send the funding fee until they submitted the loan for a guaranty, which has to be done within 60 days of loan closing. Under these proposed regulatory amendments, lenders submitting funding fees more than 15 days after the loan closing will be charged a late fee equal to 4 percent of the total funding fee. If payment of the funding fee is submitted more than 30 days after loan closing interest will be levied at a percentage rate set in conformity with the Department of Treasury's Fiscal Requirements Manual and announced quarterly in the **Federal Register**. The interest charge is not included in the amount on which interest is computed. This interest charge is to be calculated on a daily basis beginning on the date of closing, although the interest will be assessed

VOL 52 ISS 197 OCT 13 1987 UMI

only on funding fee payments received more than 30 days after closing.

The use of a lockbox depository, designated by the Administrator of Veterans Affairs, provides a reasonable expeditious cash management alternative to the current procedure. Assessment of late fees and interest charges against lenders who fail to submit funding fees through this lockbox depository in the required time frame will encourage the timely deposits of loan guaranty funding fees and allow them to be deposited in the government's account earlier than is presently done.

The Loan Guaranty Revolving Fund (LGRF) is used to finance loan guaranty program operations. Revenue and receipts of the fund consist primarily of interest income, funding fees, cash proceeds from the sale of real property acquired from foreclosure on defaulted loans, and resulting payments made on mortgages issued incident to the sale of acquired properties. The fund's expenses or outlays are mainly to honor VA liabilities under guaranty agreements and to acquire properties. The fund's expenses or outlays are mainly to honor VA liabilities under guaranty agreements and to acquire properties resulting from loan defaults when to do so decreases the VA's liabilities.

In recent years, the revolving fund's expenses have exceeded revenue due to increases in loan defaults and foreclosures. As a result, VA, with congressional approval, has had to reprogram funds from the Direct Loan Revolving Fund to the LGRF; $300 million in fiscal year 1983; $230 million in fiscal year 1984, and $100 million in fiscal year 1987 to date. In addition, in fiscal years 1984, 1985 and 1986, when there were insufficient funds in the Direct Loan Revolving Fund due to program cutbacks, direct appropriations were made to the LGRF: $180 million in fiscal year 1984, $306.6 million in fiscal year 1985 and $200 million in fiscal year 1986.

In order to lessen the need for reprogramming of funds and increasing the LGRF authorization, a funding fee on VA loans was enacted with the passage of the Omnibus Budget Reconciliation Act of 1982 (38 U.S.C. 1829). This Act provided in part that with certain exceptions, a fee, later raised to 1 percent of the total loan amount, was to be collected from each veteran obtaining a housing loan guaranteed, made, or insured. The fees collected were to be deposited into the U.S. Treasury under miscellaneous receipts effective for loans closed October 1, 1982, through September 30, 1985. Exempt from the fee are eligible beneficiaries entitled to disability compensation benefits.

In addition to increasing the funding fee from one-half percent to 1 percent effective on loans closed on or after August 17, 1984, the Deficit Reduction Act of 1984 extended the funding fee program through September 30, 1987, and the collection of funding fees was extended to individuals obtaining a vendee loan (purchase of a VA acquired property with VA provided financing). A significant change to the program was brought about with the depositing of all funding fees directly to the LGRF instead of a Treasury general receipts account. This made the funds collected readily available to the VA Loan Guaranty Program without having to make a supplemental appropriation request or borrow from the U.S. Treasury.

Previously, VA loan guaranty procedures allowed lenders up to 60 days from the loan closing or settlement date to remit loan funding fees to the VA. In addition to Federal interest savings, adoption of an existing Federal delinquent payment policy should improve collection timeliness and result in income from interest and penalty charges of about $800,000 during the next three years of the program.

The Administrator hereby certifies that these proposed regulatory amendments, if promulgated, will not have a significant economic impact on a substantial number of small entities as they are defined in the Regulatory Flexibility Act, 5 U.S.C. 601 through 612. The provision concerning the assessment of late fees and interest against lenders will affect lenders only in those cases in which the lender fails to take timely action to deposit the funding fee through lockbox depository. To prevent this from occurring, prudent loan guaranty practice dictates that the VA assess late fees and interest. Use of a lockbox depository and assessment of these late fees and interest will also assure that the VA Loan Guaranty Program is consistent with similar Federal loan programs. As only a relatively small percentage of VA guaranteed loans are held by small entities, these proposed regulatory amendments will not significantly affect small entities. Pursuant to 5 U.S.C. 605(b), these proposed regulatory amendments are exempt from the initial and final regulatory flexibility analysis requirements of sections 603 and 604.

The VA has determined that these proposed regulatory amendments are not a "major rule" within the meaning of Executive Order 12291. They will not have an annual effect on the economy of $100 million or more, and will not cause a major increase in costs or prices for consumers or individual industries; nor will they have other significant adverse effects on competition, employment, investment, productivity, innovation, or on the ability of the United States-based enterprises in domestic or export markets.

The Catalog of Federal Domestic Assistance Program Numbers are 64.114 and 64.119.

List of Subjects in 38 CFR Part 36

Condominiums, Handicapped, Housing loan program-Housing and community development, Manufactured homes, Veterans.

These proposed regulatory amendments are proposed under the authority granted the Administrator by 38 U.S.C. 210(c), 1820, and 1829.

Approved: September 16, 1987.

Thomas K. Turnage,

Administrator.

PART 36—[AMENDED]

38 CFR Part 36, Loan Guaranty, is proposed to be amended as follows:

1. In § 36.4254 paragraph (d) is revised to read as follows:

§ 36.4254 Fees and charges.

* * * * *

(d)(1) Notwithstanding the provisions of paragraph (c) of this section and subject to the limitations set out in paragraphs (d)(3) and (d)(4) of this section, a fee of 1 percent of the total loan amount must be paid to the Administrator before a combination manufactured home and lot loan (or a loan to purchase a lot upon which a manufactured home owned by the veteran will be placed) will be eligible for guaranty. All or part of such fee may be paid in cash at loan closing or all or part of the fee may be included in the loan without regard to the reasonable value of the property or the computed maximum loan amount, as appropriate. In computing the fee, the lender will disregard any amount included in the loan to enable the borrower to pay such fee.

(Authority: 38 U.S.C. 1829(a))

(2) The lender is required to pay to the Administrator the fee described in paragraph (d)(1) of this section within 15 days after loan closing. Any lender closing a loan, subject to the limitations set out in paragraphs (d)(3) and (d)(4) of this section, who fails to submit timely payment of this fee will be subject to a late charge equal to 4 percent of the total fee due. If payment of the 1 percent fee is made more than 30 days after loan

closing, interest will be assessed at a rate set in conformity with the Department of Treasury's Fiscal Requirements Manual. This interest charge is in addition to the 4 percent late charge, but the late charge is not included in the amount on which interest is computed. This interest charge is to be calculated on a daily basis beginning on the date of closing, although interest will be assessed only on funding fee payments received more than 30 days after closing.

(Authority: 38 U.S.C. 210(c))

(3) The fee described in paragraph (d)(1) of this section shall not be collected from a veteran who is receiving compensation (or who but for the receipt of retirement pay would be entitled to receive compensation) nor from a surviving spouse described in section (b)(2) of Title 38, United States Code.

(Authority: 38 U.S.C. 1829(b))

(4) Collection of the loan fee in this paragraph does not apply to loans closed prior to August 17, 1984, or to loans closed after September 30, 1987.

(Authority: 38 U.S.C. 1829(c))

2. In § 36.4312, paragraph (e) is revised to read as follows:

§ 36.4312 Charges and fees.

* * * * *

(e)(1) Subject to the limitations set out in paragraphs (e)(3) and (e)(4) of this section, a fee of 1 percent of the total loan amount must be paid to the Administrator before a home or condominium loan will be eligible for guaranty or insurance. All or part of such fee may be paid in cash at loan closing or all or part of the fee may be included in the loan without regard to the reasonable value of the property or the computed maximum loan amount, as appropriate. In computing the fee, the lender will disregard any amount included in the loan to enable the borrower to pay such fee.

(Authority: 38 U.S.C. 1829(a))

(2) The lender is required to pay to the Administrator the fee described in paragraph (e)(1) of this section within 15 days after loan closing. Any lender closing a loan, subject to the limitations set out in paragraphs (e)(3) and (e)(4) of this section, who fails to submit timely payment of this fee will be subject to a late charge equal to 4 percent of the total fee due. If payment of the 1 percent fee is made more than 30 days after loan closing, interest will be assessed at a rate set in conformity with the Department of Treasury's Fiscal Requirements Manual. This interest charge is in addition to the 4 percent late charge, but the late charge is not included in the amount on which interet is computed. This interest charge is to be calculated on a daily basis beginning on the date of closing, although interet will be assessed only on funding fee payments received more than 30 days after closing.

(Authority: 38 U.S.C. 210(c))

(3) The fee described in paragraph (d)(1) of this section shall not be collected from a veteran who is receiving compensation (or who but for the receipt of retirement pay would be entitled to receive compensation) nor from a surviving spouse described in section (b)(2) of Title 38, United States Code.

(Authority: 38 U.S.C. 1829(b))

(4) Collection of the loan fee in this paragraph does not apply to loans closed prior to August 17, 1984, or to loans closed after September 30, 1987.

(Authority: 38 U.S.C. 1829(c))

[FR Doc. 87-23617 Filed 10-9-87; 8:45 am]
BILLING CODE 8320-01-M

FEDERAL EMERGENCY MANAGEMENT AGENCY

44 CFR Part 65

[Docket No. FEMA-6918]

Proposed Flood Elevation Determinations; Arkansas, et al.

AGENCY: Federal Insurance Administration, Federal Emergency Management Agency.

ACTION: Proposed rule.

SUMMARY: Technical information or comments are solicited on the proposed base (100-year) flood elevations and proposed modified base flood elevations listed below for selected locations in the nation. These base (100-year) flood elevations are the basis for the floodplain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program.

DATES: The period for comment will be ninety (90) days following the second publication of the proposed rule in a newspaper of local circulation in each community.

ADDRESSES: See table below.

FOR FURTHER INFORMATION CONTACT: Mr. John L. Matticks, Chief, Risk Studies Division, Federal Insurance Administration, Federal Emergency Management Agency, Washington, DC 20472, (202) 646-2767.

SUPPLEMENTARY INFORMATION: The Federal Emergency Management Agency gives notice of the proposed determinations of base (100-year) flood elevations and modified base flood elevations for selected locations in the nation, in accordance with Section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93-234), 87 Stat. 980, which added Section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 (Pub. L. 90-448)), 42 U.S.C. 4001-4128, and 44 CFR 67.4(a).

These elevations, together with the floodplain management measures required by § 60.3 of the program regulations, are the minimum that are required. They should not be construed to mean the community must change any existing ordinances that are more stringent in their floodplain management requirements. The community may at any time enact stricter requirements on its own, or pursuant to policies established by other Federal, State, or regional entities. These proposed elevations will also be used to calculate the appropriate flood insurance premimum rates for new buildings and their contents and for the second layer of insurance on existing buildings and their contents.

Pursuant to the provisions of 5 U.S.C. 605(b), the Administrator, to whom authority has been delegated by the Director, Federal Emergency Management Agency, hereby certifies that the proposed flood elevation determinations, if promulgated, will not have a significant economic impact on a substantial number of small entities. A flood elevation determination under section 1363 forms the basis for new local ordinances, which, if adopted by a local community, will govern future construction within the floodplain area. The elevation determinations, however, impose no restriction unless and until the local community voluntarily adopts floodplain ordinances in accord with these elevations. Even if ordinances are adopted in compliance with Federal standards, the elevations prescribe how high to build in the floodplain and do not proscribe development. Thus, this action only forms the basis for future local actions. It imposes no new requirement; of itself it has economic impact.

Issued: October 1, 1987.

Harold T. Duryee,

Administrator, Federal Insurance Administration.

[FR Doc. 87-23536 Filed 10-9-87; 8:45 am]

BILLING CODE 6718-03-M

44 CFR Part 67

[Docket No. FEMA-6917]

Proposed Flood Elevation Determinations; Alabama, et al.

AGENCY: Federal Insurance Administration, Federal Emergency Management Agency.

ACTION: Proposed rule.

SUMMARY: Technical information or comments are solicited on the proposed base (100-year) flood elevations and proposed base flood elevation modifications listed below for selected locations in the nation. These base (100-year) flood elevations are the basis for the floodplain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP).

DATE: The period for comment will be ninety (90) days following the second publication of this proposed rule in a newspaper of local circulation in each community.

ADDRESSES: See table below.

FOR FURTHER INFORMATION CONTACT: John L. Matticks, Chief, Risk Studies Division, Federal Insurance Administration, Federal Emergency Management Agency, Washington, DC 20472, (202) 646-2767.

SUPPLEMENTARY INFORMATION: The Federal Emergency Management Agency gives notice of the proposed determinations of base (100-year) flood elevations and modified base flood elevations for selected locations in the nation, in accordance with Section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93-234), 87 Stat. 980, which added section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 (Pub. L. 90-448)), 42 U.S.C. 4001 through 4128, and 44 CFR 67.4(a).

These elevations, together with the flood plain management measures required by § 60.3 of the program regulations, are the minimum that are required. They should not be construed to mean the community must change any existing ordinances that are more stringent in their flood plain management requirements. The community may at any time enact stricter requirements on its own, or pursuant to policies established by other Federal, State, or regional entities. These proposed elevations will also be used to calculate the appropriate flood insurance premium rates for new buildings and their contents and for the second layer of insurance on existing buildings and their contents.

Pursuant to the provisions of 5 U.S.C. 605(b), the Administrator, to whom authority has been delegated by the Director, Federal Emergency

Management Agency, hereby certifies that the proposed flood elevation determinations, if promulgated, will not have a significant economic impact on a substantial number of small entities. A flood elevation determination under section 1363 forms the basis for new local ordinances, which, if adopted by a local community, will govern future construction within the flood plain area. The elevation determinations, however, impose no restriction unless and until the local community voluntarily adopts floodplain ordinances in accord with these elevations. Even if ordinances are adopted in compliance with Federal standards, the elevations prescribe how high to build in the floodplain and do not prohibit development. Thus, this action only forms the basis for future local actions. It imposes no new requirement; of itself it has no economic impact.

List of Subjects in 44 CFR Part 67

Flood insurance, Flood plains.

PART 67—[AMENDED]

The authority citation for Part 67 continues to read as follows:

Authority: 42 U.S.C. 4001 *et seq.*, Reorganization Plan No. 3 of 1978, E.O. 12127.

The proposed base (100-year) flood elevations for selected locations are:

PROPOSED BASE (100-YEAR) FLOOD ELEVATIONS

Source of flooding and location	#Depth in feet above ground. *Elevation in feet (NGVD)
ALABAMA	
Chambers County (unincorporated areas)	
Chattahoochee River:	
About 4.2 miles downstream of Riverview Dam	*527
Just downstream of Langdale Dam	*552
Just upstream of Langdale Dam	*558
About 2000 feet downstream of West Point Dam	*580
Osanippa Creek	
About 800 feet downstream of U.S. Highway 29	*577
About 1,500 feet downstream of Interstate 85	*596
Tributary No. 2:	
At mouth	*579
About 1.2 miles upstream of County Road 55	*597
Moores Creek	
About 600 feet downstream of State Highway 29	*552
Just upstream of Fob James Boulevard	*556
Ginnie Creek	
At mouth	*553
About 500 feet upstream of Fob James Boulevard	*587

Approximately 0.6 mile upstream from U.S. Route 119	*809
Maps available for inspection at the Borough Building, 426 Morgantown Street, Point Marion, Pennsylvania.	
Send comments to The Honorable Louis E. Rudolph, Mayor of the Borough of Point Marion, Fayette County, 15 East Street, Point Marion, Pennsylvania 15474.	
Snake Spring (township), Bedford County	
Raystown Branch Juniata River:	
Approximately .35 mile downstream from Lutzville Road	*1,031
Approximately .5 mile upstream from Pennsylvania Turnpike	*1,052
Snake Spring Valley Run:	
Approximately 85 feet downstream from U.S. Route 30	*1,021
Approximately .23 mile upstream from third upstream crossing of State Route 286	*1,070
Approximately .24 mile upstream from T-489	*1,126
Maps available for inspection at the Township Building, R.D. 1, Everett, Pennsylvania.	
Send comments to The Honorable Dawayne Diehl, Chairman of the Board of Supervisors of the Township of Snake Spring, Bedford County, R.D. 1, Box 440, Everett, Pennsylvania 15537.	
TENNESSEE	
Huntingdon (town), Carroll County	
Beaver Creek	
About 1,900 feet downstream of West Main Street	*375
At confluence of Poison Branch	*381
Sner Creek:	
At mouth	*381
About 1,550 feet upstream of State Route 22 Bypass	*383
Lateral No. 1:	
At mouth	*381
Just downstream of Northwood Drive	*394
Lateral No. 2:	
At mouth	*382
Just downstream of Northwood Drive	*392
Poison Branch:	
About 1,200 feet downstream of Buena Drive	*387
Just downstream of Buena Drive	*390
Unnamed Creek	
At mouth	*378
About 120 feet upstream of Hawkins Lane	*405
Maps available for inspection at the City Hall, Huntingdon, Tennessee.	
Send comments to The Honorable Jessie Pinckley, Mayor, Town of Huntingdon, City Hall, P.O. Box 666, Huntingdon, Tennessee 38344	
Pikeville (city), Bledsoe County	
Sequatchie River:	
About 3,800 feet downstream of State Route 30	*819
About 3,600 feet upstream of State Route 30	*825
Tributary No. 1:	
Just upstream of William Howard Taft Highway	*810
Just downstream of Alvin York Highway	*813
Tributary No. 2:	

PROPOSED BASE (100-YEAR) FLOOD ELEVATIONS—Continued

Source of flooding and location	#Depth in feet above ground. *Elevation in feet (NGVD)
About 850 feet downstream of William Howard Taft Highway	*829
About 1,925 feet upstream of Rockford Road	*888
Tributary No. 3:	
About 800 feet downstream of William Howard Taft Highway	*829
About 700 feet upstream of Little's Circle	851
Maps available for inspection at the City Hall, Pikeville, Tennessee.	
Send comments to The Honorable Jerry Johnson, Mayor, City of Pikeville, P.O. Box 225, Pikeville, Tennessee 37367.	
TEXAS	
Snook (city), Burleson County	
Old River Tributary 1:	
At downstream corporate limits	*228
Upstream side County Route 269	*234
At upstream corporate limits	*239
Old River Tributary 2:	
At confluence with Old River Tributary 1	*228
Approximately 0.6 mile upstream of FM 2155	*244
Old River Tributary 3:	
At confluence with Old River Tributary 1	*233
Approximately 0.6 mile upstream of County Route 269	*241
Maps available for inspection at the City Hall—FM 2155, Snook, Texas.	
Send comments to The Honorable Kim Janke, Mayor of the City of Snook, Burleson County, P.O. Box 10, Snook, Texas 77878	
VERMONT	
Underhill (town), Chittenden County	
Browns River:	
At downstream corporate limits	*685
Approximately 1.0 mile upstream of downstream corporate limits	*720
Upstream side of River Road	*781
Upstream of Pleasant Valley Road	*802
Approximately 150 feet upstream of Stevensville Road	*822
The Creek:	
Approximately 0.2 mile downstream of downstream corporate limits	*687
At the confluence of Roaring Brook	*694
Downstream of State Route 15	*701
Maps available for inspection at the Selectmen's Vault, Underhill Center, Vermont.	
Send comments to The Honorable Patrick Lampshere, Chairman of the Board of Selectmen of the Town of Underhill, Chittenden County, Town Clerk's Office, P.O. Box 32, Underhill Center, Vermont 05490	
Wells (town), Rutland County	
Wells Brook:	
Downstream corporate limits	*429
Confluence of Mill Brook	*439
Approximately 1,040 feet upstream of South Street	*515
Approximately 1.1 miles above South Street	*590
Approximately 3.0 miles above South Street	*805
Mill Brook	
At confluence with Wells Brook	*439
Approximately 150 feet upstream of T.R. 8	*448
Approximately 690 feet feet downstream of State Route 2	*480
At Little Lake Dam	*486
Lake St. Catherine: At Little Lake Dam	*486
Lake Lucidan: At Little Lake Dam	*499
Maps available for inspection at the Hopson's County Store, Wells, Vermont.	
Send comments to The Honorable Lance Hopson, Town Clerk of the Town of Wells, Rutland County, P.O. Box 585, Wells, Vermont 05774.	

PROPOSED BASE (100-YEAR) FLOOD ELEVATIONS—Continued

Source of flooding and location	#Depth in feet above ground. *Elevation in feet (NGVD)
WASHINGTON	
Moses Lake (city), Grant County	
Parker Horn:	
Just upstream of Alder Street	*1,051
Approximately 980 feet upstream of Alder Street	*1,052
At upstream corporate limit	*1,054
Maps are available for review at City Hall, 321 Balsam Street, Moses Lake, Washington.	
Send comments to Mayor Norman Johnson, P.O. Drawer 1579, Moses Lake, Washington 98837.	
Wilson Creek (town), Grant County	
Crab Creek:	
At downstream corporate limits	*1,278
At the confluence of Wilson and Crab Creeks	*1,280
Wilson Creek:	
Just upstream of Sixth Street	*1,285
At upstream corporate limits	*1,300
Maps are available for review at Town Hall, Fourth and Railroad Streets, Wilson Creek, Washington.	
Send comments to Mayor Roy Mills, Town Hall, P.O. Box 162, Wilson Creek, Washington 98860.	
WEST VIRGINIA	
Barboursville (village), Cabell County	
Mud River: Entire shoreline within community	*555
Guyandotte River: Entire shoreline within community	*555
Maps available for inspection at the City Hall, 721 Central Avenue, Barboursville, West Virginia.	
Send comments to The Honorable William E. Rucker, Mayor of the Village of Barboursville, Cabell County, P.O. Box 256, Barboursville, West Virginia 25504.	
Harrison County (unincorporated areas)	
West Fork River:	
At downstream County boundary	*902
At upstream corporate limits of City of Clarksburg	*948
At upstream County boundary	*994
Bingamon Creek:	
At confluence with West Fork River	*902
Downstream side of first County Route 8 Bridge crossing	*940
Approximately 1,200 feet upstream of County Route 3–1 Bridge	*995
Tenmile Creek:	
At confluence with West Fork River	*920
Downstream side of Indian Run Road Bridge	*982
Upstream side of Access Road approximately 1.1 miles upstream of confluence of Rush Run	*1,005
Simpson Creek:	
At confluence with West Fork River	*927
At upstream County boundary	*996
Little Tenmile Creek:	
At confluence with Tenmile Creek	*932
Approximately 200 feet upstream of confluence of Caldwell Run	*976
Approximately 1.1 miles upstream of confluence of Middle Run	*1,022
Limestone Run:	
At City of Clarksburg corporate limits, downstream side of CSX Transport (B&O) Bridge, approximately 0.5 mile	*942
Approximately 50 feet downstream of Wilsonburg Road	*981
Downstream side of County Route 50–10 Bridge	*1,036
Approximately .77 mile upstream of County Route 50–10	*1,073
Elk Creek:	
Approximately 2.6 miles downstream of Cost Avenue Bridge	*964
Approximately 250 feet upstream of Hastings Run Road	*1,010
At County boundary	*1,025
Gnatty Creek:	
At confluence with Elk Creek	*1,015
At County boundary	*1,042
Maps available for inspection at the Harrison County Planning Commission, 5th Floor, County Courthouse, Clarksburg, West Virginia.	
Send comments to The Honorable Frank X. Lopez, President of the Harrison County Board of Commissioners, 301 West Main Street, Clarksburg, West Virginia 62301.	
Marion County (unincorporated areas)	
Booths Creek:	
At County Route 58	*913
At County Route 27–1	*930
Buffalo Creek:	
At downstream County boundary	*874
At confluence of Johnson Run	*919
At CSX Transportation (2nd upstream crossing)	*952
Approximately .3 mile upstream of confluence of Dents Run	*981
Paw Paw Creek:	
At downstream County boundary	*868
At County Route 17–18	*904
At confluence of Robinson Run	*951
Approximately 1,950 feet upstream of County Route 15	*992
Pnckett Creek:	
Approximately .3 mile downstream, of County Route 73	*904
At confluence of Reuben Run	*970
Approximately .5 mile upstream of County Route 68–1	*1,002
Monongahela River:	
Approximately .7 mile downstream of the confluence of Paw Paw Creek	*866
Approximately .3 mile upstream of confluence of Paw Paw Creek	[illegible]
Approximately 686 feet downstream of the confluence of Tygart Valley and West Fork Rivers	*875
At confluence of Tygart Valley and West Fork Rivers	*875
West Fork River:	
Approximately .34 mile downstream of first upstream crossing of CSX Transportation	*878
Approximately 507 feet upstream of second upstream crossing of CSX Transportation	*880
At downstream County boundary	*898
Approximately 50 feet upstream of most upstream crossing of CSX Transportation	*898
Bingamon Creek:	
Approximately 148 feet downstream of U.S. Route 19	*902
Approximately .5 mile upstream of U.S. Route 19	*902
Tygart Valley River:	
At confluence with Monongahela River	*875
Approximately 1.5 miles upstream of confluence with Monongahela River	*875
Pyles Fork:	
At downstream County boundary	*975
At County Route 250–5	*990
Approximately .3 mile upstream of confluence of Campbell Run	*1,010
Maps available for inspection at the County Commission Office, Room 403, G. Harper Meredith Building, Fairmont, West Virginia.	
Send comments to The Honorable Raymond Prozzillo, President of the Marion County Board of Commissioners, 200 Jackson Street, Fairmont, West Virginia 26554.	
WISCONSIN	
Neosho (village), Dodge County	
Rubicon River:	
About 3300 feet downstream of Schuyler Street	*867
Just downstream of Schuyler Street	*869
Mill Pond: Along entire shoreline	*878
Maps available for inspection at the Village Hall, 115 South Schuyler Street, Neosho, Wisconsin.	
Send comments to The Honorable Robert Hanson, Village President, Village of Neosho, Village Hall, 115 South Schuyler Street, Neosho, Wisconsin 53059	
Princeton (city), Green Lake County	
Fox River:	
About 1.1 miles downstream of Main Street	*766
About 1.0 mile upstream of Main Street	*768
Maps available for inspection at the City Hall, Clerk's Office, 438 West Main, Princeton, Wisconsin.	
Send comments to The Honorable Davey E. Henschel, Mayor, City of Princeton, City Hall, 438 West Main, Box 53, Princeton, Wisconsin 54968.	

The proposed modified base (100-year) flood elevation for selected locations are:

PROPOSED MODIFIED BASE (100-YEAR) FLOOD ELEVATIONS

State	City/town/county	Source of flooding	Location	#Depth in feet above ground *Elevation in feet (NGVD)	
				Existing	Modified
California	City of Coronado, San Diego County	Pacific Ocean	Center of Strand Way, 200 feet along the street from its intersection with Pomona Avenue	none	*6
			A point 100 feet due south of the southwest end of Avenida del Sol.	none	*7

PROPOSED MODIFIED BASE (100-YEAR) FLOOD ELEVATIONS—Continued

State	City/town/county	Source of flooding	Location	#Depth in feet above ground *Elevation in feet (NGVD)

BILLING CODE 6718-01-M

FEDERAL COMMUNICATIONS COMMISSION

[Gen. Docket No. 87-389; FCC 87-300]

47 CFR Parts 2 and 15

Revision of Rules Regarding Operation of Radio Frequency Devices Without An Individual License

AGENCY: Federal Communications Commission (FCC).

ACTION: Proposed rule.

SUMMARY: This document proposes a number of changes in the technical and administrative provisions for the operation of a non-licensed radio frequency device. This item proposes to standardize the emission limitations between various devices and to establish a number of general usage frequency bands. While this item considers three petitions for rule making (RM-5193, RM-5250 and RM-5575), this action is initiated by the Commission.

DATES: Comments must be received on or before December 4, 1987, and Reply Comments must be received on or before January 4, 1988.

ADDRESS: Federal Communications Commission, 1919 M Street NW., Washington, DC 20554.

FOR FURTHER INFORMATION CONTACT: John A. Reed, Technical Standards Branch, Office of Engineering and Technology, (202) 653-7313.

SUPPLEMENTARY INFORMATION: This is a summary of the Commission's *Notice of Proposed Rule Making* in Gen. Docket No. 87-389, FCC 87-300, Adopted September 17, 1987, and Released October 2, 1987.

The full text of this Commission decision is available for inspection and copying during normal business hours in the FCC Dockets Branch (Room 230), 1919 M Street, NW., Washington, DC. The complete text of this decision also may be purchased from the Commission's copy contractor, International Transcription Service, (202) 857-3800, 2100 M Street NW. Suite 140, Washington, DC 20037.

Summary of Notice of Proposed Rule Making

1. The Commission has permitted the non-licensed operation of certain radio frequency devices, such as receivers and low power transmitters, for almost 50 years. The regulations governing such devices are contained in Part 15 of the rules and are designed in such a manner as to reduce the probability of interference being caused to the authorized radio services. The original regulations were based on a general field strength limit. As devices were designed to operate on higher frequencies, this standard was found to be too restrictive. Since that time, provisions enabling the operation of new types of devices frequently were adopted in response to petitions for rule making that requested authorization only for the specific device in question. This incremental approach to adopting device-specific regulations has resulted in a number of inconsistencies and inequities in the technical standards, generally as a result of the timing of the petitions. By implementing rules that require compliance with specific definitional and operational restrictions, the operational flexibility originally contained and intended in Part 15 has been curtailed. In addition, the standards needed to protect against interference have changed over the years due to improvements in the sensitivity of equipment used in the licensed services, the increased proliferation of licensed and non-licensed operations, and changes in frequency allocations.

2. The Part 15 regulatory plan proposed in this Notice is designed to restore the technical flexibility originally envisioned for the operation of non-licensed devices, enabling manufacturers to market new RF devices without waiting for the conclusion of rule making considering the interference potential of the devices. The proposed rules seek to eliminate all unnecessary and overly restrictive regulations by proposing minimal standards on operational frequencies, bandwidth, modulation techniques and other parameters. However, in some instances, the decision to permit greater flexibility has required a further reduction in unwanted emissions. In a few instances, we have taken this opportunity to propose more restrictive standards on the permitted levels of unwanted emissions in order to provide a "cleaner" RF environment. In those instances where standards are proposed to be tightened, we also provide a substantial "grandfather" period, 10 years in most instances.

3. The following is a brief summary of some of the more substantial proposed changes to the regulations:

—With certain exceptions, field strength limits and conducted emission limits below 1000 MHz are specified using a CISPR quasi-peak detector, and limits above 1000 MHz are specified in peak values;

—All kits are proposed to be subject to the regulations, including the equipment authorization procedures;

—A power line conducted limit of 250 uV in the frequency range of 450 kHz to 30 MHz is proposed for all devices except carrier current systems operating within that frequency band and Class A digital devices;

—Emission limits for receivers are proposed above 1000 MHz, and the frequency range over which receivers are subject to the regulations is expanded;

—The emission limits for receivers are proposed to be tightened to the Class B digital device limits for the frequency range of 30 to 960 MHz and to 500 uV/m at 3 meters for frequencies above 960 MHz;

—The emission limits for transmitters operating under the general provisions would be increased at frequencies above 1.705 MHz such that within the frequency band of 1.705–30 MHz the general limit is 30 uV/m at 30 meters and above 30 MHz the general limit is the same as proposed for receivers;
—Additional "consumer" bands are established at 13.553–13.567 MHz, 26.96–27.28 MHz, 40.66–40.70 MHz, 49.82–49.90 MHz, 902–928 MHz, 2400–2483.5 MHz, 5725–5875 MHz and 24.0–24.25 GHz; and,
—Peak emissions from transmitters operating under the provisions for periodic operation above 70 MHz, including control and security alarm devices, are proposed to be limited to within 20 dB of the permitted average emission limits.

4. This is a non-restricted notice and comment rule making proceeding. *See* § 1.1231 of the Commission's rules, 47 CFR 1.1231, for rules governing permissible *ex parte* contacts.

5. Pursuant to the Regulatory Flexibility Act of 1980, 5 U.S.C. 603, this proceeding will have a significant economic impact on a number of small entities. By providing the regulatory flexibility needed to permit general use, consumer frequency bands, this action should foster an effective competitive marketplace in the area of low power telecommunications, providing small entities the opportunity to develop systems that were not previously permitted under the regulations. Some standards regarding spurious and other undesired emissions from receivers and certain transmitters, primarily those operating in the 27 MHz, 40 MHz, and 49 MHz bands and cordless telephones, are proposed to be tightened. In addition, this Notice proposes to delete the Automatic Vehicle Identification System (§§ 15.221 through 15.228) in the 2.9–4.1 GHz band. It is proposed that kits of radio frequency devices comply with the regulations, including authorization by the Commission, where appropriate. The manufacturers of certain transmitters also may be impacted by the proposed restricted frequency bands. Public comment is requested on the initial regulatory flexibility analysis set out in full in the Commission's complete decision.

6. The collection of information requirement contained in this proposed rule has been submitted to the Office of Management and Budget for review under section 3504(h) of the Paperwork Reduction Act. Persons wishing to comment on this collection of information requirement should direct their comments to the Office of Information and Regulatory Affairs, Office of Management and Budget, Attention: Desk Officer for Federal Communications Commission.

7. Pursuant to applicable procedures set forth in §§ 1.415 and 1.419 of the Commission's rules, 47 CFR 1.415 and 1.419, interested parties may file comments on or before December 4, 1987 and reply comments on or before January 4, 1988. All relevant and timely comments will be considered by the Commission before final action is taken in this proceeding.

Rule Changes

The proposed text amending Parts 2 and 15 of Title 47 of the Code of Federal Regulations is shown in the Commission's complete decision and is available from its copy contractor.

47 CFR Parts 31 and 32

[CC Docket No. 87–447, FCC 87–313]

Common Carrier Services; Amortization of Depreciation Reserve Imbalances of Local Exchange Carriers

AGENCY: Federal Communications Commission.

ACTION: Proposed rule.

SUMMARY: The Commission proposes to amortize the depreciation reserve imbalances of all local exchange carriers for which it prescribes depreciation rates. This amortization authority would not be contingent on concurrance of the State regulatory commission having jurisdiction over the carrier. The Commission proposes a five-year amortization for all carriers for which it has not previously granted amortization authority, and invites comments on the date such amortization should begin.

DATES: Comments are due by November 4, 1987, and reply comments by November 18, 1987.

ADDRESS: Federal Communications Commission, Washington, DC 20554.

FOR FURTHER INFORMATION CONTACT: Robert W. Spangler, Common Carrier Bureau, (202) 634–1861.

SUPPLEMENTARY INFORMATION: This is a summary of the FCC's Notice of Proposed Rulemaking in CC Docket 87–447, FCC 87–313, adopted October 2, 1987 and released October 5, 1987. The full text of FCC's decision is available for inspection and copying during normal business hours in the FCC Dockets Branch (Room 230), 1919 M Street, NW., Washington, DC. The complete text of this document may be purchased from the Commission's copy contractor, International Transcription Service, (202) 857–3800, 2100 M Street, NW., Suite 140, Washington, DC 20037.

Summary of Notice of Proposed Rulemaking

The FCC prescribes depreciation rates and practices for the larger communications common carriers. Each carrier's rates are reviewed every three years and, if necessary, new rates are prescribed. This function is an important part of the Commission's ratemaking activity, because the level of depreciation expense for the carriers is a large part of their costs.

The depreciation reserve is an important indicator of the depreciation process because it is the accumulation of all past depreciation accurals net of plant retirements. Beginning in the late 1960's a substantial reserve imbalance began to materialize as the carriers replaced their electromechanical switches before the expected end of the life of that plant. The depreciation reserve that was needed to match this plant, with its shorter service life (the theoretical reserve), was far in excess of the book depreciation. This difference between the book reserve and the theoretical reserve is referred to as the depreciation reserve imbalance. The Commission initially responded to the problem in the *Property Depreciation Order*, 83 FCC 2d 267 (1980). In that decision, the Commission determined that the life estimates of carriers' plant were too long, that a significant reserve imbalance existed and that the remaining-life method of accounting should be used to clean up the imbalance. Several years later, the Commission determined that in some circumstances, amortization of the reserve imbalance might be required. The imbalances of certain carriers were amortized, over varying periods, under this procedure. However, the authority to amortize was granted only to carriers whose state regulatory commission concurred.

Although the reserve imbalance has decreased in amount since the 1980 decision to use remaining-life depreciation, the Commission is still concerned that the remaining-life method will not eliminate the imbalance

BEST COPY AVAILABLE

in a timely and uniform manner. Accordingly, the Commission proposes a one-time change in its policy in this area. The proposal is to allow all local exchange carrier to amortize their reserve imbalance over a five-year period. This policy would apply to all carriers which have not been granted amortization authority. No change is proposed for those carriers granted amortizations in 1984 and 1985. Amortizations granted in 1986 will be addressed in a separate proceeding. No carrier would be required to show the concurrence of its state regulatory commission. This proposed policy change woud not cause a corresponding increase in carriers' rates, due to changes in economic conditions since 1980, and would be consistent with this Commission's desire to effect cost-based pricing of communications services. Comments are invited as to when the amortization period should start.

Ordering Clauses

In reaching its decision, the Commission may take into consideration information and ideas not contained in the comments, provided that such information or a writing indicating the nature and source of such information is placed in the public file, and providing that the fact of the Commission's reliance on such information is noted in the *Report and Order*.

Pursuant to sections 1, 4(i), 4(j), 201 through 205, 218, 220 and 403 of the Communications Act of 1934, as amended, 47 U.S.C. 151, 154(i), 154(j), 201 through 205, 218, 220 and 403, and section 553 of the Administrative Procedure Act, 5 U.S.C. 553, notice is hereby given of the proposed policy and possible rule changes as set forth in this *Notice of Proposed Rulemaking*.

Interested persons may file comments on the specific proposals discussed herein by the dates specified in the Preamble. In accordance with the provisions of §1.419 of the Commission's Rules, 47 CFR 1.419, an original and five (5) copies of all comments shall be furnished to the Commission. Copies of the comments will be available for public inspection in the Commission's Docket Reference Room, 1919 M Street, NW., Washington, DC.

Federal Communications Commission.

DEPARTMENT OF AGRICULTURE

Forest Service

Pacific Crest National Scenic Trail Advisory Council; Meeting

The Pacific Crest National Scenic Trail Advisory Council will meet on November 19 and 20, 1987 in Pacific Grove, California. The meeting will begin on November 19 at 8:30 a.m. at the Asilomar Conference Center, 800 Asilomar Blvd, Pacific Grove.

The purpose of the meeting is for the Council to provide recommendations for the Secretary of Agriculture on broad questions of policy, programs, and procedures affecting the Pacific Crest Trail. The meeting will include a review of trail completion status, committee efforts, and other related matters about the trail.

The meeting will be open to the public. Persons who wish additional information should contact Dick Benjamin, Assistant Regional Forester, RW&CR, Pacific Southwest Region, Forest Service, 630 Sansome Street, San Francisco, California 94111, phone (415) 556–6986.

Date: September 9, 1987.

BILLING CODE 3510–BS–M

Foreign-Trade Zones Board

[Docket No. 19–87]

Foreign-Trade Zone 8, Toledo, OH; Application for Subzone, Chrysler Auto Components Plants, Toledo Area

An application has been submitted to the Foreign-Trade Zones Board (the Board) by the Toledo-Lucas County Port Authority, grantee of FTZ 8, requesting special-purpose subzone status for three Toledo-area plants of the Chrysler Corporation, which produce a variety of components for its North American auto assembly operations. The application was submitted pursuant to the provisions of the Foreign-Trade Zones Act, as amended (19 U.S.C. 81a through 81u), and the regulations of the Board (15 CFR Part 400). It was formally filed on September 8, 1987.

The three Chrysler plants, which employ a total of some 1,800 persons, are: The Toledo Machining Plant (169 acres), 8000 Chrysler Drive, Perrysburg (transmission, steering and brake components); the Plastics Plant (22 acres), 3130 W. Monroe, Sandusky (vinyl products); and, the Amplex Plant (38 acres), 1180 Kear Rd., Van Wert (clutch plates, steering couplings, connecting rod caps, rotors and other mechanical parts).

Certain parts and materials for these plants are sourced abroad, including vinyl roll goods, bearings, rotors, sprockets, and parts for transmission, steering and brake components. Foreign materials account for less than 5 percent of total production costs at Chrysler plants.

Zone procedures would exempt Chrysler from Customs duties on the foreign components that are reexported either as auto parts or in assembled autos. On products shipped to U.S. auto assembly plants with subzone status, the company would be able to take advantage of the same duty rate available to importers of complete automobiles. The duty rates on components used at the five plants range from 3.3 to 11.0 percent, whereas the rate on autos is 2.5 percent. The savings would help improve the company's international competitiveness.

In accordance with the Board's regulations, an examiners committee has been appointed to investigate the application and report to the Board. The committee consists of: Dennis Puccinelli (Chairman), Foreign-Trade Zones Staff, U.S. Department of Commerce, Washington, DC 20230; John Nelson, District Director, U.S. Customs Service, North Central Region, 6th Floor, Plaza Nine Bldg., 55 Erieview Plaza, Cleveland, OH 44114; and Colonel Daniel R. Clark, District Engineer, U.S. Army Engineer District Buffalo 1776 Niagara St., Buffalo, NY 14207.

Comments concerning the proposed subzone are invited in writing from interested parties. They shall be addressed to the Board's Executive Secretary at the address below and postmarked on or before November 16, 1987.

A copy of the application is available for public inspection at each of the following locations:

Port Director's Office, U.S. Customs Service, 234 No. Summit St., Room 704, Toledo, OH 43604

Office of the Executive Secretary, Foreign-Trade Zones Board, U.S. Department of Commerce, Room 1529, Washington, DC 20230.

Dated: October 5, 1987.

John J. Da Ponte, Jr.,

Executive Secretary.

[FR Doc. 87–23639 Filed 10–9–87; 8:45 am]

BILLING CODE 3510–DS–M

[Docket No. 20–87]

Foreign-Trade Zone 70, Detroit, MI; Application for Subzone, Yazaki Wiring Harness Plant, Wayne County, MI

An application has been submitted to the Foreign-Trade Zones Board (the Board) by the Greater Detroit Foreign-Trade Zone, Inc., grantee of FTZ 70, requesting special-purpose subzone status for the auto wiring harness testing

VOL
52
ISS
197
OC
13
1987
UMI

and distribution facility of American Yazaki Corporation, a subsidiary of Yazaki Corporation of Japan, located in Canton Township, Wayne County, Michigan, adjacent to the Detroit Customs port of entry. The application was submitted pursuant to the provisions of the Foreign-Trade Zones Act, as amended (19 CFR Part 400). It was formally filed on September 16, 1987.

The 22-acre plant, which employs 100 persons, is located at 6700 Haggerty Road, Canton, Wayne County, Michigan. It is used to produce wiring harnesses for the U.S. automobile industry, and to modify, repair, test and distribute wiring harnesses produced abroad. Both the harnesses produced abroad and at the plant contain some 50 percent foreign components such as electrical conductors, terminals, insulators, and connectors.

Wiring harnesses have a 5 percent duty rate and the duty rates on harness components range from 4.0 to 6.1 percent.

Zone procedures would allow Yazaki to avoid Customs duty payments on the items it ships to customers with auto assembly subzones, where duties would be paid at the auto duty rate (2.5 percent).

In accordance with the Board's regulations, an examiners committee has been appointed to investigate the application and report to the Board. The committee consists of: Dennis Puccinelli (Chairman), Foreign-Trade Zones Staff, U.S. Department of Commerce, Washington, DC 20230; William L. Morandini, District Director, U.S. Customs Service, North Central Region, 477 Michigan Avenue, Detroit, Michigan 48226–2586; and Colonel Robert F. Harris, District Engineer, U.S. Army Engineer District Detroit, P.O. Box 1027, Detroit, Michigan 48231–1027.

Comments concerning the proposed subzone are invited in writing from interested persons and organizations. They shall be addressed to the Board's Executive Secretary at the address below and postmarked on or before November 10, 1987.

A copy of the application is available for public inspection at each of the following locations:

U.S. Department of Commerce, District Office, 1140 McNamara Building, 477 Michigan Avenue, Detroit, Michigan 48226

Office of the Executive Secretary, Foreign-Trade Zones Board, U.S. Department of Commerce, 14th and Pennsylvania Avenue NW., Room 1529, Washington, DC 20230.

BILLING CODE 3510–DS–M

International Trade Administration

[A–580–073]

Bicycle Tires and Tubes From the Republic of Korea; Revocation of Antidumping Finding

AGENCY: International Trade Administration, Import Administration, Commerce.

ACTION: Notice of revocation of antidumping finding.

SUMMARY: The U.S. International Trade Commission has determined that an industry in the United States would not be materially injured, or threatened with material injury, by reason of imports of bicycle tires and tubes from the Republic of Korea covered by the antidumping finding if the finding were to be modified or revoked.

As a result, the Department of Commerce is revoking the antidumping finding on bicycle tires and tubes from the Republic of Korea.

EFFECTIVE DATE: September 4, 1987.

FOR FURTHER INFORMATION CONTACT: Joseph A. Fargo or John Kugelman, Office of Compliance, International Trade Administration, U.S. Department of Commerce, Washington, DC 20230; telephone: (202) 377–5255/3601.

SUPPLEMENTARY INFORMATION:

Background

On April 13, 1979, an antidumping finding on bicycle tires and tubes from the Republic of Korea was published in the **Federal Register** (44 FR 22051).

On April 28, 1987, the U.S. International Trade Commission (ITC), at the request of Korea Inoue Kasei, a Korean manufacturer and exporter of bicycle tires and tubes, instituted an investigation of bicycle tires and tubes from the Republic of Korea under section 751(b) of the Tariff Act of 1930 ("the Tariff Act"). As a result of its investigation the ITC determined that an industry in the United States would not be materially injured, or threatened with material injury, by reason of imports of bicycle tires and tubes from the Republic of Korea covered by the antidumping finding if the finding were to be modified or revoked (52 FR 33660, September 4, 1987).

Scope of the Review

Imports covered by the review are shipments of bicycle tires and tubes, currently classifiable under items 772.4800 and 772.5700 of the Tariff Schedules of the United States Annotated.

Revocation of the Finding

The Department of Commerce, as administering authority, revokes the antidumping finding of bicycle tires and tubes from the Republic of Korea. This revocation applies to all entries of this merchandise entered, or withdrawn from warehouse, for consumption on or after September 4, 1987. The Department will instruct the Customs Service to proceed with liquidation of this merchandise without regard to antidumping duties.

Unappraised entries of bicycle tires and tubes from the Republic of Korea, made prior to September 4, 1987 and covered by the finding, remain unaffected by this notice, and continue to be subject to appraisement under the antidumping finding as required by section 751 of the Tariff Act.

The Department is currently conducting its administrative review of the finding on bicycle tires and tubes from the Republic of Korea. The results of this review which covers the period April 1, 1986 through April 21, 1987, will be published in a subsequent notice.

In addition, if a review is requested the Department will conduct an administrative review of shipments of bicycle tires and tubes from the Republic of Korea to the United States from April 22, 1987 to September 4, 1987, the effective date of the revocation. These results will also be published in a subsequent notice.

This revocation is in accordance with section 751(c) of the Tariff Act (19 U.S.C. 1675 (c)).

Dated: October 5, 1987.

Gilbert B. Kaplan,

Deputy Assistant Secretary for Import Administration.

[FR Doc. 87–23640 Filed 10–9–87; 8:45 am]

BILLING CODE 3510–DS–M

[A–274–001]

Carbon Steel Wire Rod From Trinidad and Tobago; Intention To Review and Preliminary Results of Changed Circumstances Administrative Review and Tentative Determination To Revoke Antidumping Duty Order

AGENCY: International Trade Administration, Import Administration, Commerce.

ACTION: Notice of intention to review and preliminary results of changed circumstances administrative review

and tentative determination to revoke antidumping duty order.

SUMMARY: Because of changed circumstances, we tentatively determine to revoke the antidumping duty order on carbon steel wire rod from Trinidad and Tobago. The revocation will apply to all entries of carbon steel wire rod from Trinidad and Tobago entered, or withdrawn from warehouse, for consumption on or after October 1, 1984. Interested parties are invited to comment on these preliminary results and tentative determination to revoke.

EFFECTIVE DATE: October 1, 1984.

FOR FURTHER INFORMATION CONTACT: J. David Dirstine or Robert J. Marenick, Office of Compliance, International Trade Administration, U.S. Department of Commerce, Washington, DC 20230; telephone (202) 377–5255.

SUPPLEMENTARY INFORMATION:

Background

On November 16, 1983, the Department of Commerce ("the Department") published in the **Federal Register** (48 FR 52112) an antidumping duty order on carbon steel wire rod from Trinidad and Tobago. Atlantic Steel Company, Georgetown Steel Corporation, North Star Steel Texas, Inc., and Raritan Steel Company, the petitioners, informed the Department that they are no longer interested in the order and stated their support of revocation of the order. Under section 751 of the Tariff Act of 1930 ("the Tariff Act"), the Department may revoke an antidumping duty order that is no longer of interest to domestic interested parties.

Scope of the Review

The United States has developed a system of tariff classification based on the international harmonized system of Customs nomenclature. Congress is considering legislation to convert the United States to this Harmonized System ("HS") by January 1988. In view of this, we will be providing both the appropriate *Tariff Schedule of the United States Annotated* ("TSUSA") item numbers and the appropriate HS item numbers with our product descriptions on a test basis, pending Congressional approval. As with the TSUSA, the HS item numbers are provided for convenience and Customs purposes. The written description remains dispositive.

We are requesting petitioners to include the appropriate HS item number(s) as well as the TSUSA item number(s) in all new petitions filed with the Department. A reference copy of the proposed Harmonized System schedule is available for consultation at the Central Records Unit, Room B–099, U.S. Department of Commerce, 14th Street and Constitution Avenue NW., Washington, DC 20230. Additionally, all Customs offices have reference copies, and petitioners may contact the Import Specialist at their local Customs office to consult the schedule.

Imports covered by the review are shipments of carbon steel wire rod, currently classifiable under item 607.1700 of the TSUSA. These imports are currently classifiable under HS item numbers 7213.3900, 7213.4900, and 7213.5000.

The review covers the period from October 1, 1984.

Preliminary Results of the Review and Tentative Determination

As a result of our review, we preliminarily determine that the petitioners' affirmative statements of no interest in continuation of the antidumping duty order on carbon steel wire rod from Trinidad and Tobago provide a reasonable basis for revocation of the order.

Therefore, we tentatively determine to revoke the order on carbon steel wire rod from Trinidad and Tobago effective October 1, 1984. We intend to instruct the Customs Service to proceed with liquidation of all unliquidated entries of this merchandise entered, or withdrawn from warehouse for consumption on or after October 1, 1984 without regard to antidumping duties and to refund any estimated antidumping duties collected with respect to those entries. The current requirement for a cash deposit of estimated antidumping duties will continue until publication of the final results of this review.

Interested parties may submit written comments on these preliminary results within 30 days of the date of publication of this notice and may request a hearing within 5 days of the date of publication. Any hearing, if requested, will be held 30 days after the date of publication, including its analysis of any such comments or hearing.

This intention to review, administrative review, tentative determination to revoke, and notice are in accordance with sections 751 (b) and (c) of the Tariff Act (19 U.S.C. 1675 (b) and (c)) and §§ 353.53a and 353.54 of the Commerce Regulations (19 CFR 353.53a and 353.54).

Gilbert B. Kaplan,

Acting Assistant Secretary for Import Administration.

Date: October 6, 1987.

[FR Doc. 87–23641 Filed 10–9–87; 8:45 am]

BILLING CODE 3510–DS–M

[A–588–068]

Steel Wire Strand for Prestressed Concrete From Japan; Final Results of Antidumping Duty Administrative Review; Correction

AGENCY: International Trade Administration, Import Administration, Commerce.

ACTION: Notice of final results of antidumping duty administrative review; correction.

On February 11, 1987, the Department of Commerce ("the Department") published in the **Federal Register** (52 FR 4373) the final results of its administrative review of the antidumping finding on steel wire strand for prestressed concrete from Japan (43 FR 57599, December 8, 1978).

The results for Mitsubishi Corp. were incorrect because we considered in our review a sale of galvanized steel wire strand, which is not included in the scope of the antidumping finding. Mitsubishi had no sales during the period, and as a result we have determined that no margin exists for Mitsubishi Corp. for the period December 1, 1982 through November 30, 1985.

Because there is no margin for Mitsubishi Corp., the Department waives the cash deposit requirement for this firm.

EFFECTIVE DATE: February 11, 1987.

FOR FURTHER INFORMATION CONTACT: Edward Haley or Robert J. Marenick, Office of Compliance, International Trade Administration, U.S. Department of Commerce, Washington, DC 20230; telephone: (202) 377–5289/5255.

Gilbert B. Kaplan,

Deputy Assistant Secretary for Import Administration.

Bureau of the Census

Census Advisory Committees (CAC) on American Indian and Alaska Native Populations for 1990 Census, Asian and Pacific Islander Populations for 1990 Census, Black Population for 1990 Census, and Hispanic Population for 1990 Census; Public Meeting

Pursuant to the Federal Advisory Committee Act (Pub. L. 92–463 as amended by Pub. L. 94–409), we are giving notice of a joint meeting followed by separate and jointly held meetings (described below) of the CAC on the

VOL 52 ISS 197 OCT 13 1987 UMI

American Indian and Alaska Native Populations for the 1990 Census, the CAC on the Asian and Pacific Islander Populations for the 1990 Census, the CAC on the Black Population for the 1990 Census, and the CAC on the Hispanic Population for the 1990 Census. The joint meeting will convene on October 29 and 30, 1987, at the Ramada Hotel, 6400 Oxon Hill Road, Oxon Hill, Maryland 20745.

Each of these committees is composed of 12 members appointed by the Secretary of Commerce. They provide an organized and continuing channel of communication between the communities they represent and the Bureau of the Census on the problems and opportunities of the 1990 decennial census.

The committees will draw on the knowledge and insight of their members to provide advice during the planning of the 1990 Census of Population and Housing on such elements as improving the accuracy of the population count, suggesting areas of research, recommending subject content and tabulations of particular use to the populations they represent, expanding the dissemination of census results among present and potential users of census data in their communities, and generally improving the usefulness of the census product.

The agenda for the October 29 combined meeting that will begin at 8:45 a.m. and end at 3:30 p.m. is: (1) Introductory remarks by the Director, Bureau of the Census; (2) 1990 planning update, which includes dress rehearsal plans, disclosure avoidance plans, undercount behavioral research, and processing offices; (3) special urban survey/focus groups updates and committee members' observation reports; (4) 1990 promotion update; (5) affirmative action status; and (6) regional office responsibilities.

The agendas for the four committees in their separate meetings that will begin at 3:45 p.m. and end at 5 p.m. on October 29 are a discussion of regional activities that includes recruitment and outreach, and consideration of the Census Bureau responses to committee recommendations. The Hispanic Committee will also elect a chairperson.

The agenda for the October 30 combined meeting that will begin at 8:45 a.m. and end at 10:15 a.m. is: (1) 1990 Research, Evaluation, and Experimental (REX) Program; and (2) 1990 data products.

The agendas for the four committees' separate meetings that will begin at 10:30 a.m. and end at 11:45 a.m. on October 30 are as follows:

The CAC on the American Indian and Alaska Native Populations for the 1990 Census

(1) Update on identification of American Indian areas; (2) data issues for American Indians and Alaska Natives, and (3) selection aids for the 1990 census.

The CAC on the Asian and Pacific Islander Populations for the 1990 Census

(1) Data issues for Asian and Pacific Islander, and (2) early alert mailout.

The CAC on the Black Population for the 1990 Census will discuss the 1990 housing program.

The CAC on the Hispanic Population for the 1990 Census

(1) Current Population Survey Report on Hispanics, and (2) early alert mailout.

The agenda for the combined meeting that will begin at 1 p.m. and adjourn at 3 p.m. is development and discussion of recommendations, public comments, and presentation of recommendations and plans for the next meeting.

All meetings are open to the public and a brief period is set aside on October 30 for public comment and questions. Those persons with extensive questions or statements must submit them in writing to the Census Bureau official named below at least 3 days before the meeting.

Persons wishing additional information concerning these meetings or who wish to submit written statements may contact Mr. Russell L. Valentine, Assistant Chief for Outreach and Program Information, Decennial Planning Division, Bureau of the Census, Room 3574, Federal Building 3, Suitland, Maryland. (Mailing address: Washington, DC 20233). Telephone: (301) 763–5926.

Date: October 7, 1987.

John G. Keane,

Director, Bureau of the Census.

National Bureau of Standards

National Bureau of Standards' Visiting Committee; Meeting

Pursuant to the Federal Advisory Committee Act, 5 U.S.C. App., notice is hereby given that the National Bureau of Standards' Visiting Committe will meet Thursday, November 12, 1987, from 8:30 a.m. to 5:30 p.m., and Friday, November 13, 19087, from 8:30 a.m. to 10:00 a.m., in Lecture Room A, Administration Building, National Bureau of Standards, Gaithersbury, Maryland; from 11:00 a.m. to 12:00 noon in Room 5854, Department of Commerce, Washington, DC.

The NBS Visiting Committee is composed of five members prominent in the field of science and technology and appointed by the Secretary of Commerce.

The purpose of the meeting is to consider the implications of the legislation presently under consideration by Congress.

The public is invite to attend, and the Chairman will entertain comments or questions at an appropriate time during the meeting. Any person wishing to attend the meeting should inform Peggy Webb, Office of the Director, National Bureau of Standards, Gaithersburg, MD 20899, telephone 301–975–2411.

Ernest Ambler,

Director.

North Pacific Fishery Management Council; Public Meeting and Public Hearing

AGENCY: National Marine Fisheries Service, NOAA, Commerce.

The North Pacific Fishery Management Council and its Bycatch Committee will convene a separate public meeting and hearing at the Northwest and Alaska Fisheries Center, National Marine Fisheries Service as follows:

Bycatch Committee

Will convene a public meeting October 26, 1987, at 9 a.m., Room 2143, Building 4, 7600 Sand Point Way NE., Seattle, WA, to continue work on developing long-term management for bycatch species in the Gulf of Alaska and Bering Sea/Aleutian Islands; will adjourn on October 30.

Council

Will convene a public hearing October 27 at 10 a.m., at 2725 Montlake Boulevard, East, Seattle, WA, in the auditorium, to take public comment on an industry proposal to establish and provide procedures to enforce crab bycatch rates in the 1988 Bering Sea joint venture flounder fishery.

For more information contact the North Pacific Fishery Management Council, P.O. Box 103136, Anchorage, AK 99510; telephone: (907) 274–4563.

Date: October 5, 1987.

Richard H. Schaefer,

Acting Director, Office of Fisheries Conservation and Management, National Marine Fisheries Service.

BILLING CODE 3510-22-M

COMMITTEE FOR THE IMPLEMENTATION OF TEXTILE AGREEMENTS

Announcing Bilateral Textile Consultations With Government of Bangladesh To Review Trade in Category 638/639

October 6, 1987.

FOR FURTHER INFORMATION CONTACT: Kimbang Pham, International Trade Specialist, Office of Textiles and Apparel, U.S. Department of Commerce, Washington, DC (202) 377-4212.

On August 30, 1987, the Government of the United States, under Article 3 of the Arrangement Regarding International Trade in Textiles and in accordance with section 204 of the Agricultural Act of 1956, as amended, requested consultations with the Government of Bangladesh with respect to man-made fiber knit shirts and blouses in Category 638/639, produced or manufactured in Bangladesh.

The purpose of this notice is to advise the public that during consultations held September 14-17, 1987 between the Governments of the United States and Bangladesh, agreement was reached on a limit for Category 638/639.

The new limit for this category will be published upon the exchange of diplomatic notes between the Governments of the United States and Bangladesh.

A summary market statement concerning Category 638/639 follows this notice.

James H. Babb,

Chairman, Committee for the Implementation of Textile Agreements.

Bangladesh—Market Statement

Category 638/639—Man-Made Fiber Knit Shirts and Blouses

August 1987.

Summary and Conclusions

U.S. imports of Category 638/639 from Bangladesh were 619,467 dozen during the year ending June 1987, more than ten times the 60,023 dozen imported a year earlier. During the first six months of 1986, imports of Category 638/639 from Bangladesh were 536,867 dozen, eleven times the 48,163 dozen imported during the same period in 1985 and four times the amount imported during calendar year 1986.

The U.S. market for Category 638/639 has been disrupted by imports. The sharp and substantial increase of imports from Bangladesh has contributed to this disruption.

U.S. Production and Market Share

U.S. production of man-made fiber knit shirts and blouses dropped from 57.7 million dozen in 1982 to an average of 52.6 million dozen during the 1983-85, a nine percent decline. Although U.S. production increased to 54.6 million dozen in 1986, it remained five percent below the 1982 level. The domestic manufacturers' share of the man-made fiber knit shirts and blouse market declined from 73 percent in 1982 to an average 68 percent during 1983-85. The domestic manufacturers' share dropped to 63 percent in 1986.

U.S. Imports and Import Penetration

U.S. imports of Category 638/639 grew from 21.1 million dozen in 1982 to an average 25.2 million dozen during 1983-85, a 20 percent increase. U.S. imports reached 32.0 million dozen in 1986, 27 percent above the 1983-85 average import level. Imports during the year ending June 1987 are nine percent above the previous year's level. The ratio of imports to domestic production increased from 37 percent in 1982 to an average 48 percent during 1983-85. The ratio jumped to 59 percent in 1986.

Duty Paid Value and U.S. Producers' Price

Approximately 68 percent of Category 638/639 imports from Bangladesh during the first six months of 1987 entered under TSUSA numbers 381.8930—men's and boys' man-made fiber knit shirts, excluding sweatshirts, T-shirts and tank tops, not ornamented; and 384.8045—women's and man-made fiber knit shirts, excluding sweatshirts, T-shirts and tank tops, not ornamented. These garments entered the U.S. at duty paid landed values below U.S. producers' prices for comparable garments.

BILLING CODE 3510-DR-M

Request for Public Comment on Bilateral Textile Consultations With Government of Socialist Federal Republic of Yugoslavia on Cotton Textile Products in Category 338/339

October 6, 1987.

For further information contact: Jerome Turtola, International Trade Specialist, Office of Textiles and Apparel, U.S. Department of Commerce, (202) 377-4212. For information on categories on which consultation have been requested call (202) 377-3740.

On September 29, 1987, the Government of the United States, under Article 3 of the Arrangement Regarding International Trade in Textiles, done at Geneva on December 20, 1973, as further extended on July 31, 1986, and in accordance with section 204 of the Agricultural Act of 1956, requested the Government of the Socialist Federal Republic of Yugoslavia to enter into consultations concerning exports to the United States of cotton knit shirts and blouses in Category 338/339, produced or manufactured in Yugoslavia.

The purpose of this notice is to advise the public that, if no solution is agreed upon in consultation with the Government of the Socialist Federal Republic of Yugoslavia, the Committee for the Implementation of Textile Agreements may later establish a limit for the entry and withdrawal from warehouse for the consumption of textile products in Category 338/339, produced or manufactured in Yugoslavia and exported to the United States during the twelve-month period which began on September 29, 1987 and extends through September 28, 1988 at a level of 313,100 dozen.

A summary market statement concerning this category follows this notice.

Anyone wishing to comment or provide data or information regarding the treatment of Category 338/339 or in any other aspect thereof, or to comment on domestic production or availability of textile products included in this category, is invited to submit such comments or information in ten copies to Mr. James H. Babb, Chairman, Committee for the Implementation of Textile Agreements, International Trade Administration, U.S. Department of Commerce, Washington, DC 20230. Because the exact timing of the consultations is not yet certain, comments should be submitted promptly. Comments or information submitted in response to this notice will be available for public inspection in the Office of Textiles and Apparel, Room 3100, U.S. Department of Commerce, 14th and Constitution Avenue NW., Washington, DC, and may be obtained upon written request.

Further comment may be invited regarding particular comments or information received from the public which the Committee for the Implementation of Textile Agreements considers appropriate for further consideration.

The solicitation of comments regarding any aspect of the agreement or the implementation thereof is not a waiver in any respect of the exemption contained in 5 U.S.C. 553(a)(1) relating to matters which constitute "a foreign affairs function of the United States."

A description of the textile categories in terms of T.S.U.S.A. numbers was published in the **Federal Register** on December 13, 1982 (47 FR 55709), as amended on April 7, 1983 (48 FR 15175),

Adoption by the United States of the Harmonized Commodity Code (HCC) may result in some changes in the categorization of textile products covered by this notice. Notice of any necessary adjustments to the limits affected by adoption of the HCC will be published in the **Federal Register.**

James H. Babb,

Chairman, Committee for the Implementation of Textile Agreements.

Yugoslavia—Market Statement

Category 338/339—Cotton Knit Shirts and Blouses

September 1987.

Summary and Conclusions

U.S. imports of Category 338/339 from Yugoslavia were 313,100 dozen during the year ending June 1987, more than 16 times the 18,776 dozen imported a year earlier. During the first six months of 1987, imports of Category 338/339 from Yugoslavia reached 245,464 dozen, 24 times the 10,262 dozen imported during the same period of 1986 and three times the total imported in calendar year 1986.

The market for Category 338/339 has been disrupted by imports. The sharp and substantial increase in imports from Yugoslavia has contributed to this disruption.

U.S. Production and Market Share

U.S. production of cotton knit shirts and blouses has been on the decline, dropping from 24.6 million dozen in 1982 to a depressed 19 million dozen in 1985, a decline of 23 percent. Production in 1986 partially recovered from 1985, reaching 20.4 million dozen, but remained 12 percent below the 1984 level and 16 percent below the 1983 level. The domestic manufacturers' share of the market dropped 19 percentage points in four years, falling from 63 percent in 1982 to 44 percent in 1986.

U.S. Imports and Import Penetration

U.S. imports of Category 338/339 grew from 14.6 million dozen in 1982 to 25.5 million dozen in 1986, a 74 percent increase. During the first six months of 1987, imports of Category 338/339 reached 17.8 million dozen, 34 percent above the level imported during the same period in 1986. The ratio of imports to domestic production more than doubled, increasing from 60 percent in 1982 to 125 percent in 1986.

Duty-Paid Value and U.S. Producers' Price

Approximately 67 percent of Category 338/339 imports from Yugoslavia during the first six months of 1987 entered under TSUSA numbers 384.2806—women's, girls' and infants' cotton knit tank tops, not ornamented; 384.2815—women's cotton knit blouses, excluding tank tops, not ornamented; 384.2915—women's and girls' cotton t-shirts, not ornamented; and 384.2980—infants' (excluding infant boys' over 24 months of age) cotton knit shirts, excluding T-shirts and sweatshirts, not ornamented. These garments entered the U.S. at duty-paid landed values below U.S. producers' prices for comparable garments.

BILLING CODE 3510-DR-M

Amendment to the Bilateral Agreement and Visa and Exempt Requirements Concerning Textile and Apparel Products From Taiwan

October 6, 1987.

The Chairman of the Committee for the Implementation of Textile Agreements (CITA), under the authority contained in E.O. 11651 of March 3, 1972, as amended, has issued the directive published below to the Commissioner of Customs to be effective on October 6, 1987. For further information contact Pamela Smith, International Trade Specialist (202) 377-4212.

Background

Under the terms of the bilateral agreement of November 18, 1982, as amended and extended, and the visa arrangement and exempt certification of August 16, 1972, as amended and extended, concerning textile and apparel products from Taiwan, agreement was reached to further amend the agreement and the visa and exempt certification requirements to reflect that, effective on October 6, 1987, only shipments of textile and apparel products exported from Taiwan on and after October 6, 1987, which are imported for the personal use of the importer and not for resale, regardless of value, and properly marked commercial sample shipments valued at U.S.$250 or less, do not require a visa or exempt certification for entry and shall not be charged to the agreement levels. All other commercial shipments, regardless of value, now require a visa or exempt certification for entry of traditional Chinese items.

A description of the textile categories in terms of T.S.U.S.A. numbers was published in the **Federal Register** on December 13, 1982 (47 FR 55709), as amended on April 7, 1983 (48 FR 15175), May 3, 1983 (48 FR 19924), December 14, 1983 (48 FR 55607), December 30, 1983 (48 FR 57584), April 4, 1984 (49 FR 13397), June 28, 1984 (49 FR 26622), July 16, 1984 (49 FR 28754), November 9, 1984 (49 FR 44782), July 14, 1986 (51 FR 25386), July 29, 1986 (51 FR 27068) and in Statistical Headnote 5, Schedule 3 of the Tariff Schedules of The United States Annotated (1987).

James H. Babb,

Chairman, Committee for the Implementation of Textile Agreements

October 6, 1987.

Committee for the Implementation of Textile Agreements.

Commissioner of Customs,
Department of the Treasury, Washington, DC 20229.

Dear Mr. Commissioner: This directive further amends, but does not cancel, the directive of September 27, 1972, as amended, concerning an export visa requirement for certain textile and apparel products, produced or manufactured in Taiwan.

Effective on October 6, 1987, entry of all textile and apparel products exported into the United States from Taiwan on or after October 6, 1987, which are imported for the personal use of the importer and not for resale, regardless of value, and all properly marked commercial sample shipments valued at U.S.$250 or less, do not require a visa or exempt certification for entry and shall not be charged to the agreement levels. All other commercial shipments, regardless of value, now require a visa or exempt certification for entry of traditional Chinese items.

The Committee for the Implementation of Textile Agreements has determined that this action falls within the foreign affairs exception to the rulemaking provisions of 5 U.S.C. 553.

Sincerely,

James H. Babb,

Chairman, Committee for the Implementation of Textile Agreements.

BILLING CODE 3510-DR-M

DEPARTMENT OF DEFENSE

Office of the Secretary

Defense Science Board Task Force on B-1B Defensive Avionics; Advisory Committee Meetings.

SUMMARY: The Defense Science Board Task Force on B-1B Defensive Avionics will meet in closed session on October 27-28, November 24-25, December 22-23, 1987 and January 12-13, 1988 at the Pentagon, Arlington, Virginia.

The mission of the Defense Science Board is to advise the Secretary of Defense and the Under Secretary of Defense for acquisition on scientific and technical matters as they affect the perceived needs of the Department of Defense. At these meetings the Task Force will evaluate the status of the Air Force B-1B Defensive Avionics Program.

In accordance with section 10(d) of the Federal Advisory Committee Act,

Pub. L. 92–463, as amended (5 U.S.C. App. II, (1982)), it has been determined that these DSB Task Force meetings, concern matters listed in 5 U.S.C. 552b(c)(1) (1982), and that accordingly these meetings will be closed to the public.

Linda Bynum,

Alternate OSD Federal Register Liaison Officer, Department of Defense.

October 7, 1987.

Defense Science Board Task Force on Low Observable Technology Subgroup; Change in Date of Advisory Committee Meeting

ACTION: Change in Date of Advisory Committee Meeting.

SUMMARY: The meeting of the Defense Science Board Task Force on Low Observable Technology Subgroup scheduled for October 16, 1987, as published in the **Federal Register** (Vol. 52, No. 121, Page 23711, Wednesday, June 24, 1987, FR Doc. 87–14305) will be held on October 26, 1987.

Linda Bynum,

Alternate OSD Federal Register Liaison Officer, Department of Defense.

October 7, 1987.

[FR Doc. 87–23643 Filed 10–9–87; 8:45 am]

BILLING CODE 3810–01–M

Defense Science Board Task Force on Low Observable Technology Subgroup; Advisory Committee Meetings

ACTION: Notice of Advisory Committee Meetings.

SUMMARY: The Defense Science Board Task Force on Low Observable Technology Subgroup will meet in closed session on November 18–19, 1987 at the Institute for Defense Analyses, Alexandria, Virginia.

The mission of the Defense Science Board is to advise the Secretary of defense and the Under Secretary of Defense for Acquisition on scientific and technical matters as they affect the perceived needs of the Department of Defense. At these meetings the Task Force will evaluate low observable technology.

In accordance with section 10(d) of the Federal Advisory Committee Act, Pub. L. 92–463, as amended (5 U.S.C. App. II, (1982)), it has been determined that these DSB Task Force meetings, concern matters listed in 5 U.S.C. 552b(c) (1) (1982), and that accordingly these meetings will be closed to the public.

Linda Bynum,

Alternate OSD Federal Register Liaison Officer, Department of Defense.

DEPARTMENT OF EDUCATION

Proposed Information Collection Requests

AGENCY: Department of Education.

ACTION: Notice of proposed information collection requests.

SUMMARY: The Director, Information Technology Services, invites comments on the proposed information collection requests as required by the Paperwork Reduction Act of 1980.

DATE: Interested persons are invited to submit comments on or before November 12, 1987.

ADDRESSES: Written comments should be addressed to the Office of Information and Regulatory Affairs, Attention: Desk Officer, Department of Education, Office of Management and Budget, 726 Jackson Place NW., Room 3208, New Executive Office Building, Washington, DC 20503. Requests for copies of the proposed information collection requests should be addressed to Margaret B. Webster, Department of Education, 400 Maryland Avenue SW., Room 5624, Regional Office Building 3, Washington, DC 20202.

FOR FURTHER INFORMATION CONTACT: Margaret B. Webster (202) 732–3915.

SUPPLEMENTARY INFORMATION: Section 3517 of the Paperwork Reduction Act of 1980 (44 U.S.C. Chapter 35) requires that the Office of Management and Budget (OMB) provide interested Federal agencies and the public an early opportunity to comment on information collection requests. OMB may amend or waive the requirement for public consultation to the extent that public participation in the approval process would defeat the purpose of the information collection, violate State or Federal law, or substantially interfere with any agency's ability to perform its statutory obligations.

The Director, Information Technology Services, publishes this notice containing proposed information collection requests prior to submission of these requests to OMB. Each proposed information collection, grouped by office, contains the following: (1) Type of review requested, e.g., new, revision, extension, existing or reinstatement; (2) Title; (3) Agency form number (if any); (4) Frequency of collection; (5) The affected public; (6) Reporting burden; and/or (7) Recordkeeping burden; and (8) Abstract. OMB invites public comment at the address specified above. Copies of the requests are available from Margaret Webster at the address specified above.

Dated: October 7, 1987.

Carlos U. Rice,

Director for Information Technology Services.

Office of Educational Research and Improvement

Type of Review: Reinstatement
Title: National Education Longitudinal Study of 1988 (NELS:88)
Agency Form Number: G50–21P
Frequency: Once only
Affected Public: Individuals or households
Reporting Burden: Responses: 56,950; *Burden Hours:* 80,814
Recordkeeping Burden: Recordkeepers: 0; *Burden Hours:* 0

Abstract: This study will collect information from eighth graders and their parents, school administrators, and teachers about educational, vocational, and personal development of these students. The Department will use this data to prepare and submit various reports to Congress.

Type of Review: Revision
Title: Schools and Staffing Survey
Agency Form Number: G50–25P
Frequency: On occasion
Affected Public: Individuals or households: state or local governments; businesses or other for-profit; non-profit institutions; small businesses or organizations
Reporting Burden: Responses: 93,817; *Burden Hours:* 107,558
Recordkeeping: Recordkeepers: 0; *Burden Hours:* 0

Abstract: The purpose of this survey is to provide national and state estimates of teacher demand and shortage, school conditions and staffing, teacher qualifications, and administrator background. These data will be used by policy makers at national, state and local levels.

Office of Elementary and Secondary Education

Type of Review: Extension
Title: Application for the Magnet Schools Assistance Program
Agency Form Number: A10–1P
Frequency: Annually
Affected Public: State or local governments
Reporting Burden: Responses: 48; *Burden Hours:* 656
Recordkeeping: Recordkeepers: 0); *Burden Hours:* 0

Abstract: This application is used by local educational agencies to apply for magnet school projects. The Department needs this information to make awards and insure that proposed projects meet the requirements of the statute and regulations.

Office of Bilingual Education and Minority Language Affairs

BILLING CODE, 4000–01–M

Executive Committee, National Advisory Council on Indian Education; Meeting

AGENCY: Education.

ACTION: Notice of meeting.

SUMMARY: This notice sets forth the schedule and proposed agenda of a forthcoming meeting of the Executive Committee of the National Advisory Council on Indian Education. This notice also describes the functions of the Council. Notice of this meeting is required under section 10(a)(2) of the Federal Advisory Committee Act, 5 U.S.C. App. 2. This document is intended to notify the general public of their opportunity to attend.

DATE: October 26, 1987, 2:00 p.m. until conclusion of business.

ADDRESS: Sheraton Bismarck Galleria, P.O. Box 2718, Sixth & Broadway, Bismarck, North Dakota 58502 (701/255–6000).

FOR FURTHER INFORMATION CONTACT: Lincoln C. White, Executive Director, National Advisory Council on Indian Education, 2000 L Street NW., Suite 574, Washington, DC 20036 (202/634–6160).

SUPPLEMENTARY INFORMATION: The National Advisory Council on Indian Education is established under Section 442 of the Indian Education Act (20 U.S.C. 1221g). The Council is established to, among other things, assist the Secretary of Education in carrying out responsibilities under the Indian Education Act (Title IV of Pub. L. 92–318), and to advise Congress, and the Secretary of Education, the Under Secretary of Education and the Assistant Secretary of Elementary and Secondary Education with regard to education programs benefiting Indian children and adults.

The meeting will be open to the public. The proposed agenda includes:

(1) Chairman's Report.
(2) NACIE Budget—FY'88.
(3) Plans an agenda for NACIE activities.
(4) Committee assignments.
(5) Other business.

Records shall be kept of all Council proceedings and shall be available for public inspection at the Office of the National Advisory Council on Indian Education located at 2000 L Street, NW., Suite 574, Washington, DC 20036.

Dated: October 2, 1987.

Signed at Washington, DC.

Lincoln C. White,

Executive Director, National Advisory Council on Indian Education.

BILLING CODE 4000–01–M

DEPARTMENT OF ENERGY

Divestiture of the Great Plains Coal Gasification Project (GPCGP)

On February 26, 1987, the Department of Energy engaged Shearson Lehman Brothers, one of the world's largest securities firms, to assist the Department in marketing the Great Plains coal-to-synthetic gas plant in North Dakota

The Great Plains Coal Gasification Plant, near Beulah, ND, was built originally at a cost of $2.1 billion. It was acquired by the Department of Energy when its private sponsors defaulted on approximately $1.5 billion in federal loans in 1985. The Department has operated the facility since the default but desires to return the plant to the private sector.

The Department has authorized Shearson Lehman to initiate the sales process, the first phase of which is to provide broad public notice of the sale and to contact prospective buyers.

Parties with a possible interest in purchasing the facility are referred to: Mr. Jeremy Diamond, Shearson Lehman Brothers, Inc. American Express Tower, World Financial Center, New York, New York 10285–1800

A Copy of the Shearson Descriptive Memorandum for the Great Plains Gasification Project is available in the Department of Energy's Public Reading Room (Room 1E–190), Forrestal Building, 1000 Independence Avenue SW., Washington, DC.

Issued in Washington, DC, on October 6, 1987.

J. Allen Wampler,

Assistant Secretary, Fossil Energy.

BILLING CODE 6450–01–M

Inventories & Storage Task Group National Petroleum Council; Open Meeting

Notice is hereby given of the following meeting:

Name: Inventories & Storage Task Group of the Coordinating Subcommittee on Petroleum Storage and Transportation of the National Petroleum Council.

Date and time: Thursday, October 22, 1987, 9 AM.

Place: National Petroleum Council, Conference Room, 1625 K Street, NW, Washington, DC.

Contact: Margie D. Biggerstaff, U.S. Department of Energy, Office of Fossil Energy (FE–1), Washington, DC 20585, Telephone: 202/586–4695.

Purpose of the Parent Council

To provide advice, information, and recommendations to the Secretary of Energy on matters relating to oil and gas or the oil and gas industries.

Purpose of the meeting

To organize Task Group and discuss assignments.

Tentative Agenda:

—Opening remarks by Chairman and Government Cochairman.
—Establish the Task Group organization.
—Discuss the individual assignments.
—Discuss any other matters pertinent to the overall assignment.

Public Participation

The meeting is open to the public. The Chairman of the Inventories & Storage Task Group is empowered to conduct the meeting in a fashion that will, in his judgment, facilitate the orderly conduct of business. Any member of the public who wishes to file a written statement with the Task Group will be permitted to do so, either before or after the meeting. Members of the public who wish to make oral statements pertaining to agenda items should contact Ms. Margie D. Biggerstaff at the address or telephone number listed above. Requests must be received at least 5 days prior to the meeting and reasonable provisions will be made to include the presentation on the agenda.

Transcript

Available for public review and copying at the Public Reading Room, Room 1E–190, Forrestal Building, 1000 Independence Avenue SW., Washington, DC, between 9:00 a.m. and 4:00 p.m. Monday through Friday, except Federal holidays.

Issued at Washington, DC, on October 6, 1987.

J. Allen Wampler,

Assistant Secretary Fossil Energy.

Federal Energy Regulatory Commission

[Docket No. TA88–1–46–000]

Kentucky West Virginia Gas Co.; Proposed Change in FERC Gas Tariff

October 6, 1987.

Take notice that Kentucky West Virginia Gas Company (Kentucky West) on September 30, 1987, tended for filing with the Federal Energy Regulatory Commission (Commission) the following tariff sheets to its FERC Gas Tariff, Second Revised Volume No. 1, to become effective November 1, 1987:

First Revised Sheet No. 40
First Revised Sheet No. 41

Kentucky West states that the foregoing tariff sheets reflect changes in the tariff sheets filed in Docket No. RP87–147–000 on September 23, 1987, to become effective October 1, 1987. Kentucky West also states that the filing in Docket No. RP87–147–000 was made to update its tariff and to provide for an Annual Charge Adjustment Provision. Kentucky West states, however, that if the Commission believes the PGA filing tendered herewith should reflect changes in the tariff sheets presently in effect prior to October 1, 1987, then Kentucky West, in the alternative, requests that the following tariff sheets be accepted to become effective November 1, 1987:

Thirty-Ninth Revised Sheet No. 27
Twenty-Fourth Revised Sheet No. 27A

If these alternate tariff sheets are accepted, Kentucky West submits it should be with the later right to file the appropriate tariff sheets upon Commission action accepting the tariff sheets filed in Docket No. RP87–147–000.

Kentucky West states that the change in rates results from the application of the Purchase Gas Cost Adjustment provision in section 18, General Terms and Conditions of its FERC Gas Tariff.

Kentucky West states that the current purchase gas adjustment is an increase of 19.83¢ per dekatherm (dth) and that the deferred gas cost adjustment is an increase of 5.46¢ per dth. These changes, Kentucky West asserts, result in a total net jurisdiction purchase gas cost charge of 193.77¢ per dth, to become effective November 1, 1987.

Kentucky West states that a copy of its filing has been served upon its purchasers and interested state commissions and upon each party on the service list of Docket No. RP86–52.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with §§ 385.211 and 385.214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 385.214). All such motions or protests should be filed on or before October 13, 1987. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceedings. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717–01–M

[Docket No. RP87–86–001]

KN Energy, Inc.; Compliance Filing

October 6, 1987.

On September 30, 1987, KN Energy, Inc. ("KN") tendered for filing the following tariff sheets in Third Revised Volume No. 1 of its FERC Gas Tariff:

Substitute Twenty-Eighth Revised Sheet No. 4
Substitute Seventh Revised Sheet No. 4B
Substitute Sixth Revised Sheet No. 14

VOL 52 ISS 197 OCT 13 1987 UMI

KN states that the purpose of these substitute tariff sheets is to comply with the Commission's September 11, 1987 suspension order issued in Docket No. RP87–86–000, which directed KN to eliminate the selective discount authority proposed in Rate Schedules 1OR–1 and 1OR–2 and to eliminate the filed Annual Charge Adjustment.

Any person desiring to be heard or to protest said filing should file a motion to intervene or a protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with Rules 214 and 211 of the Commission's Rules of Practice and Procedure (18 CFR 385.214, 385.211). All such motions or protests should be filed on or before October 13, 1987. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717–01–M

[Docket No. RP88–7–000]

K N Energy, Inc.; Tariff Filing

October 6, 1987.

On September 30, 1987, K N Energy, Inc. ("KN") tendered for filing the following revised tariff sheets:

Third Revised Volume No. 1

Twenty-Ninth Revised Sheet No. 4
Eighth Revised Sheet No. 4B
Second Revised Sheet No. 16
Fifth Revised Sheet No. 27B
Fifth Revised Sheet No. 27C

Second Revised Volume No. 2

First Revised Sheet No. 21
Second Revised Sheet No. 42
First Revised Sheet No. 68A
Fourth Revised Sheet No. 97
First Revised Sheet No. 165
First Revised Sheet No. 190
First Revised Sheet No. 204

K N states that these tariff sheets implement an Annual Charge Adjustment (ACA) and unit charge and requests that the tariff sheets be made effective on October 1, 1987. K N also requests clarification that Order No. 472 assesses annual charges based on local distribution sales by K N and requests that the Commission protect K N from undercollecting the Fiscal Year 1987 annual bill if Order No. 472 *et al.* are reversed on appeal.

Any person desiring to be heard or to protest said filing should file a motion to intervene or a protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with Rules 214 and 211 of the Commission's Rules of Practice and Procedure (18 CFR 385.214, 385.211). All such motions or protests should be filed on or before October 13, 1987. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717–01–M

[Docket No. TA88–1–59–000]

Northern Natural Gas Co.; Change in Rates and Tariff Revisions

October 6, 1987.

Take notice that on October 1, 1987, Northern Natural Gas Company, Division of Enron Corp. (Northern), tendered for filing with the Commission to be effective November 1, 1987 the following tariff sheets to be included in Northern's F.E.R.C. Gas Tariff, Third Revised Volume No. 1:

Third Revised Volume No. 1

Forty-Fifth Revised Sheet No. 4a
Forty-Ninth Revised Sheet No. 4b
Seventeenth Revised Sheet No. 4b.1

Original Volume No. 2

Fifty-Sixth Revised Sheet No. 1c

Northern states that the purpose of the revised tariff sheets is to adjust its jurisdictional natural gas sales rates to reflect its purchased gas cost from Canadian suppliers in a manner consistent with Commission Opinion Nos. 256 and 256–A.

In accordance with the terms established in Northern's Stipulation and Agreement in Docket No. TA86–3–59 and approved by the Commission on January 30, 1987, Northern will file to adjust its market area sales commodity and demand rates to comply with the requirements of the order in the Natural Gas Pipeline Company (NGPL) proceeding in Docket No. TA85–1–26–004 if the outcome of that proceeding is different than Northern's current treatment.

Northern states that the effect of the proposed changes will be to transfer approximately $3.3 million from its demand rates to its commodity rates and will increase the Company's commodity PGA rate by $.008 per Mcf. The decrease in Northern's D–1 rate will be $.056 per Mcf and the D–2 rate will decrease by $.0019 per Mcf.

Copies of the filing were served on all of Northern's jurisdictional customers and interested State commissions.

Any person desiring to be heard or to protest said filing should file a motion to intervene or a protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, DC, 20426, in accordance with the Commission's Rules of Practice & Procedure (18 CFR 385.211, 385.214). All such motions or protests should be filed on or before October 13, 1987. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene.

Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717–01–M

[Docket No. RP88–4–000]

Northwest Alaskan Pipeline Co.; Tariff Changes

October 6, 1987.

Take notice that on October 1, 1987, Northwest Alaskan Pipeline Company ("Northwest Alaskan"), 295 Chipeta Way, Salt Lake City, Utah 84108–899, tendered for filing in Docket No. RP88–4–000 the following tariff sheets to its FERC Gas Tariff Original Volume No. 2:

Fourth Revised Sheet No. 200
Third Revised Sheet No. 201
Fourth Revised Sheet No. 207
Fourth Revised Sheet No. 208
Third Revised Sheet No. 213B
Third Revised Sheet No. 213C
Third Revised Sheet No. 213D
Third Revised Sheet No. 213E
Fourth Revised Sheet No. 221
Third Revised Sheet No. 250
Fourth Revised Sheet No. 258
Fourth Revised Sheet No. 259
Original Sheet No. 259A
Third Revised Sheet No. 272E
Second Revised Sheet No. 272F
Original Sheet No. 272F–A
Fifth Revised Sheet No. 286

Northwest Alaskan states that it is submitting these sheets to reflect changes in the commodity charges and minimum volume requirements for

Canadian gas purchased by Northwest Alaskan from Pan-Alberta Gas Ltd. ("Pan-Alberta") and resold to Panhandle Eastern Pipe Line Company ("Panhandle") under Rate Schedule X–2.

Northwest Alaskan states that it is submitting the above tariff sheets pursuant to the provisions of the amended purchase agreement dated November 1, 1987, between Northwest Alaskan and Panhandle.

Northwest Alaskan states that these tariff changes are beneficial to Panhandle in that the commodity charges for gas purchased and the minimum annual volumes will be reduced. Panhandle will also have greater flexibility in scheduling its daily minimum purchases during the months May-September. For maintenance of a ready supply far in excess of the substantially reduced minimum take obligations, a Panhandle Supply Reservation Payment will be made with respect to takes below certain levels.

Northwest Alaskan requests that the above sheets become effective November 1, 1987.

Northwest Alaskan states that a copy of this filing is being served on Northwest Alaskan's customers.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington DC 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure. All such motions or protests should be filed on or before October 13, 1987. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717–01–M

[Docket No. TA88–1–49–000]

Williston Basin Interstate Pipeline Co.; Purchased Gas Cost Adjustment Filing

October 6, 1987.

Take notice that on September 30, 1987, Williston Basin Interstate Pipeline Company (Williston Basin), Suite 200, 304 East Rosser Avenue, Bismarck, North Dakota 58501, tendered for filing as part of its FERC Gas Tariff the following tariff sheets:

First Revised Volume No. 1

Sixth Revised Sheet No. 10
Third Revised Sheet No. 11

Original Volume No. 1–A

Fourth Revised Sheet No. 275
Third Revised Sheet Nos. 275A–275B
Fourth Revised Sheet No. 276
First Revised Sheet No. 276A
Fourth Revised Sheet No. 277

Original Volume No. 2

Ninth Revised Sheet No. 10
Tenth Revised Sheet No. 11

Williston Basin states that it prepared the instant PGA filing without benefit of the anticipated Commission order relative to the Company's compliance filing in Docket No. TA87–4–49–000, filed July 1, 1987.

The proposed effective date of the tariff sheets is November 1, 1987.

Williston Basin states the tariff sheets in Sixth Revised Sheet No. 10 and Third Revised Sheet No. 11 (First Revised Volume No. 1) and Ninth Revised Sheet No. 10 and Tenth Revised Sheet No. 11 (Original Volume No. 2) and the schedules in support thereof were computed in adherence to Williston Basin's PGA clause and the Commission's Rules and Regulations. The changes herein reflect a cumulative gas cost adjustment for Rate Schedules G–1, SGS–1, I–1 and X–1 of a negative 47.493 cents per dkt. The surcharge adjustment for Rate Schedules G–1, SGS–1 and I–1, is a negative 16.453 cents per dkt. These changes produce a net decrease in rates for Rate Schedules G–1, SGS–1 and I–1 of 24.723 cents per dkt and a net decrease of 15.021 cents per dkt for Rate Schedule X–1, relative to Williston Basin's compliance PGA filing of July 1, 1987. Rate Schedule X–5 reflects a cumulative gas cost adjustment of a negative 12.577 cents per dkt, an increase of .032 cents per dkt.

Williston Basin states that the projected price of deregulated gas supplies reflect the price last agreed-to by the various suppliers of natural gas.

Williston Basin has also submitted, pursuant to § 154.41(b) of the Commission's Regulations, Fourth Revised Sheet No. 275, Third Revised Sheet Nos. 275A–275B, Fourth Revised Sheet No. 276, First Revised Sheet No. 276A and Fourth Revised Sheet No. 277 (Original Volume No. 1–A), to update its "Index of Purchasers."

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, DC 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (16 CFR 385.211 and 385.214). All such motions or protests should be filed on or before October 13, 1987. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party to the proceeding must file a motion to intervene. Copies of the filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

[FR Doc. 87–23623 Filed 10–9–87; 8:45 am]

BILLING CODE 6717–01–M

Office of Hearings and Appeals

Issuance of Decisions and Orders; Week of June 22 Through June 26, 1987

During the week of June 22 through June 26, 1987, the decisions and orders summarized below were issued with respect to applications for exception or other relief filed with the Office of Hearings and Appeals of the Department of Energy. The following summary also contains a list of submissions that were dismissed by the Office of Hearings and Appeals.

Remedial Orders

Cougar Oil Marketers, Inc., Ira Wynn Sanborn, 6/24/87, HRO–0262

Cougar Oil Marketers, Inc. (Cougar) and Ira Wynn Sanborn (Sanborn) objected to a Proposed Remedial Order (PRO) which the DOE's Economic Regulatory Administration (ERA) issued to them on September 21, 1984. In the PRO, the ERA alleged that during the period November 1979 through January 1981, Cougar committed violations of the crude oil reseller "layering regulation," 10 CFR 212.186. The ERA also sought to hold Sanborn personally liable for the pricing violations as the "central figure"controlling Cougar's activities.

The DOE found no merit in Cougar's arguments that the PRO was procedurally inadequate or that the layering regulation was not validly promulgated. The DOE held that in order for Cougar to rebut the ERA's prima facie showing of layering, the firm had to provide evidence of some tangible service which facilitated the movement of crude oil from the producer to the refiner or some other function of economic benefit to the crude oil market. In one instance, the DOE found that Cougar paid a service firm to sample and analyze crude oil, and concluded that no layering violation had

occurred with respect to that transaction. In general, however, the DOE found that Cougar had failed to rebut the evidence of layering presented by the ERA. In response to Cougar's objection that certain crude oil purchases and sales were improperly matched, the DOE accepted that ERA's rematching of those purchases and sales. The DOE also rejected Sanborn's argument that he could not be held personnally liable for the full amount of the overcharges. Accordingly, the PRO, with modifications, was issued as a final Remedial Order. The Remedial Order directs Cougar and Sanborn to refund $4,843,747.97 plus interest, for distribution under 10 CFR Part 205, Subpart V.

Petroleum Carrier Company, Inc., et al., 6/26/87 HRO–0228

Petroleum Carrier Company, Inc., Max B. Penn, and Rodney Siegfried (Respondents) objected to a Proposed Remedial Order (PRO) which the DOE's Economic Regulatory Administration (ERA) issued to them on April 6, 1984. Respondents' Statement of Objections and Objections Supplement set forth only general denials to the PRO. Although given numerous opportunities to submit evidence in support of their claims, the Respondents declined to do so. The DOE examined the record and found that Respondents' submissions failed to rebut the prima facie case established by the PRO. As a result, the DOE found that Respondents resold crude oil at price levels which exceeded the maximum lawful selling price permitted under the reseller price rule at 10 CFR 212.93(a) and 212.111(b)(3). The DOE concluded that Respondents should refund $1,163,865.17 plus interest, and that the refund should be disbursed pursuant to 10 CFR Part 205, Subpart V. Accordingly, the PRO, with a modificaiton, was issued as a final Remedial Order.

Storey Oil Company, Inc., 6/24/87, HRO–0211

Storey Oil Company, Inc. objected to a Proposed Remedial Order (PRO) which the DOE's Economic Regulatory Administration (ERA) issued to the firm on February 14, 1984. In the PRO, ERA found that the firm sold motor gasoline during the period September 1, 1979 through November 30, 1979 at prices in excess of those permitted by the price rule applicable to reseller-retailers, 10 CFR 212.93. After considering the firm's objections, the DOE concluded that the PRO, with modifications, should be issued as a final Order.

Important issues considered in the Decision were (i) the applicability of the acquired entity rule, 10 CFR 212.111(c), in the context of an acquisition of a bulk distribution plant from a refiner, (ii) the inapplicability of the new item/new market rule, 10 CFR 212.111(b), to sales from a retail outlet where the firm previously made sales from a bulk plant to "consumers" as that term is used in the new item/new market rule, (iii) the DOE's refusal to follow, during the pendency of the DOE's appeal to TECA, the district court decision in *County Fuel Company* v. *DOE*, 644 F. Supp. 294 (D. Md. 1986) (DOE required to compute the MLSP for retail sales by a reseller-retailer during the period July 1979 to May 1980 by reference to the July 19, 1979 fixed margin rule, 44 FR 42542 (July 19, 1979), applicable to retailers), and (iv) whether the record supported ERA's finding that the firm's transportation costs had declined from the base period to the audit period.

Petition for Special Redress

Arkansas, 6/26/87, KEG–0010

The DOE issued a Decision and Order concerning a Petition for Special Redress submitted by the State of Arkansas. The State sought approval to use Stripper Well funds for a project found by the DOE's Assistant Secretary for Conservation and Renewable Energy to be inconsistent with the terms of the Stripper Well Settlement Agreement. After considering Arkansas' Petition, the DOE disapproved the State's proposal to use $400,000 for the Natural Gas Line Extension Project. The DOE found that the project was not an "energy assistance program" as defined in the 1981 Chevron Consent Order. Furthermore, the DOE found that the program did not qualify as a new program under the guidelines established in previous determinations. Accordingly, Arkansas' Petition for Special Redress was denied.

Requests for Exception

Fleming Bros. Oil Co., 6/26/87, KEE–0130

Fleming Bros. Oil Co. filed an Application for Exception in which the firm sought to be relieved of the requirement to file Form EIA–782B, entitled "Reseller/Retailers' Monthly Petroleum Product Sales Report." In its Application the firm argued that exception relief was warranted on the grounds that the firm had filed the form for three years and that it spent one hour per month on preparing the form. In considering the request, the DOE found that the firm was not suffering an inordinate burden by fulfilling its reporting obligations. Accordingly, exception, relief was denied.

McCormick Marketing, Inc., 6/26/87, KEE–0096

McCormick Marketing, Inc. filed an Application for Exception in which the firm sought to be relieved of the requirement to file Form EIA–782B, entitled "Reseller/Retailers' Monthly Petroleum Product Sales Report." The firm argued that exception relief was warranted on the ground that it had only one full-time employee for bookkeeping and administrative tasks and that it took that employee three hours per month to prepare the form. In considering the request, the DOE found that the firm would not suffer an inordinate burden by fulfilling its reporting obligation. Accordingly, exception relief was denied.

Wm. Fabian & Son, Inc., Craft Oil Co., Par-Mar Oil Co., 6/26/87, KEE–0092, KEE–0101, KEE–0116

W. Fabian & Son, Inc., Craft Oil Co. and Par-Mar Oil Co. filed Applications for Exception seeking relief from the requirement to file Form EIA–782B, entitled "Reseller/Retailer's Monthly Petroleum Product Sales Report." The firms argued that exception relief was warranted on the ground that they spent from one and one-half to four hours per month preparing the form. In considering the request, the DOE found that the firms would not suffer an inordinate burden by fulfilling their reporting obligations. Accordingly, exception relief was denied.

Refund Applications

Charter Co./Louisiana, National Helium Corp./Massachusetts, OKC Corp./Louisiana, 6/25/87, RQ23–359, RQ3–366, RQ13–375

The DOE issued a Decision and Order approving the second-stage refund applications submitted by the State of Louisiana and the Commonwealth of Massachusetts in the Charter Co., National Helium Corp., and OKC Corp. refund proceedings. Louisiana will use $74,200 for the New Orleans Vanpool Program, $55,100 for the Marine Energy Conservation Program, and $60,000 for the Fertilizer Application Energy Conservation Education Program. Massachusetts will use $125,000 for the Fleet Management Program. In evaluating the plans, the DOE found that they would conserve energy and provide restitutionary benefits to consumers who were injured by the oil violations during the period 1973–1981.

Consolidated Freightways of Delaware, Inc., Combustion Engineering, Inc., Salem Transportation Co., Inc., 6/

23/87, RF270–1516, RF270–1531, RF270–1532

The DOE issued a Decision and Order in connection with its administration of the $10.75 million Surface Transporter Escrow fund established pursuant to the settlement agreement in the DOE Stripper Well Exemption Litigation. The DOE approved the volumes of refined petroleum products used by a Class 100 motor carrier, a diversified engineering firm with its own fleet, and an airport passenger transportation company. The DOE will use those volumes as the basis for the refunds that will ultimately be issued to the firms. The total number of gallons approved in this Decision and Order is 654,060,002.

Cressona Trucking Company et al., 6/24/87, RF270–881 et al.

Cressona Trucking Company, and twenty-six other for-hire and private motor carriers sought refunds from the $10.75 million Surface Transporters Escrow fund established pursuant to the settlement agreement in the DOE Stripper Well Exemption Litigation. The DOE examined each claim and ascertained that each of the applicants is an eligible surface transporter, and that its claim does not exceed the volume of petroleum products that the applicant consumed in vehicle operations. The DOE approved the volumes that will be the bases of the refunds ultimately issued to the firms. The total volume approved in this Decision and Order is 118,765,601 gallons.

Davidson Brothers et al., 6/26/87, RF270–1447 et al.

The DOE issued a Decision and Order in connection with its administration of the $10.75 million Surface Transporters Escrow fund established pursuant to the settlement agreement in the DOE Stripper Well Exemption Litigation. The DOE approved the volumes of refined petroleum products used by fifteen Common Motor Freight Carriers or Bulk Commodity Haulers, after adjusting three claims to compensate for mathematical errors. The DOE will use those volumes as a basis for the refund that will ultimately be issued to the three firms. The total number of gallons approved in this Decision and Order is 90,682,092.

Delux Limousine Service, Inc., Port Washington Delux Taxi, Inc., 6/24/87, RF270–1122, RF270–1144

The DOE issued a Decision and Order approving two affiliated companies who filed separate timely applications for Surface Transporter Refunds. Since both companies could have consolidated their applications into a single application, the DOE considered the two claims as if they had been properly consolidated. The DOE approved the applications after making certain adjustments to the volumes claimed by the firms. The DOE will use these volumes as the bases for the refunds ultimately granted to the firms. The total number of gallons approved in this decision and order is 1,215,552.

East Penn Manufacturing Co. et al., 6/23/87, RF270–2264 et al.

The DOE issued a Decision and Order concerning eight Applications for Refund from the $10.75 million Surface Transporters Escrow fund established pursuant to the settlement agreement in the DOE Stripper Well Exemption Litigation. Each applicant demonstrated that it operated motor vehicles during the settlement period and that it was either a "for hire" carrier or a private fleet operator for the purposes of theis proceeding. One of the applicants based part of its claim on propane consumed by buses. The DOE found that this was an acceptable use of an eligible fuel because these vehicles operated over the road just like taxicabs, whose use of propane had previously been approved. *Owensboro Yellow Cab Co.*, 15 DOE ¶ 85,363 (1987). Accordingly, all eight Applications were approved, and the respective volumes will be used to calculate each company's refund. The total number of gallons approved in this Decision and Order is 15,755,646.

Elm City Filling Stations, Inc./ Consolidated Edison Co. of New York, 6/24/87, RF255–3

Consolidated Edison Company of New York applied for a refund from the Elm City Stations, Inc. consent order fund on the basis of its purchase of residual fuel from JOC Oil Company, a direct purchaser of Elm City residual fuel. The DOE determined that the residual fuel that Con Ed purchased from JOC in January 1974 was unlikely to have been the product purchased by JOC from Elm City in the November 1973 transaction covered by the Elm City consent order. Accordingly, Con Ed's refund application was denied.

Good Hope Refineries/Marathon Petroleum Company, 6/24/87, RF189–11

The DOE issued a Decision and Order concerning an Application for Refund filed by Marathon Petroleum Company on the basis of the procedures outlined in *Good Hope Refineries*, 13 DOE ¶ 85.105 (1985). Marathon, a major refiner that resold Good Hope motor gasoline and No. 2 fuel, was a spot purchaser. According to the *Good Hope* procedures, spot purchasers are ineligible for refunds unless they present a showing that they were injured. Marathon did not submit documentation demonstrating that it was injured by its spot purchases. Therefore, Marathon's refund application was denied.

Gulf Oil Corporation/Lee's Gulf Service, 6/25/87, RF40–2941

The DOE granted a refund from the Gulf Oil Corporation consent order escrow account to Lee's Gulf, a retailer of Gulf petroleum products. Lee's demonstrated that it would not have been required to reduce its selling prices to its customers by the amount of the refund claimed. The refund to Lee's totals $536.

Gulf Oil Corporation/Roo's Gulf et al., 6/23/87, RF40–3387 et al.

The DOE issued a Decision and Order concerning four Applications for Refund filed by retailers of Gulf Oil Corporation petroleum products. Each firm applied for a refund based on the procedures outlined in *Gulf Oil Corporation*, 12 DOE ¶ 85,048 (1984), governing the disbursement of settlement funds received from Gulf pursuant to a 1978 Consent Order. In accordance with those procedures, each applicant demonstrated that it would not have been required to pass through to its customers a cost reduction equal to the amount of the refund claimed. After examining the applications and supporting documentation submitted by the claimants, the DOE concluded that they should receive refunds totaling $2,002, representing $1,598 in principal and $404 in accrued interest.

Joy Farm Transportation, Inc. et al., 6/24/87, RF270–432 et al.

The DOE issued a Decision and Order in connection with its administration of the $10.75 million Surface Transporters Escrow fund established pursuant to the settlement agreement in the DOE Stripper Well Exemption Litigation. The DOE approved the volumes of refined petroleum products claimed by four private bus companies and will use those volumes as the bases for the refunds that will ultimately be issued to the four firms. The total number of gallons approved in this Decision and Order is 13,016,063.

Marathon Petroleum Company/Bud's Service, ABC Oil Company, 6/23/87, RF250–2507 et al.

The DOE issued a Decision and Order concerning Applications for Refund filed by Bud's Service and ABC Oil Company, both purchasers of products covered by a consent order that the agency entered into with Marathon Petroleum Company.

Each applicant demonstrated the volume of its Marathon purchases, and each declined to submit a demonstration that it was injured by the alleged overcharges. Therefore, each applicant was granted a refund under the 35 percent presumption of injury. The sum of refunds approved in this Decision and Order is $13,764 in principal and $1,409 in interest.

Marathon Petroleum Company/Major Oil Products, 6/25/87, RF250–2334, RF250–2335

The DOE issued a Decision and Order granting an Application for Refund filed by Major Oil Products (Major) in connection with the Marathon Petroleum Company special refund proceeding. Under the refund procedures estalished for Marathon applicants, Major's purchase volume corresponded to a volumetric share exceeding the $5,000 small claim threshold level. However, the firm elected to limit its refund claim to $5,000, and was therefore not required to submit a detailed showing of injury. The total refund granted Major is $5,512, representing $5,000 in principal and $512 in interest.

Marathon Petroleum Company/Monarch Oil & Supply Co., 6/23/87, RF250–1523

Monarch Oil & Supply Co. (Monarch) filed an Application for Refund in which the firm sought a portion of the fund obtained by the DOE through a consent order entered into with Marathon Petroleum Company (Marathon). Monarch demonstrated that it purchased 4,337,731 gallons of motor gasoline during the consent order period from Marathon through Universal Oil, a direct purchaser that had not filed an Application for Refund in the Marathon proceeding. Using a volumetric methodology, the DOE determined that Monarch's claim was below the presumption of injury threshold refund level of $5,000. The DOE therefore granted Monarch a refund of $1,821.85 in principal and $173.51 in accrued interest for a total of $1,995.36.

Marathon Petroleum Company/Pacino's Marathon, 6/23/87, RF250–1715

Pacino's Marathon (PM) filed an Application for Refund in which the firm sought a portion of the fund obtained by the DOE through a consent order entered into with Marathon Petroleum Company (Marathon). PM demonstrated that it purchased 1,974,000 gallons of motor gasoline during the consent order period from Marathon through Brubaker Oil Company, a direct purchaser that had not filed an application for Refund in the Marathon proceeding. Using a volumetric methodology, the DOE determined that PM's claim was below the presumption of injury threshold refund level of $5,000. The DOE therefore granted PM a refund of $829.08 in principal and $78.96 in accrued interest for a total refund of $908.04.

Marathon Petroleum Company/Toney's Marathon, 6/23/87, RF250–1524

Toney's Marathon (TM) filed an Application for Refund in which the firm sought a portion of the fund obtained by the DOE through a consent order entered into with Marathon Petroleum Company (Marathon). TM demonstrated that it purchased 571,898 gallons of motor gasoline during the consent order period from Marathon through Ray Stewart, a direct purchaser that had not filed an Application for Refund in the Marathon proceeding. Using volumetric methodology, the DOE determined that TM's claim was below the presumption of injury threshold refund level of $5,000. The DOE therefore granted TM a refund of $240.20 in principal and $22.88 in accrued interest for a total refund of $263.08.

Marathon Petroleum Company/Painter Petroleum Co., 6/23/87, RF250–1360, RF250–1361

Painter Petroleum Co. (PPC) filed two Applications for Refund in which the firm sought a portion of the fund obtained by the DOE through a consent order entered into with Marathon Petroleum Company (Marathon). PPC demonstrated that it purchased 6,582,549 gallons of motor gasoline and 1,962,570 gallons of middle distillates during the consent order period from Marathon through Ball Tire & Gas, Inc. which had been granted a refund as a direct purchaser under the 35 percent presumption of injury method. Using a volumetric methodology, the DOE determined that PPC's claim was below the presumption of injury threshold refund level of $5,000. The DOE therefore granted PPC a refund of $3,588.95 in principal and $341.80 in accrued interest for a total refund of $3,930.75.

Marathon Petroleum Company/Private Brand Services, Inc. Johnson Oil Company, 6/24/87, RF250–2448, RF250–2490, RF250–2491

The DOE issued a Decision and Order concerning Applications for Refund filed on behalf of Private Brand Services, Inc. and Johnson Oil Company. Private Brand Services demonstrated its indirect purchases of Marathon product through Johnson Oil Company and another supplier. Johnson Oil Company demonstrated its direct purchases of covered product from Marathon. Johnson Oil Company was granted a refund on the basis of the 35 percent presumption of injury, and Private Brand Services was granted a refund under the small claims presumption of injury. The sum of the refunds approved in this Decision is $11,861 in principal and $1,214 in interest for a total refund of $13,075.

Mobil Oil Corporation/Central & Grove Mobil, 6/26/87, RF225–10848

The DOE issued a Decision and Order concerning duplicate Applications for Refund filed by Richard Bird, owner of Central & Grove Mobil. In the Decision, the DOE determined that the applicant had received two refunds based on its purchases from Mobil, and that it should remit $495 for deposit into the Mobil escrow account.

Roesch Lines et al., 6/24/87, RF270–289 et al.

The DOE issued a Decision and Order in connection with its administration of the $10.75 million Surface Transporters Escrow fund established pursuant to the settlement agreement in the DOE Stripper Well Exemption Litigation. The DOE approved the volumes of refined petroleum products claimed by 13 companies which operated private fleets of trucks and will use those volumes as the bases for the refunds that will ultimately be issued to the 13 firms. The total number of gallons approved in this Decision and Order is 176,647,032.

Shulton, Inc. & John Breck Divisions of American Cyanamid Co., American Cyanamid Co., Chemicals Group, 6/25/87, RF270–751, RF270–1119

The DOE issued a Decision and Order approving two affiliated companies who filed separate timely applications for refunds from the Surface Transporters Escrow fund. Since both companies could have consolidated their applications into a single application, the DOE considered the two claims as if they had been properly consolidated. The total number of gallons approved in this Decision and Order is 8,766,443.

T. Achenberg Transportation Co. et al., 6/23/87, RF270–1799 et al.

The DOE issued a Decision and Order in connection with its administration of the $10.75 million Surface Transporters Escrow fund established pursuant to the settlement agreement in the DOE Stripper Well Exemption Litigation. The DOE approved the purchase volumes of refined petroleum products claimed by twelve trucking companies and will use those volumes as the bases for the refunds that will ultimatley be issued to the twelve firms. The total number of

gallons approved in this Decision and Order is 22,912,027.

The Davidson Transfer and Storage Company, Inc. et al., 6/24/87, RF270–921 et al.

The Davidson Transfer & Storage Company, Inc. and eighteen other for-hire motor carriers filed Applications for Refund, seeking funds from the Surface Transporters Escrow fund established pursuant to the settlement agreement in the DOE Stripper Well Exemption Litigation. The DOE examined each claim and ascertained that each of the applicants is an eligible surface transporter, and its claim did not exceed the gallons of petroleum products that the applicant consumed in vehicle operations. The total volume approved in this Decision and Order is 43,164,320 gallons. The DOE will determine a per gallon refund amount and establish the amount of each company's refund after it completes its analysis of all Surface Transporter claims.

Ward Trucking Corp. et al., 6/25/87, RF270–285 et al.

The DOE issued a Decision and Order in connection with its administration of the $10.75 million Surface Transporters Escrow fund established pursuant to the settlement agreement in the DOE Stripper Well Exemption Litigation. The DOE approved the volumes of refined petroleum products claimed by 26 trucking companies which operated as common carriers and will use those volumes as the bases for the refunds that will ultimately be issued to the 26 firms. The total number of gallons approved in this Decision and Order is 116,542,082.

Yellow Cab Co. of Greater Buffalo et al., 6/26/87, RF270–1681 et al.

The DOE issued a Decision and Order approving the volumes of thirteen Applicants for Refund from the Surface Transporters Escrow, established as the result of the DOE Stripper Well Settlement Agreement. The DOE will determine a per gallon refund amount and establish the amount of each company's refund after it completes its analysis of all Surface Transporter Claims. The total number of gallons approved in this Decision and Order is 37,752,285.

BILLING CODE 6450–01–M

Issuance of Decisions and Orders: Week of August 17 Through August 21, 1987

During the week of August 17 through August 21, 1987, the decisions and orders summarized below were issued with respect to appeals and applications for exception or other relief filed with the Office of Hearings and Appeals of the Department of Energy. The following summary also contains a list of submissions that were dismissed by the Office of Hearings and Appeals.

Appeal

Citizen/Labor Energy Coalition, 8/19/87, KFA–0110

The Citizen/Labor Energy Coalition filed an Appeal from a denial by the Director, Office of Oil and Gas, Energy Information Administration, of a Request for Information which it had submitted under the Freedom of Information Act (FOIA). In considering the Appeal, the DOE found that, except for some transmittal and telecommunication slips, the documents at issue were properly withheld under Exemption 4 and 5 of the FOIA, which exempt confidential commercial information and predecisional agency material from mandatory disclosure. Important issues considered in the Decision and Order involved the confidentiality of survey data and whether drafts of the report at issue came within the agency's deliberative process privilege.

Remedial Order

Texaco Inc., 8/20/87, HRO–0276

Texaco Inc. objected to a Proposed Remedial Order alleging that the firm used excessive May 15, 1973 prices in computing its maximum allowable prices for sales of propane to Dow Chemical Company and Enterprise Products Company. The PRO found that the use of an excessive May 15, 1973 selling price was a per se violation of the refiner price rule for which refunds can be ordered. The PRO proposed the adoption of either a "refund down" remedy or a MAP recalculation. The "refund down" remedy was based on the difference between the correct and incorrect May 15, 1975 selling prices, multiplied by the volume of propane sold during the period in which Texaco used the incorrect May 15, 1973 price. The DOE rejected Texaco's factual objection and affirmative defenses to the May 15 selling price allegation and then determined that the "refund down" remedy was appropriate and lawful. The DOE found that the "refund down" was appropriate because, inter alia, it would remedy the precise regulatory harm that occurred and would further the national energy policy of concluding the enforcement program in a timely manner. In connection with its determination that the "refund down" was lawful, the DOE agreed with the PRO's finding that the use of an incorrect May 15, 1973 selling price was a per se violation of the refiner price rule for which refunds can be ordered. In making this determination, the DOE requested that the Federal Energy Regulatory Commission reconsider its decision in *Exxon U.S.A. Inc.*, 35 FERC 61,033 (1986), in which the FERC held that the use of an incorrect May 15, 1973 selling price was not a per se violation of the refiner price rule for which refunds can be ordered. In this regard, the DOE explained why it believed that the FERC decision was incorrect at the time it was issued and that, in any event, the issuance of a recent TECA decision alone warranted a reconsideration of the Exxon decision.

Request for Exception

Winco, Inc., 8/20/87, KEE–0123

Winco, Inc. filed an Application for Exception seeking relief from the reporting requirements of Form EIA–782B. In considering the request, the DOE found that in view of its precarious financial condition, the firm was experiencing an unfair distribution of burdens as a result of the reporting requirements and that exception relief was warranted. Accordingly, relief

BEST COPY AVAILABLE

VOL 52 ISS 197 OCT 13 1987 UMI

excepting Winco from any obligation to file Form EIA–782B was approved.

Refund Applications

Affiliated of Florida, Inc. et al., 8/20/87, RF270–446 et al.

The DOE issued a Decision and Order in connection with its administration of the $10.75 million escrow fund established for surface transporters pursuant to the settlement agreement in the DOE stripper well exemption litigation. The DOE approved the gallonages of refined petroleum products claimed by forty-two trucking companies and will use those gallonages as a basis for the refund that will ultimately be issued to the forty-two firms. The total gallonage approved in the Decision was 146,938,444.

Connecticut American Charters, Inc., et al., 8/18/87, RF270–1225, et al.

The Department of Energy issued a Decision approving ten applications for refunds from the Surface Transporter Escrow, established as a result of the Stripper Well Settlement Agreement. The applicants all provided private surface transportation services. The total number of gallons approved is 46,575,417.

Delaware and Hudson Railroad Company, 8/19/87, RF271–230

The DOE corrected a Decision and Order issued to Delaware and Hudson (D&H), granting the firm's Application for a Refund from the Rail and Water Transporters Escrow. Specifically, the DOE amended the gallonage figure that will be used in calculating the firm's refund to reflect a correction submitted by D&H. Accordingly, D&H's refund will be based on its use of 132,162,080 gallons of petroleum products.

Farm House Foods Corporation, et al., 8/19/87, RF270–2296, et al.

The DOE issued a Decision and Order granting five Applications for Refund from the $10.75 million Surface Transporters Escrow fund established pursuant to the Settlement Agreement in the DOE Stripper Well Exemption Litigation. Each applicant demonstrated that it operated motor vehicles during the Settlement Period and that it was a private fleet operation for the purposes of this proceeding. The total number of gallons approved in this Decision is 38,046,466.

Getty Oil Company/Baltimore Gas & Electric Co., et al., 8/21/87, RF265–1785 et al.

The DOE issued a Decision and Order concerning six Applications for Refund filed by public utilities that used products covered by a consent order that the agency entered into with Getty Oil Company. Each applicant submitted information indicating the volume of Getty products that were purchased. As end-users, these applicants were entitled to receive a refund in the full volumetric amount. The sum of the refunds approved in this Decision is $309,467, representing $406,465 and $403,002 in accrued interest.

Getty Oil Company/Borough of Media, et al., 8/20/87, RF265–956, et al.

The DOE issued a Decision and Order concerning four Applications for Refund filed by municipalities that used products covered by a consent order that the agency entered into with Getty Oil Company. Each applicant submitted information indicating the volume of Getty products that it purchased. As end-users, these applicants were entitled to the full volumetric amount. The sum of the refunds approved in this Decision is $6,196, representing $3,111 in principal and $3,085 in accrued interest.

Getty Oil Company/Boyler's OK Service, et al., 8/17/87, RF265–2203, et al.

The DOE issued a Decision and Order concerning eight Applications for Refund filed by resellers or retailers of products covered by a consent order that the agency entered into with Getty Oil Company. Four applicants were eligible for refunds based on the $5,000 small claims presumption and the remaining four applicants elected use that presumption by to limiting their claims to $5,000. The sum of the refunds approved in this Decision is $87,586, representing $33,938 in principal and $33,648 in accrued interest.

Getty Oil Company/Butler's L.P. & Fertilizer, Inc., et al., 8/17/87, RF265–2498, et al.

The DOE issued a Decision and Order concerning five Applications for Refund filed by retailers of products covered by a consent order that the agency entered into with Getty Oil Company. Three applicants were eligible for refunds based on the $5,000 small claims presumption and the remaining two applicants elected to use that presumption by limiting their claims to $5,000. The sum of the refunds approved in this Decision is $43,093, representing $21,638 in principal and $21,454 in accrued interest.

Getty Oil Company/Kumm Gas Company, Inc., et al., 8/17/87, RF265–2504 et al.

The DOE issued a Decision and Order concerning three Applications for Refund filed by resellers and retailers of products covered by a consent order that the agency entered into with Getty Oil Company. Two applicants were eligible for refunds based on the $5,000 small claims presumption. In the remaining case, the applicant elected to use that presumption by limiting its claim to $5,000. The sum of the refunds approved in this Decision is $17,345, representing $8,710 in principal and $8,635 in accrued interest.

Getty Oil Company/Sussex Petroleum Co., Inc., 8/19/87, RF265–2520

The DOE issued a Decision and order concerning an inadvertent overstatement of 118,183 gallons of middle distillates in the purchase volume used in calculating the refund previously granted to Sussex Petroleum Co., Inc. Accordingly, the prior refund was corrected and the total Sussex refund approved was $6,939, representing $3,484 in principal and $3,455 in accrued interest.

Gulf Oil Corporation/Illinois Valley Supply Company, 8/19/87, RF40–3592

The DOE issued a Decision and Order concerning an Application for Refund filed by Illinois Valley Supply Company, a reseller of propane sold by Gulf Oil Corporation. The firm applied for a refund based on the procedures outlined in *Gulf Oil Corp.*, 12 DOE ¶ 85,048 (1984), governing the disbursement of settlement funds received from Gulf pursuant to a 1978 consent order. The applicant demonstrated that it would not have been required to pass through to customers a cost reduction equal to the refund claimed. After examining the estimation technique and other supporting data submitted by the applicant, the DOE concluded that the firm should receive a refund of $2,992 ($2,370 principal plus $622 interest).

Hunt Concrete, et al., 8/18/87, RF270–2447 et al.

The DOE issued a Decision and Order concerning Applications for Refund filed by four firms seeking portions of the Surface Transporters Escrow. Each of the applications was received after the December 8, 1986 filing deadline established for such claims. In considering each firm's reasons for its late filing, the DOE found that none of the firms had convincingly demonstrated that its position was materially different from any of the approximately 2400 other firms that managed to file timely applications. Accordingly, the DOE dismissed the four applications as untimely filed.

Joyce Bros. Storage & Van, et al., 8/19/87, RF270–1214, et al.

The Department of Energy issued a Decision approving applications submitted by eleven firms for refunds from the Surface Transporter Escrow, established as a result of the Stripper Well Settlement Agreement. Each applicant operated motor vehicles for surface transporter and applied for a refund based on its purchases of motor gasoline and diesel fuel between August 19, 1973 and January 27, 1981. The total number of gallons approved in this Decision is 39,538,680.

Lapeer Community Schools, Matney Service Station, Jonesville Community Schools, 8/21/87, RF270–1203, RF270–1205, RF270–1246

The Department of Energy issued a Decision considering the applications for refunds from the Surface Transporter Escrow, submitted by Lapeer Community Schools, Matney Service Station and Jonesville Community Schools. The DOE determined that Lapeer and Jonesville were school districts and that Matney was a service station. The DOE therefore found that they had failed to establish that they were Surface Transporters as defined in the Stripper Well Settlement Agreement establishing the escrow fund. Accordingly, the applications were denied.

Magnolia Marine Transport Co., et al., 8/19/87, RF271–123, et al.

The Department of Energy issued a Decision and Order approving applications submitted by six water transporters for refunds from the Rail and Water Transporters Escrow established as a result of the Stripper Well Settlement Agreement. Each applicant used an acceptable method for estimating its fuel use. The total number of gallons approved in the Decision was 114,976,098.

Mapco, Inc./Gulf States Oil & Refining Co., 8/17/87, RF108–17

Gulf States Oil & Refining Co. filed an Application for Refund in the Mapco, Inc. refund proceeding. Gulf States' refund claim was based on 71,392,254 gallons of covered products, of which 70,955,792 gallons were obtained through exchanging products rather than actual purchases. Since Gulf States failed to establish any regulatory violation with respect to the exchange transactions, the DOE denied the firm's refund request with respect to the gallons that the firm obtained through exchange. Gulf States' refund request was granted for the 436,462 gallons that the firm actually purchased from Mapco. The amount of the refund granted to Gulf States was $785.63, plus $414 in interest.

Midwest Coast Transport, Inc., 8/19/87, RF270–1536

Midwest Coast Transport filed an Application for Refund in the Surface Transporters Escrow fund. The claim included volumes purchased by both Midwest and its independent contractors (owner operators). Although Midwest indicated its intention to pass any refunds through to its owner operators, the DOE approved for refunds only the volumes of product actually purchased by the claimant. The basis for this determination was (i) that the owner operators had not signed claim forms agreeing to be bound by the terms of the Settlement, and (ii) that since each owner operator's purchase volumes were lower than the minimum threshold, they are not individually members of the class for which the Surface Transporters Escrow was established. The total gallonage approved was 13,356,495.

Panella Trucking, Inc., Ralph Panella Trucking, 8/19/87, RF270–890, RF270–891

Panella Trucking, Inc. and Ralph Panella Trucking filed application seeking refunds from the Surface Transporters Escrow established pursuant to the Stripper Well Settlement Agreement. Panella Trucking, Inc. claimed 3,514,108 gallons of motor fuel, and Ralph Panella Trucking's claimed 564,994 gallons. While noting that the two applicants are affiliated firms under a common ownership, and that a strict adherence to the waiver and release clause would have resulted in dismissal of one the two applications, the DOE decided that the gallons that the applicants each claimed were not duplicative, and that the two claims had the same effect as one claim based on a consolidated volume. Accordingly, the DOE granted the applications and approved a total gallonage claim of 4,079,102.

Path Truck Lines, Inc., et al., 8/18/87, RF270–9 et al.

The Department of Energy issued a Decision and Order approving 23 Applications for Refund from the Surface Transporters Escrow, established as the result of the Stripper Well Settlement Agreement. The applicants, "for hire" trucking companies, private fleets of trucks, taxi companies, or bus companies, applied for refunds based on purchases of diesel fuel, motor gasoline, motor oil, and lubricating oils. The total number of gallons approved was 63,522,180.

Petroleum Heat and Power Co., Inc./A-One Oil, Inc., 8/19/87, RF285–17

The DOE issued a Decision and Order concerning an Application for Refund filed by A-One Oil, Inc. a retailer of Petroleum Heat and Power Co., Inc. No. 2 heating oil. A-One applied for a refund based on the procedures outlined in *Petroleum Heat and Power Co., Inc.*, 15 DOE ¶ 85,036 (1986), governing the disbursement of settlement funds received from PHP pursuant to a November 13, 1980 Consent Order. Since A-One's purchases entitled it a refund of less than $5,000, the firm was presumed to have been injured by the PHP alleged overcharges. After examining the application and supporting documentation submitted by A-One, the DOE granted the firm a refund of $7,252, representing $4,431 in principal and $2,821 in accrued interest.

R.O. Harrell, Inc. et al., 8/21/87, RF270–581 et al.

The DOE issued a Decision and Order in connection with its administration of the $10.75 million escrow fund established for surface transporters pursuant to the settlement agreement in the DOE stripper well litigation. The DOE approved the gallonages of refined petroleum products claimed by twenty trucking companies and will use those gallonages as a basis for the refund that will ultimately be issued to the twenty firms. The total number of gallons approved in the Decision was 73,623,492.

R.W. Harmon & Sons, Inc., et al., 8/18/87, RF270–1186, et al.

The Department of Energy issued a Decision approving six applications for refunds from the Surface Transporters Escrow established as a result of the Stripper Well Settlement Agreement. The claimants provided trucking services, maintained private fleets or contracted for school bus services. The total number of gallons approved in this Decision is 16,072,177.

Sandersville Railroad Company, Inc. et al., 8/21/87, RF271–43 et al.

The DOE issued a Decision and Order approving 19 applications for refunds from the Rail and Water Transporters (RWT) Escrow established as a result of the Stripper Well Settlement Agreement. OHA found that all 19 applicants had established that they were members of the RWT class, and had substantiated the volumes of their purchases of U.S. petroleum products claimed in their respective applications. The total number of gallons approved in this Decision is 217,996,157.

Tresler Oil Company/Kent Oil & Trading Company, Inc., 8/19/87, RF295–3

VOL 52 ISS 197 OCT 13 1987 UMI

Kent Oil & Trading Company, Inc. filed an application for a refund from the Tresler Oil Company escrow account. The DOE determined that Kent was a spot purchaser of Tresler product that failed to rebut the presumption that it was not injured as a result of those transactions. Accordingly, the Kent application was denied.

Vickers Energy Corp./Missouri Standard Oil Company (Indiana)/ Missouri OKC Corp./Missouri, 8/ 19/87, RM1–71, RM251–72, RM13–73

The State of Missouri filed Requests for Modification with the Office of Hearings and Appeals. The State sought permission to use second stage refund monies derived from escrow accounts provided by Amoco and OKC Corporation to pay for a project that was originally to be funded by a Vickers Energy Corporation Escrow Account. The DOE found that due to pending litigation, the Vickers fund could not yet be released and that the State's request should therefore be granted.

Wallack Freight Lines, Inc., 8/20/87, RR270–2

Wallack Freight Lines, Inc. (Wallack) filed a Motion for Reconsideration of the dismissal by the DOE of its Application for Refund from the Surface Transporters Escrow fund. The firm's refund application had been dismissed because it was filed after the December 8, 1986 filing deadline established for Surface Transporter applications. In its Motion, Wallack stated that it had been informed by a local trucking association that the filing deadline had been extended and that it did not receive the claim form in sufficient time to meet the filing deadline. The DOE stated that the agency could not be held responsible for erroneous information concerning the deadline and that Wallack had not convincingly demonstrated that its position was materially different from that of any other firms that managed to file timely applications. Accordingly, the firm's Motion for Reconsideration was denied.

Dismissals

The following submissions were dismissed.

Name	Case No.

ENVIRONMENTAL PROTECTION AGENCY

[FRL–3275–8]

Science Advisory Board, Research Strategy Subcommittee, Sources, Transport and Fate Group; Open Meeting

Under Pub. L. 92–463, notice is hereby given that the Sources, Transport and Fate Group of the Science Advisory Board's Research Strategy Subcommittee will meet from 9:00 a.m. to 4:00 p.m. on October 15th at the Airport Hilton Inn at 4411 Peoria Street, Denver, Colorado in the Conference Room. The purpose of the Research Strategy Subcommittee is to advise the Administrator of the Environmental Protection Agency on the development of research strategies needed to enhance the Agency's ability to acquire scientific and technical information to support regulatory decision making, and to identify emerging environmental problems. The Sources, Transport and Fate Subgroup will evaluate environmental contaminants from both a media-specific and a multi-media basis.

The meeting is open to the public. Any member of the public wishing to attend or submit written comments should notify Dr. Terry F. Yosie, Director, Science Advisory Board, at 202-382-4126 or Joanna Foellmer by October 13, 1987.

Dated: October 7, 1987.

Terry F. Yosie,

Director, Science Advisory Board.

BILLING CODE 6712-01-M

FEDERAL DEPOSIT INSURANCE CORPORATION

Information Collection Submitted to OMB for Review

AGENCY: Federal Deposit Insurance Corporation.

ACTION: Notice of information collection submitted to OMB for review and approval under the Paperwork Reduction Act of 1980.

Title of Information Collection: Notices Required of Government Securities Dealers or Brokers (Insured State Nonmember Banks).

Background: In accordance with requirements of the Paperwork Reduction Act of 1980 (44 U.S.C. Chapter 35), the FDIC hereby gives notice that it has submitted to the Office of Management and Budget a request for OMB review for the information collection system identified above.

Written comments regarding the submission should be addressed to Robert Fishman, Office of Information and Regulatory Affairs, Office of Management and Budget, Washington, DC 20503 and to John Keiper, Assistant Executive Secretary, Federal Deposit Insurance Corporation, Washington, DC 20429.

Comments: Comments on this collection of information should be submitted on or before November 12, 1987.

FOR FURTHER INFORMATION CONTACT: Requests for a copy of the submission should be sent to John Keiper, Assistant Executive Secretary, Federal Deposit Insurance Corporation, Washington, DC 20429, telephone (202) 898-3810.

Summary: The FDIC is requesting OMB approval for implementing the information collection requirements contained in the Government Securities Act of 1986. The act requires all financial institutions that function as government securities brokers and government securities dealers to notify their designated federal regulatory agencies of their broker-dealer activities unless exempt from the notice requirement by the Department of the Treasury regulation. Insured State nonmember banks that act as government securities broker-dealers must file notices with the FDIC. The forms involved in the required notifications are G-FIN, G-FINW, G-FIN-4, and G-FIN-5.

It is estimated that it takes the average bank one hour to prepare the notification form. The FDIC expects to receive 115 forms over a 12 month period resulting in an annual paperwork burden estimate of 115 hours for all respondents.

Dated: October 6, 1987.

Federal Deposit Insurance Corporation.

Hoyle L. Robinson,

Executive Secretary.

[FR Doc. 87-23607 Filed 10-9-87; 8:45 am]

BILLING CODE 6714-01-M

Information Collection Submitted to OMB for Review

AGENCY: Federal Deposit Insurance Corporation.

ACTION: Notice of information collection submitted to OMB for review and approval under the Paperwork Reduction Act of 1980.

Title of Information Collection: Community Reinvestment Act Statement and Recordkeeping.

Background: In accordance with requirements of the Paperwork Reduction Act of 1980 (44 U.S.C. Chapter 35), the FDIC hereby gives notice that it has submitted to the Office of Management and Budget a request for OMB review for the information collection system identified above.

ADDRESS: Written comments regarding the submission should be addressed to

Robert Fishman, Office of Information and Regulatory Affairs, Office of Management and Budget, Washington, DC 20503 and to John Keiper, Assistant Executive Secretary, Federal Deposit Insurance Corporation, Washington, DC 20429.

Comments: Comments on this collection of information should be submitted on or before November 12, 1987.

FOR FURTHER INFORMATION CONTACT: Requests for a copy of the submission should be sent to John Keiper, Assistant Executive Secretary, Federal Deposit Insurance Corporation, Washington, DC 20429, telephone (202) 898–3810.

Summary: The FDIC is requesting OMB approval to continue the collection of information imposed on insured State nonmember banks by regulation 12 CFR Part 345—*Community Reinvestment*, which appeared at 43 FR 47151, October 12, 1978. The information collection requirements of the regulation pertain to the adoption of a Community Reinvestment Act (CRA) statement, posting of a CRA public notice, and maintenance of CRA public files, by banks. These information collection requirements were not previously approved by OMB as required by the Paperwork Reduction Act of 1980. The annual review and updating of CRA statements and the maintenance of public files require, on the average, one hour of effort per bank. The total annual burden on all banks, collectively, is 8,617 hours.

Dated: October 6, 1987.

Federal Deposit Insurance Corporation.

Hoyle L. Robinson,

Executive Secretary.

FEDERAL RESERVE SYSTEM

Bank South Corp., et al.; Formations of, Acquisitions by, and Mergers of Bank Holding Companies

The companies listed in this notice have applied for the Board's approval under section 3 of the Bank Holding Company Act (12 U.S.C. 1842) and § 225.14 of the Board's Regulation Y (12 CFR 225.14) to become a bank holding company or to acquire a bank or bank holding company. The factors that are considered in acting on the applications are set forth in section 3(c) of the Act (12 U.S.C. 1842(c)).

Each application is available for immediate inspection at the Federal Reserve Bank indicated. Once the application has been accepted for processing, it will also be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing to the Reserve Bank or to the offices of the Board of Governors. Any comment on an application that requests a hearing must include a statement of why a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute and summarizing the evidence that would be presented at a hearing.

Unless otherwise noted, comments regarding each of these applications must be received not later than October 30, 1987.

A. **Federal Reserve Bank of Atlanta** (Robert E. Heck, Vice President) 104 Marietta Street, NW., Atlanta, Georgia 30303:

1. *Bank South Corporation*, Atlanta, Georgia; to acquire 92.21 percent of the voting shares of Heritage Trust, Conyers, Georgia.

2. *C & L Banking Corporation*, Bristol, Florida; to become a bank holding company by acquiring 80 percent of the voting shares of C & L Bank of Bristol, Bristol, Florida.

B. **Federal Reserve Bank of St. Louis** (Randall C. Sumner, Vice President) 411 Locust Street, St. Louis, Missouri 63166:

1. *Cardinal Bancorp II, Inc.*, Washington, Missouri; to become a bank holding company by acquiring 100 percent of the voting shares of United Bank of Union, Union, Missouri.

2. *Liberty National Bancorp, Inc.*, Louisville, Kentucky; to acquire, through its wholly-owned subsidiary, CSB Bancshares, Inc., 100 percent of the voting shares of First Indiana Bank, National Association, Milltown, Indiana, and Indiana First National Bank, Charlestown, Indiana.

3. *Okawville Bancshares, Inc.*, Okawville, Illinois; to become a bank holding company by acquiring at least 80 percent of the voting shares of Old Exchange National Bank, Okawville, Illinois.

4. *Old National Bancorp*, Evansville, Indiana; to acquire 100 percent of the voting shares of Furst Farmers Corporation, Madisonville, Kentucky, and thereby indirectly acquire Farmers Bank and Trust Co., Madisonville, Kentucky.

C. **Federal Reserve Bank of Dallas** (W. Arthur Tribble, Vice President) 400 South Akard Street, Dallas, Texas 75222:

1. *Willow Bend Bancshares, Inc.*, Plano, Texas; to acquire 100 percent of the voting shares of Preston North National Bank, Dallas, Texas.

D. **Federal Reserve Bank of San Francisco** (Harry W. Green, Vice

President) 101 Market Street, San Francisco, California 94105:

1. *Eldorado Bancorp*, Tustin, California; to acquire at least 83.8 percent of the voting shares of American Merchant Bank, Newport Beach, California.

Board of Governors of the Federal Reserve System, October 6, 1987.

James McAfee,

Associate Secretary of the Board.

BILLING CODE 6210-01-M

Mercantile Bancorporation, Inc., et al.; Applications To Engage de Novo in Permissible Nonbanking Activities

The companies listed in this notice have filed an application under § 225.23(a)(1) of the Board's Regulation Y (12 CFR 225.23(a)(1)) for the Board's approval under section 4(c)(8) of the Bank Holding Company Act (12 U.S.C. 1843(c)(8)) and § 225.21(a) of Regulation Y (12 CFR 225.21(a)) to commence or to engage *de novo*, either directly or through a subsidiary, in a nonbanking activity that is listed in § 225.25 of Regulation Y as closely related to banking and permissible for bank holding companies. Unless otherwise noted, such activities will be conducted throughout the United States.

Each application is available for immediate inspection at the Federal Reserve Bank indicated. Once the application has been accepted for processing, it will also be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing on the question whether consummation of the proposal can "reasonably be expected to produce benefits to the public, such as greater convenience, increased competition, or gains in efficiency, that outweigh possible adverse effects, such as undue concentration of resources, decreased or unfair competition, conflicts of interests, or unsound banking practices." Any request for a hearing on this question must be accompanies by a statement of the reasons a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute, summarizing the evidence that would be presented at a hearing, and indicating how the party commenting would be aggrieved by approval of the proposal.

Unless otherwise noted, comments regarding the applications must be received at the Reserve Bank indicated or the offices of the Board of Governors not later than October 30, 1987.

A. **Federal Reserve Bank of St. Louis** (Randall C. Sumner, Vice President) 411 Locust Street, St. Louis, Missouri 63166:

1. *Mercantile Bancorporation, Inc.*, St. Louis, Missouri; to engage *de novo* through its subsidiary, Mercantile Investment Services, Inc., St. Louis, Missouri, in brokerage services consisting of buying and selling securities soley as agent for the account of customers pursuant to § 225.25(b)(15) of the Board's Regulation Y. These activities will be conducted in the states of Missouri, Illinois, and Kansas.

B. **Federal Reserve Bank of Minneapolis** (James M. Lyon, Vice President) 250 Marquette Avenue, Minneapolis, Minnesota 55480:

1. *Madison Agency, Inc.*, Sioux Falls, South Dakota; to engage *de novo* through its subsidiary, Madison Agency, Inc., Sioux Falls, South Dakota, in making and servicing loans pursuant to § 225.25(b)(1) of the Board's Regulation Y.

Board of Governors of the Federal Reserve System, October 6, 1987.

James McAfee,

Associate Secretary of the Board.

BILLING CODE 6210-01-M

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Office of the Secretary

Privacy Act of 1974; Deletion of Notices of Systems of Records

AGENCY: Department of Health and Human Services.

ACTION: Notice.

SUMMARY: Notice is hereby given that the Office of the Assistant Secretary for Planning and Evaluation is deleting four Privacy Act Systems of Records previously published in the **Federal Register.**

DATE: Effective October 13, 1987.

ADDRESS: Office of the Assistant Secretary for Planning and Evaluation, Department of Health and Human Services, Washington DC, 20201.

FOR FURTHER INFORMATION CONTACT: For information regarding this action, contact Joan Turek-Brezina, Privacy Act Officer (telephone: 202-245-6141).

Notice is hereby given that the Department of Health and Human Services is deleting the following notices which describe systems of records maintained by the Office of the Assistant Secretary for Planning and Evaluation:

System No	System name	Date published in the FEDERAL REGISTER
00-09-0087	Recipient Survey for the Monthly Reporting and Retrospective Accounting Study	3/24/81
00-09-0090	Recipient Survey of Alternative Approaches to Financing Day Care for AFDC Children	10/13/82
09-90-0089	National Long-Term Care Survey	12/7/81
00-90-0082	Pennhurst Longitudinal Study (also called the Longitudinal Study of the Court Ordered Deinstitutionalization of Pennhurst)	12/22/80

The records formerly covered by the systems notices for the Pennhurst Longitudinal Study and the Recipient Survey for Monthly Reporting and Retrospective Accounting study have been certified as being destroyed or disposed of by the respective contractors, Temple University and Abt Associates, Inc. The project, Recipient Survey of Alternative Approaches to Financing Day Care for AFDC Children, was canceled and the survey never conducted. Consequently, no system of records was ever maintained. The National Long-term Care Survey notice has been superseded by the National Long-Term Care Survey Follow-up notice (09-70-0030) of the Health Care Financing Administration.

Dated: October 2, 1987.

Robert B. Helms,

Assistant Secretary for Planning and Evaluation.

[FR Doc. 87-23549 Filed 10-9-87; 8:45 am]

BILLING CODE 4150-04-M

Alcohol, Drug Abuse, and Mental Health Administration

Community Demonstration Grant Projects for Alcohol and Drug Abuse Treatment of Homeless Individuals; Availability of Funds

AGENCY: National Institute on Alcohol Abuse and Alcoholism (in consultation with the National Institute on Drug Abuse); HHS.

ACTION: Notice of availability of funds.

SUMMARY: The National Institute on Alcohol Abuse and Alcoholism in consultation with the National Institute on Drug Abuse announces the availability of Community Demonstration Grant Projects for Alcohol Drug Abuse Treatment of Homeless Individuals, AA-87-04. These grants will be made under the authority of section 613 of Pub. L. 100-77, the Stewart B. McKinney Homeless Assistance Act, which authorizes funds under section 512 of the Public Health Service Act for a new demonstration program for homeless persons with alcohol and/or drug-related problems.

The purpose of this program is to provide, document and evaluate successful and replicable approaches to community-based alcohol and/or drug abuse treatment and rehabilitation services for homeless individuals with alcohol and/or drug-related problems. The program goals are to effect the following changes among the target population: Decreased levels of alcohol and/or drug abuse; increased cooperation and formal linkages among alcohol treatment, drug treatment, and other supportive services in addressing the multiple needs of homeless individuals with alcohol and/or drug-related problems; improved access to shelter and housing (including alcohol and drug-free living environments); increased access to health and mental health services and improved health and mental health status; enhanced economic status; and improved quality of life.

In fiscal year 1988, NIAAA will make up to ten grant awards for community-based services demonstration projects for alcohol and/or drug-dependent homeless persons. Grant awards will be for 2-year projects. A total of approximately $8.6 million will be available for demonstration projects concentrated in urban areas with large homeless populations.

The statute authorizes projects to be carried out by community-based public and private nonprofit entities. NIAAA is limiting applicants under this announcement to those entities already in existence with prior experience and expertise in working with alcohol and/or drug-dependent populations and/or homeless populations. Working knowledge of and experience in dealing with the special needs of the target population is essential to the planning and implementation of viable intervention projects. In addition, demonstration programs must be located in urban centers with populations greater than 250,000 persons, or in smaller urban areas which can demonstrate a generic approach that could be replicated in larger areas. This focus on urban centers is intended to maximize benefits of demonstration projects by serving areas which have the highest concentration of the target population.

This program is subject to the provisions of Executive Order 12372, Intergovernmental Review of Federal Programs and 45 CFR Part 100. Executive Order 12372 allows States/territories the option of setting up a system for reviewing applications from within their States for assistance under certain Federal programs. The application kit (Form PHS-398) will contain a listing of States which have chosen to set up a review system and will provide a point of contact in the States for that review. Since 60 days are allowed for the State review, applicants are advised to discuss projects with and provide copies of their applications to State contact points as early as possible.

Receipt and Review Procedures for Applications

Applications in response to this announcement will be accepted under the single receipt date of January 5, 1988. The following criteria will be used in the review of applications: Extent to which the applicant demonstrates a clear understanding of the scope and range of service needs among the target population; the availability of community resources in the proposed

demonstration area; level of need for the demonstration project in the proposed locality; prior experience and expertise the applicant and proposed staff demonstrate in working with alcohol and/or drug-dependent populations and/or homeless populations; adequacy of the proposed plan of action and evaluation plan; adequacy of proposed management and coordination strategy; and cultural and programmatic relevance of proposed services for racial and ethnic minority persons.

For additional program guidance, potential applicants should contact: Barbara Lubran, National Institute on Alcohol Abuse and Alcoholism, Room 16C–02, 5600 Fishers Lane, Rockville, Maryland 20857, (301) 443–0786.

The Catalog of Federal Domestic Assistance number is 13.152.

Doanld Ian Macdonald,

Administrator, Alcohol, Drug Abuse and Mental Health Administration.

Food and Drug Administration

[Docket No. 87D–0251]

Content Uniformity Testing of Tablets and Capsules; Compliance With U.S.P. Monograph Requirements; Availability of Compliance Policy Guide

AGENCY: Food and Drug Administration.

ACTION: Notice.

SUMMARY: The food and Drug Administration (FDA) is announcing the availability of Compliance Policy Guide 7132a.14 (Guide). The Guide affirms that content uniformity testing of tablets and capsules requirements of the United States Pharmacopeia (U.S.P.), including the specification for relative standard deviation to limit large variations in test results, is applicable to U.S.P. products regardless of whether such products are the subject of approved new drug applications. With regard to tablets and capsules which contain less than 50 milligrams of any active ingredient, but which are not subject to U.S.P. compendial requirements, the sections of the current good manufacturing practice regulations that pertain to content uniformity may be satisfied by U.S.P. specifications or by sound alternative specifications.

ADDRESS: Requests for single copies of FDA Compliance Policy Guide 7132a.14 may be submitted to the Dockets Management Branch (HFA–305), Food and Drug Administration, Room 4–62, 5600 Fishers Lane, Rockville, MD 20857. (Send two self-addressed adhesive labels to assist the Branch in processing your requests.)

FOR FURTHER INFORMATION CONTACT: Stephen P. Molinari, Center for Drugs and Biologics (HFN–325), Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857, 301–295–8098.

SUPPLEMENTARY INFORMATION: FDA has prepared Compliance Policy Guide 7132a.14 to affirm certain test requirements of the U.S.P. to ensure drug product attributes.

Compliance Policy Guide 7132a.14 is available for public examination in the Dockets Management Branch (address above) between 9 a.m. and 4 p.m., Monday through Friday. Requests for single copies of Compliance Policy Guide 7132a.14 should refer to the docket number found in brackets in the heading of this document and should be submitted to the Dockets Management Branch (address above).

This notice is issued under 21 CFR 10.85.

Dated: October 2, 1987.

John M. Taylor,

Associate Commissioner for Regulatory Affairs.

BILLING CODE 4160–01–M

Advisory Committee Meeting; Amendment of Notice

AGENCY: Food and Drug Administration.

ACTION: Notice; amendment.

SUMMARY: The Food and Drug Administration (FDA) is amending an advisory committee meeting notice of the Ophtalamic Devices Panel to reflect changes in the schedule and in the agenda. As a result of these changes, there will be a 1 day meeting only. Notice of the October 22 and 23, 1987, meetings was published in the **Federal Register** of September 18, 1987 (52 FR 35329).

SUPPLEMENTARY INFORMATION: In FR Doc. 87–21559, appearing at page 35330 in the **Federal Register** of Friday, September 18, 1987, the following corrections are made under the heading, "Ophthalmic Devices Panel" beginning in the first column:

(1) On page 35330, first column, lines 1–4 of the *Date, time, and place* paragraph, the days of the meeting scheduled for October 22–23, 1987, is revised to read as follows:

Date, time, and place. October 22, 1987, 9 a.m., Auditorium, Hubert H. Humphrey Bldg., 200 Independence Avenue SW., Washington, DC.

(2) On page 35330, first column, the *Open committee discussion* paragraph is revised to read as follows:

Open committee discussion. The committee will discuss issues relating to approvals of premarket approval applications (PMA's) for intraocular lenses and contact lenses. The committee will also discuss general issues relating to other ophthalmic devices and requirements for PMA approval.

(3) On page 35330, first column, the *Closed committee deliberation* paragraph is revised to read as follows:

Closed committee deliberation. The committee may discuss trade secret and/or confidential commercial information regarding PMA's. This portion of the meeting will be closed to permit discussion of this information (5 U.S.C. 552b(c)(4)).

Dated: October 5, 1987.

John M. Taylor,

Associate Commissioner for Regulatory Affairs.

BILLING CODE 4160–01–M

Health Resources and Services Administration

Program Announcement for Grants for Faculty Development in General Internal Medicine and/or General Pediatrics

The Health Resources and Services Administration, announces that applications for Fiscal Year 1988 Grants for Faculty Development in General Internal Medicine and/or General Pediatrics are being accepted under the authority of section 784 of the Public Health Service Act, as amended by Pub. L. 99–129.

The Administration's budget request for Fiscal Year 1988 does not include funding for this program. This notice regarding applications does not reflect any change in this policy. However, should funds become available unexpectedly for this purpose, this contingency action will assure that grants can be awarded in a timely fashion consistent with the needs of the programs as well as provide for even distribution of funds throughout the fiscal year.

Section 784 of the Public Health Act authorizes Federal assistance to schools of medicine and osteopathy, public or private nonprofit hospitals or other public or private nonprofit entities for planning, developing and operating programs for the training of physicians who plan to teach in general internal medicine or general pediatrics training programs. These grants are intended to promote the development of faculty

skills in physicians who are currently teaching or who plan teaching careers in general internal medicine and/or general pediatrics training programs. These grants also provide direct support in the form of traineeships to physicians in training.

In addition, section 784 authorizes the award of grants to support general internal medicine and/or general pediatrics residency training programs. A separate grant program exists for this purpose.

Section 784, as amended by Pub. L 99–129, requires that the Secretary shall give priority to applicants that demonstrate to the satisfaction of the Secretary a commitment to general internal medicine and general pediatrics in their medical education training programs.

Funding Preference

Preference will be given to applicants that demonstrate a commitment to increase participation by minority physicians in their programs or show evidence of efforts to recruit minority physicians.

Requests for application materials and questions regarding grants policy should be directed to: Grants Management Officer (D–28), Bureau of Health Professions, Health Resources and Services Administration, 5600 Fishers Lane, Room 8C–22, Rockville, Maryland 20857, Telephone: (301) 443–6960.

Questions regarding programmatic information should be directed to: Chief, Primary Care Graduate Medical Education Branch, Division of Medicine, Health Resources and Services Administration, Bureau of Health Professions, 5600 Fishers Lane, Room 4C–04, Rockville, Maryland 20857, Telephone: 443–1467.

The standard application form PHS 6025–1, HRSA Competing Training Grant Application, General Instructions and supplement for this program have been approved by the Office of Management and Budget under the Paperwork Reduction Act. The OMB clearance number is 0915–0060.

The application deadline date is December 4, 1987. Applications shall be considered as meeting the deadline if they are either:

1. Received on or before the deadline date, or

2. Postmarked on or before the deadline date and received in time for submission to the independent review group. A legibly dated receipt from a commercial carrier or the U.S. Postal Service will be accepted in lieu of a postmark. Private metered postmarks shall not be acceptable as proof of timely mailing.

This program is listed at 13.900 in the *Catalog of Federal Domestic Assistance.* Applications submitted in response to this annoucement are not subject to the provisions of Executive Order 12372 Intergovernmental Review of Federal Programs, or 45 CFR Part 100.

Dated: August 20, 1987.

John H. Kelso,

Deputy Administrator.

[FR Doc. 87–23544 Filed 10–9–87; 8:45 am]

BILLING CODE 4160–15–M

Program Announcement for Grants for Predoctoral Training in Family Medicine

The Health Resources and Services Administration announces that applications for Fiscal Year 1988 Grants for Predoctoral Training in Family Medicine are being accepted under the authority of section 786(a) of the Public Health Service Act, as amended by Pub. L. 99–129.

Section 786(a) of the Public Health Service Act authorizes the award of grants to assist in meeting the cost of planning, developing and operating or participating in approved predoctoral training programs in the field of family medicine. Grants may include support for the program only or support for both the program and the trainees.

The Administration's budget request for Fiscal Year 1988 does not include funding for this program. This notice regarding applications does not reflect any change in this policy. However, should funds become available unexpectedly for this purpose, this contingency action will assure that grants can be awarded in a timely fashion consistent with the needs of the programs as well as to provide for even distribution of funds throughout the fiscal year.

To receive support, programs must meet the requirements of regulations as set forth in 42 CFR Part 57, Subpart Q. Eligible applicants are accredited public or nonprofit private schools of medicine or osteopathic medicine. In accordance with § 57.1605(b)(2), a funding preference will be accorded approved applications for projects in which:

1. Substantial training experience is in settings which exemplify interdependent utilization of physicians and physician assistants or nurse practitioners; and/or

2. Substantial portions of the training program are conducted in a primary medical manpower shortage area which is a part of a health manpower shortage area(s) designated under section 332 of the PHS Act, or, in an Area Health Education Center funded, at least in part, under section 781 of the Act.

Special Consideration

Special consideration will be given to applicants where applications indicate substantial efforts to recruit and retain minorities.

Requests for application materials and questions regarding grants policy should be directed to: Grants Management Officer (D–15), Bureau of Health Professions, Health Resources and Services Administration, Parklawn Building, Room 8C–22, 5600 Fishers Lane, Rockville, Maryland 20857, Telephone: (301) 443–6960.

Should additional programmatic information be required, please contact: Multidisciplinary Resources Development Branch, Division of Medicine, Bureau of Health Professions, Health Resources and Services Administration, Parklawn Building, Room 4C–16, 5600 Fishers Lane, Rockville, Maryland 20857, Telephone: (301) 443–3614.

The standard application form PHS 6025–1, HRSA Competing Training Grant Application, General Instructions and supplement for this program have been approved by the Office of Management and Budget under the Paperwork Reduction Act. The OMB clearance number is 0915–0060.

The deadline date for receipt of applications is November 20, 1987. Applications shall be considered as meeting the deadline date if they are either:

(1) Received on or before the deadline date, or

(2) Postmarked on or before the deadline and received in time for submission to the independent review group. A legibly dated receipt from a commerical carrier or U.S. Postal Service will be accepted in lieu of a postmark. Private metered postmarks shall not be acceptable as proof of timely mailing.

This program is listed at 13.986 in the *Catalog of Federal Domestic Assistance.* It is not subject to the provisions of Executive Order 12372, Intergovernmental Review of Federal Programs or 45 CFR Part 100.

Dated: August 20, 1987.

John H. Kelso,

Deputy Administrator.

[FR Doc. 87–23545 Filed 10–9–87; 8:45 am]

BILLING CODE 4160–15–M

Program Announcement for Grants for Residency Training in General Internal Medicine and General Pediatrics

The Health Resources and Service Administration announces that

applications for Fiscal Year 1988 Grants for Residency Training in General Internal Medicine and/or General Pediatrics are being accepted under the authority of section 784, Title VII, of the Public Health Service Act, as amended by Pub. L. 99–129.

Section 784 authorizes the award of grants to planning, developing and operating approved residency training programs which emphasize the training of residents for the practice of general internal medicine general pediatrics. In addition, Section 784 authorizes assistance in meeting the cost of supporting residents who are participants in any such program, and who plan to specialize or work in the practice of general internal or medicine or general pediatrics.

The Administration's budget request for Fiscal Year 1988 does not include funding for this program. This notice regarding applications does not reflect any change in this policy. However, should funds become available unexpectedly for this purpose, this contingency action will assure that grants can be awarded in a timely fashion consistent with the needs of the programs as well as to provide for even distribution of funds throughout the fiscal year.

Eligible applicants are accredited schools of medicine and osteopathy, public and private nonprofit hosptials, or other public or private nonprofit entities.

To receive support, programs must meet the requirements of final regulations as specified in 42 CFR Part 74, Subpart FF.

Section 784, as amended by Pub. L. 99–129, requires that the Secretary shall give priority to applicants that demonstrate to the satisfaction of the Secretary a commitment to general internal medicine and general pediatrics in their medical education training programs.

Section 57.3106(b) of the program regulations requires that preference will be given to projects in which:

1. Substantial training experiences are provided in settings where physician assistants or nurse practitioners, or both, are used as part of a health care team.

2. Administrative and educational resources are coordinated for the use of a program of general internal medicine and a program of general pediatrics which are to be conducted within a single project.

3. Substantial portions of a project are conducted in a primary medical care manpower shortage area(s) designated under section 332 of the Public Health Service Act and in particular, one which is located in a Metropolitan Statistical Area, as defined by the Office of Federal Statistical Policy and Standards, Department of Commerce; or are conducted in an Area Health Education Center funded, at least in part, under section 781 of the Act.

Additional preference will be given to applicants who demonstrate an increase in monority and disadvantaged residents or show evidence of efforts to recruit minority and disadvantaged into their medical education program.

Requests for grant application materials and questions regarding grants policy should be directed to: Grants Management Officer (D–28), Bureau of Health Professions, Health Resorces and Services Administration, 5600 Fishers Lane, Room 8C–22, Rockville, Maryland 20857, Telephone (301) 443–6960.

Should additional programmatic information be required, please contact: Primary Care Graduate Medical Education Branch, Division of Medicine, Bureau of Health Professions, Health Resources and Services Administration, 5600 Fishers Lane, Room 4C–04, Rockvile, Maryland 20857, Telephone (301) 443–1467.

The standard application form PHS 6025–1, HRSA Competing Training Grant Application, General Instructions and supplement for this program have been approved by the Office of Management and Budget under the Paperwork Reduction Act. The OMB clearance number is 0915–0060.

The deadline date for receipt of applications is November 20, 1987. Application shall be considered as meeting the deadline if they are either:

(1) *Received* on or before the deadline date, or

(2) *Postmarked* on or before the deadline and received in time for submission to the independent review group. A legibly dated receipt from a commercial carrier or the U.S. Postal Service will be accepted in lieu of a postmark. Private metered postmarks shall not be acceptable as proof of timely mailing.

This program is listed at 13.884 in the *Catalog of Federal Domestic Assistance*. Applications submitted in response to this announcement are not subject to the provisions of Executive Order 12372, Intergovernmental Review of Federal Program or 45 CFR Part 100.

Dated: August 20, 1987.

BILLING CODE 4160–15–M

Office of Human Development Services

Administration for Children, Youth and Families

AGENCY: Human Development Services Office, HHS.

ACTION: Extension of closing date for receipt of applications.

SUMMARY: In the **Federal Register** of August 5, 1987 (52 FR 29150), the Office of Human Development Services announced that applications were being accepted for a grant to establish a National Resource Center on Child Sexual Abuse authorized by Pub. L. 93–247, as amended, 42 U.S.C. 5101, *et seq.* The closing date for receipt of applications under that announcement was October 5, 1987.

As a result of an earthquake and several aftershocks, many potential applicants in California were unable to gain access to their offices and were prevented from completing their applications. Because of this, the Office of Human Development Services is extending the deadline for submission of applications for all applicants.

The new closing date for receipt of applications is October 9, 1987.

FOR FURTHER INFORMATION CONTACT: Cynthia Darling, (202) 245–2856.

Dated: October 6, 1987.

Approved: October 7, 1987.

Dodie Livingston,

Commissioner, Administration for Children, Youth and Families.

Phillip N. Hawkes,

Acting Assistant Secretary for Human Development Services.

CLINFO System, possible new technologies for GCRCs, and clinical research data management. Attendance by the public will be limited to space available.

In accordance with the provisions set forth in sections 552(c)(4) and 552(c)(6), Title 5, U.S.C. and section 10(d) of Pub. L. 92–463, the meeting will be closed to the public on November 18, from 9:00 a.m. to 3:30 p.m. and from 8:30 a.m. November 19 to adjournment for the review, discussion, and evaluation of individual grant applications. These applications and the discussions could reveal confidential trade secrets or commercial property such as patentable material, and personal information concerning individuals associated with the applications, disclosure of which would constitute a clearly unwarranted invasion of personal privacy.

Mr. James Augustine, Information Officer, Division of Research Resources, Bldg. 31, Room 5B–10, National Institutes of Health, Bethesda, Maryland 20892, (301) 496–5545, will provide a summary of the meeting and a roster of the Committee members upon request. Dr. Stanley L. Slater, Executive Secretary of the General Clinical Research Centers Review Committee, Bldg. 31, Room 5B–51, National Institutes of Health, Bethesda, Maryland 20892, (301) 496–6595, will furnish program information upon request.

National Cancer Institute; Cancer Therapeutics Program Project Review Committee; Meeting

Pursuant to Pub. L. 92–463, notice is hereby given of the meeting of the Cancer Therapeutics Program Project Review Committee, National Cancer Institute, National Institutes of Health, December 3–4, 1987, Chevy Chase Holiday Inn, 5520 Wisconsin Avenue, Palladian Room, Chevy Chase, Maryland 20815.

This meeting will be open to the public on December 3 from 8 a.m. to 8:30 a.m., to discuss administrative details. Attendance by the public will be limited to space available.

In accordance with provisions set forth in sections 552b(c)(4) and 552b(c)(6),Title 5, U.S.C. and section 10(d) of Pub. L. 92–463, the meeting will be closed to the public on December 3 from 8:30 a.m. to adjournment on December 4, for the review, discussion and evaluation of individual program project grant applications. These applications and the discussions could reveal confidential trade secrets or commercial property such as patentable material, and personal information concerning individuals associated with the applications, the disclosure of which would constitute a clearly unwarranted invasion of personal privacy.

Mrs. Winifred Lumsden, the Committee Management Officer, National Cancer Institute, Building 31, Room 10A06, National Institutes of Health, Bethesda, Maryland 20892 (301/496–5708) will provide summaries of the meeting and rosters of committee members, upon request.

Dr. Suzanne E. Fisher, Executive Secretary, Westwood Building, Room 820, Bethesda, Maryland 20892 (301/496–2330) will provide substantive program information, upon request.

Dated: September 30, 1987.

National Toxicology Program; Availability of Technical Report on Toxicology and Carcinogenesis Studies of Chlorendic Acid

The HHS' National Toxicology Program announces the availability of the NTP Technical Report on the toxicology and carcinogenesis studies of chlorendic acid, a chemical intermediate used in the preparation of fire-retardant polyester resins and plasticizers.

Toxicology and carcinogenesis studies of chlorendic acid were conducted by administering the chemical in feed to groups of 50 male and 50 female F344/N rats and $B6C3F_1$ mice at concentrations of 0, 620, or 1,250 ppm for 103 weeks.

Under the conditions of these 2-year feed studies, there was clear evidence of carcinogenicity [1] of chlorendic acid for male F344/N rats as shown by increased incidences of neoplastic nodules of the liver and acinar cell adenomas of the pancreas. Increased incidences of alveolar/bronchiolar adenomas and preputial gland carcinomas may also have been related to the administration of chlorendic acid. There was clear evidence of carcinogenicity of chlorendic acid for female F344/N rats as shown by increased incidences of neoplastic nodules and of carcinomas of the liver. There was clear evidence of carcinogenicity of chlorendic acid for male $B6C3F_1$ mice as shown by increased incidences of hepatocellular adenomas and of hepatocellular carcinomas. There was no evidence of carcinogenicity of chlorendic acid for female $B6C3F_1$ mice given chlorendic acid in the diet at concentrations of 620 or 1,250 ppm for 103 weeks.

The Chemical Manager for this bioassay is Dr. J. E. French. Questions or comments about the contents of this technical report should be directed to Dr. French at P.O. Box 12233, Research Triangle Park, NC 27709 or telephone (919) 541–7790; FTS: 629–7790.

Copies of *Toxicology and Carcinogenesis Studies of Chlorendic Acid in F344/N Rats and $B6C3F_1$ Mice (Feed Studies)* (TR 304) are available without charge from the NTP Public Information Office, MD B2–04, P.O. Box 12233, Research Triangle Park, NC 27709. Telephone: (919) 541–3391. FTS: 629–3991.

FOR FURTHER INFORMATION CONTACT: Mr. Leroy P. Gonnella, Office of Program Policy Development, Office of Community Planning and Development, Department of Housing and Urban Development, 451 Seventh Street SW., Washington, DC 20410, (202) 755–6092. (This is not a toll-free number.)

SUPPLEMENTARY INFORMATION: This Notice sets the deadline dates for submitting applications for the Community Development Block Grant Program for Indian Tribes and Alaskan Native Villages. HUD will use the information furnished in these applications to rate the proposed project(s) and to assure the Department that there has been the necessary citizen participation. these dates apply only to applications submitted by Indian Tribes and Alaskan Native Villages for Fiscal Year 1988.

The field responsibility for the administration of the program is divided among the following offices: Region V Office of Indian Programs (OIP) in Chicago, responsible for all HUD Indian program activities within Regions I–V, plus the State of Iowa; Oklahoma City Office, responsible for all HUD Indian program activities in the States of Arkansas, Texas, Oklahoma, Kansas, Louisiana, and Missouri; Region VIII, OIP in Denver, responsible for all HUD Indiana program activities in Region VIII, plus the States of Nebraska; Region IX OIP in Phoenix, responsible for all HUD Indian program activities in Region IX, plus the State of New Mexico; Region X OIP in Seattle, responsible for all HUD Indian program activities in Region X, with the exception of the State of Alaska; and the Anchorage Office, responsible for all HUD Indian and Alaskan Native program activities in the State of Alaska.

Applications will be accepted by HUD as of the publication date of this Notice.

FINAL DATES FOR SUBMISSION OF APPLICATIONS

Offices	Applications must be submitted no later than
Region VIII, OIP	Nov. 25, 1987
Region X, OIP	Dec. 18, 1987
Region IX, OIP	Jan. 22, 1988
Oklahoma City Office	Jan. 29, 1988.
Region V, OIP	Feb. 29, 1988
Anchorage Office	March 31, 1988

Applications must be received or postmarked no later than the closing date specified above. Applications received or postmarked after the deadline will not be considered.

Tribes and Villages submitting applications for this program must do so on HUD forms approved by the Office of Management and Budget under OMB Control Number 2506–0043. These forms request participation has taken place. Forms will be provided by the appropriate HUD Field Offices.

Authority: Section 107, Housing and Community Development Act of 1974 (42 U.S.C. 5307); section 7(d), Department of Housing and Urban Development Act (42 U.S.C. 3535(d)).

Date: October 5, 1987.

Jack R. Stokvis,

General Deputy, Assistant Secretary for Community Planning and Development.

BILLING CODE 4210–29–M

DEPARTMENT OF THE INTERIOR

Bureau of Reclamation

Uncompahgre Valley Hydropower Project, AB Lateral Hydropower Facility, Colorado; Environmental Scoping Meetings

AGENCY: Bureau of Reclamation, Interior.

ACTION: Notice of environmental scoping meetings.

SUMMARY: Pursuant to CEQ Regulations and Bureau of Reclamation (BR) policy, the Department of the Interior announces two environmental scoping meetings on the AB Lateral Hydropower Facility, Uncompahgre Valley Hydropower Project. Studies for the project have been underway since 1984. During this time, considerable input has been received from interested agencies and individuals. Two meetings will be held to elicit information to use in determining the scope of the environmental impacts and the issues related to the proposal. The results of the meetings will help the Bureau of Reclamation determine whether an environmental impact statement will be prepared on the proposed action.

DATES: The meetings will be held on October 27, 1987, at 7:00 p.m. in Lakewood, Colorado, and October 28, 1987, at 7:00 p.m. in Montrose, Colorado.

ADDRESS: The meetings will be held in the Bergan Park Room of the Sheraton Hotel and Convention Center, 360 Union Boulevard, Lakewood, Colorado, and in the Meeting Room of the Montrose County Chamber of Commerce Building, 550 North Townsend Avenue, Montrose, Colorado.

FOR FURTHER INFORMATION CONTACT: The contact person for this environmental scoping effort is Steve McCall, Bureau of Reclamation, Grand Junction Projects Office, P.O. Box 1889, Grand Junction, Colorado, 81502, telephone (303) 242–8621, extension 441.

SUPPLEMENTARY INFORMATION: The purpose of the facility is to develop hydropower potential in the Uncompahgre Valley for the production of baseload electrical energy. The facility would use hydropower potential afforded by the flow of irrigation water through the Uncompahgre Project, an existing Bureau of Reclamation irrigation project.

The AB Lateral Hydropower Facility would be privately constructed and operated by the Uncompahgre Valley Water Users Association and Montrose Partners. The Bureau of Reclamation serves as the lead Federal agency for compliance with the National Environmental Policy Act.

The facility, to be located near the city of Montrose in west-central Colorado would consist of a diversion and intake works on an enlarged AB Lateral and a 7.4-mile buried pipeline leading to a powerhouse and tailrace leading to the Uncompahgre River. A maximum of 1,100 cubic feet per second of water would be diverted through the powerplant to produce about 240 million kilowatt-hours of electricity per year. The facility would use water diverted from the Gunnison River through the existing Gunnison Tunnel to the AB Lateral. Some of the existing irrigation flows would be utilized for the facility during the irrigation season. These flows could be increased by additional diversions from the Gunnison River when water is available through existing water rights. The facility would be operated year-round, and although flows in the Gunnison River and in parts of the irrigation system would be changed from pre-project flows, the facility would be operated to meet existing minimum flow levels in the Gunnison River below the Gunnison Tunnel and existing irrigation needs.

Dated: October 6, 1987.

C. Dale Duvall,

Commissioner.

BILLING CODE 4310–09–M

INTERSTATE COMMERCE COMMISSION

[Docket No. AB–55 (Sub-No. 213X)]

CSX Transportation, Inc., Exemption; Abandonment in Jefferson County, AL

Applicant has filed a notice of exemption under 49 CFR 1152 Subpart F-*Exempt Abandonments* to abandon its line of railroad between milepost NC–

397.34 near Chetopa, AL, and milepost NC-400.00 near Vulcan, AL, and between milepost NH-399.20 at Vulcan and milepost NH-400.46 near Sayre, AL, a distance of 3.92 miles, in Jefferson County, AL

Applicant has certified (1) that no local traffic has moved over the line for at least 2 years and that overhead traffic is not moved over the line or may be rerouted, and (2) that no formal complaint filed by a user of rail service on the line (or by a State or local governmental entity acting on behalf of such user) regarding cessation of service over the line either is pending with the Commission or any U.S. District Court, or has been decided in favor of the complainant within the 2-year period. The appropriate State agency has been notified in writing at least 10 days prior to the filing of this notice.

Applicant has filed an environmental report which shows that no significant environmental or energy impacts are likely to result from this abandonment.

As a condition to use of this exemption, any employee affected by the abandonment shall be protected pursuant to *Oregon Short Line R. Co.—Abandonment—Goshen*, 360 I.C.C. 91 (1979).[1]

The exemption will be effective November 12, 1987 (unless stayed pending reconsideration). Petitions to stay must be filed by October 23, 1987, and petitions for reconsideration, including environmental, energy and public use concerns, must be filed by November 2, 1987 with: Office of the Secretary, Case Control Branch, Interstate Commerce Commission, Washington, DC 20423.

A copy of any petition filed with the Commission should be sent to applicant's representative: Charles M. Rosenberger, 500 Water St., Jacksonville, FL 32202.

If the notice of exemption contains false or misleading information, use of the exemption is void *ab initio*.

A notice to the parties will be issued if use of the exemption is conditioned upon environmental or public use conditions.

Decided: October 5, 1987.

By the Commission, Jane F. Mackall, Director, Officer of Proceedings.

Noreta R. McGee,

Secretary.

BILLING CODE 7035-01-M

[1] The Railway Labor Executives' Association has filed a request for the imposition of labor protective conditions. As the sought exemption involves a transaction under 49 U.S.C. 10903, labor protective conditions have been imposed routinely.

[Finance Docket No. 31060]

Thomas C. Graham; Exemption

AGENCY: Interstate Commerce Commission.

ACTION: Notice of exemption.

SUMMARY: The Interstate Commerce Commission exempts Thomas C. Graham from the provisions of 49 U.S.C. 11322 to permit him to serve on the Boards of Directors of International Paper Corporation and USX Corporation.

DATES: This exemption will be effective on November 6, 1987.

ADDRESSES: Send pleadings referring to Finance Docket No. 31060 to:

(1) Office of the Secretary, Case Control Branch, Interstate Commerce Commission, Washington, DC 20423

(2) Petitioner's representative: Mark T. Priesing, 1054 Thirty-First Street, NW., Suite 200, Washington, DC 20007-4492

FOR FURTHER INFORMATION CONTACT: Joseph H. Dettmar, (202) 275-7245 (TDD for hearing impaired: (202) 275-1721)

SUPPLEMENTARY INFORMATION: Additional information is contained in the Commission's decision. To purchase a copy of the full decision, write to Dynamic Concepts, Inc., Room 2229, Interstate Commerce Commission Building, Washington, DC 20423, or call 289-4357 (DC Metropolitan area). (Assistance for the hearing impaired is available through TDD services (202) 275-1721) or by pickup from Dynamic Concepts, Inc., in Room 2229 at Commission headquarters.

Decided: September 30, 1987.

By the Commission, Chairman Gradison, Vice Chairman Lamboley, Commissioners Sterrett, Andre, and Simmons.

Noreta R. McGee,

Secretary.

BILLING CODE 7035-01-M

DEPARTMENT OF JUSTICE

Drug Enforcement Administration

[Docket No. 86-37]

Larry R. Killough, M.D.; Revocation of Registration

On March 24, 1986, the Deputy Assistant Administrator, Office of Diversion Control, Drug Enforcement Administration (DEA), issued an Order to Show Cause to Larry R. Killough, M.D. (Respondent) of 1300 South Main Street, Searcy, Arkansas 72143, proposing to revoke his DEA Certificate of Registration AK3231999 and to deny any pending applications for renewal of such registration. The statutory basis for the Order to Show Cause was that Respondent was convicted in the United States District Court for the Eastern District of Arkansas, of knowingly and intentionally distributing Schedule II narcotic and non-narcotic controlled substances outside the course of professional practice in violation of 21 U.S.C. 841(a)(1).

By letter dated April 23, 1986, Respondent's counsel requested a hearing on the issues raised by the Order to Show Cause. The matter was placed on the docket of Administrative Law Judge Francis L. Young and the hearing was held in Washington, DC on September 30, 1986.

On March 19, 1987, the Administrative Law Judge issued his opinion and recommended ruling, findings of fact, conclusions of law and decision. Respondent filed exceptions to Judge Young's recommended ruling pursuant to 21 CFR 1316.66. On July 2, 1987, the Administrative Law Judge transmitted the record in the proceeding, including Respondent's exceptions, to the Administrator. The Administrator has considered this record in its entirety and pursuant to 21 CFR 1316.67, hereby issues his final order in this matter, based upon findings of fact and conclusions of law as hereinafter set forth.

The Administrative Law Judge found that on July 30, 1984, an investigator assigned to the Arkansas State Police Diversion Investigation Unit was advised by an individual, who at that time was a prisoner and admitted drug abuser, that he had been obtaining large quantities of Preludin (phenmetrazine), a Schedule II non-narcotic controlled substance, unlawfully from Respondent. Between August 1 and August 15, 1984, at the direction and under the control of the state investigator, the individual met with Respondent three times. On each occasion, the individual purchased prescriptions for Schedule II controlled substances from Respondent for the price of $200 per visit. At no time did the individual demonstrate any legitimate medical need. On August 17, 1984, the individual purchased four prescriptions from Respondent for Schedule II controlled substances for the sum of $400. Respondent issued these prescriptions even though he was told by the individual that he had a drug abuse problem from which he was slowly withdrawing; he was also told by the individual that the bulk of the drugs obtained would be sold on the street. On August 21, 1984, the individual,

accompanied by the investigator acting in an undercover capacity, met with Respondent and arranged for the purchase of a prescription for 36 Dilaudid 4 mg. tablets, a Schedule II narcotic controlled substance. On August 22, 1984, the individual obtained the Dilaudid prescription from Respondent.

On August 31, 1984, the investigator, acting in an undercover capacity, showed Respondent four diamonds which he represented as samples of 22 stones which he would trade for prescriptions. After some discussion, Respondent stated he would annotate the individual's medical chart to show fictitious visits on August 29 and September 5 and 12, 1984, and issue a prescription bearing each date, in exchange for the 22 diamonds. On September 14, 1984, the investigator met Respondent in a motel room. The meeting was videotaped. During the meeting, the investigator gave Respondent 22 cubic zircon stones in exchange for three prescriptions for Schedule II controlled substances.

Based upon the undercover investigation described above, Respondent was subsequently indicted and tried before a jury in the United States District Court for the Eastern District of Arkansas. Respondent was convicted on eight counts of distribution of a controlled substance for other than a legitimate medical purpose, in violation of 21 U.S.C. 841(a)(1). He was sentenced on June 18, 1985, to 20 months incarceration and fined $40,000.

In June 1985, subsequent to his conviction, Respondent surrendered his medical practice license to the Arkansas Medical Board. In September 1985, his medical license was suspended in that state. On April 18, 1986, the Arkansas Medical Board unanimously decided to reinstate Respondent's license to practice medicine in that state and granted permission for Respondent to reapply for all schedules of his DEA registration with the exception of Schedule II. On June 4, 1986, Respondent applied for renewal of his DEA Registration No. AK3231999, in Schedules III, IV and V only.

The Administrative Law Judge found that Respondent has not provided a satisfactory explanation for his conduct of writing controlled substance prescriptions for the individual and the investigator. After noting that Respondent has not admitted to any motivation for his conduct, the Administrative Law Judge concluded that Respondent's motive was greed. The individual paid Respondent $100 for each prescription. The undercover officer offered, and Respondent accepted, what Respondent believed to be a large number of stolen valuable gems in exchange for prescriptions. The Administrative Law Judge determined that Respondent was unable to put the motivation of greed behind him, and that Respondent might succumb to such temptation again. Based upon those findings, the Administrative Law Judge recommended that Respondent's DEA Certificate of Registration be revoked, and that his application for renewal of said registration be denied.

The Administrator adopts the recommended ruling, findings of fact, conclusions of law and decision of the Administrative Law Judge in its entirety.

A felony conviction relating to controlled substances is a sufficient ground for the revocation of a registrant's DEA Certificate of Registration. *Fitzhugh* v. *D.E.A.*, 813 F.2d 1248 (D.C. Cir. 1987).

Accordingly, the Administrator of the Drug Enforcement Administration, pursuant to the authority vested in him by 21 U.S.C. 823 and 824 and 28 CFR 0.100(b), hereby orders that DEA Certificate of Registration, AK3231999, previously issued to Respondent be, and hereby is, revoked. It is further ordered that any pending applications for renewal be, and hereby are, denied.

This order is effective November 12, 1987.

Dated: October 5, 1987.

John C. Lawn,

Administrator.

[FR Doc. 87-23520 Filed 10-9-87; 8:45 am]

BILLING CODE 4410-09-M

DEPARTMENT OF LABOR

Pension and Welfare Benefits Adminsitration

Advisory Council on Employee Welfare and Pension Benefits Plans; Work Group Meeting

Pursuant to the authority contained in section 512 of the Employee Retirement Income Security Act of 1974 (ERISA), 29 U.S.C. 1142, a public meeting of the Work Group on Retiree Health of the Advisory Council on Employee Welfare and Pension Benefit Plans will be held at 10:00 a.m., Friday, November 13, 1987, at the American Association of Retired Persons, (AARP), 1909 K Street, NW., Room 830, Washington, DC 20049.

This eight-member work group was formed by the Advisory Council to study issues relating to retiree health benefit programs for employee welfare plans covered by ERISA.

The purpose of the November 13 meeting is to hear from several experts in the field of Retiree Health who have been invited to participate in a round-table discussion of the following issue:

How does the retiree health benefit fit into the realm of all empolyee benefits?

In addition, the work group will take testimony from employee representatives, employer representatives and other interested individuals and groups regarding subject matter.

Individuals, or represenatives or organizations, wishing to address the work group should submit written requests on or before November 9, 1987 to Charles W. Lee, Jr., Executive Secretary, ERISA Advisory Council, U.S. Department of Labor, Room N-5677, 200 Constitution Avenue NW., Washington, DC 20210. Oral presentations will be limited to ten minutes, but witnesses may submit an extended statement for the record.

Organizations or individuals may also submit statements for the record without testifying. Twenty (20) copies of such statements should be sent to the Executive Secretary of the Advisory Council at the above address. Papers will be accepted and included in the record of the meeting if received on or before November 9, 1987.

Signed at Washington, DC This 7th day of October, 1987.

David M. Walker, CPA,

Assistant Secretary-Designate for Pension and Welfare Benefits Administration.

BILLING CODE 4510-29-M

NATIONAL AERONAUTICS AND SPACE ADMINISTRATION

[Notice (87-82)]

NASA Advisory Council (NAC), Aeronautics Advisory Committee (AAC); Meeting

AGENCY: National Aeronautics and Space Administration.

ACTION: Notice of meeting.

SUMMARY: In accordance with the Federal Advisory Committee Act, Pub. L. 92-463, as amended, the National Aeronautics and Space Administration announces a forthcoming meeting of the NASA Advisory Council, Aeronautics Advisory Committee, Ad Hoc Review Team on Acoustic Wind Tunnel Requirements.

Date and Time: October 28, 1987, 8:15 a.m. to 5 p.m.

ADDRESS: National Aeronautics and Space Administration, Room 625,

Federal Office Building 10B, Washington, DC 20546.

FOR FURTHER INFORMATION CONTACT: Dr. Randolph A. Graves, Jr., Office of Aeronautics and Space Technology, National Aeronautics and Space Administration, Washington, DC 20546, 202/453–2828.

SUPPLEMENTARY INFORMATION: The NAC Aeronautics Advisory Committee (AAC) was established to provide overall guidance and direction to the Office of Aeronautics and Space Technology (OAST). Special ad hoc teams were formed to address specific topics. The Ad Hoc Team on Acoustic Wind Tunnel Requirements, chaired by Mr. Dean Borgman, is comprised of nine members. The meeting will be open to the public up to the seating capacity of the room (approximately 30 persons including the team members and other participants).

Type of Meeting: Open.

Agenda

October 28, 1987

8:45 a.m.—Review of charter, objectives and meeting schedule.
11 a.m.—Presentation of Army acoustic testing requirements for rotorcraft.
1:30 p.m.—Presentation of civil acoustic testing requirements.
5 p.m.—Adjourn.

September 30, 1987.

Richard L. Daniels,

Advisory Committee Management Officer, National Aeronautics and Space Administration.

BILLING CODE 7510–01–M

NATIONAL FOUNDATION ON THE ARTS AND THE HUMANITIES

National Council on the Humanities; Meeting

October 9, 1987.

Pursuant to the provisions of the Federal Advisory Committee Act (Pub. L. 92–463, as amended) notice is hereby given that a meeting of the National Council on the Humanities will be held in Washington, DC on November 12–13, 1987.

The purpose of the meeting is to advise the Chairman of the National Endowment for the Humanities with respect to policies, programs, and procedures for carrying out her functions, and to review applications for financial support and gifts offered to the Endowment and to make recommendations thereon to the Chairman.

The meeting will be held in the Old Post Office Building, 1100 Pennsylvania Avenue NW., Washington, DC. A portion of the morning and afternoon sessions on November 12–13, 1987, will not be open to the public pursuant to subsections (c)(4), (6) and (9)(B) of section 552b of Title 5, United States Code because the Council will consider information that may disclose: Trade secrets and commercial or financial information obtained from a person and privileged or confidential; information of a personal nature the disclosure of which will constitute a clearly unwarranted invasion of personal privacy; and information the disclosure of which would significantly frustrate implementation of proposed agency action. I have made this determination under the authority granted me by the Chairman's Delegation of Authority dated January 15, 1978.

The agenda for the sessions on November 12, 1987, will be as follows:

Committee Meetings

8:30–9:30 a.m.—Coffee for Council Members—Room 526 (Open to the Public)
9:30–10:30 a.m.—Committee Meetings—Policy Discussion

Education Programs—Room M–14
Fellowship Programs—Room 315
General Programs—Room 415
Research Programs—Room 316–2
State Programs—Room M–07 East

10:30 a.m. until Adjourned—(Closed to the Public for the reasons stated above)—Consideration of specific applications
(Open to the Public)
Policy Discussion
3:00–3:30 p.m.
Challenge Grants—Room 430
Preservation Grants—Room M–07 West
3:30 p.m. until Adjourned—(Closed to the Public for the reasons stated above)—Consideration of specific applications

The morning session on November 13, 1987, will convene at 9:00 a.m., in the 1st Floor Council Room, M–09, and will be open to the public. The agenda for the morning session will be as follows:

(Coffee for Staff and Council members attending meeting will be served from 8:30–9:00 a.m.)

Minutes of the Previous Meeting

Reports
A. Introductory Remarks
B. Introduction of New Staff
C. Contracts Awarded in the Previous Quarter
D. Final Fiscal Year Reports: Applications; Matching; and Obligations
E. Fiscal Year 1988 Appropriations
F. Biennial Election of Vice Chairman of the National Council on the Humanities
G. National Capital Arts and Cultural Affairs Program
H. Humanities Teachers in the 1990s and Beyond
I. Committee Reports on Policy and General Matters
1. Education Programs
2. Fellowship Programs
3. Preservation Grants
4. Research Programs
5. General Programs.
6. State Programs
7. Challenge Grants
8. Jefferson Lecture
J. OMB Hearing on Fiscal Year 1989 Budget
K. Actions on Emergency Grant Requests
L. Actions Departing from Council Recommendation

The remainder of the proposed meeting will be given to the consideration of specific applications (closed to the public for the reasons stated above).

Further information about this meeting can be obtained from Mr. Stephen J. McCleary, Advisory Committee Management Officer, Washington, DC 20506, or call area code (202) 786–0322.

Stephen J. McCleary,

Advisory Committee Management Officer.

NUCLEAR REGULATORY COMMISSION

Documents Containing Reporting or Recordkeeping Requirements; Office of Management and Budget (OMB) Review

AGENCY: Nuclear Regulatory Commission (NRC).

ACTION: Notice of the OMB review of information collection.

SUMMARY: The NRC has recently submitted to the OMB for review the following proposal for the collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. Chapter 35).

1. Type of submission: new, revision or extension: Revision.

2. The title of the information collection: Application for License to Export Nuclear Material and Equipment.

3. The form number if applicable: NRC Form 7.

4. How often the collection is required: Once for each separate request for a specific export license.

5. Who will be required or asked to report: Any person in the U.S. who wishes to export nuclear material and equipment subject to the requirements of a specific license.

6. An estimate of the number of reporting responses: 140.

7. An estimate of the total number of hours needed to complete the reporting and recordkeeping requirements: 140 Hours.

8. An indication of whether section 3504(h), Pub. L. 96–511 applies: Not applicable.

9. Abstract: Any person in the U.S. wishing to export nuclear material and equipment requiring a specific authorization should file an application for a license on NRC Form 7. The application will be reviewed by the NRC and by the Executive Branch and, if applicable statutory, regulatory, and policy considerations are satisfied, the NRC will issue a license authorizing the export.

Copies of the submittal may be inspected or obtained for a fee from the NRC Public Document Room, 1717 H Street NW., Washington, DC 20555.

Comments and questions should be directed to the OMB reviewer, Vartkes L. Broussalian, (202) 395–3084.

The NRC Clearance Office is Brenda Jo Shelton, (301) 492–8132.

Dated at Bethesda, Maryland, this 6th day of October 1987.

[Docket No. 50–213]

Connecticut Yankee Atomic Power Co.; Haddam Neck Plant; Environmental Assessment and Finding of No Significant Impact

The U.S. Nuclear Regulatory Commission (the Commission) is considering issuance of an exemption from the requirements of Appendix J to 10 CFR Part 50 to Connecticut Yankee Atomic Power Company (the licensee) for the Haddam Neck Plant located at the licensee's site in Middlesex County, Connecticut.

Environmental Assessment

Identification of Proposed Action

The licensee is requesting an exemption from Paragraph III.A.3 of 10 CFR Part 50 Appendix J, "Primary Reactor Containment Leakage Testing for Water-Cooled Power Reactors." In 1973, Appendix J was issued to establish

requirements for primary containment leakage testing and incorporated by reference, ANSI N45.4–1972, "Leakage Rate Testing of Containment Structures for Nuclear Reactors." This Standard requires that containment leakage calculations be performed by using either the point-to-point method or the total time method. The total time method was used the most by the nuclear industry until about 1976.

At this time, licensees who wish to use mass-point must submit an application for exemption from the Appendix J requirement that containment integrated leak rate tests will conform to ANSI N45.4. The exemption proposed by the licensee would be granted until pending changes to Appendix J become effective. The exemption applies only to the method of calculating containment leakage. In the mass-point method, the mass of air in containment is calculated and plotted as a function of time. Leakage is calculated from the slope of the Linear Least Squares.

With the present developments in technology, the mass-point method has gained increasing recognition. In the total time method, a series of leakage rates are calculated on the basis of air mass differences between an initial data point and each individual data point thereafter. If for any reason (such as instrument error, lack of temperature equilibrium, ingassing or outgassing) the initial data point is not accurate, the result of the test will be affected. In the point-to-point method, the leak rates are based on the mass difference between each pair of consecutive points which are the averaged to yield a single leakage rate estimate. Mathematically, this can be shown to be the difference between the air mass at the beginning of the test and the air mass at the end of the test expressed as a percentage of the containment air mass. It follows from the above that the point-to-point method ignores any mass readings during the test and thus the leakage rate is calculated on the basis of the difference in mass between two measurements taken at the beginning and at the end of the test, which are 24 hours apart.

The licensee's request for exemption and the bases therefore are contained in a letter dated July 10, 1987.

The Need for the Proposed Action

The exemption is needed to allow continued use of the mass-point analysis method at the Haddam Neck Plant.

Environmental Impact of the Proposed Action

The proposed exemption will have no incremental environmental impact relative to current practice because the exemption will allow testing to be conducted in the same manner as it is currently performed.

The error in the total time method creates a higher probability of unnecessarily failing a containment integrated leakage rate test (note that the calculational procedure is independent of containment tightness) possibly resulting in increase test frequency, critical path outage time, and exposure to test personnel.

The radiological releases will not be greater than previously determined, nor does the proposed exemption otherwise affect radiological plant effluents, and has no other environmental impact. Therefore, the Commission concludes that there are no significant radiological or non-radiological environmental impacts associated with the proposed exemption.

Alternatives to the Proposed Action

It has been concluded that there is no measurable impact associated with the proposed exemption; any alternatives to the exemption will have either no environmental impact or greater environmental impact.

Alternative Use of Resources

This action does not involve the use of resources beyond the scope of resources used during normal plant operation.

Agencies and Persons Consulted

The Commission's staff reviewed the licensee's request that supports the proposed exemption. The staff did not consult other agencies or persons.

Finding of No Significant Impact

Based upon the foregoing environmental assessment, the Commission concludes that the proposed action will not have a significant effect on the quality of the human environment. Accordingly, the Commission has determined not to prepare an environmental impact statement for the proposed exemption.

For further details with respect to this action, see the request for exemption submittal dated July 10, 1987 which is available for public inspection at the Commission's Public Document Room, 1717 H Street NW., Washington, DC 20555, and at the local public document room located at the Russell Library, 123 Broad Street, Middletown, Connecticut 06457.

Dated at Bethesda, Maryland, this 5th day of October, 1987.

For the Nuclear Regulatory Commission.

Cecil O. Thomas,

Director, Integrated Safety Assessment Project Directorate, Divisions of Reactor Projects III/IV/V and Special Projects.

BILLING CODE 7590–01–M

[Docket No. 50–245]

Northeast Nuclear Energy Co., Millstone Nuclear Power Station, Unit No. 1; Environmental Assessment and Finding of No Significant Impact

The U.S. Nuclear Regulatory Commission (the Commission) is considering issuance of an exemption from the requirements of Appendix J to 10 CFR Part 50 to Northeast Nuclear Energy Company (the licensee) for the Millstone Nuclear Station, Unit No. 1, located at the licensee's site in New London County, Connecticut.

Environmental Assessment

Identification of Proposed Action

The licensee is requesting an exemption from Paragraph III.A.3 of 10 CFR Part 50 Appendix J, "Primary Reactor Containment Leakage Testing for Water-Cooled Power Reactors." In 1973, Appendix J was issued to establish requirements for primary containment leakage testing and incorporated by reference, ANSI N45.4–1972, "Leakage Rate Testing of Containment Structures for Nuclear Reactors." This standard requires that containment leakage calculations be performed by using either the point-to-point method or the total time method. The total time method was used the most by the nuclear industry until about 1976.

At this time, licensees who wish to use mass-point must submit an application for exemption from the Appendix J requirement that containment integrated leak rate tests will conform to ANSI N45.4. The exemption proposed by the licensee would be granted until pending changes to Appendix J become effective. The exemption applies only to the method of calculating containment leakage. In the mass-point method, the mass of air in containment is calculated and plotted as a function of time and leakage is calculated from the slope of the linear least squares.

With the present developments in technology, the mass-point method has gained increasing recognition.

The superiority of the mass-point method becomes apparent when it is compared with the two other methods. In the total time method, a series of

leakage rates are calculated on the basis of air mass differences between an initial data point and each individual data point thereafter. If for any reason (such as instrument error, lack of temperature equilibrium, ingassing or outgassing) the initial data point is not accurate, the results of the test will be affected. In the point-to-point method, the leak rates are based on the mass difference between each pair of consecutive points which are then averaged to yield a single leakage rate estimate. Mathematically, this can be shown to be the difference between the air mass at the beginning of the test and the air mass at the end of the test expressed as a percentage of the containment air mass. It follows from the above that the point-to-point method ignores any mass readings during the test and thus the leakage rate is calculated on the basis of the difference in mass between two measurements taken at the beginning and at the end of the test, which are 24 hours apart.

The licensee's request and bases for exemption are contained in a letter dated July 10, 1987.

The Need for the Proposed Action

The exemption is needed to allow continued use of the mass-point analysis method at Millstone Unit No. 1.

Environmental Impact of the Proposed Action

The proposed exemption will have no incremental environmental impact relative to current practice because the exemption will allow testing to be conducted in the same manner as it is currently performed.

The erraticism of the total time method creates a higher probability of unnecessarily failing a containment integrated leakage rate test (note that the calculational procedure is independent of containment tightness) possibly resulting in increased test frequency, critical path outage time, and exposure to test personnel.

Thus, radiological releases will not be greater than previously determined, nor does the proposed exemption otherwise affect radiological plant effluents, and has no other environmental impact. Therefore, the Commission concludes that there are no significant radiological or non-radiological enviromental impacts associated with the proposed exemption.

Alternative to the Proposed Action

It has been concluded that there is no measurable impact associated with the proposed exemption; any alternatives to the exemption will have either no environmental impact or greater environmental impact.

Alternative Use of Resources

This action does not involve the use of resources beyond the scope of resources used during normal plant operation.

Agencies and Persons Consulted

The Commission's staff reviewed the licensee's request that supports the proposed exemption. The staff did not consult other agencies or persons.

Finding of No Significant Impact

Based upon the foregoing environmental assessment, the Commission concluded that the proposed action will not have a significant effect on the quality of the human environment. Accordingly, the Commission has determined not to prepare an environmental impact statement for the proposed exemption.

For further details with respect to this action, see the request for exemption submittal dated July 10, 1987 which is available for public inspection at the Commission's Public Document Room, 1717 H Street NW., Washington, DC 20555, and at the local public document room located at the Waterford Public Library, Rope Ferry Road, Route 156, Waterford, Connecticut 06385.

Dated at Bethesda, Maryland, this 5th day of October, 1987.

[Docket Nos. 50-440, 50-441]

Cleveland Electric Illuminating Co., et. al., Perry Nuclear Power Plant, Units 1 and 2, Issuance of Final Director's Decision

Notice is hereby given that the Director, Office of Nuclear Reactor Regulation, has issued a Director's Decision concerning a Petition dated June 5, 1987, filed by Terry J. Lodge on behalf of the Toledo Coalition for Safe Energy, Sunflower Alliance, Inc., Susan B. Carter and Steve Sass (Petitioners). The Petitioners requested that the Nuclear Regulatory Commission (NRC) issue an order to show cause why the operating license for the Perry Nuclear Power Plant, Unit 1, should not be modified or revoked pending full consideration of certain issues raised in the 1975 General Electric Company Nuclear Reactor Study ("Reed Report") prepared by a team of General Electric engineers. The Petition alleged that the Reed Report identified problems with the General Electric BWR-6 Mark III containment boiling water reactor, specifically: (1) Technology to fix problems would not be available: (2) the design is unusually subject to earthquake hazards; (3) plant workers might be unusually subject to radiation exposures; (4) safety systems contained in the design had not been subjected to adequate testing; and (5) inadequate or undertested metals could create defectively performing systems.

The operating license for Unit 1 of the Perry facility was issued on November 13, 1986 to the Cleveland Electric Illuminating Company, *et al.* On June 30, 1987, the NRC notified Petitioners that this matter would be considered pursuant to 10 CFR 2.206.

The Director has determined that the Petitioners' request should be denied for the reasons set forth in the "Director's Decision Pursuant to 10 CFR 2.206" (DD-87-10, which is available for inspection and copying in the Commission's Public Document Room, 1717 H Street NW., Washington, DC 20555 and at the local Public Document Room for the Perry Nuclear Power Plant at the Perry Public Library, 3753 Main Street, Perry, Ohio 44081.

A copy of the Decision will be filed with the Secretary for Commission review in accordance with 10 CFR 2.206(c). As provided in 10 CFR 2.206(c), the Decision will become the final action of the Commission twenty-five (25) days after issuance unless the Commission on its own motion institutes review of the Decision within that time.

Dated at Bethesda, Maryland, this 7th day of October 1987.

For The Nuclear Regulatory Commission.

Thomas E. Murley,

Director, Office of Nuclear Reactor Regulation.

PANAMA CANAL COMMISSION

Privacy Act of 1974; Systems of Records

AGENCY: Panama Canal Commission.

ACTION: Adoption of systems of records.

SUMMARY: In accordance with 5 U.S.C. 552a, the Panama Canal Commission published in the **Federal Register** (52 FR 28498, July 30, 1987) nine Privacy Act Systems of Records. The systems described are PCC/AE-1, Executive

Personnel Financial Disclosure Reports; PCC/AMTE–2, Equity Adjustment; PCC/FMAC–10, Estate Files; PCC/FMAP–2, Payroll Deduction System for Court Ordered Wage Garnishments; PCC/FMCL–1, Travel and Transportation Claims; PCC/GCCL–1, Marine Accident/Miscellaneous General Claims; PCC/MRNP–1, Pilot Training Program; PCC/PRAA–1, Adverse Actions Files; and PCC/PRCL–1, Injury Claims.

EFFECTIVE DATE: October 13, 1987.

FOR FURTHER INFORMATION CONTACT: Mr. Thomas C. Duty, Agency Records Officer, Chief, Administrative Services Division, Panama Canal Commission, APO Miami 34011–5000.

SUPPLEMENTARY INFORMATION: On July 30, 1987, the Panama Canal Commission published a notice concerning the nine Systems of Records maintained by the Panama Canal Commission. The public was provided with a comment period of 30 days which ended on August 31, 1987. No comments were received in connection with the interim rule during this period; therefore, the notice is now adopted without change and is incorporated into the Panama Canal Commission Privacy Act Systems of Records.

Dated: September 9, 1987.

Frank R. Turman,

Acting Agency Records Officer.

POSTAL SERVICE

Implementation of Temporary Changes in the Domestic Mail Classification Schedule Provision Regarding Merchandise Return Service

AGENCY: Postal Service.

ACTION: Notice of implementation of a temporary change in the Domestic Mail Classification Schedule provision regarding merchandise return service.

SUMMARY: This gives notice that effective 12:01 a.m. on October 25, 1987, the Postal Service will implement a change in the Domestic Mail Classification Schedule allowing registered mail service and merchandise return service to be used in conjunction with each other, and allowing special handling and merchandise return service to be used in conjunction with each other.

EFFECTIVE DATE: October 25, 1987.

FOR FURTHER INFORMATION CONTACT: Lynn M. Martin, (202) 268–5176.

SUPPLEMENTARY INFORMATION: On May 7, 1987, the United States Postal Service filed with the Postal Rate Commission a Request for a Recommended Decision on amending sections 14.060, 18.060, and 20.040 of the Domestic Mail Classification Schedule. The Postal Service proposed to allow registered mail service and merchandise return service to be used in conjunction with each other, and to allow special handling and merchandise return service to be used in conjunction with each other. As amended, the sections would read as follows:

Classification Schedule SS–14

Registered Mail

14.060 The following services may be obtained in conjunction with mail sent under this classification schedule upon payment of applicable fees:

	Classification schedule
a. Collect on delivery	SS–6
b. Restricted delivery	SS–15
c. Return receipt	SS–16
d. Special delivery	SS–17
e. Merchandise return (shippers only)	SS–20

Classification Schedule SS–18

Special Handling

18.060 The following services may be obtained in conjunction with mail sent under this classification schedule upon payment of the applicable fees:

	Classification schedule
a. C.O.D. mail	SS–6
b. Insured mail	SS–9
c. Parcel airlift	SS–13
e. Merchandise return (shippers only)	SS–20

Classification Schedule SS–20

Merchandise Return

20.040 The following services may be obtained in conjunction with mail sent under this classification schedule upon payment of applicable fees:

	Classification schedule
a. Certificate of mailing	SS–4
b. Insured mail	SS–9
c. Registered mail	SS–14
d. Special handling	SS–19

Notice of the Postal Service's request was published in the **Federal Register** by the Rate Commission on May 15, 1987 (52 FR 18498).

Under the Postal Reorganization Act, if the Postal Rate Commission has not transmitted its recommended decision to the Governors of the Postal Service within 90 days of the submission to it of the Postal Service's request for a recommended decision on a proposed change in the mail classification schedule, the Postal Service may place the proposed change into effect on a temporary basis. 39 U.S.C. 3641(e). More than ninety days have elapsed since the Postal Service filed its request for a recommended decision on the proposed changes in services and the Rate Commission has not transmitted its recommended decision to the Governors. By Resolution No. 87–8 the Board of Governors on October 6, 1987, voted to implement the proposed changes on a temporary basis and set October 25, 1987, as the date on which the temporary changes will become effective. Accordingly, the proposed changes in the classification schedule described above shall take effect on a temporary basis at 12:01 a.m. on October 25, 1987.

Fred Eggleston,

Assistant General Counsel, Legislative Division.

SMALL BUSINESS ADMINISTRATION

[License No. 09/09-5375]

Issuance of a Small Business Investment Company License; Bentley Capital

On June 17, 1987, a notice was published in the **Federal Register** (Vol. 52, No. 116, Page 23130) stating that an application has been filed by Bentley Capital, San Francisco, California, with the Small Business Administration (SBA) pursuant to the Regulations governing small business investment companies (13 CFR 107.102 (1987)) for a license as a small business investment company.

Interested parties were given until close of business July 18, 1987, to submit their comments to SBA. No comments were received.

Notice is hereby given that, pursuant to section 301(d) of the Small Business Investment Act of 1958, as amended, after having considered the application and all other pertinent information, SBA issued License No. 09/09-5375 on August 27, 1987, to Bentley Capital to operate as a small business investment company.

(Catalog of Federal Domestic Asssitance Program No. 59.011,) Small Business Investment Companies)

Robert G. Lineberry,

Deputy Associate Administrator for Investment.

Dated: October 2, 1987.

[FR Doc. 87-23532 Filed 10-9-87; 8:45 am]

BILLING CODE 8025-01-M

[Application No. 01/01-0344]

Application for License To Operate as Small Business Investment Company; First New England Capital Limited Partnership

Notice is hereby given that an application has been filed with the Small Business Administration pursuant to the Regulations governing small business investment companies (13 CFR 107.102 (1987)) by First New England Capital Limited Partnership (the Applicant), 255 Main Street, Hartford, Connecticut 06103, for a license to operate as a small business investment company (SBIC) under the Small Business Investment Act of 1958 (the Act), as amended (15 U.S.C. 661 *et. seq.*).

The proposed officers, directors and shareholders of the Applicant are as follows:

Name	Title or relationship	Percent of ownership
FINEC Corp., 255 Main Street, Hartford, CT 06106.	General Manager and General Partner	10
Richard C. Klaffky, 105 Knob Hill Rd., Glastonbury, CT 06033.	Limited Partner, President, 10% Stockholder of FINEC Corp	
George J. Ritter, 248 Whitney Avenue, Hartford, CT 06105.	Chairman of Board of FINEC Corp.	
Paul F. Romanelli, 265 Natchung Drive, Glastonbury, CT 06033	Treasurer, Director, and 10% Stockholder in FINEC Corp	
Richard Sursman, 148 Kenyon, Hartford, CT 06105	Director and 10% Stockholder in FINEC Corp	
John H. Filer, 627 Fern Street, West Hartford, CT 06107.	Chairman of Advisory Board, 10% Stockholder in FINEC Corp.	

The Applicant, a Connecticut limited partnership, will conduct its operations in the States of Connecticut, Massachusetts, and Rhode Island. The Applicant intends to begin operations with $5,000,000 in partnership private capital. The amount of partnership private capital depends on the success of a private offering of limiting partnership units. Also, additional shares in the corporate general partner will be offered through a private offering.

Matters involved in SBA's consideration of the application include the general business reputation and character of the proposed owners and management, and the probability of successful operations of the company under their management, including adequate profitability and financial soundness, in accordance with the Small Business Investment Act of 1958, as amended, and the SBA Rules and Regulations.

Notice is further given that any person may, not later than 30 days from the date of publication of this Notice, submit written comments on the proposed SBIC to the Deputy Associate Administrator for Investment, Small Business Administration, 1441 L Street NW., Washington, DC 20416.

A copy of the notice will be published in a newspaper of general circulation in the Hartford, Connecticut area.

(Catalog of Federal Domestic Assistance Program No. 59.011, Small Business Investment Companies)

Robert G. Lineberry,

Deputy Associate Administrator for Investment.

Dated: October 2, 1987.

BILLING CODE, 8025-01-M

DEPARTMENT OF STATE

[Public Notice 1032]

Immigant Visa Files; Records Disposal Procedures

AGENCY: Bureau of Consular Affairs, Department of State.

ACTION: Systematic disposal of files relating to registrations of aliens who fail to apply for immigrant visas.

SUMMARY: The Department proposes, pursuant to the authority in section 203(e) of the Immigration and Nationality Act, to instruct consular officers at immigrant visa issuing posts to begin to dispose of immigrant visa files in accordance with records disposal procedures, which have been inactive for at least three years from the date on which the priority date has been reached. This notice proposes a change in the procedures established to administer the provisions of section 203(e). The proposal would affect immigrant visa applicants who have not reaffirmed their continuing intent to emigrate.

DATE: Comments must be received on or before November 13, 1987.

ADDRESS: Comments may be addressed to Stephen K. Fischel, Chief, Legislative and Regulations Division, Visa Office, Department of State, Washington, DC 20520.

FOR FURTHER INFORMATION CONTACT: Mr. Stephen K. Fischel, Chief, Legislative and Regulations Division, Visa Office, Department of State, Washington, DC 20520, Telephone (202) 663-1204.

SUPPLEMENTARY INFORMATION: The Department has become aware of a growing number of inactive immigrant visa cases which are being stored at posts abroad. In an effort to cope with the large volume of files currently both occupying valuable file space and overloading computer systems, the Department proposes to change its procedures for processing certain immigrant visa applications. Consequently, the Department proposes to authorize all immigrant visa issuing posts to begin a screening process which

eventually will result in the revocation of petitions of inactive cases as defined herein.

The Department has reviewed the procedures originally established pursuant to the provisions of section 203(e) of the Immigration and Nationality Act, as amended by Pub. L. 94–571, and has determined that such procedures should be modified to allow for the gradual purging of the voluminous number of pending immigrant visa files which have been inactive for years.

Under current procedures, revocation of an inactive petition cannot occur until two years after Packet 4 (Appointment Letter for Immigrants) has been transmitted to the applicant.

The only criterion for transmitting Packet 4 to the applicant under current procedures is the receipt of notification from the alien that all documents have been assembled in accordance with Packet 3 instructions. These procedures, however, give no time limitation after receipt of the Packet 3 letter in which an intending immigrant must collect the required documentation and notify the consular post. A new criterion is being proposed which would trigger transmission of the Packet 4 letter. Under this criterion the letter scheduling the visa interview would be mailed in all "inactive" cases, that is, cases in which the applicant's priority date is current and in which Packet 3 letters have been sent to the applicant and no response has been received for the three years following the Packet 3 mailing date. The mailing of Packet 4 invokes the provisions of section 203(e) which are explained in the background section of this preamble.

A conservative estimate indicates that there are approximately 600,000 inactive immigrant visa cases worldwide which must be stored at a substantial cost to the United States Government. The Department believes that some of the applicants may have adjusted status in the United States and that others have simply abandoned their intention to immigrate to the United States.

The proposed procedure would be implemented in all cases which come before immigrant visa issuing posts. These posts will be directed to begin mailing the Packet 4 appointment letters to those applicants who do not respond to the Packet 3 letter within three years from its mailing date. At posts which have a substantial number of "inactive cases", the procedure would be implemented gradually on a continuous basis to avoid the taxing of available resources. Those posts would be directed to limit the number of "inactive cases" to be processed at one time to be no more then five percent of the total inactive cases or the average number of immigrant visa applicants normally scheduled for an interview in the normal month, whichever is smaller. This gradual processing approach will allow for the orderly implementation of the procedures.

Background

Section 203(e) of the Immigration and Nationality Act provides in part: "* * * The Secretary of State shall terminate the registration of any such alien who fails to apply for an immigrant visa within one year following notification to him of the availability of such visa, but the Secretary shall reinstate the registration of any such alien who establishes within two years following the notification of the availability of such visa that failure to apply was due to circumstances beyond his control. Upon such termination the approval of any petition approved pursuant to section 204(b) shall be automatically revoked."

Under current procedures, a "Packet 3" letter is sent to all immigrant visa applicants when their turn for processing has been reached instructing them to notify the post when all documents have been collected and the applicant is ready for the scheduling of an immigrant visa interview. The Packet 3 letter, as all other correspondence, is sent to the beneficiary's address of record, as the beneficiary had been informed of his responsibility of keeping the consular office informed of the alien's current address.

Further processing (Packet 4 letter) can take place only after receipt of the applicant's reply to Packet 3 informing the post that all documents have been assembled. Upon receipt of such notification and completion of necessary administrative processing, the case is reported to the Department as one for which an immigrant visa number can be allocated, if available. When the alien's priority date actually comes within the visa issuance cut-off date (immediately in some cases; after a further waiting period in others), the visa number is allocated and the post notifies the alien of the availability of a visa by scheduling the formal appointment. If within one year from the date of the scheduled interview a response has not been received from the applicant, a second letter is mailed advising the applicant that since no response was received to the Packet 4 letter the visa petition and accompanying documents have been terminated. This second letter also advises the applicant that the application for registration could be reinstated and the petition revalidated if the applicant is able to establish within one year from the date of the second letter that failure to pursue the application was due to circmstances beyond the applicant's control. At the end of the two year period a third and final letter informs the applicant that the processing of the immigrant visa application has been terminated and that all documentation submitted has been destroyed in accordance with standard records disposal procedures and that the petition has been returned to the originating office of the Immigration and Naturalization Service.

Date: September 29, 1987.

Joan M. Clark,

Assistant Secretary for Consular Affairs.

[Public Notice CM–8/1127]

Advisory Committee on Oceans and International Environmental and Scientific Affairs; Partially Closed Meeting

Department of State officials responsible for international health policy regarding AIDS will be present at 2:00 p.m. Tuesday, October 27 in Room 1107 of the Department of State at 2201 C Street NW., Washington, DC, to discuss key issues and problems in that field and seek comments and advice. This session, which is being convened by the Department's Advisory Committee on Oceans and International Environmental and Scientific Affairs, will be open to the public and will last until 4:00 p.m. Members of the general public will be admitted to the session to the limits of seating capacity and will be given the opportunity to participate in discussions according to the instructions of the Chairperson. In that regard, entrance to the Department of State building is controlled, and entry will be facilitated if arrangements are made in advance of the meeting. Prior to the meeting, persons who plan to attend should so advise the Office of Science and Technology Support by contacting William Moody or Douglas Dearborn, telephone (202) 647–4069. All attendees must use the C Street entrance to the building.

Officers of the Bureau of Oceans and International Environmental and Scientific Affairs, along with the Department of State's Advisory Committee on Oceans and International Environmental and Scientific Affairs, will meet at 8:30 a.m. on Wednesday, October 28, in a session which will not

VOL 52 ISS 197 OCT 13 1987 UMI

be open to the public. This session will include discussion of classified material under 5 U.S.C. 552b (c) (1) and U.S.C. 552b (c) (9) (B). The disclosure of classified material and revelation of considerations which go into policy development could adversely affect the ability of the United States to achieve its foreign policy objectives. The purposes of these discussions will be to elicit views and discuss issues relating to international health policy regarding AIDS. This portion of the meeting will include classified briefings and discussion of classified documents pursuant to Executive Order 12356.

Requests for further information on this meeting should be directed to Thomas Wajda or William Moody of the Office of Science and Technology Support of the Department of State's Bureau of Oceans and International Environmental and Scientific Affairs. They may be reached by telephone on (202) 647–4069.

John D. Negroponte,

Chairman, Advisory Committee on Oceans and International Environmental and Scientific Affairs.

October 1, 1987.

[Public Notice CM–8/1126]

Study Group 4 of the U.S. Organization for the International Radio Consultative Committee (CCIR); Meeting

The Department of State announces that Study Group 4 of the U.S. Organization for the International Radio Consultative Committee (CCIR) will meet on November 4, 1987 in the 8th Floor Conference Room, Communications Satellite Corporation, 950 L'Enfant Plaza, SW., Washington, DC. The meeting will begin at 9:30 a.m.

Study Group 4 deals with matters relating to systems of radiocommunications for the fixed service using satellites. The purpose of the meeting will be to continue the plan of work for the Study Group during the 1986–1990 period.

Members of the general public may attend the meeting and join in the discussions subject to instructions of the Chairman. Admittance of public members will be limited to the seating available. Requests for further information should be directed to Mr. Richard E. Shrum, State Department, Washington, DC 20520; telephone (202) 647–2592.

Richard E. Shrum,

Chairman, U.S. CCIR National Committee.

October 1, 1987.

BILLING CODE 4710–07–M

[Public Notice CM–8/1125]

National Committee of the U.S. Organization for the International Telegraph and Telephone Consultative Committee (CCITT); Meeting

The Department of State announces that the National Committee of the U.S. Organization for the International Telegraph and Telephone Consultative Committee (CCITT) will meet on November 6, 1987 in Room 1912, Department of State, 2201 C Street NW., Washington, DC. The meeting will begin at 9:30 a.m.

The National Committee assists in the resolution of administrative/procedural problems pertaining to U.S. CCITT activities; provides advice on matters of policy and positions in the preparation for CCITT Plenary Assemblies and meetings of the International Study Groups; provides advice and recommendations in regard to the work of the U.S. CCITT Study Groups; and recommends the disposition of proposed U.S. contributions to the international CCITT which are submitted to the Committee for consideration.

The purpose of the meeting is to:

1. Decide certain administrative changes proposed at the September 9 meeting.
2. Establish Ad Hoc groups for particular purposes in preparation for the IX Plenary Assembly of the CCITT, and the Plenipotentiary Conference of the ITU.
3. Determine the program of work and participants of the above mentioned Ad Hoc groups.
4. Establish an Ad Hoc group for strategic planning relating more generally to WATTC and Plenipotentiary Conference issues.
5. Other business.

Members of the general public may attend the meeting and join in the discussion, subject to the instructions of the Chairman. Admittance of public members will be limited to the seating available. In that regard, entrance to the Department of State building is controlled and entry will be facilitated if arrangements are made in advance of the meeting. Prior to the meeting, persons who plan to attend should so advise the office of Mr. Earl Barbely, State Department, Washington, DC; telephone (202) 653–6102. All attendees must use the C Street entrance to the building.

Dated: September 28, 1987.

Earl S. Barbely,

Director, Office of Technical Standards and Development; Chairman, U.S. CCITT National Committee.

DEPARTMENT OF TRANSPORTATION

Aviation Proceedings; Agreements Filed During the Week Ending October 2, 1987

The following agreements were filed with the Department of Transportation under the provisions of 49 U.S.C. 408, 409, 412, and 414. Answers may be filed within 21 days of date of filing.

Docket No. 45167

Parties: Members of International Air Transport Association
Date Filed: October 1, 1987
Subject: Cancel Specific Co-Rates BUE–US
Proposed Effective Date: October 15, 1987

Docket No. 45168 R–1–R–3

Parties: Members of International Air Transport Association
Date Filed: October 1, 1987
Subject: Within So.-East Asia Fares
Proposed Effective Date: November 1, 1987

Docket No. 45166

Parties: Pan American World Airways, Inc. and Aeroflot Soviet Airlines
Date Filed: October 1, 1987
Subject: Application of Pan American World Airways, Inc. pursuant to sections 412 and 414 of the Act, requests (1) approval of an agreement between itself and the General Department of International Air Services (Aeroflot Soviet Airlines), entitled Agreement Between Pan Am and Aeroflot Concerning the Joint Commercial Use of a Pan Am 747 Aircraft Between the USSR and USA, dated September 25, 1987, and (2) the concomitant conferral of antitrust immunity.

Phyllis T. Kaylor,

Chief, Documentary Services Division.

BILLING CODE 4910–62–M

Applications for Certificates of Public Convenience and Necessity and Foreign Air Carrier Permits Filed During the Week Ending

October 2, 1987.

The following applications for certificates of public convenience and necessity and foreign air carrier permits were filed under Subpart O of the Department of Transportation's Procedural Regulations (See 14 CFR 302.1701 *et. seq.)*. The due date for answers, conforming applications, or motion to modify scope are set forth below for each application. Following the answer period DOT may process the application by expedited procedures. Such procedures may consist of the adoption of a show-cause order, a tentative order, or in appropriate cases in a final order without further proceedings.

Docket No. 45170

Date Filed: October 1, 1987
Due Date for Answers, Conforming Applications, or Motion to Modify Scope: October 29, 1987

Description: Application of Continental Airlines, Inc. and Air Micronesia, Inc. pursuant to section 401 of the Act and Subpart Q of the Regulations, requests an amendment of their certificates of public convenience and necessity for Route 171 and Route 170 respectively in order to authorize Continental/Air Micronesia to provide foreign air transportation of persons, property and mail between the United States coterminals Guam and Saipan, on the one hand, and Naha, Japan (formerly Okinawa), on the other hand.

Docket No. 45173

Date Filed: October 2, 1987
Due Date for Answers, Conforming Applications, or Motions to Modify Scope: October 30, 1987

Description: Application of Executive Air Charter pursuant to section 401 of the Act and subpart Q of the Regulations requests that it be granted a certificate of public convenience and necessity for scheduled and charter interstate and overseas air transportation of persons, property and mail.

Docket No. 45174

Date Filed: October 2, 1987
Due Date for Answers, Conforming Applications, or Motions to Modify Scope: October 30, 1987

Description: Application of Executive Air Charter pursuant to section 401 of the Act and Subpart Q of the Regulations requests that it be granted a certificate of public convenience and necessity for scheduled and charter foreign air transportation of persons, property and mail.

Phillis T. Kaylor,
Chief, Documentary Services Division.

[Docket 45165]

Seattle/Portland-Japan Service Proceeding; Prehearing Conference

The prehearing conference in this proceeding will be held on Wednesday, November 4, 1987 at 10:00 a.m. (local time) in Room 5332, U.S. Department of Transportation, 400 Seventh Street, SW., Washington, DC.

On or before October 28, 1987, the parties shall submit one copy to each other and four copies to the Judge of (1) any proposals for changes in the evidence request contained in the Appendix to Order 87-9-66; (2) proposed procedural dates; (3) proposed stipulations; and (4) a statement of position. The latter two matters also bear on the Department's stated anticipation "that most of the record created in Docket 44380 would be incorporated into the new docket * * *." Order 87-9-66 at p. 2. Therefore, the submissions shall comment on how much of the prior record and by what method (notice, stipulation, etc.) the previous evidence can be incorporated into this record. Be specific in outlining exhibits and testimony that can be incorporated.

Dated at Washington, DC, October 5, 1987.

Burton S. Kolko,
Administrative Law Judge.

BILLING CODE 4910-13-M

Radio Technical Commission for Aeronautics (RTCA); Special Committee 147; Traffic Alert and Collision Avoidance System; Meeting

Pursuant to section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92-463; 5 U.S.C. App. I) notice is hereby given of a meeting of RTCA Special Committee 147 on Traffic Alert and Collision Avoidance System to be held on October 27-29, 1987, in the RTCA Conference Room, One McPherson Square, 1425 K Street, NW., Suite 500, Washington, DC commencing at 9:30 a.m.

The Agenda for this meeting is as follows: (1) Chairman's Remarks; (2) Approval of Minutes of the Twenty-Second Meeting held on May 19-21, 1987; (3) Briefing on recent near mid-air incident reports; (4) Status Reports on Phase II of Piedmont flight evaluations; (5) Status report on FAA Technical Center TCAS activities; (6) Working Group Reports; (7) Status reports on joint separation assurance task force activities; (8) Briefing on items submitted for change 5 to RTCA/DO-185; (9) Briefing on FAA TCAS program; (10) Discussion on future plan and work programs; (11) Other business; and (12) Date and place of next meeting; (13) Working group separate sessions; (14) Summary of working group deliberations; (15) Closing discussion.

Attendance is open to the interested public but limited to space available. With the approval of the Chairman, members of the public may present oral statements at the meeting. Persons wishing to present statements or obtain information should contact the RTCA Secretariat, One McPherson Square, 1425 K Street, NW., Suite 500, Washington, DC 20005; (202) 682-0266. Any member of the public may present a written statement to the committee at any time.

Issued in Washington, DC, on October 1, 1987.

Herbert P. Goldstein,

Designated Officer.

BILLING CODE 4910-13-M

Federal Highway Administration

Environmental Impact Statement; St. Joseph County; City of Mishawaka; IN

AGENCY: Federal Highway Administration (FHWA), DOT.

ACTION: Notice of intent.

SUMMARY: The FHWA is issuing this notice to advise the public that an environmental impact statement will be prepared for a proposed highway project located in the City of Mishawaka, St. Joseph County, Indiana.

FOR FURTHER INFORMATION CONTACT: Mr. James E. Threlkeld, District Engineer, Federal Highway Administration, Federal Office Building, 575 North Pennsylvania Street, Room 254, Indianapolis, Indiana, Telephone: (317) 269-7481.

SUPPLEMENTARY INFORMATION: The FHWA in cooperation with the Indiana Department of Highways (IDOH) will prepare an environmental impact statement (EIS) on a proposal to construct a new 4-lane controlled access roadway on the east side of the City of Mishawaka and to the northeast and southeast of the City in the unincorporated area of St. Joseph County. The proposed roadway will generally follow along and/or adjacent to existing sections of Capital Avenue (Elm Road). The south terminus will be at the interchange of Elm Road and the new route for US 20 which is presently under design. The north terminus will be at State Road 23 with connection to the Milepost 83 interchange on the Indiana East-West Toll Road (I80/90). The total corridor length is approximately 7.8 miles.

Completion of this proposed action will provide for interconnection between U.S. 20 and the Indiana Toll Road on the east side of the South Bend/Mishawaka urbanized area and will improve local north-south travel on the east side of the City of Mishawaka and St. Joseph County. The proposed action is a priority recommendation of the 2005 Transportation Plan for the South Bend/Elkhart urbanized area.

Two (2) primary alternative alignments with various crossover connections will be developed and evaluated in the EIS. The alternative alignments will include an alignment which follows adjacent to existing sections of Capital Avenue (and north-south extensions thereof) and parallel alignment to the east or west. The recently completed 4-lane bridge on Capital Avenue over the St. Joseph River, located near the midpoint of the corridor, should not require modifications or replacement. Grade separations of Conrail, Grand Trunk Western Railroad and the Indiana Toll Road are anticipated. The evaluation of alternatives in the EIS will include a do nothing action.

To ensure that the full range of issues related to this proposed action are addressed and that all significant issues are identified, those agencies, groups or individuals affected by or interested in the proposed action are invited to participate by sending their written comments to the FHWA. No formal Scoping Meeting will be held for this proposed action. Public information meetings will be held during the early development phase of the proposed action. Dates and locations of such

meetings will be advertised in newspapers having local distribution within the project area.

(Catalog of Federal Domestic Assistance Program Number 20.205, Highway Planning and Construction. The regulations implementing Executive Order 12372 regarding intergovernmental consultation on Federal programs and activities apply to this program)

Issued On: October 2, 1987.

James E. Threlkeld,

District Engineer.

[FR Doc. 87-23587 Filed 10-9-87; 8:45 am]

BILLING CODE 4910-22-M

Federal Railroad Administration

[FRA General Docket No. H-87-2]

Petition for Exemption or Waiver for Test Program; National Railroad Passenger Corporation

Notice is hereby given that the National Railroad Passenger Corporation (Amtrak), has submitted a petition for a temporary waiver of 49 CFR 213.57(b), that section of the Federal Track Safety Standards that prescribes the maximum allowable operating speeds for trains on curves as a function of actual superelevation and curvature. Amtrak requests this waiver for the test operation of an RTG II Turbine train on its Northeast Corridor line between New York and Boston. The purpose of the petition is to obtain the approval of the Federal Railroad Administration (FRA) to operate an RTG trainset, under test conditions, at speeds which produce up to six inches of lateral unbalance.

In response to Amtrak's request and for the reasons stated in this notice, FRA has granted a temporary, conditional waiver, pending receipt and evaluation of public comments. The waiver permits the conduct of the RTG II Turbine Train test between New Haven, Connecticut, and Boston, Massachusetts, during the period October 5 to October 31, 1987, at curving speeds that will produce up to six inches of unbalance and is conditioned on Amtrak's adherence to the parameters of the test program set forth in this notice.

In the ideal case, trained vehicles would negotiate all curves at what is called equilibrium speed. That is the speed at which several favorable things happen: Centrifugal force is exactly counterbalanced by the actual superelevation (tilt/cant) of the track, passengers do not sense curve presence and wheel-rail wear is minimized. As a practical matter, the ideal cannot be achieved: operating conditions demand different train speeds, from time to time, over the same location. So, what evolved many years ago was a compromise approach to equilibrium or balanced curve negotiation in which the tracks; superelevation on curves was established at some value less than that which would provide a balanced ride for the fastest type of service. Thus, the concept of unbalance was introduced and there can indeed be both underbalance situations where moving vehicles lean to the outside of curves and overbalance conditions where slowly moving vehicles lean to the inside. The petition is concerned exclusively with underbalance, also called superelevation/cant deficiency or just unbalance.

Section 213.57(b) of the Track Safety Standards specifies a maximum allowable unbalance or cant deficiency of three inches. This means that track maintenance personnel can install superelevation on a curve that is up to three inches less than that which would provide "balanced" curve negotiation. This value of three inches was borrowed from industry application over many years for direct inclusion in the Track Safety Standards at the time that they were being formulated. The origin in the railroad industry of the number was entirely based on passenger comfort, not train safety. There have been a number of tests, over the years and worldwide, in which it was demonstrated that unbalanced curve negotiation could be as high as 11 inches before vehicle safety became an issue. Indeed, the RTG II Turbine trainsets are operated on a daily basis in France in revenue service at up to 6.3 (160 mm) inches of unbalance. However, unbalance is a variable quantity, and the level of can deficiency tolerated by specific railroad car type needs to be determined through analysis and test.

In order to improve trip times between New York and Boston, the petitioner is contemplating train operation over various curves at up to six inches of unbalanced elevation using trainsets designed to operate safely and comfortably at this cant deficiency. In reality, this can only be achieved in the region New Haven to Boston, because the petitioner does not control the track, New Rochelle to New Haven, and the segment, New York to New Rochelle, is unsuitable for higher speeds. These restrictions are acknowledged by the petitioner; therefore, the test zone will be New Haven to Boston. To investigate the implication of this operating concept, the petitioner proposes to test the response of a trainset representing the type likely to provide this service at candidate speeds developing six inches of unbalanced elevation. It is the responsibility of the FRA to assure that this test event can be carried out safely. While the RTG trainsets have an extensive record in the U.S. of safe operation at speeds conforming to the requirements of § 213.57(b), there are no data reflecting domestic operation at speeds beyond those associated with three-inch unbalanced operation. Before approving the petition, an analysis of the risk of test vehicle derailment must be performed. There are three causes of vehicle derailments on curves that are of concern here: Rail rollover, lateral track shift and vehicle overturning. Each of these derailment modes will be considered in turn.

Rail rollover: This mode of derailment is largely a function of the integrity of the fastening system used to attach the rails to the ties and the magnitude of lateral wheel loads. In cases where the rail-tie fasteners are totally secure and large lateral wheel loads are applied to the elevated rail in curves, the hazard then is a shift of the rail-tie structur in the ballast and consequent destabilization of the trainset. Since both of these derailment modes are closely related, it is convenient to consider them together.

There is broad test experience in France with exactly the same kind of equipment proposed for test by the petitioner. This can be summarized as follows based on four typical investigations:

Speed	Unbalance	Lateral wheel force (lb)
107 mph	10"	14,112
83 mph	11"	12,992
78 mph	10"	14,560
150 mph	7"	9,856

What these numbers are saying is that when the French technicians operated an RTG trainset at significantly higher unbalanced speeds than are contemplated in the petition, the design factors of the equipment combined to produce not more than 15,000 lbs of lateral wheel-rail load at any one point in the test zones.

This is to be compared with the wheel-rail loads generated by a conventional American diesel locomotive (SDP-40) operated in 1978 over deliberately misaligned track at the Transportation Test Center. At that time, while running on the misaligned curve at a speed of 75 mph, a total truck force (evenly distributed over the three high rail wheels) of 105,000 lbs caused the track to shift laterally four inches. The rail-tie fasteners at this instrumented location were in excellent

condition and there was no indication of rail tipping (roll). Since the track remained stable during the preceding 70 mph test run, this result provides a quantified bound describing the upper limits of good quality track such as is evident in the highly upgraded corridor, New York to Boston. Note that the loads developed were higher by more than a factor of two than the greatest loads measured in the French RTG tests. Recall, too, that the trainset speeds developed in these French tests resulted in 10-inch to 11-inch unbalanced curve negotiation.

The conclusion to be drawn from this comparison of test experience is that for the two vehicle derailment modes of interest, rail rollover and track shift, the lateral wheel forces developed by an RTG trainset running through curves at six-inch unbalanced speeds in no way approaches an unsafe condition. To assure the validity of this conclusion under actual test conditions, a table was prepared that lists maximum predicted RTG carbody lateral acceleration values, curve by curve, both tracks, in the test zone, New Haven to Boston. It is known from past investigations in this same area what the lateral wheel load/vehicle acceleration output was for other passenger equipment types having higher centers of gravity and stiffer suspensions than RTG vehicles, yet operating safely at more than six inches of unbalance. Instrumentation aboard the test RTG trainset will produce data that will be compared with the tabular values, the point being that the design characteristics of the RTG vehicles are expected to consistently lead to the imposition of lower track loads, carbody accelerations being equivalent. If RTG carbody accelerations approach the levels attained by this previous test equipment known to be capable of safe operation at well over six inches of unbalance, further speed increases on the specific curve will be cut off by the on-board FRA test monitor.

Vehicle overturning: Reference is made, above, to the preparation of a table of RTG carbody lateral acceleration values. These data will accrue as part of the overall exercise intended to preserve the RTG test train set from overturning at the elevated test speeds. The following steps were pursued toward this end:

• The RTG train set was parked on two reversed curves, each having six inches of superelevation. The tilt of the carbody induced by the superelevation caused deflections in truck suspension springing, and these dimensional differences were recorded for consolidation with similar static state data gathered from the RTG while stopped on level track.

• These and other specific RTG data are being entered into the vehicle curving model developed and verified during the referenced earlier passenger-locomotive test series.

• From the exercise of this model, the following steady state estimates of RTG vehicle dynamics were made, all being related to elevation unbalance:

—Carbody lateral acceleration;
—Shift in resultant force due to changes in centrifugal force as speed varies (a measure of outer-rail wheel loading as a vehicle tilts in curving);
—Truck lateral force;
—Vertical wheel force on each rail.

• These estimates were correlated with actual Amcoach and F–40 (locomotive) response data collected in test.

• From a review of this assembled data, the petitioner's test director and FRA's test monitor jointly selected a maximum acceptable value for lateral acceleration of the vehicle carbody in the RTG trainset. No train speeds will be permitted that will cause higher accelerations than this value as measured on board the train during each test run.

In summary, no vehicle accelerations or wheel-rail loads greater than what has already been demonstrated to be safe for rail passenger vehicles will be permitted to occur.

FRA has also prepared a technical justification for the assignment of limiting steady state and transient lateral acceleration values as recorded on board the test train. This justification is on file as part of the public docket.

FRA has reviewed this whole approach to assuring the safety of the RTG trainset during the test events and believes it to be sound. FRA has determined that granting the required temporary waiver would be consistent with railroad safety and in the public interest, provided that Amtrak adheres to the following conditions:

Test Program Guidelines

1. A run at timetable speed (3" unbalanced curve negotiation) shall be made over both tracks, New Haven to Boston and from the on-board lateral accelerometer data output an intermediate test zone will be selected by mutual agreement of the Amtrak Test Director and the FRA Test Monitor. This intermediate test zone will consist of one or more track segments, both main tracks, for which a review of the accelerometer data indicates higher levels of carbody accelerations than occurred elsewhere.

2. Round trips shall then be scheduled over the designated intermediate test area at train speeds producing 4, 5 and 6 inches of curve unbalance, successively. During and following each of these unbalanced speed runs, the strip chart output of the on-board instrumentation shall be observed and analyzed by Amtrak and FRA technical staff who will arrive at mutually acceptable interpretation of the values displayed in the data.

Test train speeds shall not be exceeded which produce greater than:

A. Carbody steady state lateral accelerations of 0.20 g;

b. Transient accelerations (related to track alignment and crosslevel variation) of 0.33 g.

These two values are individually and independently operative as limits; they are not to be combined.

3. At the conclusion of train runs over the intermediate area, round trips shall then be scheduled over the entire test zone, New Haven to Boston, at train speeds producing 4, 5 and 6 inches of curve unbalance, successively. During these trips, maximum train speeds shall not exceed the restrictions, if any, identified for specific curves during the previous test runs in the intermediate test area.

4. If a review of the data displayed by the on-board instrumentation indicates only small increases in carbody accelerations from one value of unbalanced speed to another, the FRA Test Monitor has the authority to suspend scheduled trips in the interest of efficient test operation.

5. The location of the on-board accelerometer will be at floor level in the trailing power car located as close as possible to the pivot point of the leading (passenger compartment) truck.

6. The test train shall not operate at speeds producing more than 3 inches of unbalanced elevation when other trains are passing on the adjacent main track.

7. In no event shall the test train operate at more than 110 mph.

8. Evidence of recent accelerometer calibration shall be available to the FRA Test Monitor prior to the start of test or, if not, calibration shall occur immediately following the test series, and the resulting documentation shall be provided to the FRA Test Monitor in copy form.

9. There shall be a capability for understandable voice communication between the Amtrak Test Director and the test train Engineman continuously operative during each test run.

It is the responsibility of the petitioner to have sufficient spare devices for this purpose on board to obviate

communication interruption because of equipment failure.

10. Copies of test train operating instructions not issued by a train dispatcher shall be available to the FRA Test Monitor before each test run except the first 3-inch unbalance round trip.

11. If the RTG is operated over the Dorchester Branch, timetable speeds shall not be exceeded.

12. During periods when wind gusts of 50 mph or greater are predicted, the test trainset shall not be operated at speeds developing more than 3 inches of unbalanced elevation.

13. The manual on Uniform Traffic Control Devices (for Streets and Highways), Revision No. 4 (page 8C–7) recommends a warning period of at least 20 seconds for actuated automatic highway grade crossing protection. If the operation of the test train produces a warning period of less than 20 seconds at any active highway grade crossing device, the petitioner shall present a plan to FRA, prior to any unbalanced speed testing, which describes compensating measures that will be taken to provide highway traffic with the recommended warning interval.

14. The FRA Test Monitor shall have the authority to withdraw, at anytime for cause, the waiver of (Amtrak) compliance with § 213.57(b) of the Federal Track Safety Standards.

15. The test RTG II Turbine train shall be equipped in the control compartment(s) with accurate, operating speed indicating device(s).

16. The waiver will automatically expire at 11:59 p.m., October 31, 1987.

FRA responded promptly to the Amtrak petition, granting a conditional waiver of compliance on a temporary basis. That temporary waiver was granted with the understanding that FRA's decision would be reviewed in the light of any public comments received in response to this public notice. The decision to grant a temporary waiver, pending receipt and consideration of public comment, was based on the determination that immediate action was required in the public interest.

FRA is not seeking information and comments of all interested parties on this waiver request. As noted, FRA intends to review its initial decision in light of these comments. In addition, FRA will take these comments into account in assessing any future Amtrak petitions for similar test programs involving the RTG II Turbine train. All interested parties are invited to participate in this proceeding through written submissions. FRA does not anticipate scheduling an opportunity for oral comment because the facts do not appear to warrant it. An opportunity to present oral comments will be provided, however, if, by November 15, 1987, the party submits a written request for hearing that demonstrates that his or her position cannot be properly presented by written statements.

All written communications concerning this petition should reference "FRA General Docket No. H–87–2" and should be submitted in triplicate to the Docket Clerk, Office of Chief Counsel, FRA, 400 7th Street, SW., Washington, DC 20590.

Comments received by November 15, 1987, will be considered in this proceeding and in evaluating any future proposals by Amtrak for similar test programs. All comments received will be available for examination by interested persons at any time during regular working hours (9 a.m.–5 p.m.) in Room 8201, Nassif Building, 400 7th Street, SW., Washington, DC 20590.

Issued in Washington, DC, on October 7, 1987.

J.W. Walsh,

Associated Administrator for Safety.

BILLING CODE 4910–06–M

DEPARTMENT OF THE TREASURY

Public Information Collection Requirements Submitted to OMB for Review

Date: October 6, 1987.

The Department of Treasury has submitted the following public information collection requirement(s) to OMB for review and clearance under the Paperwork Reduction Act of 1980, Pub. L. 96–511. Copies of the submission(s) may be obtained by calling the Treasury Bureau Clearance Office listed. Comments to the OMB reviewer listed and to the Treasury Department Clearance Officer, Department of Treasury, Room 2224, 15th and Pennsylvania Avenue NW., Washington, DC 20220.

Financial Management Service

OMB Number: 1510–0013
Form Number: TPS 2208
Type of Review: Extension
Title: States Where Licensed for Surety
Description: Information is collected to report, in Treasury Circular 570, Surety Licenses of Treasury certified companies for the use by Federal bond approving officers.
Respondents: Businesses of other for-profit, Small businesses or organizations
Estimated Burden: 306 hours
Clearance Officer: Hector Leyva, (301) 436–5300, Financial Management Service, Room 100, 3700 East West Highway, Hyattsville, MD 20782
OMB Reviewer: Milo Sunderhauf, (202) 395–6880, Office of Management and Budget, Room 3208, New Executive Office Building, Washington, DC 20503

Alcohol Tobacco and Firearms

OMB Number: 1512–0092
Form Number: ATF F 5100.31 (1648/1649/1650)
Type of Review: Extension
Title: Application for Certification/Exemption of Label/Bottle Approval Under the Federal Alcohol Administration Act
Description: The Federal Administration Act regulates the labeling of alcoholic beverages and designates the Treasury Department to oversee compliance with regulations. This form is completed by the regulated industry and submitted to Treasury as an application to label their products. Treasury oversees label applications to prevent consumer deception and to deter falsification of unfair advertising practices on alcoholic beverages.
Respondents: Businesses or other for-profit, Small businesses or organizations
Estimated Burden: 27,300 hours
Clearance Officer: Robert Masarsky, (202) 566–7077, Bureau of Alcohol, Tobacco and Firearms, Room 7011, 1200 Pennsylvania Avenue NW., Washington, DC 20226
OMB Reviewer: Milo Sunderhauf, (202) 395–6880, Office of Management and Budget, Room 3208, New Executive Office Building, Washington, DC 20503.

Dale A. Morgan,

Departmental Reports, Management Officer.

Customs Service

Current IRS Interest Rate Used in Calculating Interest on Overdue Accounts and Refunds

AGENCY: U.S. Customs Service, Department of the Treasury.

ACTION: Notice of calculation of interest.

SUMMARY: The Tax Reform Act of 1986 established a new method of determining the adjusted rate of interest on applicable overpayments or underpayments of Customs duties. The new method provides a two-tier system based on the short-term Federal rate and is adjusted quarterly. This notice

VOL
52
ISS
197
OC
13
1987
UMI

advices the public that the interest rates, as set by the Internal Revenue Service, will be 10 percent for underpayments and 9 percent for overpayments for the quarter beginning October 1, 1987. It is being published for the convenience of the importing public and Customs personnel.

EFFECTIVE DATE: October 1, 1987.

FOR FURTHER INFORMATION CONTACT: Robert Hamilton, Revenue Branch, National Finance Center, U.S. Customs Service, 6026 Lakeside Boulevard, Indianapolis, IN 46278, (317) 298–1245.

SUPPLEMENTARY INFORMATION:

Background

By notice published in the **Federal Register** on January 5, 1987 (52 FR 255), Customs advised the public that the Tax Reform Act of 1986 (Pub. L. 99–514), amended 26 U.S.C. 6621 mandating a new method of determining the interest rate paid on applicable overpayments or underpayments of Customs duties. The new method provides a two-tier system based on the short-term Federal rate. As amended, 26 U.S.C. 6621 provides that the interest rate that Treasury pays on overpayments will be the short-term Federal rate plus 2 percentage points. The interest rate paid to the Treasury for underpayments will be the short-term Federal rate plus 3 percentage points. The rates will be rounded to the nearest full percentage.

The interest rates are determined by the Internal Revenue Service on behalf of the Secretary of the Treasury based on the average market yield on outstanding marketable obligations of the U.S. with remaining periods to maturity of 3 years or less and are to fluctuate quarterly. The rates are determined during the first month of a calendar quarter and become effective for the following quarter.

Determination

It has been determined that the rates of interest for the period of October 1, 1987–December 31, 1987 are 10 percent for underpayments and 9 percent for overpayments. These rates will remain in effect through December 31, 1987, and are subject to change on January 1, 1988. They will remain in effect until changed by another notice in the **Federal Register.**

Dated: October 6, 1987.

William von Raab,

Commissioner of Customs.

UNITED STATES INFORMATION AGENCY

Culturally Significant Objects Imported for Exhibition; Determination

Notice is hereby given of the following determination: Pursuant to the authority vested in me by the act of October 19, 1965 (79 Stat. 985, 22 U.S.C. 2459), Executive Order 12047 of March 27, 1978 (43 FR 13359, March 29, 1978), and Delegation Order No. 85–5 of June 27, 1985 (50 FR 27393, July 2, 1985) I hereby determine that the objects to be included in the exhibit, "Crossroads of Continents: Cultures of Siberia and Alaska" (see list [1]) imported from abroad for the temporary exhibition without profit within the United States are of cultural significance. These objects are imported pursuant to loan agreements with the foreign lenders. I also determine that the temporary exhibition or display of the listed exhibit objects at the National Museum of Natural History, Smithsonian Institution, Washington, DC, beginning on or about September 22, 1988, to on or about April 2, 1989; at the Seattle Center, Seattle, Washington, beginning on or about May 14, 1989, to on or about October 15, 1989; at the American Museum of Natural History, New York, N.Y., begining on or about November 26, 1989, to on or about March 25, 1990; at the Indiana State Museum, Indianapolis, Ind., beginning on or about May 6, 1990, to on or about September 9, 1990; at the Los Angeles County Museum of Natural History, Los Angeles, California, beginning on or about October 21, 1990, to on or about February 24, 1991; at the Anchorage Museum of History and Art, Anchorage, Alaska, beginning on or about April 7, 1991, to on or about August 11, 1991; and for such period as may be needed for shipment out of the United States to the U.S.S.R., is in the national interest.

[1] A copy of this list may be obtained by contacting Mr. R. Wallace Stuart of the Office of the General Counsel of USIA. The telephone number is 202–485–7988, and the address is Room 700, U.S. Information Agency, 301 4th Street, SW., Washington, DC 20547.

Public notice of this determination is ordered to be published in the **Federal Register.**

R. Wallace Stuart,

Acting General Consel.

Date: October 6, 1987.

BILLING CODE 8230–01

Meeting of Advisory Board for Radio Broadcasting to Cuba

The Advisor Board for Radio Broadcasting to Cuba will conduct a meeting on October 15, 1987, in Room 3557, 400 Sixth Street SW., Washington, DC. Below is the intended agenda.

Thursday, October 15, 1987

Part One—Closed to the Public

10:00 a.m. 1. Report by the Director of Radio Marti
11:00 a.m. 2. Discssion of Radio Marti internal personnel rules and practices
11:45 a.m. 3. Tour of new studios (secured area)

Part Two—Open to the Public

2:00 p.m. 4. Discussion of impact of del Pino, Azpillaga interviews
2:30 p.m. 5. Budget status
3:00 p.m. 6. Marathon transmitter site upgrade status
3:30 p.m. 7. Audience research results
4:00 p.m. 8. Marti TV
4:30 p.m. 9. Public Testimony Period.

Items 1 through 3, which will be discussed from 10:00 a.m. to 12:00 noon, will be closed to the public. Item 1 involves discussion of classified information. Closing such deliberations to the public is justified under 5 U.S.C. 552b (c)(1). Item 2 relates solely to internal personnel rules and practices. Authority for deliberations is provided by U.S.C. 552b (c)(2). Item 3 relates to admittance to a secure area and therefore closed to the public.

Members of the public interested in attending the meeting should contact Peggy Chu (202) 485–7011 to make prior arrangements, as access to the building is controlled.

Dated: October 8, 1987.

Charles Z. Wick,

Director

Corrections

Federal Register
Vol. 52, No. 197
Tuesday, October 13, 1987

This section of the FEDERAL REGISTER contains editorial corrections of previously published Presidential, Rule, Proposed Rule, and Notice documents and volumes of the Code of Federal Regulations. These corrections are prepared by the Office of the Federal Register. Agency prepared corrections are issued as signed documents and appear in the appropriate document categories elsewhere in the issue.

FEDERAL COMMUNICATIONS COMMISSION

47 CFR Part 1

[Gen. Docket No. 86-225; FCC 87-303]

Ex Parte Communications and Presentations in Commission Proceedings

Correction

In rule document 87-23050 beginning on page 37458 in the issue of Wednesday, October 7, 1987, make the following corrections:

1. On page 37460, in the second column, in the amendatory instructions for § 1.1208,, item 9 (b) should read "(b) Redesignating paragraphs (c)(1)(iv) introductory text, (A), (B), and (C), as (c)(1)(i) introductory text, (A), (B), and (C)."

2. In the same column, item 9 (d) should read "(d) Adding paragraphs (c)(1)(ii) introductory text and (c)(1)(ii)(D)."

BILLING CODE 1505-01-D

FEDERAL RETIREMENT THRIFT INVESTMENT BOARD

5 CFR Part 1650

Methods of Withdrawing Funds From the Thrift Savings Plan

Correction

In rule document 87-19552 beginning on page 32280 in the issue of Wednesday, August 26, 1987, make the following corrections:

1. On page 32284, in the first column, § 1650.16 contained errors and is reprinted in its entirety as follows:

§ 1650.16 Withdrawal elections requiring notification to spouses.

(a) The Executive Director will transfer a vested account balance to an eligible retirement plan for CSRS and FERS participants who separate from government service before having basic retirement eligibility only after notification of the current and each former spouse of the participant in accordance with § 1650.19.

(b) No election of benefits, change of election of benefits, or modification of the commencement date of an annuity can be made effective for a CSRS participant prior to notification of the current spouse of the participant in accordance with the requirements of § 1650.19.

§ 1650.18 [Corrected].

2. Also page 32284, in the first column, in § 1650.18(a), in the fourth line, "Form FSP-" should read "Form TSP-."

BILLING CODE 1505-01-D

DEPARTMENT OF THE TREASURY

Customs Service

19 CFR Part 113

[T.D. 87-124]

Customs Regulations Amendment Relating to Carrier Liabilities for Unlawful Lading, Exportation or Disposition of Export-Controlled Merchandise

Correction

In rule document 87-22934 beginning on page 37132 in the issue of Monday, October 5, 1987, make the following correction:

On page 37135, in the first column, in the fourth complete paragraph, in the ninth line, "and the" should read "and not the".

Part II

Federal Maritime Commission

Notice of Intent To Cancel Inactive Tariffs

VOL
52
ISS
197

13
1987
UMI

FEDERAL MARITIME COMMISSION

Notice of Intent To Cancel Inactive Tariffs

The foreign commerce files of the Federal Maritime Commission contain numerous tariffs filed on behalf of firms which appear to be inactive or no longer operating as common carriers. For the purpose of this notice a carrier has been deemed to be inactive or no longer operating if it has met all of the following criteria: (1) Return as undeliverable by the United States Postal Service of an anti-rebating certificate reminder letter mailed to the carrier at its last known address; (2) attempts to contact the carrier by telephone have been unsuccessful; (3) failure of the carrier to file an anti-rebating certificate; and (4) failure of the carrier to amend its tariffs during the preceding twelve months.

Inactive tariffs reflect inaccurate information and serve no useful purpose. Accordingly, in the absence of a showing of good cause why such action should not be taken, the Commission proposes to cancel the tariffs of the companies included on the attached list. Certain information items on the attached list may not apply to a particular carrier and are therefore, intentionally left blank.

Now Therefore, it is ordered, That the carriers included on the attached listing advise the Federal Maritime Commission's Director, Bureau of Domestic Regulation at 1100 L Street, NW., Washington, DC 20573, in writing, within 30 days after the publication of this Order in the **Federal Register**, of any reason why the Commission should not cancel their respective tariffs;

It is further ordered, That a copy of this Order be sent by certified mail to the last known address of the carriers listed in the attachment;

It is further ordered, That the tariffs of all carriers named in the attached list who fail, within the time allotted, to provide good cause for maintaining these tariffs in an active status will be cancelled;

It is further ordered, That this notice be published in the **Federal Register**.

This Order is issued pursuant to authority delegated to the Director, Bureau of Domestic Regulation by Section 9.04 of Commission Order No. 1 (Revised) dated November 12, 1981.

Robert G. Drew,

Director, Bureau of Domestic Regulation.

Federal Maritime Commission, Bureau of Domestic Regulation, Office of Carrier Tariffs, and Service Contract Operations

DEPARTMENT OF EDUCATION

34 CFR Part 763

Drug Abuse Education and Prevention Audiovisual Materials Program

AGENCY: Department of Education.

ACTION: Final regulations.

SUMMARY: The Secretary issues regulations governing the Drug Abuse Education and Prevention Audiovisual Materials Program. The program reflects the congressional mandate in Pub. L. 99–591 to develop audiovisual materials for distribution to local educational authorities for drug abuse education and prevention activities.

EFFECTIVE DATE: These regulations take effect either 45 days after publication in the **Federal Register** or later if the Congress takes certain adjournments. If you want to know the effective date of these regulations, call or write the Department of Education contact person.

FOR FURTHER INFORMATION CONTACT: Louie E. Mathis, 202–732–4637.

SUPPLEMENTARY INFORMATION:

Background

Congress appropriated $5.5 million in October 1986 to develop audiovisual materials for distribution to local educational authorities for drug education and prevention activities.

To help carry out that mandate, the Department has created the Drug Abuse Education and Prevention Audiovisual Materials Program. This program will award funds to produce and distribute videotapes of broadcast quality for viewing by students in elementary and secondary schools. Funds awarded under this program would cover the production and distribution of both the videotapes and accompanying printed material such as teacher guides. Awards totalling $4.5 million will be made through cooperative agreements that give the Department a significant role in planning and monitoring the entire course of each project. The remaining $1 million has been reserved for additional activities related to producing and distributing audiovisual materials.

Summary of Major Provisions

On June 9, 1987, the Secretary published a notice of proposed rulemaking (NPRM) for this program in the **Federal Register**. See 52 FR 21920. The preamble to the NPRM contained a summary of major provisions which is still fully applicable to these final regulations. Section 763.31(c) of the regulations has been changed to reflect minor editorial revisions; § 763.31(c)(1) has also been changed to clarify that recipients of awards, as well as third parties, may contribute to the production and distribution of audiovisual materials with the Secretary's prior written approval. Otherwise, there are no differences between the NPRM and these final regulations. Three commenters submitted comments on the NPRM. A summary of their comments and the Secretary's responses follows.

Comment: One commenter noted that § 763.4 of the NPRM authorized the Secretary to establish program priorities related to grade levels and types of substance abuse. The commenter recommended that the Secretary specifically establish a priority to develop culturally-oriented audiovisual materials targeted for ethnic/racial minorities.

Response: No change is made.

The Secretary does not believe that any priorities should be established under this program exclusively to benefit particular ethnic or racial groups. However, the Secretary has authority to select applications for funding other than those most highly rated if doing so would improve the diversity of activities or projects funded. See § 763.20(d) of the regulations.

Comment: Another commenter objected to the requirement that program funds be used for videotapes of broadcast quality. See § 763.31(d) of the regulations. The commenter also questioned whether videotapes need to be close-captioned. See § 763.3(b). The commenter further noted the prohibition against use of funds to purchase equipment contained in § 763.32, and stated that the proposed regulations failed to mention the possibility of joint projects involving more than one eligible applicant. The commenter recommended that the program fund audiovisual media other than videotapes, such as computers and laserdiscs, and that awards be made for videotapes of less than broadcast qualtity. The commenter believed that these steps would help applicants that do not possess the equipment necessary to ensure broadcast quality.

Response: No change is made.

Videotapes are commonly used in the Nation's schools. Moreover, the Secretary believes that close-captioned videotapes of broadcast quality provide a cost-effective means of enhancing efforts to combat the use of illicit drugs. Alternate methods of distribution—which typically relay solely on the direct mail of multiple copies—could substantially reduce the funds available for production of materials under this program. Both the proposed regulations and these final regulations allow a number of eligible parties to apply as a group. See 34 CFR 75.127(a), which is cross-referenced in § 763.5(a) of the regulations.

Comment: Another commenter urged that this program be restructured to focus on assisting schools in acquiring products already available in the market, as opposed to the production and distribution of new materials. The commenter stated that the NPRM improperly helped nonprofit entities enter a competitive field in which profit-making firms are active. The commenter also objected to § 763.5, which applies the same cost principles to both profit and nonprofit entities that receive an award. According to the commenter, § 763.5 is inconsistent with OMB Circular A–76. the commenter further requested that it be allowed to express its views more fully at a public hearing before final regulations are published.

Response: No change is made.

The legislation authorizing this program calls for the "development of audiovisual materials for distribution to local educational authorities." The Secretary interprets this language as contemplating the production and distribution of new materials, rather than the purchase of existing materials. The Secretary believes that both profit and nonprofit entities should be allowed to compete for awards under the program. This competition is governed by the selection criteria contained in § 763.21, rather than by OMB Circular A–76. The Circular applies only in cases where the Government compares the cost of performing a commercial activity directly with the cost of contracting for that activity through a commercial source. Moreover, the cost principles referenced in § 763.5 address the use of Federal funds after an award has been made, and are unrelated to the competition for an award. It is unnecessary to convene a public hearing because the commenter has already been given an opportunity to provide written comments on the NPRM. Convening a public hearing would also significantly delay the development of new materials to help combat drug abuse among the Nation's young people.

Executive Order 12291

These regulations have been reviewed in accordance with Executive Order 12291. They are not classified as major because they do not meet the criteria for major regulations established in the order.

Intergovernmental Review

This program is subject to the requirements of Executive Order 12372 and the regulations in 34 CFR Part 79. The objective of the Executive Order is to foster an intergovernmental partnership and a strengthened federalism by relying on processes developed by State and local governments for coordination and review of proposed Federal financial assistance.

In accordance with the order, this document is intended to provide early notice of the Department's specific plans and actions for this program.

Assessment of Educational Impact

In the notice of proposed rulemaking, the Secretary requested comments on whether the proposed regulations would require transmission of information that is being gathered by or is available from any other agency or authority of the United States.

Based on the response to the proposed rules and on its own review, the Department has determined that the regulations in this document do not require transmission of information that is being gathered by or is from any other agency or authority of the United States.

List of Subjects in 34 CFR Part 763

Education, Grants program—Education, Reporting and recordkeeping requirements.

(Catalog of Federal Domestic Assistance Number 84.189)

Dated: September 23, 1987.

William J. Bennett,

Secretary of Education.

The Secretary amends Title 34 of the Code of Federal Regulations by adding a new Part 763 to read as follows:

PART 763—DRUG ABUSE EDUCATION AND PREVENTION AUDIOVISUAL MATERIALS PROGRAM

Subpart A—General

Sec.

763.1 What is the Drug Abuse Education and Prevention Audiovisual Program?
763.2 Who is eligible for an award under this program?
763.3 What types of projects does the Secretary assist under this program?
763.4 What priorities may the Secretary establish for this program?
763.5 What regulations apply to this program?
763.6 What definitions apply to this program?

Subpart B—[Reserved]

Subpart C—How Does the Secretary Make an Award?

763.20 How does the Secretary evaluate an application?
763.21 What selection criteria does the Secretary use?

Subpart D—What Conditions Must Be Met After an Award?

763.30 What message must project materials convey regarding illicit drug use?
763.31 What other standards must an applicant meet?
763.32 May funds be used to purchase equipment?

Authority: Pub. L. 99–591, 100 Stat. 3341–360.

Subpart A—General

§ 763.1 What is the Drug Abuse Education and Prevention Audiovisual Materials Program?

The Drug Abuse Education and Prevention Audiovisual Materials Program supports the production and distribution of audiovisual materials primarily to local educational agencies for use in drug abuse prevention and education programs.

(Authority: Pub. L. 99–591, 100 Stat. 3341–360)

§ 763.2 Who is eligible for an award under this program?

The Secretary may make an award under this program to a State educational agency, local educational agency, institution of higher education, or to another profit or nonprofit agency, organization, or institution.

(Authority: Pub. L. 99–591, 100 Stat. 3341–360)

§ 763.3 What types of projects does the Secretary assist under this program?

(a) The Secretary makes awards for projects that produce and distribute audiovisual materials for use in drug abuse education and prevention programs for elementary and secondary school students.

(b) The audiovisual materials produced must be closed-captioned videotapes with brief teacher guides and, if appropriate, student materials for classroom use.

(c) Recipients shall produce and distribute audiovisual materials for drug abuse education and prevention programs in both public and private elementary and secondary schools.

(Authority: Pub. L. 99–591, 100 Stat. 3341–360)

§ 763.4 What priorities may the Secretary establish for this program?

The Secretary may establish as priorities particular grade levels, types of substance abuse, or any combination of grade levels or types of substance abuse.

(Authority: Pub. L. 99–591, 100 Stat. 3341–360)

§ 763.5 What regulations apply to this program?

The following regulations apply to this program:

(a) The Education Department General Administrative Regulations (EDGAR), in 34 CFR Part 74 (Administration of Grants), Part 75 (Direct Grant Programs), Part 77 (Definitions That Apply to Department Regulations), Part 78 (Education Appeal Board), and Part 79 (Intergovernmental Review of Department of Education Programs and Activities).

(b) The regulations in this Part 763.

(c) The cost principles referenced in 34 CFR 74.174 apply to profit-making organizations that receive awards under this program.

(Authority: Pub. L. 99–591, 100 Stat. 3341–360)

§ 763.6 What definitions apply to this program?

(a) *Definitions in EDGAR.* The following terms used in this part are defined in 34 CFR 77.1:

Applicant
Application
Award
Budget
Department
EDGAR
Facilities
Local educational agency
Private
Project
Public
Secretary
State
State educational agency

(b) *Other Definitions*—The following definitions also apply to this part:

"Drug abuse education and prevention" means prevention, early intervention, rehabilitation referral, and education related to the use and abuse of controlled, illegal, addictive, or harmful substances, including the abuse of alcohol.

"Illicit drug use" means the use of illegal drugs and the abuse of other drugs and alcohol.

"Institution of higher eduction," "secondary school," and "nonprofit" have the meanings provided in section 1001 of the Elementary and Secondary Education Act of 1965 in effect prior to October 1, 1981.

(Authority: Pub. L. 99–591, 100 Stat. 3341–360)

Subpart B—[Reserved]

Subpart C—How Does the Secretary Make an Award?

§ 763.20 How does the Secretary evaluate an application?

(a) For each competition, the Secretary evaluates an application submitted under this program on the basis of the selection criteria in § 763.21.

(b) The Secretary awards up to 100 points for these criteria.

(c) The maximum possible points for each criterion are indicated in parentheses.

(d) The Secretary may select applications for funding other than those most highly rated if doing so would improve the diversity of activities or projects funded.

(e) The Secretary may, after applying the criteria in § 763.21, confirm the production and distribution capacity of highly rated applicants in order to make final determinations for awards. That confirmation may include review and inspection of an applicant's facilities.

(Authority: Pub. L. 99–591, 100 Stat. 3341–360)

§ 763.21 What selection criteria does the Secretary use?

The Secretary uses the following criteria to evaluate an application:

(a) *Creativity and effectiveness.* (15 points) The Secretary reviews each application to determine how creatively and effectively the applicant's proposed project will incorporate a strong message to elementary and secondary school students that illicit drug use is wrong and harmful.

(b) *Applicant's capacity.* (15 points) The Secretary reviews each application to determine the applicant's capacity successfully to complete the production and distribution of audiovisual materials of high quality, including—

(1) The applicant's ability to acquire and organize the necessary expertise, production personnel, and, if necessary, actors and other talent—as evidenced by examples of past performance;

(2) The applicant's experience in developing educational materials for elementary and secondary schools;

(3) The applicant's experience and knowledge concerning drug abuse education and prevention;

(4) The applicant's access to equipment and facilities to produce audiovisual materials; and

(5) The quality of the applicant's work, as evidenced by a sample videotape that demonstrates professional competence in the production of audiovisual education materials.

(c) *Production plan.* (25 points) The Secretary reviews each application to determine how adequately the applicant's production plan will—

(1) Ensure the use of approaches appropriate for the age levels of the target audience;

(2) Incorporate the advice of experts in drug abuse education and prevention;

(3) Incorporate research findings likely to improve drug abuse education and prevention programs;

(4) Involve teachers, school officials, parents, and students in designing the project; and

(5) Include field-testing of materials in classroom settings and make appropriate modifications, if needed, before the materials are distributed in final form.

(d) *Distribution plan.* (12 points) The Secretary reviews each application to determine how adequately the applicant's distribution plan will—

(1) Inform appropriate school authorities of the purpose and availability of materials produced by the applicant's project, and encourage their maximum use;

(2) Effectively and economically distribute these materials for broad use by schools; and

(3) Provide for periodic review and improvement of the applicant's distribution methods.

(e) *Management plan.* (12 points) The Secretary reviews each application to determine the quality of the management plan for the project, including—

(1) The extent to which the plan is effective and ensures proper, timely, and efficient completion of the project;

(2) The extent to which the plan's project design involves measurable timeliness for achieving significant steps in production and distribution; and

(3) The manner in which the plan will use resources and personnel successfully to complete the project.

(f) *Quality of key personnel.* (15 points)

(1) The Secretary reviews each application to determine the quality of key personnel and applicant plans to use on the project, including—

(i) The qualifications of the project director;

(ii) The qualifications of the audiovisual producer and other key personnel to be used in the project; and

(iii) The time that each person referred to in paragraphs (f)(1) (i) and (ii) of this section will commit to the project.

(2) To determine personnel qualifications under paragraph (f)(1) of this section, the Secretary considers experience and training in fields related to the objectives of the project.

(g) *Budget and cost-effectiveness.* (6 points) The Secretary reviews each application to determine the extent to which—

(1) The budget is adequate to support the project; and

(2) Costs are reasonable in relation to the objectives of the project, as well as to timeliness for achieving significant steps in production and distribution.

(Authority: Pub. L. 99–591, 100 Stat. 3341–360)

Subpart D—What Conditions Must Be Met After an Award?

§ 763.30 What message must project materials convey regarding illicit drug use?

All materials produced or distributed with funds made available under this program must reflect the message that illicit drug use is wrong and harmful.

(Authority: Pub. L. 99–591, 100 Stat. 3341–360)

§ 763.31 What other standards must an applicant meet?

(a)(1) A recipient of funds under this part shall secure and provide to the Secretary on a timely basis prior to the broadcast or publication of materials (including field testing) produced with program funds, proof that the recipient has obtained all of the releases and rights that are necessary to ensure the authorized and noninfringing broadcast or publication of audiovisual materials funded under the program.

(2) These rights and releases must at a minimum include signed talent releases from all persons recognizably photographed, recorded or otherwise depicted, including, if necessary, releases from parents or guardians of minors who appear in or on audiovisual materials produced with program funds; worldwide music performance rights; and worldwide exhibition rights for exhibiting by the Government of others during the distribution phase of the project.

(b) Commercialization, or the implied or actual endorsement of commercial products or services through their focused portrayal, depiction, or use in audiovisual materials produced under this program, is prohibited.

(c)(1) Recipients and third parties may contribute to the production and distribution of audiovisual materials under this part only with the prior written approval of the Secretary.

(2) Any contribution under paragraph (c)(1) of this section is subject to the regulations on cost sharing in 34 CFR Part 74; Subpart G.

(3) If audiovisual materials are produced with funds or other assistance

in addition to funds provided by the Secretary under this program, an appropriate acknowledgment of that additional assistance must be placed after the Department's credit line and disclaimer referred to in paragraph (e) of this section.

(d) The videotapes produced under the regulations in this part must be of broadcast quality acceptable to public and commercial broadcasters in the United States. Compliance with the standards set forth in the Federal Communications Commission rules at 47 CFR 73.682, 73.687, and 73.699 constitute an acceptable standard of broadcast quality.

(e) Materials produced under this part must include a credit line and disclaimer at the end stating as follows: "These materials were produced with funds from the U.S. Department of Education. The opinions expressed herein do not necessarily reflect the views or policies of the Department."

(Authority: Pub. L. 99–591, 100 Stat. 3341–360)

§ 763.32 May funds be used to purchase equipment?

Funds awarded under this program may not be used to purchase equipment.

(Authority: Pub. L. 99–591, Stat. 3341–360)

DEPARTMENT OF AGRICULTURE

Agricultural Marketing Service

7 CFR Part 910

[Lemon Regulation 582]

Lemons Grown in California and Arizona; Limitation of Handling

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Final rule.

SUMMARY: Regulation 582 establishes the quantity of fresh California-Arizona lemons that may be shipped to market at 265,000 cartons during the period October 11, through October 17, 1987. Such action is needed to balance the supply of fresh lemons with market demand for the period specified, due to the marketing situation confronting the lemon industry.

DATES: Regulation 582 (§ 910.882) is effective for the period October 11 through October 17, 1987.

FOR FURTHER INFORMATION CONTACT: Ronald L. Cioffi, Chief, Marketing Order Administration Branch, F&V, AMS, USDA, Room 2523, South Building, P.O. Box 96465, Washington, DC 20090–6456; telephone: (202) 447–5697.

SUPPLEMENTARY INFORMATION: This final rule has been reviewed under Executive Order 12291 and Departmental Regulation 1512–1 and has been determined to be a "non-major" rule under criteria contained therein.

Pursuant to requirements set forth in the Regulatory Flexibility Act (RFA), the Administrator of the Agricultural Marketing Service has determined that this action will not have a significant economic impact on a substantial number of small entities.

The purpose of the RFA is to fit regulatory action to the scale of business subject to such actions in order that small businesses will not be unduly or disproportionately burdened. Marketing orders issued pursuant to the Agricultural Marketing Agreement Act, and rule issued thereunder, are unique in that they are brought about through group action of essentially small entities acting on their own behalf. Thus, both statutes have small entity orientation and compatibility.

This regulation is issued under Marketing Order No. 910, as amended (7 CFR Part 910) regulating the handling of lemons grown in California and Arizona. The order is effective under the Agricultural Marketing Agreement Act (the "Act", 7 U.S.C. 601 through 674), as amended. This action is based upon the recommendation and information submitted by the Lemon Administrative Committee and upon other available information. It is found that this action will tend to effectuate the declared policy of the Act.

This regulation is consistent with the marketing policy for 1987–88. The committee met publicly on October 7, 1987, in Los Angeles, California, to consider the current and prospective conditions of supply and demand and recommended, by a unanimous vote, a quantity of lemons deemed advisable to be handled during the specified week. The committee reports that the market is good for large sized lemons, poor for smaller sizes.

Pursuant to 5 U.S.C. 553, it is further found that it is impracticable unnecessary, and contrary to the public interest to give preliminary notice, and engage in further public procedure with respect tothis action and that good cause exists for not postponing the effective date of this action until 30 days after publication in the **Federal Register** because of insufficient time between the date when information became available upon which this regulation is based and the effective date necessary to effectuate the declared purposes of the Act. Interested persons were given an opportunty to submit information and views on the regulation at an open meeting. It is necessary, in order to effectuate the declared purposes of the Act, to make these regulatory provisions and the effective as specified, and handlers have been apprised of such provisions and the effective time.

List of Subjects in 7 CFR Part 910

Marketing agreements and orders, California, Arizona, Lemons.

For the reasons set forth in the preamble, 7 CFR Part 910 is amended as follows:

PART 910—LEMONS GROWN IN CALIFORNIA AND ARIZONA

1. The authority citation for 7 CFR Part 910 continues to read as follows:

Authority: Secs. 1–19, 48 Stat. 31, as amended; 7 U.S.C. 601–674.

2. Section 910.882 is added to read as follows:

§ 910.882 Lemon Regulation 582

The quantity of lemons grown in California and Arizona which may be handled during the period October 11 through October 17, 1987, is established at 265,000 cartons.

Dated: October 8, ,1987.

Charles R. Brader,

Director Fruit and Vegetable Division, Agricultural Marketing Service.

CFR CHECKLIST

This checklist, prepared by the Office of the Federal Register, is published weekly. It is arranged in the order of CFR titles, prices, and revision dates.

An asterisk (*) precedes each entry that has been issued since last week and which is now available for sale at the Government Printing Office.

New units issued during the week are announced on the back cover of the daily **Federal Register** as they become available.

A checklist of current CFR volumes comprising a complete CFR set, also appears in the latest issue of the LSA (List of CFR Sections Affected), which is revised monthly.

The annual rate for subscription to all revised volumes is $595.00 domestic, $148.75 additional for foreign mailing.

Order from Superintendent of Documents, Government Printing Office, Washington, DC 20402. Charge orders (VISA, MasterCard, CHOICE, or GPO Deposit Account) may be telephoned to the GPO order desk at **(202) 783-3238** from 8:00 a.m. to 4:00 p.m. eastern time, Monday—Friday (except holidays).

Title	Price	Revision Date

[1] Because Title 3 is an annual compilation, this volume and all previous volumes should be retained as a permanent reference source.

[2] No amendments to this volume were promulgated during the period Apr. 1, 1980 to March 31, 1987. The CFR volume issued as of Apr. 1, 1980, should be retained.

[3] No amendments to this volume were promulgated during the period July 1, 1985 to June 30, 1986. The CFR volume issued as of July 1, 1985 should be retained

[4] The July 1, 1985 edition of 32 CFR Parts 1–189 contains a note only for Parts 1–39 inclusive. For the full text of the Defense Acquisition Regulations in Parts 1–39, consult the three CFR volumes issued as of July 1, 1984, containing those parts.

[5] The July 1, 1985 edition of 41 CFR Chapters 1–100 contains a note only for Chapters 1 to 49 inclusive. For the full text of procurement regulations in Chapters 1 to 49, consult the eleven CFR volumes issued as of July 1, 1984 containing those chapters.

[6] No amendments to this volume were promulgated during the period Oct. 1, 1985 to Sept. 30, 1986. The CFR volume issued as of Oct. 1, 1985 should be retained.

The United States Government Manual 1987/88

As the official handbook of the Federal Government, the *Manual* is the best source of information on the activities, functions, organization, and principal officials of the agencies of the legislative, judicial, and executive branches. It also includes information on quasi-official agencies and international organizations in which the United States participates.

Particularly helpful for those interested in where to go and who to see about a subject of particular concern is each agency's "Sources of Information" section, which provides addresses and telephone numbers for use in obtaining specifics on consumer activities, contracts and grants, employment, publications and films, and many other areas of citizen interest. The *Manual* also includes comprehensive name and subject/agency indexes.

Of significant historical interest is Appendix C, which lists the agencies and functions of the Federal Government abolished, transferred, or changed in name subsequent to March 4, 1933.

The *Manual* is published by the Office of the Federal Register, National Archives and Records Administration.

$20.00 per copy

FEDERAL REGISTER Published daily, Monday through Friday, (not published on Saturdays, Sundays, or on official holidays), by the Office of the Federal Register, National Archives and Records Administration, Washington, DC 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402.

The **Federal Register** provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders and Federal agency documents having general applicability and legal effect, documents required to be published by act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The **Federal Register** will be furnished by mail to subscribers for $340.00 per year, or $170.00 for 6 months, payable in advance. The charge for individual copies is $1.50 for each issue, or $1.50 for each group of pages as actually bound. Remit check or money order, made payable to the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402.

There are no restrictions on the republication of material appearing in the **Federal Register**.

Questions and requests for specific information may be directed to the telephone numbers listed under INFORMATION AND ASSISTANCE in the READER AIDS section of this issue.

How To Cite This Publication: Use the volume number and the page number. Example: 52 FR 12345.

Title 3—

The President

Proclamation 5727 of October 9, 1987

Termination of Import Relief on Certain Heavyweight Motorcycles

By the President of the United States of America

A Proclamation

1. In Proclamation 5050 of April 15, 1983 (48 FR 16639), pursuant to section 202(b)(1) and (c) of the Trade Act of 1974, as amended (Act) (19 U.S.C. 2252(b)(1) and (c)), I proclaimed import relief with respect to heavyweight motorcycles having engines with a total displacement over 700 cubic centimeters, provided for in item 692.50 of the Tariff Schedules of the United States (TSUS) (19 U.S.C. 1202). This relief took the form of a tariff increase implemented through tariff-rate quotas and the suspension of preferential tariff treatment under the Generalized System of Preferences (GSP) for such heavyweight motorcycles entered, or withdrawn from warehouse for consumption, during the period April 16, 1983, through April 15, 1988.

2. On June 19, 1987, the United States International Trade Commission (USITC) reported to me the results of an investigation (Inv. No. TA–203–17) pursuant to section 203(i)(2)–(5) of the Act (19 U.S.C. 2253(i)(2)–(5)) with respect to the early termination of the heavyweight motorcycles import relief as requested by petitioner Harley-Davidson, Inc. The USITC advised that the early termination of the import relief would have no significant economic effect on the domestic industry producing heavyweight motorcycles.

3. Accordingly, pursuant to section 203(h)(4) of the Act (19 U.S.C. 2253(h)(4)), after taking into account the advice of the United States Trade Representative, the USITC, the Secretary of Commerce, and the Secretary of Labor, I have determined that it is in the national interest to terminate the import relief in effect with respect to the articles concerned. I have further determined that it is appropriate to terminate the suspension of GSP treatment for such articles required by section 503(c)(2) of the Act (19 U.S.C 2463(c)(2)) during the period of effectiveness of the import relief.

NOW, THEREFORE, I, RONALD REAGAN, President of the United States of America, acting under the authority vested in me by the Constitution and the statutes of the United States, including sections 203, 503, and 604 of the Act (19 U.S.C. 2253, 2463, and 2483), do proclaim that—

(1) Part I of Schedule XX to the General Agreement on Tariffs and Trade (GATT) (61 Stat. (pt. 5) A58; 8 UST (pt. 2) 1986) is modified to conform to the actions taken in this Proclamation.

(2) Subpart A, part 2 of the Appendix to the TSUS is modified by striking out headnote 9 to such subpart and item 924.20.

(3) In order to restore GSP treatment for the motorcycles subject to import relief, part 6B of schedule 6 of the TSUS is modified by inserting in the Rates of Duty Special column for TSUS item 692.52 the symbol "A" immediately before the symbol "E" in parentheses.

(4) (a) Paragraphs (1) and (2) of this Proclamation shall be effective with respect to articles entered, or withdrawn from warehouse for consumption, on and after the third day following the date of publication of this Proclamation in the **Federal Register**.

(b) Paragraph (3) of this Proclamation shall be effective with respect to articles both (1) imported on or after January 1, 1976, and (2) entered, or withdrawn from warehouse for consumption, on and after the third day following the date of publication of this Proclamation in the **Federal Register**.

IN WITNESS WHEREOF, I have hereunto set my hand this 9th day of October, in the year of our Lord nineteen hundred and eighty-seven, and of the Independence of the United States of America the two hundred and twelfth.

Ronald Reagan

Rules and Regulations

Federal Register
Vol. 52, No. 198
Wednesday, October 14, 1987

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect, most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.
The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each week.

NUCLEAR REGULATORY COMMISSION

10 CFR Part 50

Commission Policy Statement on Deferred Plants

AGENCY: Nuclear Regulatory Commission.

ACTION: Final policy statement.

SUMMARY: This statement presents the policy of the Nuclear Regulatory Commission (NRC) with regard to the procedures that apply to nuclear power plants while in a deferred status and when they are being reactivated. The regulations and guidance applicable to deferred and terminated plants; maintenance, preservation, and documentation requirements; and the applicability of new regulatory requirements and other general administrative considerations are addressed.

EFFECTIVE DATE: November 13, 1987.

FOR FURTHER INFORMATION CONTACT: Theodore S. Michaels, Office of Nuclear Reactor Regulation, U.S. Nuclear Regulatory Commission, Washington, DC 20555, Telephone (301) 492–8251.

SUPPLEMENTARY INFORMATION:

I. Background

On March 16, 1987, the Commission published a proposed policy statement on deferred plants in the **Federal Register** for a 30-day comment period (52 FR 8075). Five commenters offered a total of nine comments on the proposed policy statement. The Commission has modified the policy statement in section III of this notice in reponse to comment B(1) in section II below. In addition, some minor editorial changes were made.

II. Response to Public Comments on the Proposed Policy Statement

A. KMC, Inc.

Summary of Comment. KMC, Inc. and the Utility Safety Classification Group recommended that the term "safety-related" be substituted for the term "important to safety" in sections III.B.2.a and III.B.2.b because there is not yet a clear definition of the latter term.

Commission Response. The Commission rejects this suggestion. The term "safety-related" is a subset of the term " important to safety." Safety-related is more precisely defined at this time because licensees provide a list of structures, systems, and components that come within its scope. However, there is sufficient Commission guidance regarding the term "important to safety" to warrant its use without causing confusion. For example, the Commission has indicated that while there is not "a predefined class of equipment at every plant whose functions have been determined by rule to be 'important to safety,' * * * whether any piece of equipment has a function 'important to safety' is to be determined on the basis of a particularized showing of clearly identified safety concerns * * *, and the requirements of * * * GDC 1 must be tailored to the identified safety concerns." *Long Island Lighting Company* (Shoreham Nuclear Power Station, Unit 1), CLI–84–9, 19 NRC 1323, 1325 (1984); *see also Shoreham,* ALAB–788, 20 NRC 1102, 1115–1119 (1984).

In the context of this policy statement, it is expected that a utility, planning to maintain its reactivation option or transfer of ownership to others, will identify any structures, systems, and components (SSC) which are important to safety and establish appropriate maintenance, preservation, and documentation (MPD) for these SSC. If a utility determines, based on an analysis of cost-effectiveness, to develop MPD only for safety-related SSC, it must recognize the possibility that SSC for which adequate MPD were not developed may have to be replaced if and when reactivation or transfer of ownership takes place.

The NRC does not want to limit its application of MPD requirements to safety-related SSC because that could allow other SSC, which are important to safety, to be placed into service without proper MPD.

B. Washington Public Power Supply System (WPPSS)

Summary of Comments. WPPSS submitted the following three comments:

(1) The commenter recommended that the requirement in section III.A.6.e (incorrectly referred to by the commenter as 6.c) be amended. This item requires that a listing of any new applicable regulatory requirements that are made effective during the deferral period be submitted with a description of the licensee's proposed plans for compliance with these requirements. The commenter suggests that this presumes a sufficient level of engineering activity during the deferral period to develop such plans. Since this might not be the case, the commenter asks that the requirement be changed to permit a commitment to submit this information at a specific later date.

Commission Response. This change has been made. However, it should be noted that this information should be submitted at the time of reactivation notification, or as soon thereafter as possible, since the lack of this information could impact the review schedule.

(2) The commenter recommended that the requirement in section III.A.6 to notify the NRC at least 120 days before construction resumes be changed to "at least 120 days before construction is expected to resume or as soon as possible after a reactivation decision has been reached." This would permit some construction activities to get under way earlier.

Commission Response. The 120–day advance notification is the minimum period required to evaluate the licensee's submittal to determine the acceptability of reactivation. Any request by the licensee to resume selected non-safety-related activities sooner than 120 days will be considered at the time of the request.

(3) This comment refers to section III.A.6.i, which requires an amendment to the Final Safety Analysis Report (FSAR), as applicable and necessary, discussing the bases for all substantive site and design changes made since the last amendment. The commenter states that, in its specific case, such an amendment would not be available at the time of initial notification. The commenter believes that since no substantive site and design changes will

VOL 52 ISS 198 OCT 14 1987 UMI

be made during deferral, an FSAR amendment would not be needed at that time.

Commission Response. The amendment is required only if there are substantive changes. If there are none, no amendment is necessary. Therefore, the commenter's concern is satisfied by the text in the proposed policy statement.

C. The State of Washington Energy Facility Site Evaluation Council

Summary of Comments. The following three comments were made:

(1) The commenter suggested that the policy clearly state, early on, that it applies only to facilities deferred or terminated during construction.

Commission Response. The intent of the policy statement is made clear throughout the document. Deferral and termination refer to construction, not operation. No further clarification is needed.

(2) The commenter expressed concern that the definition of a terminated plant might cause confusion because it requires a valid construction permit, whereas the only authorized activity is site restoration.

Commission Response. The reference to a valid construction permit in the definition for a terminated plant is not a requirement; it merely identifies the status of a plant that fits the definition. A plant is considered to be in terminated status only from the time the licensee has announced that construction has been permanently stopped until the construction permit is formally withdrawn by the NRC. The licensee of a deferred plant, on the other hand, retains the construction permit because construction has only been deferred, not terminated.

(3) The commenter suggested that the Commission might wish to address circumstances of abandonment and cessation of operation, which the commenter had recently adopted in its rules.

Commission Response. These areas go beyond the intended scope and purpose of the subject policy statement. These matters are being addressed in the Commission's decommissioning rulemaking.

D. Marvin Lewis

Summary of Comment. The commenter suggested that deferral of cancellation often provides a cover for inadequate quality or other very dangerous conditions and that the NRC must handle resumption of construction "sternly" and with "extreme prejudice," requiring that all the latest safety requirements be met.

Commission Response. The proposed policy statement stresses clearly and repeatedly that deferral, termination, and reactivation will be subject to all applicable current regulations, standards, policies, and guidance. No further clarification is needed.

E. Atomic Industrial Forum

Summary of Comment. The commenter supported the proposed policy statement and did not suggest changes to its text.

Commission Response. None required.

III. Policy Statement

This policy guidance outlines (1) the NRC's regulatory provisions for deferring and preserving a deferred nuclear power plant until such time as it may be reactivated and (2) the applicability of new regulatory staff positions to a deferred plant when it is reactivated. Moreover, because of the possibility that the plant and/or its equipment may be sold to another utility, some general guidance with regard to terminated plants is presented.

The following definitions apply to this policy guidance:

"Deferred plant" means a nuclear power plant at which the licensee has ceased construction or reduced activity to a maintenance level, maintains the construction permit (CP) in effect, and has not announced termination of the plant.

"Terminated plant" means a nuclear power plant at which the licensee has announced that construction has been permanently stopped, but which still has a valid CP.

A. Deferred Plant

The following areas should be addressed by the licensee and the NRC when a plant is deferred:

1. Notification of Plant Deferral

The licensee should inform the Director of Nuclear Reactor Regulation (NRR) when a plant is to be deferred within 30 days of the decision to defer. Information to be made available should include the reason for deferral, the expected plant reactivation date (if known), whether a CP extension request will be submitted, and the plans for fulfilling the requirements of the CP, including the maintenance, preservation, and documentation requirements as outlined in Section III.A.3 of this policy statement.

2. Extension of Construction Permit

The licensee must ensure that its CP does not expire. Title 10 of the *Code of Federal Regulations,* § 2.109 (10 CFR 2.109), "Effect of Timely Renewal Application," provides that if a request for renewal of a license is made 30 days before the expiration date, the license will not be deemed to have expired until the application has been finally processed. Extension of the completion date for a CP will be considered in accordance with 10 CFR 50.55(b).

3. Maintenance, Preservation, and Documentation of Equipment

The NRC requirements for verification of construction status, retention and protection of records, and maintenance and preservation of equipment and materials are applied through: 10 CFR 50.54(a), "Conditions of Licenses," and 10 CFR 50.55(f), "Conditions of Construction Permits," which require that a quality assurance program be implemented; 10 CFR Part 50, Appendix B, which requires that all activities performed to establish, maintain, and verify the quality of plant construction be addressed in the licensee's quality assurance program; 10 CFR Part 50, Appendices A and B, which require that certain quality records be retained for the life of the plant; 10 CFR 50.55(e), which requires reporting of deficiencies in design, construction, quality assurance, etc.; 10 CFR 50.71, which applies to the maintenance of records; and 10 CFR Part 21, which applies to reporting of defects and noncompliance. Those NRC regulatory guides that endorse the ANSI N45.2 series of standards, "Quality Assurance Requirements for Nuclear Power Plants," also are applicable and include Regulatory Guides 1.28, 1.37, 1.38, 1.58, 1.88, and 1.116.[1] Of particular importance is the guidance on packaging, shipping, receiving, storing, and handling of equipment as well as on collecting, storing, and maintaining quality control documentation. The maintenance, preservation, and documentation requirements outlined above apply to plants under construction.

The licensee may choose to modify existing commitments during extended construction delays by developing a quality assurance plan that is commensurate with the expected activities and expected (or potential) length of delay. The licensee should discuss with the NRC the expected construction delay period and the quality assurance program to be

[1] These regulatory guides are available for inspection at the Commission's Public Document Room, 1717 H St. NW., Washington DC. Copies of these regulatory guides may be purchased by calling (202) 275–2060 or by writing to the Superintendent of Documents, U.S. Government Printing Office, P.O. Box 37082, Washington DC 20013–7082.

implemented during the deferral. The program should include a description of the planned activities; organizational responsibilities and procedural controls that apply to the verification of construction status, maintenance, and preservation of equipment and materials; and retention and protection of quality assurance records. The program will be reviewed and approved by the NRC in accordance with 10 CFR 50.54(a)(3), 10 CFR Part 50, Appendix B, and inspection procedures, as appropriate.

Implementation of the program will be examined periodically to determine licensee compliance with commitments and overall program effectiveness.

4. Conduct of Review During Deferral

When a plant is deferred, the staff will normally bring all ongoing post-CP and operating license (OL) reviews and associated documentation to an appropriate termination point. Normally, new reviews will not be initiated. If the review has progressed sufficiently, a safety evaluation report (SER) will be issued, which assembles and discusses the status of the completed work and lists all outstanding open items. Subject to availability of resources, the staff might perform specific technical reviews or complete SER supplements.

5. Applicability of New Regulatory Requirements During Deferral

Deferred plants of custom or standard design will be considered in the same manner as plants still under construction with respect to applicability of new regulations, guidance, and policies. Proposed plant-specific backfits of new regulatory staff positions promulgated while a plant is deferred will be considered in accordance with the Commission backfit criteria. Other modifications to previously accepted staff positions will be implemented either through rulemaking or generic issue resolution, which themselves are subject to the backfit rule. Regulations that have integral update provisions built into them will be applied to deferred plants, as they are to other plants under construction, without the use of the backfit rule.

Provisions in other policy statements that are applicable to plants under construction also will have to be implemented. Any resulting backfit recommendations will have to be supported in accordance with 10 CFR 50.109. Appeals procedures applicable to plant-specific backfits would be applicable to deferred plants. Appeals filed by a licensee during plant deferral will be considered and processed by the NRC while a plant is in a deferred status.

6. Information to be Submitted by Licensee When Reactivating

The licensee should submit a letter to the Director of NRR at least 120 days before plant construction is expected to resume. The letter should include the following information, to the extent that the information has not been submitted to the staff during the deferral period:

a. The proposed date for resuming construction, a schedule for completion of the construction, and a schedule for submittal of an operating license application, including a final safety analysis report (FSAR), if one has not already been submitted.

b. The current status of the plant site and equipment.

c. A description of how any conditions established by the NRC during the deferral have been fulfilled.

d. A list of licensing issues that were outstanding at the time of the deferral and a description of the resolution or proposed resolution of these issues.

e. A listing of any new regulatory requirements applicable to the plant that have become effective since plant construction was deferred, together with a description of the licensee's proposed plans for compliance with these requirements or a commitment to submit such plans by a specified date.

f. A description of the management and organization responsible for construction of the plant.

g. A description of all substantive changes made to the plant design or site since the CP was issued (for those plants for which an OL application has not been submitted).

h. Identification of any additional required information that is not available at the time of reactivation and a commitment to submit this information at a specific later date.

i. As necessary, an amendment to the OL application (revised FSAR) and a discussion of the bases for all substantive site and design changes that have been made since the last FSAR revision was submitted (for those plants which were already under OL review at the time of deferral).

7. Staff Actions When Notified of Reactivation

The acceptability of structures, systems, and components important to safety (10 CFR Part 50, Appendix A, General Design Criterion 1) upon reactivation from deferred status will be determined by the NRC on the following basis:

a. Reviews of the approved preservation and maintenance program, as implemented, in order to determine whether or not any structures, systems, or components require special NRC attention during reactivation.

b. Verification that design changes, modifications, and required corrective actions have been implemented and documented in accordance with established quality control requirements.

c. The results of any licensee of NRC baseline inspections that indicate quality and performance requirements have not been significantly reduced below those originally specified in the FSAR. Structures, systems, and components that fail to meet the acceptability criteria or will not meet current NRC requirements will be dealt with on a case-by-case basis.

B. Terminated Plant

1. Plant Termination

A licensee should inform the Director of NRR when a plant is placed in a terminated status. In the event that withdrawal of a CP is sought, the permit holder should provide notice to the NRC staff sufficiently far in advance of the expiration of the CP to permit the staff to determine appropriate terms and conditions. If necessary, a brief extension of the CP may be ordered by the staff to accommodate these determinations. Until withdrawal of the CP is authorized, a permit holder must adhere to the Commission's regulations and the terms of the CP and should submit suitable plans for the termination of site activities, including redress, as provided for under 10 CFR 51.41, for staff approval. Moreover, if the plant has been completed to a point that it can function as a utilization facility, the licensee must take all necessary actions to ensure that the facility is no longer a facility for which an NRC license is required.

2. Measures that Should be Considered for Reactivation or Transfer of Ownership of Terminated Plants

The licensee of a terminated nuclear plant, if planning to maintain the option of plant reactivation or transfer of ownership to others—either totally or in part—should consider the following actions:

a. For the removal and transfer of ownership of plant components and systems important to safety, make necessary provisions to maintain, collect, and transfer to the new owner appropriate performance and material documentation attesting to the quality of the components and systems that will be

VOL 52 ISS 198 OCT 14 1987 UMI

required of the new owner if intended for use in NRC-licensed facilities.

b. Develop and implement a preservation and maintenance program for structures, systems, and components important to safety, as well as documentation substantially in accordance with section III.A.3 of this policy statement. If these provisions are implemented throughout the period of termination, a terminated plant may be reactivated under the same provisions as a deferred plant.

These licensees also must assure that any necessary extensions of the CP are requested in a timely manner.

Dated at Washington, DC this 7th day of October 1987.

For the Nuclear Regulatory Commission.

Samuel J. Chilk,

Secretary of the Commission.

BILLING CODE 7590-01-M

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Docket No. 87-NM-64-AD; Amdt. 39-5749]

Airworthiness Directives; British Aerospace Model 125-800A Series Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment adopts a new airworthiness directive (AD), applicable to certain British Aerospace Model 125-800A series airplanes, which requires inspection and replacement, if necessary, of certain connector socket contacts in the engine fire warning system. This proposal is prompted by reports of inadequate crimping of socket contacts. This condition, if not corrected, could lead to failure of the engine fire warning annunciation in the flight deck.

EFFECTIVE DATE: November 13, 1987.

ADDRESSES: The applicable service information may be obtained from British Aerospace, Inc., Librarian for Service Bulletins, P.O. Box 17414, Dulles International Airport, Washington, DC 20041. This information may be examined at the FAA, Northwest Mountain Region, 17900 Pacific Highway South, Seattle, Washington, or the Seattle Aircraft Certification Office, 9010 East Marginal Way South, Seattle, Washington.

FOR FURTHER INFORMATION CONTACT: Ms. Judy Golder, Standardization Branch, ANM-113; telephone (206) 431-1967. Mailing address: FAA, Northwest Mountain Region, 17900 Pacific Highway South, C-68966, Seattle, Washington 98168.

SUPPLEMENTARY INFORMATION: A proposal to amend Part 39 of the Federal Aviation Regulations to include an airworthiness directive, which requires inspection, and replacement if necessary, of certain connector socket contacts in the engine fire detection system on BAe Model 125-800A airplanes, was published in the **Federal Register** on June 22, 1987 (52 FR 23465).

Interested parties have been afforded an opportunity to participate in the making of this amendment. No comments were received in response to the NPRM.

After careful review of the available data, the FAA has determined that air safety and the public interest require the adoption of the rule as proposed.

It is estimated that 29 airplanes of U.S. registry will be affected by this AD, that it will take approximately 1 manhour per airplane to accomplish the required actions, and that the average labor cost will be $40 per manhour. Based on these figures, the total cost impact of this AD to U.S. operators is estimated to be $1,160.

For the reasons discussed above, the FAA has determined that this regulation is not considered to be major under Executive Order 12291 or significant under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979) and it is further certified under the criteria of the Regulatory Flexibility Act that this rule will not have a significant economic effect on a substantial number of small entities because of the minimal cost of compliance per airplane ($40). A final evaluation has been prepared for this regulation and has been placed in the docket.

List of Subjects in 14 CFR Part 39

Aviation safety, Aircraft.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration amends § 39.13 of Part 39 of the Federal Aviation Regulations as follows:

PART 39—[AMENDED]

1. The authority citation for Part 39 continues to read as follows:

Authority: 49 U.S.C. 1354(a), 1421 and 1423; 49 U.S.C. 106(g) (Revised Pub. L. 97-449, January 12, 1983); and 14 CFR 11.89.

§ 39.13 [Amended]

2. By adding the following new airworthiness directive:

British Aerospace: Applies to BAe Model 125-800A series airplanes, certificated in any category. Compliance is required within 60 days after the effective date of this AD, unless previously accomplished.

To prevent failure of the engine fire warning annunciation in the flight deck, accomplish the following:

A. Inspect the socket contacts in connectors TA7 and TB7 for adequate crimping, and replace, if necessary, in accordance with British Aerospace Service Bulletin 26-27, dated May 16, 1986.

B. An alternate means of compliance or adjustment of the compliance time, which provides an acceptable level of safety, may be used when approved by the Manager, Standardization Branch, ANM-113, FAA, Northwest Mountain Region.

C. Special flight permits may be issued in accordance with FAR 21.197 and 21.199 to operate airplanes to a base for the accomplishment of the inspections required by this AD.

All persons affected by this directive who have not already received the appropriate service document from the manufacturer may obtain copies upon request to British Aerospace, Inc., Librarian for Service Bulletins, P.O. Box 17414, Dulles International Airport, Washington, DC 20041. This document may be examined at the FAA, Northwest Mountain Region, 17900 Pacific Highway South, Seattle, Washington, or the Seattle Aircraft Certification Office, 9010 East Marginal Way South, Seattle, Washington.

This amendment becomes effective November 13, 1987.

Issued in Seattle, Washington, on October 2, 1987.

Wayne J. Barlow,

Director, Northwest Mountain Region.

[FR Doc. 87-23681 Filed 10-13-87; 8:45 am]

BILLING CODE 4910-13-M

14 CFR Part 39

[Docket No. 87-NM-66-AD; Amdt. 39-5750]

Airworthiness Directives; British Aerospace Viscount Model 700 and 800 Series Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment adopts a new airworthiness directive (AD), applicable to British Aerospace (BAe) Viscount Model 700 and 800 series airplanes, which requires periodic inspections for cracks, and replacement if necessary, of the aluminum main landing gear ram feet. This proposal is prompted by reports of long term stress corrosion cracking of a ram foot. Failure

to detect cracks could lead to failure of the main landing gear brake flange and loss of braking.

EFFECTIVE DATE: November 13, 1987.

ADDRESSES: The applicable service information may be obtained from British Aerospace, Inc., Librarian for Service Bulletins, P.O. Box 17414, Dulles International Airport, Washington, DC 20041. This information may be examined at the FAA, Northwest Mountain Region, 17900 Pacific Highway South, Seattle, Washington, or the Seattle Aircraft Certification Office, 9010 East Marginal Way South, Seattle, Washington.

FOR FURTHER INFORMATION CONTACT: Ms. Judy Golder, Standardization Branch, ANM–113; telephone (206) 431–1967. Mailing address: FAA, Northwest Mountain Region, 17900 Pacific Highway South, C–68966, Seattle, Washington 98168.

SUPPLEMENTARY INFORMATION: A proposal to amend Part 39 of the Federal Aviation Regulations to include an airworthiness directive, which requires inspection and replacement if necessary of the aluminum main landing gear ram feet, on Viscount Model 700 and 800 series airplanes, was published in the **Federal Register** on June 24, 1987 (52 FR 23663).

Interested parties have been afforded an opportunity to participate in the making of this amendment. No comments were received in response to the NPRM.

After careful review of the available data, the FAA has determined that air safety and the public interest require the adoption of the rule as proposed.

It is estimated that 27 airplanes of U.S. registry will be affected by this AD, that it will take approximately 2 manhours per airplane to accomplish the required actions, and that the average labor cost will be $40 per manhour. Based on these figures, the total cost impact of this AD to U.S. operators is estimated to be $2,160.

For the reasons discussed above, the FAA has determined that this regulation is not considered to be major under Executive Order 12291 or significant under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979) and it is further certified under the criteria of the Regulatory Flexibility Act that this rule will not have a significant economic effect on a substantial number of small entities because of the minimal cost of compliance per airplane ($80). A final evaluation has been prepared for this regulation and has been placed in the docket.

List of Subjects in 14 CFR Part 39

Aviation safety, Aircraft.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration amends § 39.13 of Part 39 of the Federal Aviation Regulations as follows:

PART 39—[AMENDED]

1. The authority citation for Part 39 continues to read as follows:

Authority: 49 U.S.C. 1354(a), 1421 and 1423; 49 U.S.C. 106(g) (Revised Pub. L. 97–449, January 12, 1983); and 14 CFR 11.89.

§ 39.13 [Amended]

2. By adding the following new airworthiness directive:

British Aerospace: Applies to Viscount Model 700 series and 800 series airplanes, certificated in any category. Compliance is required as indicated, unless previously accomplished.

To prevent failure of landing gear ram feet, accomplish the following:

A. For all Model 700 series airplanes, pre-modification D2781:

1. Within 30 days or 120 landings after the effective date of this AD, whichever occurs first, inspect and replace, if necessary, main landing gear ram feet in accordance with Paragraph 2.0 "Accomplishment Instructions" of British Aerospace (BAe) Viscount Preliminary Technical Leaflet (PTL) No. 317, dated June 10, 1986.

2. Repeat the above inspection at intervals not to exceed 14 months or 1,600 landings, whichever occurs first.

B. For all Model 800 series airplane, pre-modification F1323:

1. Within 30 days or 120 landings after the effective date of this AD, whichever occurs first, inspect and replace, if necessary, main landing gear ram feet in accordance with Paragraph 2.0 "Accomplishment Instructions" of BAe Viscount PTL No. 186, dated June 10, 1986.

2. Repeat the above inspection at intervals not to exceed 14 months or 1,600 landings, whichever occurs first.

C. An alternate means of compliance or adjustment of the compliance time, which provides an acceptable level of safety, may be used when approved by the Manager, Standardization Branch, ANM–113, FAA, Northwest Mountain Region.

D. Special flight permits may be issued in accordance with FAR 21.197 and 21.199 to operate airplanes to a base for the accomplishment of the inspections required by this AD.

All persons affected by this directive who have not already received the appropriate service document from the manufacturer may obtain copies upon request to British Aerospace, Inc., Librarian for Service Bulletins, P.O. Box 17414, Dulles International Airport, Washington, DC 20041. This document may be examined at the FAA, Northwest Mountain Region, 17900 Pacific Highway South, Seattle, Washington, or the Seattle Aircraft Certification Office, 9010 East Marginal Way South, Seattle, Washington.

This amendment becomes effective November 13, 1987.

Issued in Seattle, Washington, on October 2, 1987.

Wayne J. Barlow,

Director, Northwest Mountain Region.

Airworthiness Directives; British Aerospace Model H.S. 748 Series Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment adopts a new airworthiness directive (AD), applicable to all Model H.S. 748 Series airplanes with large freight doors, which requires inspection and adjustment, repair, or replacement, if necessary, of the large freight door locking mechanism components, and installation of a placard to warn crew members to depressurize the cabin before opening the large freight door. This amendment is prompted by a report of an incident where, due to an unserviceable pressure lock system, the large freight door was opened in flight while the cabin was pressurized. The door detached from the fuselage, causing severe damage. This condition, if not corrected, could lead to loss of the large freight door and damage to the airplane.

EFFECTIVE DATE: November 13, 1987.

ADDRESSES: The applicable service information may be obtained from British Aerospace, Librarian for Service Bulletins, P.O. Box 17414, Dulles International Airport, Washington, DC 20041. This information may be examined at the FAA, Northwest Mountain Region, 17900 Pacific Highway South, Seattle, Washington, or the Seattle Aircraft Certification Office, 9010 East Marginal Way South, Seattle, Washington.

telephone (206) 431–1946. Mailing address: FAA, Northwest Mountain Region, 17900 Pacific Highway South, C–68966, Seattle, Washington 98168.

SUPPLEMENTARY INFORMATION: A proposal to amend Part 39 of the Federal Aviation Regulations to include an airworthiness directive, which requires inspection and adjustment, or repair, or replacement, if necessary, of the large freight door locking mechanism, and installation of a placard warning crew members to depressurize the cabin before opening the large freight door on British Aerospace Model H.S. 748 series airplanes, was published in the **Federal Register** on August 10, 1987 (52 FR 29534).

Interested parties have been afforded an opportunity to participate in the making of this amendment. No comments were received in response to the NPRM.

After careful review of the available data, the FAA has determined that air safety and the public interest require the adoption of the rule as proposed.

It is estimated that 3 airplanes of U.S. registry will be affected by this AD, that it will take approximately 6 manhours per airplane to accomplish the required actions, and that the average labor cost will be $40 per manhour. Based on these figures, the total cost impact of this AD on U.S. operators is estimated to be $720.

For the reasons discussed above, the FAA has determined that this regulation is not considered to be major under Executive Order 12291 or significant under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and it is further certified under the criteria of the Regulatory Flexibility Act that this rule will not have a significant economic impact on a substantial number of small entities, because of the minimal cost of compliance per airplane ($240). A final evaluation has been prepared for this regulation and has been placed in the regulatory docket.

List of Subjects in 14 CFR Part 39

Aviation safety, Aircraft.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration amends § 39.13 of Part 39 of the Federal Aviation Regulations as follows:

PART 39—[AMENDED]

1. The authority citation for Part 39 continues to read as follows:

Authority: 49 U.S.C. 1354(a), 1421 and 1423; 49 U.S.C. 106(g) (Revised Pub. L. 97–449, January 12, 1983); and 14 CFR 11.89.

§ 39.13 [Amended]

2. By adding the following new airworthiness directive:

British Aerospace: Applies to all Model H.S. 748 series airplanes with a large freight door, certificated in any category. Compliance required within the next 90 days after the effective date of this AD, unless previously accomplished.

To prevent inadvertent opening of the freight door in flight, accomplish the following:

A. Inspect the large freight door shoot bolt lever, barometric (pressure lock) lever, bellows assembly, dry air cartridge and microswitches for damage, distortion and/or wear in accordance with British Aerospace Service Bulletin 52/129, dated May 1986. If any damage, distortion and/or wear is discovered as a result of the inspection required by this paragraph, prior to further flight, adjust, repair, or replace the affected components, in accordance with British Aerospace Service Bulletin 52/129, dated May 1986.

B. Install a placard to indicate that the aircraft must be depressurized before opening its large freight door, in accordance with British Aerospace Service Bulletin 11/7, dated December 1, 1986.

C. An alternate means of compliance or adjustment of the compliance time, which provides an acceptable level of safety, may be used when approved by the Manager, Standardization Branch, ANM–113, FAA, Northwest Mountain Region.

D. Special flight permits may be issued in accordance with FAR 21.197 and 21.199 to operate airplanes to a base for the accomplishment of inspections and/or modifications required by this AD.

All persons affected by this directive who have not already received the appropriate service information from the manufacturer may obtain copies upon request to British Aerospace, Librarian for Service Bulletins, P.O. Box 17414, Dulles International Airport, Washington, DC 20041. This information may be examined at the FAA, Northwest Mountain Region, 17900 Pacific Highway South, Seattle, Washington, or the Seattle Aircraft Certification Office, 9010 East Marginal Way South, Seattle, Washington.

This amendment becomes effective November 13, 1987.

Issued in Seattle, Washington, on October 2, 1987.

Wayne J. Barlow,

Director, Northwest Mountain Region.

BILLING CODE 4910–13–M

14 CFR Part 39

[Docket No. 87–CE–30–AD; Amdt. 39–5745]

Airworthiness Directives; Cessna Models 150, 150 A thru M, A150, 152, and A152 Airplanes Modified in Accordance With Supplemental Type Certificate (STC) SA4795SW

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment adopts a new Airworthiness Directive (AD), applicable to certain Cessna Models 150, 150 A thru M, A150, 152 and A152 airplanes modified in accordance with Supplemental Type Certificate (STC) SA4795SW. The FAA has determined that these airplanes have been modified using STC SA4795SW for which no substantiating data exists and that the limitations regarding spins and the center-of-gravity envelopes were not properly defined for airplanes modified by this STC that are eligible for the STC. This action is necessary to prevent operation of the airplane outside the approved CG envelope wherein unknown flight characteristics could lead to loss of control of the airplane.

DATES: *Effective Date:* October 13, 1987.

Compliance: Within the next 50 hours time-in-service after the effective date of this AD, unless already accomplished.

ADDRESSES: Background information applicable to this AD is contained in the Rules Docket, Office of the Regional Counsel, Room 1558, 601 East 12th Street, Kansas City, Missouri 64106.

FOR FURTHER INFORMATION CONTACT: Mr. Carl F. Mittag, Special Programs Branch, ASW–192, Aircraft Certification Division, Southwest Region, Fort Worth, Texas 76193–0190; Telephone (817) 624–5197.

SUPPLEMENTARY INFORMATION: Supplemental Type Certificate SA4795SW and its latest revisions approves installation of Lycoming Model 0–320–E2A, –E2B, –E2D or –E2H engines with McCauley Model 1C172/TM 7458 propellers or Lycoming Model 0–360–A2A, –A2D or –A4A engines with McCauley Model 1A170/EFA 7562 or 1A170/SFA 7562 propellers and increased takeoff weight from 1600 pounds to 1760 pounds in Cessna 150 Series and 152 airplanes. The terminology "Cessna 150 Series and 152 airplanes" which appears on the STC certificate has been misinterpreted to include all airplanes certificated under Type Certificate Data Sheet 3A19.

Technical data originally submitted by the STC applicant only substantiates the application of the modification to Cessna Models 150 D through M and 152 with operation in the utility category at 1600 pounds and in the normal category at takeoff weights from 1600 pounds to 1760 pounds. This technical data also substantiates a change to the center-of-gravity limits at the new weights. Additionally, spin testing only showed compliance with normal category spin requirements. Specifically not included in any of the substantiating data for STC SA4795SW are Cessna Models 150,150 A/B/C, A150 K/L/M, and A152.

This AD identifies those airplanes eligible for modification under STC SA4795SW, and requires new placards showing the approved center-of-gravity limits and prohibition of intentional spins when operating in the utility category. This AD limits the operation of Cessna Models 150, 150 A/B/C/, A150 K/L/M, and A152 airplanes which have STC SA4795SW installed. The holder of STC SA4795SW is currently developing data to substantiate adding the Cessna Models 150, 150A/B/C, A150K/L/M/, and A152 airplanes to the STC. The limitations imposed on these airplanes by this AD may be removed or modified upon completion of the type certification program.

Since the conditions described only exist for Cessna Model 150, A150, 152 and A152 airplanes modified in accordance with STC SA4795SW, the AD requires the removal of the category and weight limits placard currently required by the STC. Replacement of that placard, in airplanes approved for modification by STC SA4795SW, is required with a placard stating the approved weight and center-of-gravity limits for the utility and normal categories, the prohibition of spins in utility category and the prohibition of spins and any acrobatic maneuver in the normal category. Airplanes improperly modified by STC SA4795SW are limited to operation in the utility category with corresponding aircraft limitations and no spins authorized.

Since the FAA has determined that the unsafe condition described herein is likely to exist or develop in other airplanes of the same type design, an AD is being issued requiring the installation of a new placard and operating limitations on Cessna Models 150, 150A thru M, A150, 152, and A152 airplanes modified in accordance with STC SA4795SW. Because an emergency condition exists that requires the immediate adoption of this regulation, it is found that notice and public procedure hereon are impractical and contrary to the public interest, and good cause exists for making this amendment effective in less than 30 days.

The FAA has determined that this regulation is an emergency regulation that is not major under section 8 of Executive Order 12291. It is impracticable for the agency to follow the procedures of Order 12291 with respect to this rule since the rule must be issued immediately to correct an unsafe condition in aircraft. It has been further determined that this document involves an emergency regulation under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979). If this action is subsequently determined to involve a significant regulation, a final regulatory evaluation or analysis, as appropriate, will be prepared and placed in the regulatory docket (otherwise, an evaluation is not required). A copy of it, when filed, may be obtained by contacting the Rules Docket under the caption "ADDRESSES" at the location identified.

List of Subjects in 14 CFR Part 39

Air transportation, Aviation safety, Aircraft, Safety.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration amends § 39.13 of Part 39 of the FAR as follows:

PART 39—[AMENDED]

1. The authority citation for Part 39 continues to read as follows:

Authority: 49 U.S.C. 1354(a), 1421 and 1423; 49 U.S.C. 106(g) (Revised, Pub. L. 97–449, January 12, 1983); and 14 CFR 11.89.

§ 39.13 [Amended]

2. By adding the following new AD:

Cessna: Applies to the following Models and Serial Numbered airplanes certificated in any category which have been modified in accordance with Supplemental Type Certificate (STC) SA4795SW:

Models	Serial Numbers
150	17001 thru 17999 . 59001 thru 59018.
150A	15059019 thru 15059350.
150B	15059351 thru 15059700.
150C	15059701 thru 15060087.
150D	15060088 thru 15060772.
150E	15060773 thru 15061532.
150F	15061533 thru 15064532.
150G	15064533 thru 15067189 (except 15064970).
150H	649, 15067199 thru 15069308.
150J	15069309 thru 15071128.
150K	15071129 thru 15072003.
150L	15072004 thru 15075781.
150M	15075782 thru 15079405.
A150K	A1500001 thru A1500226.
A150L	A1500227 thru A1500523.
A150M	15064970, A1500524 thru A1500734.
152	15279406 thru 15285595 and on.
A152	A1500433, A1520735 thru A1520808. 681, A1520809 thru A1521015 and on

Compliance: Required within the next 50 hours time-in-service after the effective date of this AD, unless already accomplished.

To assure operation of the airplane within the approved center of gravity (CG) limits and approved operating limitations, accomplish the following:

(a) For Model 150, 150 A/B/C, airplanes accomplish the following:

(1) Remove the placard required by STC SA4795SW which states the category and weight limits and begins with the words "THIS AIRPLANE MAY BE OPERATED * * *". The placard probably is located on the right hand door post.

(2) Fabricate a placard with the following statement using letters with a minimum height of ⅛ inch: "NOT APPROVED FOR SPINS". Install this placard in clear view of the pilot on the airplane instrument panel.

(3) Operate the airplane in the Utility Category in accordance with the placard and the operating limitations for center-of-gravity and maximum weight as specified in the original weight and balance data for an unmodified airplane.

Note.—Compliance with Airworthiness Director 86–15–07 does not relieve compliance with this AD for Models 150, 150A/B/C airplanes.

(b) For Model A150 K/L/M airplanes, accomplish the following:

(1) Remove the placard required by STC SA4795SW which states the category and weight limits and begins with the words "THIS AIRPLANE MAY BE OPERATED * * *". The placard probably is located on the right hand door post.

(2) Fabricate the temporary placard detailed in Figure 1. of this AD, marking it with the statement as shown and install it in clear view of the pilot on the instrument panel over the existing maneuver placard.

(3) Operate the airplane in the Utility Category in accordance with the placard and the operating limitations for center-of-gravity and maximum weight as specified in the original weight and balance data for an unmodified airplane.

(c) For Model A152 airplanes, accomplish the following:

(1) Remove the placard required by STC SA4795SW which states the category and weight limit and begins with the words "THIS AIRPLANE MAY BE OPERATED * * *". The placard probably is located on the right hand door post.

VOL
52
ISS
198
OC
14
1987
UMI

(2) Fabricate the temporary placard detailed in Figure 2. of this AD, permanently marking it with the statement as shown and install it in clear view of the pilot on the instrument panel over the existing maneuver placard.

(3) Operate the airplane in the Utility Category in accordance with the placard and the operating limitations for center-of-gravity and maximum weight as specified in the original weight and balance data for an unmodified airplane.

(d) For Model 150 D thru M and 152 airplanes, accomplish the following:

(1) Remove the placard required by STC SA4795SW which states the category and weight limits and begins with the words "THIS AIRPLANE MAY BE OPERATED * * *". The placard probably is located on the instrument panel over the existing maneuver placard.

(2) Fabricate the placard detailed in Figure 3. of this AD, permanently marking it with the statement as shown and install it in clear view of the pilot on the instrument panel over the existing maneuver placard. Alternatively, this placard may be obtained from Aircraft Conversion Technologies Inc., 1410 Flight Line Drive, Lincoln, California 95648.

(3) Operate the airplane in accordance with the placard.

(e) Installation of the placards required by this AD may be accomplished by the owner/operator on any airplanes which are not used under FAR Part 121 or 135. The person accomplishing these actions must make the appropriate airplane maintenance record entry per FAR 43.9 and 91.173

(f) Airplanes may be flown in accordance with FAR 21.197 to a location where this AD may be accomplished.

(g) An equivalent means of compliance with this AD may be used if approved by the Manager, Aircraft Certification Division, FAA Southwest Region, Fort Worth Texas 76193–0100; Telephone (817) 624–5100

All persons affected by this directive may obtain copies of the document(s) referred to herein upon request to J&S Engineering, 222 W. Turbo Drive, San Antonio, Texas 78216; or may examine the document(s) referred to herein at FAA, Office of the Regional Counsel, Room 1558, 601 East 12th Street, Kansas Ciry, Missouri 64106.

This amendment becomes effective on October 13, 1987.

Issued in Kansas City, Missouri, on September 28, 1987.

[Docket No. 25408; Amdt. No. 340]

IFR Altitudes; Miscellaneous Amendments

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment adopts miscellaneous amendments to the required IFR (instrument flight rule) altitudes and changeover points for certain Federal airways, jet routes, or direct routes for which a minimum or maximum en route authorized IFR altitude is prescribed. These regulatory actions are needed because of changes occurring in the National Airspace System. These changes are designed to provide for the safe and efficient use of the navigable airspace under instrument conditions in the affected areas.

EFFECTIVE DATE: November 19, 1987.

FOR FURTHER INFORMATION CONTACT: Donald K. Funai, Flight Procedures Standards Branch (AFS–230), Air Transportation Division, Office of Flight Standards, Federal Aviation Administration, 800 Independence Avenue, SW., Washington, DC 20591; telephone: (202) 267–8277.

SUPPLEMENTARY INFORMATION: This amendment to Part 95 of the Federal Aviation Regulations (14 CFR Part 95) prescribes new, amended, suspended, or revoked IFR altitudes governing the operation of all aircraft in IFR flight over a specified route or any portion of that route, as well as the changeover points (COPs) for Federal airways, jet routes, or direct routes as prescribed in Part 95. The specified IFR altitudes, when used in conjunction with the prescribed changeover points for those routes, ensure navigation aid coverage that is adequate for safe flight operations and free of frequency interference.

The reasons and circumstances which create the need for this amendment involve matters of flight safety, operational efficiency in the National Airspace System, and are related to published aeronautical charts that are essential to the user and provide for the safe and efficient use of the navigable airspace. In addition, those various reasons or circumstances require making this amendment effective before the next scheduled charting and publication date of the flight information to assure its timely availablity to the user. The effective date of this amendment reflects those considerations. In view of the close and immediate relationship between these regulatory changes and safety in air commerce, I find that notice and public procedure before adopting this amendment is unnecessary, impracticable, and contrary to the public interest and that good cause exists for making the amendment effective in less than 30 days.

The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore—(1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. For the same reason, the FAA certifies that this amendment will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 95

Aircraft, Airspace.

Issued in Washington, DC on October 2, 1987.

Robert L. Goodrich,

Director of Flight Standards.

Adoption of the Amendment

Accordingly and pursuant to the authority delegated to me by the Administrator, Part 95 of the Federal Aviation Regulations (14 CFR Part 95) is amended as follows effective at 0901 GMT:

PART 95—[AMENDED]

1. The authority citation for Part 95 continues to read as follows:

Authority: 49 U.S.C. 1348, 1354 and 1510; 49 U.S.C. 106(g) (Revised, Pub. L. 97–449, January 12, 1983); and 14 CFR 11.49(b)(2).

2. Part 95 is amended to read as follows:

BILLING CODE 4910-13-C

INTERNATIONAL DEVELOPMENT COOPERATION AGENCY

Agency for International Development

48 CFR Parts 702, 732, 750 and 752

[AIDAR Notice 88-1]

Miscellaneous Amendments to Acquisition Regulations

AGENCY: Agency for International Development, IDCA.

ACTION: Final rule.

SUMMARY: The A.I.D. Acquisition Regulation (AIDAR) is being amended by updating the address for submission of report copies to the A.I.D. reference center, and reducing the number of copies required by that office from 3 to 2; by removing the requirement for routine Inspector General comment or concurrence for extraordinary contractual relief actions; by specifying the approving authority for advance payments to profit making organizations; by clarifying some of the definitions in the policy text of Appendix D; by including a new definition of a resident hire personal services contractor along with guidance on payment of allowances, differentials and fringe benefits for such contractors; by providing for contractor emergency locator information in the contract schedule as well as contractor biographical data; and by clarifying several provisions in Appendix J. Required Personal Services Contractor checklist information has also been added to Appendices D & J along with other miscellaneous editorial changes.

EFFECTIVE DATE: October 14, 1987.

FOR FURTHER INFORMATION CONTACT: Mrs. Patricia L. Bullock, telephone (703) 875-1534.

SUPPLEMENTARY INFORMATION: AIDAR Appendix J is being amended by: (1) Adding the note under paragraph 4, Policy, paragraph (b) Limitations on personal services contracts which permits TCNs and CCNs to negotiate on behalf of the U.S. with private individuals and entities the same as in Appendix D (the note was inadvertently omitted when the Appendix was published); (2) Clarifying the language in paragraph 5(a)(4) "Soliciting for Personal Services Contracts" under which, instead of providing an estimate of what a comparable GS or FS position should cost (including benefits), the project officer of the Mission is now required to obtain a certification from the officer in charge at the Mission responsible for the LEPCH or equivalent that the position has been reviewed and properly classified as to title, series, and grade in accordance with LEPCH or its equivalent; (3) Revising the General Provision and Additional General Provision entitled "Physical Fitness" to reflect that costs of physical examinations for both CCNs and TCNs shall be based on rates prevailing locally for such examinations in accordance with Mission practice; (4) Revising the General Provision entitled "Workweek" to permit overtime in accordance with procedures governing premium compensation applicable to direct hire FSN employees; (5) Revising the General Provision "Leave and Holidays" to conform vacation leave and sick leave policies to those that apply to FSN direct hire employees; (6) Revising the payment provision to permit payment of compensation to CCNs and TCNs to be made in a method similar to that used for FSN direct hire employees but require written supporting documentation concerning time and attendance which complies with Mission policy and practice; (7) Allowing Missions to grant access to classified or administratively controlled (LOU) information to CCNs and TCNs based on their need to know in accordance with A.I.D. Handbook 6, Security; and (8) Adding the required FAR Clause 52.203-7, Anti-kickback Procedures.

Appendix D is being amended by clarifying some of the definitions in the policy text, by adding a new definition for a resident hire personal services contractor along with guidance on payment of allowances, differentials and fringe benefits to such contractors and by adding contractor emergency locator information as well as contractor biographical data. Required PSC Checklist information which must be placed in the official contract folder has been added to both Appendices. Miscellaneous and editorial changes are also being made to the AIDAR and the Appendices.

This AIDAR Notice is not a major rule and is exempt from the requirement of Executive Order 12291 by OMB Bulletin 85-7. Therefore, the change is not considered "significant" under FAR 1.301 or FAR 1.501, and public comments have not been solicited. This Notice will not have an impact on a substantial number of small entities or require any information collection, as contemplated by the Regulatory Flexibility Act or the Paperwork Reduction Act respectively.

List of Subjects in 48 CFR Parts 702, 732, 750 and 752

Government procurement.

1. The authority citation for Parts 702, 732, 750 and 752 and the Appendices to Chapter 7 is unchanged and continues to read as follows:

Authority: Sec. 621, Pub. L. 87-195, 75 Stat. 445 (22 U.S.C. 2381), as amended; E.O. 12163, Sept. 29, 1979, 44 FR 56673, 3 CFR 1979 Comp., p. 435.

PART 702—DEFINITIONS OF WORDS AND TERMS

Subpart 702.170—Definitions

702.170-13 [Amended]

2. Section 702.170-13(d) is amended by removing the references to the "Office of Acquisition and Assistance Management" and in their place inserting "Office of Procurement".

PART 732—CONTRACT FINANCING

Subpart 732.4—Advance Payments

3. A new section 732.402 is added to read as follows:

732.402 General.

(a)-(d) [Reserved]

(e) All U.S. Dollar advances to profit making organizations require the approval of the Procurement Executive; all such approvals are subject to prior consultation with the A.I.D./W Controller. Interest is charged on such advances at the rate established by the Secretary of the Treasury under Pub. L. 92-41, unless waived by the Procurement Executive.

PART 750—EXTRAORDINARY CONTRACTUAL ACTIONS

Subpart 750.71—Extraordinary Contractual Actions To Protect Foreign Policy Interests of the United States

750.7110-2 [Amended]

4. Section 750.7110-2 is amended by removing the words "and the Inspector General" from the first sentence.

PART 752—SOLICITATION PROVISIONS AND CONTRACT CLAUSES

Subpart 752.2—Texts of Provisions and Clauses

752.202 [Redesignated as 752.202-1 and Amended]

5. Section 752.202, Definitions, is amended as follows:

a. The section number is redesignated from 752.202 to 752.202-1; and

b. The contract clause in paragraph (d) *Alternate 72* is amended by removing paragraph (f) of the clause, and redesignating paragraphs (g) and (h) of

VOL
52
ISS
198
OC
14
1987
UMI

the clause as paragraphs (f) and (g), respectively.

6. Section 752.7026 is revised as follows:

752.7026 Reports.

(a) *Alternate 70.* For use in all A.I.D. direct contracts except fixed-price contracts for technical services.

Reports (June 1987)

(a) Unless otherwise provided in the schedule of this contract, the contractor shall prepare and submit to the contracting officer 3 copies, to PPC/CDIE/DI, ACQUISITIONS 2 copies [see paragraph (d)], and to the Mission 4 copies, of a semi-annual report, within 45 days following the end of the period being covered, which shall include the following:

(1) A substantive report covering the status of the work under the contract, indicating progress made with respect thereto, setting forth plans for the ensuing period, including recommendations covering the current needs in the fields of activity covered under the terms of this contract.

(2) An administrative report covering expenditures, foreign country national trainees, and personnel employed under the contract.

(b) Contractor shall prepare and submit to the contracting officer and to PPC/CDIE/DI, ACQUISITIONS [see paragraph (d)] such other reports as may be specified in the schedule.

(c) Unless otherwise provided in the schedule of this contract, at the conclusion of the work hereunder, the contractor shall prepare and submit to the contracting officer 3 copies; to PPC/CDIE/DI, ACQUISITIONS 2 copies [see paragraph (d)], and to the Mission 4 copies, of a final report which summarizes the accomplishments of the assignment, methods of work used and recommendations regarding unfinished work and/or program continuations. The final report shall be submitted within 60 days after completion of the work hereunder unless the required date of submission is extended by the contracting officer.

(d) Contractor shall submit 2 copies of each report required by paragraphs (a)(1), (b), and (c) of this clause or of any other reports required by the schedule of this contract to the Bureau for Program and Policy Coordination, Center for Development Information and Evaluation, Development Information Division (PPC/CDIE/DI). All documents should be mailed to: PPC/CDIE/DI, ACQUISITIONS, Room 209, SA–18, Agency for International Development, Washington, DC 20523.

The title page of all reports forwarded to PPC/CDIE/DI pursuant to this paragraph (d) shall include a descriptive title, the author's name(s), contract number, project number and title, contractor's name, name of the A.I.D. project office, and the publication or issuance date of the report.

(e) When preparing reports, the contractor shall refrain from using elaborate art work, multicolor printing and expensive paper/binding, unless it is specifically authorized in the Contract Schedule. Wherever possible, pages should be printed on both sides using single spaced type.

(b) *Alternate 71.* For use in fixed price contracts for technical services, use the clause in *Alternate 70*, less paragraph (a)(2).

Appendices to Chapter 7

Appendix D—Direct A.I.D. Contracts With U.S. Citizens or U.S. Resident Aliens for Personal Services Abroad

7. Paragraph 1, General, is amended by revising paragraph (b) to read as follows:

1. General.

* * * * *

(b) *Definitions.* For the purpose of this appendix:

(1) "Personal services contract (PSC)" means a contract which establishes an employer-employee relationship for the performance of services personally by the contractor. The services may include general continuing services as well as specifically identifiable tasks.

(2) "Employer-employee relationship" means an employment relationship in which the employer supervises or has the power to supervise the performance of the work including, for example, the manner in which the work is to be performed, the days of the week and hours of the day in which it is to be performed, and where the work is to be performed. Another indication of this relationship is the provision by the employer of workspace and basic tools and materials for use in accomplishing the work.

(3) "Non-personal services contract" means a contract which directly engages the time and effort of a contractor whose primary purpose is to perform an identifiable task and which establishes an independent contractor relationship between the contractor and the activity contracting for the services.

(4) "Independent contractor relationship" means a contract relationship in which the contractor is not subject to the supervision and control prevailing in relationships between the Government and its employees. Under these relationships, the Government does not normally supervise the performance of the work, the manner in which it is to be performed, the days of the week or hours of the day in which it is to be performed, or the location of performance.

(5) "Resident Hire" means a U.S. citizen who, at the time they are hired as a PSC, resides in the cooperating country (a) as a spouse or dependent of a U.S. citizen employed by a U.S. Government Agency or under any U.S. Government-financed contract or agreement, or (b) for reasons other than for employment with a U.S. Government Agency or under any U.S. Government-financed contract or agreement. A U.S. citizen for purposes of this definition also includes persons who at the time of contracting are lawfully admitted permanent residents of the United States.

(6) "U.S. resident alien" means a non-U.S. citizen lawfully admitted for permanent residence in the United States.

(7) "Abroad" means outside the United States and its territories and possessions.

(8) "A.I.D. direct hire employees" means civilian employees appointed under A.I.D. Handbook 25 procedures.

* * * * *

8. Paragraph 3, *Applicability*, is amended by removing the parenthetical sentence at the end of paragraph (a).

9. Paragraph 4, *Policy* is amended by revising subparagraph (c)(2)(v) introductory text as follows:

4. Policy

* * * * *

(c) * * *

(2) * * *

(v) PSCs shall receive the following allowances and differentials provided in the State Department's Standardized Regulations (Government Civilians Foreign Areas) on the same basis as direct hire U.S. Government employees (except for resident hires, see paragraph 4(g) and Section 11, General Provisions, Definitions Clause 26, "Resident Hire Personal Services Contractors"):

* * * * *

10. Paragraph 4, *Policy*, Subparagraph (c)(2)(vi) is amended as follows: The word "shall" in the first sentence is changed to "may".

11. Paragraph 4, *Policy*, is amended by adding a new paragraph (g) which reads as follows:

4. Policy

* * * * *

(g) Resident Hire Personal Services Contractors.

Resident hire PSCs are not eligible for any fringe benefits (except contributions for FICA, health insurance, and life insurance), including differentials and allowances, unless such individuals can demonstrate to the satisfaction of the contracting officer that they have received similar benefits and allowances from their immediately previous employer in the cooperating country or the Mission Director may determine that payment of such benefits would be consistent with the Mission's policy and practice and would be in the best interests of the U.S. Government.

12. Paragraph 7, *Executing a Personal Services Contract*, is revised as follows:

7. Executing a Personal Services Contract.

Contracting activities, whether A.I.D./W or Mission, may execute personal services contracts, provided that the amount of the contract does not exceed the contracting authority that has been redelegated to them under Delegation of Authority No. 1103 "To the Assistant to the Administrator for Management, Concerning Acquisition Functions" (50 FR 23842), as amended (see AIDAR 702.170–10).

In executing a personal services contract, the contracting officer is responsible for insuring that:

(a) The proposed contract is within his/her delegated authority;

(b) A PIO/T covering the proposed contract has been received;

(c) The proposed scope of work is contractible, contains a statement of minimum qualifications from the technical office requesting the services, and is suitable for a personal services contract in that:

(1) Performance of the proposed work requires or is best suited for an employer-employee relationship, and is thus not suited to the use of a non-personal services contract;

(2) The scope of work does not require performance of any function normally reserved for Federal employees (see paragraph 4(b) of this Appendix); and

(3) There is no apparent conflict of interest involved (if the contracting officer believes that a conflict of interest may exist, the question should be referred to the cognizant legal counsel).

(d) Selection of the contractor is documented and justified. AIDAR 706.302-70(b)(1) provides an exception to the requirement for full and open competition for personal services contracts abroad (see paragraph 5(c) of this Appendix);

(e) The standard contract format prescribed for personal services contracts (Sections 10, 11, 12 and 13 to AIDAR Appendix D) is used; or that any necessary deviations are processed as required by AIDAR 701.470. (**Note:** The prescribed contract format is designed for use with contractors who are residing in the U.S. when hired. If the contract is with a U.S. citizen residing in the cooperating country when hired, contract provisions governing physical fitness and travel/transportation expenses, and Additional General Provisions dealing with home leave, allowances, and orientation should be suitably modified (see paragraph 4(g) of this Appendix). These modifications are not considered deviations subject to AIDAR 701.470. Justification and explanation of these modifications is to be included in the contract file);

(f) Orientation is arranged in accordance with Additional General Provision 32;

(g) The contractor has submitted the names, addresses, and telephone numbers of at least two persons who may be notified in the event of an emergency (this information is to be retained in the contract file);

(h) The contract is complete and correct and all information required on the contract Cover Page (AID form 1420-36A) has been entered;

(i) The contract has been signed by the contracting officer and the contractor, and fully executed copies are properly distributed;

(j) The following clearances, approvals and forms have been obtained, properly completed, and placed in the contract file before the contract is signed by both parties:

(1) Security clearance, including the completed SF 86, to the extent required by A.I.D. Handbook 8, *Security;*

(2) Mission, host country, and project office clearance, as appropriate;

(3) Medical clearance(s) for the contractor and for each dependent who is authorized to travel to the overseas post based on a full medical examination(s) and certification of same by a licensed physician. The physician's certification must be in the possession of the contracting officer prior to any travel undertaken by contractor or his/her dependents;

(4) One original executed IRS Form W-4 entitled "Employee's Withholding Allowance Certificate" and one copy shall be obtained. The original shall be sent to the Controller of the paying office and one shall be placed in the contract file;

(5) The approval for any salary in excess of FS-1, in accordance with Appendix G of this chapter;

(6) A copy of the class justification or other appropriate explanation and support required by AIDAR 706.302-70, if applicable;

(7) Any deviation to the policy or procedures of this appendix, processed and approved under AIDAR 701.470;

(8) A fully executed SF 171;

(9) The memorandum of negotiation;

(k) Funds for the contract are properly obligated to preclude violation of the Anti-Deficiency Act, 31 U.S.C. 134 (the contracting officer ensures that the contract has been properly recorded by the appropriate accounting office prior to its release for the signature of the selected contractor);

(l) The contractor receives and understands Attachment 2C of Chapter 2, A.I.D. Handbook 24, *General Personnel Policy*, entitled "Employee Responsibilities and Conduct," and a copy is attached to each contract, as provided for in paragraph 2(c) of General Provision 2, Section 11;

(m) Agency conflict of interest requirements, as set out in Chapter 2D and 2F of A.I.D. Handbook 24, are met by the contractor prior to his/her reporting for duty;

(n) A copy of a Checklist for Personal Services Contractors which may be in the form set out above or another form convenient for the contracting officer, provided that a form containing all of the information described in this paragraph 7 shall be prepared for each PSC and placed in the contract file; and

(o) The block entitled, "Project No." on the Cover Page of the contract format is completed by inserting the four-segment project number as prescribed in A.I.D. Handbook 18, *Information Services.*

13. In Section 10, Table of Contents, under General Provisions amend the schedule by adding: "Biographical Data" as new Clause 25 and "Resident Hire PSC" as new Clause 26.

14. Section 11, General Provisions, Index of Clauses is amended by adding: "Biographical Data" as new Clause 25 and "Resident Hire PSC" as new Clause 26.

15. Section 11, General Provision 1, Definitions, is amended by adding paragraph (p) as follows:

1. Definitions

* * * * *

(p) "Resident Hire Personal Services Contractor (PSC)" means a U.S. citizen who, at the time they are hired as a PSC, resides in the cooperating country (a) as a spouse or dependent of a U.S. citizen employed by a U.S. Government Agency or under any U.S. Government-financed contract or agreement, or (b) for reasons other than for employment with a U.S. Government Agency or under any U.S. Government-financed contract or agreement. A U.S. citizen for purposes of this definition also includes persons who at the time of contracting, are lawfully admitted permanent residents of the United States.

16. Section 11, General Provision 14 is amended by removing the words "shall be available" in paragraph (a) after "employees" and substituting the words "may be available only".

17. Section 11, General Provision 23, Reports is revised as follows:

23. Reports (June 1987)

(a) The contractor shall prepare and submit 2 copies of each report required by the schedule of this contract to the Bureau for Program and Policy Coordination, Center for Development Information and Evaluation, Development Information Division (PPC/CDIE/DI). All documents should be mailed to: PPC/CDIE/DI, ACQUISITIONS, Room 209, SA-18, Agency for International Development, Washington, DC 20523.

The title page of all reports forwarded to PPC/CDIE/DI pursuant to this paragraph shall include a descriptive title, the author's name(s), contract number, project number and title, contractor's name, name of the A.I.D. project office, and the publication or issuance date of the report.

(b) When preparing reports, the contractor shall refrain from using elaborate art work, multicolor printing and expensive paper/binding, unless it is specifically authorized in the Contract Schedule. Wherever possible, pages should be printed on both sides using single spaced type.

18. Section 11, General Provisions, is amended by adding the following new Clause 25:

25. Biographical Data

(a) The contractor agrees to furnish biographical information to the contracting officer, on forms (SF 171 and 171As) provided for that purpose.

(b) Emergency locator information. The contractor agrees to provide the following information to the Mission Administrative Officer on arrival in the host country regarding himself/herself and dependents:

(1) Contractor's full name, home address, and telephone number including any after-hours emergency number(s).

(2) The name and number of the contract, and whether the individual is the contractor or the contractor's dependent.

(3) The name, address, and home and office telephone number(s) of each individual's next of kin.

(4) Any special instructions pertaining to emergency situations such as power of attorney designees or alternate contact persons.

19. Section 11, General Provisions, is amended by adding the following new clause 26:

26. Resident Hire Personal Services Contractor

A contractor meeting the definition of a Resident Hire PSC contained in Section 11, General Provisions, Clause 1, Definitions, shall not be eligible for any fringe benefits (except contributions for FICA, health insurance and life insurance), allowances, or differentials, including but not limited to travel and transportation, medical, orientation, home leave, etc., unless such individual can demonstrate to the satisfaction of the contracting officer that he/she has received similar benefits/allowances from their immediately previous employer in the cooperating country, or the Mission Director determines that payment of such benefits would be consistent with the Mission's policy and practice and would be in the best interests of the U.S. Government.

Appendix J—Direct A.I.D. Contracts With Cooperating Country Nationals and With Third Country Nationals for Personal Services Abroad.

20. Paragraph 1, *General,* is amended by revising paragraph (b) (8) to read as follows:

1. General

* * * * *

(b) Definitions

* * * * *

(8) "Third Country National (TCN)" means an individual (a) who is neither a citizen nor a permanent legal resident alien of the United States nor of the country to which assigned for duty, and (b) who is eligible for return to his/her home country or country of recruitment at U.S. Government expense [see Section 13, General Provision 11 paragraph (b)(1)].

* * * * *

21. Paragraph 4, Policy, subparagraph (b)(3)(i) is revised to read as follows:

4. Policy

* * * * *

(b) Limitations on Personal Services Contracts

* * * * *

(3) * * *

(i) Negotiating on behalf of the United States with foreign governments and public international organizations.

Note.—Negotiating on behalf of the United States with private individuals and entities is permitted.

* * * * *

22. Also in paragraph 4, Policy, subparagraph (c)(2)(i) is amended by removing the citation "4(c)(2)(b)" and correcting it to read "4(c)(2)(ii)" in the last sentence of the paragraph.

23. Paragraph 5, *Soliciting for Personal Services Contracts,* paragraph (a)(4) is revised as follows:

5. Soliciting for Personal Services Contracts

* * * * *

(a) Project Officer's Responsibilities

* * * * *

(4) a certification from the officer in the Mission responsible for the LEPCH or equivalent that the position has been reviewed and is properly classified as to a title, series and grade in accordance with the LEPCH. If the position does not fall within the LEPCH or equivalent system, an estimate of compensation based on subparagraph 4(c)(2)(ii) (A) or (B) of Appendix D after consultations or in coordination with the contract officer or executive officer.

* * * * *

24. Paragraph 7, *Executing a Personal Services Contract* is revised as follows:

7. Executing a Personal Services Contract

Contracting activities, whether A.I.D./W or Mission, may execute personal services contracts, provided that the amount of the contract does not exceed the contracting authority that has been redelegated to them under Delegation of Authority No. 1103 "To the Assistant to the Administrator for Management, Concerning Acquisition Functions" (50 FR 23842), as amended (see AIDAR 702.170–10).

In executing a personal services contract, the contracting officer is responsible for insuring that:

(a) The proposed contract is within his/her delegated authority;

(b) A written detailed statement of duties covering the proposed contract has been received;

(c) The proposed scope of work is contractible, contains a statement of minimum qualifications from the technical office requesting the services, and is suitable for a personal services contract in that:

(1) Performance of the proposed work requires or is best suited for an employer-employee relationship, and is thus not suited to the use of a non-personal services contract;

(2) The scope of work does not require performance of any function normally reserved for Federal employees (see paragraph 4(b) of this Appendix); and

(3) There is no apparent conflict of interest involved (if the contracting officer believes that a conflict of interest may exist, the question should be referred to the cognizant legal counsel).

(d) Selection of the contractor is documented and justified. AIDAR 706.302–70(b)(1) provides an exception to the requirement for full and open competition for personal services contracts abroad (see paragraph 5(c) of this Appendix);

(e) The standard contract format prescribed for Cooperating Country Nationals and Third Country Nationals personal services contracts (Sections 10, 11, 12, 13 14, and 15 to this Appendix as appropriate) is used; or that any necessary deviations are processed as required by AIDAR 701.470.

(f) The contractor has submitted the names, addresses, and telephone numbers of at least two persons who may be notified in the event of an emergency (this information is to be retained in the contract file);

(g) The contract is complete and correct and all information required on the contract Cover Page (AID form 1420–36B) has been entered;

(h) The contract has been signed by the contracting officer and the contractor, and fully executed copies are properly distributed;

(i) The following clearances, approvals and forms have been obtained, properly completed, and placed in the contract file before the contract is signed by both parties:

(1) Security clearance to the extent required by A.I.D. Handbook 6, *Security;*

(2) Mission, host country, and project office clearance, as appropriate;

(3) Medical clearance(s) based on a full medical examination(s) and certification of same by a licensed physician. The physician's certification must be in the possession of the contracting officer prior to signature of contract. If a TCN is recruited, medical clearance requirements apply to the contractor and for each dependent who is authorized to accompany the contractor.

(4) The approval for any salary in excess of FS–1, in accordance with Appendix G of this chapter;

(5) A copy of the class justification or other appropriate explanation and support required by AIDAR 706.302–70, if applicable;

(6) Any deviation to the policy or procedures of this Appendix, processed and approved under AIDAR 701.470;

(7) The memorandum of negotiation;

(j) The position description is classified in accordance with the LEPCH, and the proposed salary is consistent with the local compensation plan or the alternate procedures established in 4(c)(2)(ii) above;

(k) Funds for the contract are properly obligated to preclude violation of the Anti-Deficiency Act, 31 U.S.C. 134 (the contracting officer ensures that the contract has been properly recorded by the appropriate accounting office prior to its release for the signature of the selected contractor);

(l) The contractor receives and understands Attachment 2C of Chapter 2, A.I.D. Handbook 24, *General Personnel Policy,* entitled "Employee Responsibilities and Conduct," and a copy is attached to each contract, as provided for in paragraph 2(c) of General Provision 2, Section 11;

(m) Agency conflict of interest requirements, as set out in Chapter 2D and 2F of A.I.D. Handbook 24, are met by the contractor prior to his/her reporting for duty;

(n) A copy of a Checklist for Personal Services Contractors which may be in the form set out above or another form convenient for the contracting officer, provided that a form containing all of the information described in this paragraph 7 shall be prepared for each PSC and placed in the contract file;

(o) In consultation with the regional legal advisor and/or the regional contracting officer, the contract is modified by deleting from the General Provisions (Sections 10, 11, 12, 13, 14, and 15 of this Appendix) the inapplicable clause(s) by a listing in the Schedule; and

(p) The block entitled, "Project No." on the Cover Page of the contract format is completed by inserting the four-segment project number as prescribed in A.I.D. Handbook 18, *Information Services.*

25. Section 11, General Provisions, Contract With a Cooperating Country National for Personal Services, Clause 3, Physical Fitness, is revised as follows:

3. PHYSICAL FITNESS (October 1987)

The contractor shall be examined by a licensed doctor of medicine, and the contractor shall obtain from the doctor a certificate that, in the doctor's opinion, the contractor is physically qualified to engage in the type of activity for which he/she is to be employed under the contract. A copy of the certificate shall be provided to the contracting officer before the contractor starts work under the contract. The contractor shall be reimbursed for the cost of the physical examination based on the rates prevailing locally for such examinations in accordance with Mission practice.

26. Section 11, General Provisions, Contract With a Cooperating Country National for Personal Services Clause 5, Workweek, is revised as follows:

5. WORKWEEK (October 1987)

The contractor workweek shall not be less than 40 hours, unless otherwise provided in the Schedule, and shall coincide with the workweek for those employees of the Mission or the cooperating country agency most closely associated with the work of this contract. If approved in advance in writing, overtime worked by the contractor shall be paid in accordance with the procedures governing premium compensation applicable to direct hire foreign service national employees.

27. Section 11, General Provisions, Contract With a Cooperating Country National for Personal Services, Clause 6, Leave and Holidays, is revised as follows:

6. LEAVE AND HOLIDAYS (October 1987)

(a) Vacation Leave.

The contractor may accrue, accumulate, use and be paid for vacation leave in the same manner as such leave is accrued, accumulated, used and paid to foreign service national direct hire employees of the Mission. No vacation leave shall be earned if the contract is for less than 90 days. Unused vacation leave may be carried over under an extension or renewal of the contract as long as it conforms to Mission policy and practice.

(b) Sick Leave.

The contractor may accrue, accumulate, and use sick leave in the same manner as such leave is accrued, accumulated and used by foreign service national direct hire employees of the Mission. Unused sick leave may be carried over under an extension of the contract. The contractor will not be paid for sick leave earned but unused at the completion of this contract.

(c) Leave Without Pay.

Leave without pay may be granted only with the written approval of the contracting officer or Mission Director.

(d) Holidays.

The contractor shall be entitled to all holidays granted by the Mission to direct hire cooperating country national employees who are on comparable assignments.

28. Section 11, General Provisions, Contract With a Cooperating Country National for Personal Services, Clause 10, Payment, is revised as follows:

10. PAYMENT (October 1987)

(a) Payment of compensation shall be based on written documentation supporting time and attendance which may be (1) maintained by the Mission in the same way as for direct hire FSN's or (2) the contractor may submit such written documentation in a form acceptable to Mission policy and practice as required for other personal service contractors and as directed by the Mission Controller or paying office. The documentation will also provide information required to be filed under Cooperating Country laws to permit withholding by A.I.D. of funds, if required, as described in the clause of these General Provisions entitled Social Security and Cooperating Country Taxes.

(b) Any other payments due under this contract shall be as prescribed by Mission policy for the type of payment being made.

29. Section 11, General Provisions, Contact With a Cooperating Country National for Personal Services, in Clause 11, No Access to Classified Information, the clause heading and paragraph (a) are revised as follows:

11. NO ACCESS TO CLASSIFIED INFORMATION (October 1987)

(a) The contractor shall not normally have access to classified or administratively controlled information and shall take conscious steps to avoid receiving or learning of such information. However, based on contractor's need to know, Mission may authorize access to administratively controlled information for performance of assigned scope of work on a case-by-case basis in accordance with A.I.D. Handbook 6.

* * * * *

30. The title of Section 13, General Provisions—Contract With Third Country National for Personal Services is revised as follows: General Provisions—Contract With a Third Country National for Personal Services.

31. Section 13, General Provisions, Contract With a Third Country National for Personal Services, Clause 3, Physical Fitness, is revised as follows:

3. PHYSICAL FITNESS (October 1987)

The contractor shall be examined by a licensed doctor of medicine, and the contractor shall obtain from the doctor a certificate that, in the doctor's opinion, the contractor is physically qualified to engage in the type of activity for which he/she is to be employed under the contract. A copy of the certificate shall be provided to the contracting officer before the contractor starts work under the contract. The contractor shall be reimbursed for the cost of the physical examination based on the rates prevailing locally for such examinations in accordance with Mission practice, or not to exceed $100 if not done locally.

32. Section 13, General Provisions, Contract With a Third Country National for Personal Services, Clause 6, Leave and Holidays, is revised as follows:

6. LEAVE AND HOLIDAYS (October 1987)

(a) Vacation Leave.

The contractor may accrue, accumulate, use and be paid for vacation leave in the same manner as such leave is accrued, accumulated, used and paid to foreign service national direct hire employees of the Mission but no vacation leave shall be earned if the contract is for less than 90 days. Unused vacation leave may be carried over under an extension or renewal of the contract as long as it conforms to Mission policy and practice.

(b) Sick Leave.

The contractor may accrue, accumulate, and use sick leave in the same manner as such leave is accumulated and used by foreign service national direct hire employees of the Mission. Unused sick leave may be carried over under an extension of the contract. The contractor will not be paid for sick leave earned but unused at the completion of this contract.

(c) Holidays.

The contractor shall be entitled to all holidays granted by the Mission to direct hire cooperating country national employees who are on comparable assignments.

33. Section 13, General Provisions, Contract With a Third Country National for Personal Services, in Clause 11, Travel and Transportation Expenses, the clause heading and paragraph (b)(1) are revised as follows:

11. Travel and Transportation Expenses (October 1987)

(a) General.

* * * * *

(b) Travel and Transportation

(1) Notwithstanding other provisions of this Clause 11, a TCN must return to the country of recruitment or to the TCN's home country within 30 days after termination or completion of employment or will forfeit all right to reimbursement for repatriation travel. The return travel obligation (repatriation travel) assumed by the U.S. Government may have been the obligation of another employer in the area of assignment if the employee has been in substantially continuous employment which provided for the TCN's return to home country or country from which recruited.

* * * * *

34. Section 13, General Provisions, Contract With a Third Country National for Personal Services, Clause 12, Payment, is revised as follows:

12. PAYMENT (October 1987)

(a) Payment of compensation shall be based on written documentation supporting time and attendance which may be (1) maintained by the Mission in the same way as for direct hire FSN's or (2) the contractor may submit such written documentation in a form acceptable to Mission policy and practice as required for other personal service contractors and as directed by the Mission Controller or paying office. The

documentation will also provide information required to be filed under Cooperating Country laws to permit withholding by A.I.D. of funds, if required, as described in the clause of these General Provisions entitled Social Security and Cooperating Country Taxes.

(b) Any other payments due under this contract shall be prescribed by Mission policy for the type of payment being made

35. Section 13, General Provisions, Contract With a Third Country National for Personal Services, in Clause 15, No Access to Classified Information, the clause heading and paragraph (a) are revised as follows:

15. NO ACCESS TO CLASSIFIED INFORMATION (October 1987)

(a) The contractor shall not normally have access to classified or administratively controlled information and shall take conscious steps to avoid receiving or learning of such information. However, based on contractor's need to know, Mission may authorize access to administratively controlled information for performance of assigned scope of work on a case-by-case basis in accordance with A.I.D. Handbook 6.

* * * * *

36. Section 14, Additional Provisions, Contract With a Third Country National for Personal Services, Clause 3, Physical Fitness, is revised as follows:

3. PHYSICAL FITNESS (October 1987)

(a) Predeparture.

The contractor's authorized dependents shall also be required to be examined by a licensed doctor of medicine. The contractor shall require the doctor to certify that in the doctor's opinion, the contractor's authorized dependents are physically qualified to reside in the cooperating country. A copy of the certificate shall be provided to the contracting officer prior to the dependent's departure for the cooperating country.

(b) End of Tour.

The contractor and his/her authorized dependents are authorized physical examinations within 60 days after completion of the contractor's tour of duty.

(c) *Reimbursement.*

The contractor shall be reimbursed for the cost of the physical examinations mentioned in paragraphs (a) and (b) above as follows: (1) Based on those rates prevailing locally for such examinations in accordance with Mission practice or (2) if not done locally, not to exceed $100 per examination for the contractor's dependents of 12 years of age and over and not to exceed $40 per examination for contractor's dependents under 12 years of age. The contractor shall also be reimbursed for the cost of all immunizations normally authorized and extended to FSN employees.

37. Section 15, FAR Clauses is amended by adding the following FAR citation: "14. Anti-Kickback Procedures, 52.203-7."

Date: October 1, 1987.

John F. Owens,

Procurement Executive.

BILLING CODE 6116-01-M

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

50 CFR Part 683

[Docket No. 70752-7196]

Western Pacific Bottomfish and Seamount Groundfish Fisheries

AGENCY: National Marine Fisheries Service (NMFS), NOAA, Commerce.

ACTION: Final rule.

SUMMARY: NOAA issues a final rule to implement Amendment 1 to the Fishery Management Plan for the Bottomfish and Seamount Groundfish Fisheries of the Western Pacific Region (FMP) adopted by the Western Pacific Fishery Management Council (Council) at its 57th meeting in Honolulu, Hawaii on June 4–5, 1987. Amendment 1 permits the Council to consider limited access for American Samoa and Guam, and changes the due date for the annual bottomfish report from March 31 to June 30. The intent of this action is to amend the FMP so that the Council can act quickly to protect the bottomfish resources in American Samoa and Guam, if necessary.

EFFECTIVE DATE: November 11, 1987.

ADDRESS: Copies of the amendment are available from Kitty B. Simonds, Executive Director, Western Pacific Fishery Management Council, 1164 Bishop Street, Room 1405, Honolulu, HI 96813 (808-523-1368).

FOR FURTHER INFORMATION CONTACT: Doyle E. Gates, Administrator, Western Pacific Program Office, 2570 Dole Street, Room 106, Honolulu, HI 96822-2396, 808-955-8831.

SUPPLEMENTARY INFORMATION: The FMP was prepared by the Council to establish a framework for managing the bottomfish fisheries within the U.S. exclusive economic zone (EEZ) around Hawaii, American Samoa, and Guam, and the seamount groundfish fisheries in the EEZ around the Hancock Seamounts northwest of the Northwestern Hawaiian Islands (NWHI). The FMP describes the processes by which the fishery will be managed, and establishes the limits and controls within which regulatory adjustments may be made. A set of heavily fished bottomfish species is routinely monitored by a Plan Monitoring Team appointed by the Council, and a set of indicators provides the basis for further investigation or recommendations for action on the part of the Regional Director through notice in the **Federal Register.**

In response to concerns of American Samoa and Guam representatives regarding maintaining the stability of the bottomfish resources in their respective areas, the Council approved the development of limited access proposals for these areas at its June meeting. The original FMP reserves limited entry management proposals only for the NWHI.

In addition, regulations presently in effect require the Bottomfish Monitoring Team to prepare an annual report on the fishery by March 31 of each year. The report contains information on the bottomfish fisheries operating in the Northwestern Hawaiian Islands, the main Hawaiian Islands, American Samoa and Guam during the past year. It has not been possible for the monitoring team to prepare an annual report by the March 31 deadline because a large portion of the fishery data is not available before this date. The data availability problem can be solved by extending the due date of the annual report from March 31 to June 30 of each year.

Proposed rules were published in the **Federal Register** on July 24, 1987 (52 FR 27838), and the public comment period ended on September 3, 1987. No comments were received.

Classification

The Administrator of NOAA determined that this amendment is necessary for the conservation and management of the bottomfish fishery of the Western Pacific region and that it is consistent with the Magnuson Act and other applicable law.

The Council prepared an environmental assessment (EA) for this amendment and concluded that there will be no significant impact on the environment as a result of this rule. A copy of the amendment containing the EA may be obtained at the above address.

The Administrator of NOAA determined that this rule is not a "major rule" requiring a regulatory impact analysis under Executive Order 12291. A summary of his determination appears in the proposed rule.

The General Counsel of the Department of Commerce certified to the Chief Counsel for Advocacy of the Small Business Administration that this rule will not have a significant economic impact on a substantial number of small

businesses. A summary of this determination appears in the proposed rule.

This rule contains no collection of information requirement subject to the Paperwork Reduction Act.

The Council has determined, and the appropriate State and territorial government offices have found, that the measures established in the amendment are consistent to the maximum extent practicable with the approved coastal zone management programs of American Samoa and Guam.

List of Subjects in 50 CFR Part 683

Fish, Fisheries, Reporting and recordkeeping requirements.

Dated: October 8, 1987.

Bill Powell,

Executive Director, National Marine Fisheries Service.

For the reasons stated in the preamble, 50 CFR Part 683 is proposed to be amended as follows:

PART 683—[AMENDED]

1. The authority citation for 50 CFR Part 683 continues to read as follows:

Authority: 16 U.S.C. 1801 *et seq.*

2. In § 683.24, paragraph (a) introductory text is revised, paragraphs (d) (1) and (2) are redesignated as (d) (2) and (3), and a new paragraph (d)(1) is added to read as follows:

§ 683.24 Framework for regulatory adjustments.

(a) *Annual reports.* By June 30 of each year a Council-appointed bottomfish monitoring team will prepare an annual report on the fishery by area covering the following topics:

* * * * *

(d) * * *

(1) Access limitation may be adopted only for the NWHI, American Samoa, and Guam.

7 CFR Part 273

[Amendment No. 300]

Food Stamp Program; Prerelease Applications From Residents of Institutions

AGENCY: Food and Nutrition Service, USDA.

ACTION: Proposed rule.

SUMMARY: This action proposes changes to Food Stamp Program regulations based on section 11006 of the Anti-Drug Abuse Act of 1986 (Pub. L. 99–570, enacted on October 27, 1986) which provides certain individuals in institutions applying for Supplemental Security Income (SSI) the opportunity to also apply for Food Stamp Program benefits by completing a single application for SSI and food stamps before they are released from instituions. These proposed rule changes allow institutionalized individuals to receive assistance upon release.

DATE: Comments on this proposed rulemaking must be received on or before December 14, 1987, to be assured of consideration.

ADDRESS: Comments should be submitted to Judith M. Seymour, Supervisor, Certification Rulemaking Section, Eligibility and Monitoring Branch, Program Development Division, Family Nutrition Programs, Food and Nutrition Service, USDA, 3101 Park Center Drive, Room 708, Alexandria, Virginia 22302. All written comments will be open to public inspection at the office of the Food and Nutrition Service during regular business hours (8:30 a.m. to 5:00 p.m., Monday through Friday), at 3101 Park Center Drive, Alexandria, Virginia, Room 708.

FOR FURTHER INFORMATION CONTACT: Questions regarding this proposed rulemaking should be directed to Ms. Seymour at the above address or by telephone at (703) 756–3429.

SUPPLEMENTARY INFORMATION:

Classification

Executive Order 12291 and Secretary's Memorandum 1512–1

This proposed rule has been reviewed under Executive Order 12291 and Secretary's Memorandum No. 1521–1 and has been classified as non major. The rule will not result in an annual economic impact of more that $100 million or major increases in costs or prices, nor will it have a significant adverse effect on competition, employment, productivity, investment, or foreign trade. Further, the rule is unrelated to the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

Executive Order 12372

The Food Stamp Program is listed in the Catalog of Federal Domestic Assistance under No. 10.551. For the reasons set forth in the final rule and related Notice to 7 CFR Part 3015, Subpart V (48 FR 29115), this program is excluded from the scope of Executive Order 12372 which requires intergovermental consultation with State and local officials.

Regulatory Flexibility Act

This proposed rule has been reviewed with regard to the requirements of the Regulatory Flexibility Act of 1980 (Pub. L. 96–354, Stat 1164, September 19, 1980). Anna Kondratas, Administrator of the Food and Nutrition Service, has certified that this action does not have a significant economic impact on a substantial number of small entities. This action would affect certain individuals in institutions and the State and local agencies which administer the Food Stamp Program.

Paperwork Reduction Act

This rulemaking does not contain reporting or recordkeeping requirements subject to approval by the Office of Management and Budget (OMB) under the Paperwork Reduction Act of 1980 (44 U.S.C. 3507).

Background

Section 11006 of the Anti-Drug Abuse Act of 1986 amends section 1631 of the Social Security Act (42 U.S.C. 1383) to require the Secretaries of the Department of Health and Human Services and the Department of Agriculture to develop a procedure under which an individual who applies for SSI benefits will also be permitted to apply for participation in the Food Stamp Program prior to the discharge or release of the individual from a public institution by executing a single application. It is expected that this provision will simplify applying for Food Stamp Program benefits for individuals anticipating release from a public institution and expedite financial help upon release.

The Social Security Administration (SSA) currently accepts SSI applications from individuals not yet discharged from an institution under their Prerelease Program for the Institutionalized (Program Operations Manual System GN–00204.293). However, there are no similar procedures in Food Stamp Program regulations for processing food stamp applications for residents of public institutions prior to their release from the institution. Consequently, residents of institutions now must wait until they are released before they may apply for food stamp benefits.

Pursuant to the passage of the Anti-Drug Abuse Act of 1986, the Department met with SSA staff to discuss the procedures which could be used for prerelease institutionalized applicants and to resolve problems in combining the applications for SSI and food stamps into a single application. The Food and Nutrition Service (FNS) is currently working with SSA staff to resolve the problems created by a single application. However, pending resolution of the single application issue, SSA and FNS staff agree that SSA field staff and food stamp State agencies should use the same processing procedures thay are currently using under existing SSA/food stamp joint processing regulations at 7 CFR 273.2(k). This will avoid a delay in implementing the prerelease application provision of section 11006. While current food stamp regulations do not contemplate prerelease applications, they do, in 7 CFR 273.2(k) provide for the joint processing of food stamp and SSI applications at SSA offices. SSA accepts food stamp applications and conducts interviews at SSA offices for food stamp applicant households consisting entirely of SSI applicants or recipients which

request this service and which have neither applied for food stamps during the previous 30 days nor have an application pending at the State agency. These applications are then forwarded to the food stamp office for determination of eligibility for the Food Stamp Program. These determinations are made within one working day after receipt of the signed applications.

SSA issued Program Circular No. 03–87–OSSI on March 9, 1987 to its field office staff notifying them of the upcoming procedures for accepting food stamp applications from prerelease applicants. SSA will issue further instructions on this procedure to their field offices. The FNS is keeping food stamp regional offices informed as plans progress and will notify them when SSA issues further instructions so that their respective State agencies can be alerted to expect applications from individuals not yet discharged from institutions.

That applications will be taken before the applicant leaves the public institution creates a potential conflict with the 30-day application processing time required by section 11(e)(3) of the Food Stamp Act. Unlike the Food Stamp Program, SSI has no processing time requirements. It may take several months for an SSI application to be approved. Under the prerelease program the institutionalized person will usually not be released until the institution has been notified that the person is potentially eligible for SSI. Thus, a prerelease food stamp application could be pending with the State agency for several months. This obviously contravenes the Food Stamp Program's 30-day processing time requirement. Under current application processing procedures in 7 CFR 273.2(c), the 30-day (or 5-day for expedited service) processing time begins on the date a signed application is filed by the applicant. Since the institutionalized applicant cannot be eligible for food stamps until he or she is released from the institution, this definition of the date of application raises problems for prerelease applicants. The Department considered three options on how to re-define the date of application for prerelease applicants.

The first option is to follow current policy, e.g., in accordance with 7 CFR 273.2(c)(1), define the date of application as the day the institutionalized person signs and submits the application. Under this definition, for a State agency to meet the 30-day processing time requirement it would have to deny the application if the applicant is not released within 30 days, and the individual would have to reapply. The applying and denying (since the person very often would be in the institution for several months after applyling for benefits) could go on for several 30-day cycles—this is clearly not what Congress intended. Thus, for this specific group of people the current definition of the date of application is not viable.

The second option is to use the date of the notice of potential SSI eligibility. The determination of potential eligibility is valid for 30 days (37 days if the institution indicates the individual will be released within 7 days of the end of the 30-day period. Once an institution is notified of SSI eligibility it usually, but not always, releases the individual within 30-37 days. If SSA has not been contacted by the institution within 23 days, SSA will contact the institution again. The problem with using the date of SSI prospective eligibility is that the release may not occur within 30 days, or even 37 days, and thus the State agency is again forced to deny the application in order to meet the 30-day time limitation. The applicant would then have to reapply. This is burdensome for both the State agency and the applicant.

The third option is to use the applicant's actual release date from the institution as the date of application. It is not until the time of release that the institutionalized applicant's new living arrangement is known for certain. Before making a final eligibility determination on the prerelease application the State agency will have to know what type of living situation the applicant is moving into. For example, the State agency will have to ensure that the applicant has not moved into another institutional situation and will need information on the applicant's expenses and the composition of the household in order to determine the benefit level The Department expects that most of these applicants will be entitled to expedited service. This is because these applicants are residents of public institutions and probably have little or no resources, they almost certainly have no income at the time of application and they will not know exactly their SSI check will be received. Based on the expectation that most prerelease applicants will be eligible for expedited service, they would receive benefits within 5 days of release from the institution. The State agency would thus meet its processing deadlines and still ensure rapid benefit delivery to the applicant. It will be extremely important that SSA notify the State agency as quickly as possible of the release date, because if there is a delay in notification there may be a delay in benefit delivery. SSA has assured FNS that their notification will be timely. In light of this, the Department is proposing to use the release date as the date of application for prerelease applicants.

Specifically, the changes being proposed in this rule are as follows. Language is being added to 7 CFR 273.1(e) to provide that residents of public institutions who apply for SSI prior to their release from an institution under SSA's Prerelease Program for the Institutionalized shall be permitted to apply for food stamps at the same time they apply for SSI. Changes are proposed to 7 CFR 273.1(c)(1), (g)(1), and (i)(3)(i) to specify that for residents of public institutions who apply jointly for SSI and food stamps the filing date of the food stamp application is the date of release from the instituion and that normal and expedited procesing times shall begin from that date. Consistent with this, language has been added to 7 CFR 273.10(a) to provide that these prerelease applicants will have their eligibility determined for the calendar month in which the household is released from the institution and their benefits will be prorated form the date of release.

Changes are proposed to 7 CFR 273.2(j)(1)(iv) and (j)(2)(i) to provide that, for prerelease applicants, a finding by SSA of *potential* SSI eligibility prior to release would not make these applicants categorically eligible for food stamp benefits. These prerelease applicants will be considered categorically eligible when a final SSI eligibility determination has been made and the individual has been release from the institution. Food Stamp Program benefits would be paid from the prerelease applicant's date of release.

This rule proposes changes to 7 CFR 273.2(k)(1)(i) to include prerelease applicants in the joint processing procedures. The proposed rule provides that SSA staff take the joint SSI and food stamp applications from residents of institutions prior to their release and that the State agency make an eligibility determination and issue benefits within normal or expedited processing standards using the date of release as the date of application. The proposed rule also provides that SSA notify the State agency of the prerelease applicant's release date. The Department encourages State agencies to follow-up with SSA if they do not hear from SSA about a given application for an undue period of time (for example, three months or more). The proposed rule also provided that, if, for any reason, the State agency is not notified on a timely basis of the

applicant's release date, the State agency shall restore benefits in accordance with 7 CFR 273.17 to such applicant back to the date of release.

Finally, this rule proposes to add a paragraph to 7 CFR 273.11 which identifies prerelease applicants as a household with special circumstances and cross-references the sections of the regulations which specify the procedures to be used for such households.

Implementation

It is proposed that the provisions in this rule be implemented by State agencies on the first day of the first month which begins 30 days after publication of the final rule. The Department feels that this timeframe is reasonable. State agencies which will have already received applications from prerelease applicants at the time will need only to adjust the date of application accordingly.

List of Subject in 7 CFR Part 273

Administrative practice and procedure, Aliens, Claims, Food Stamp, Fraud, Grant programs-social programs, Penalties, Reporting and recordkeeping requirements, Social Security, Students.

Accordingly 7 CFR Part 273 is proposed to be amended as follows:

PART 273—CERTIFICATION OF ELIGIBLE HOUSEHOLDS

1. The authority citation for Part 273 continues to read as follows:

Authority: 7 U.S.C. 2011–2029.

2. In § 273.1, paragraphs (e)(1) through (5) are redesignated as paragraphs (e)(1)(i) through (v), introductory paragraph (e) is redesignated as paragraph (e)(1), and a new paragraph (e)(2) is added to read as follows:

§ 273.1 Household concept.

* * * * *

(e) *Residents of institutions.* * * *

(2) Residents of public institutions who apply for SSI prior to their release from an institution under the Social Security Administration's Prerelease Program for the Institutionalized (42 U.S.C. 1383(j) shall be permitted to apply for food stamps at the same time they apply for SSI. These prerelease applicants shall be processed in accordance with the provisions in §§ 273.2 (c), (g), (i), (j), and (k), 273.10(a) and 273.11(i), as appropriate.

* * * * *

3. In § 273.2:

a. The second sentence of paragraph (c)(1) is revised, a new sentence is added between the second and third sentences, and a new sentence is added at the end of (c)(1).

b. The first sentence of paragraph (g)(1) is revised and a new sentence is added at the end of the paragraph.

c. A new sentence is added to paragraph (i)(3)(i) between the first and second sentences.

d. The eleventh sentence of paragraph (j)(l)(iv) is revised and a new sentence added between the eleventh and twelfth sentences.

e. Two new sentences are added to paragraph (j)(2)(i) between the first and second sentences.

f. Paragraphs (k)(1)(i)(D) through (k)(1)(i)(O) are redesignated as paragraphs (k)(1)(i)(E) through (P), respectively and a new paragraph (k)(1)(i)(D) is added.

g. The first sentence of newly redesignated paragraph (k)(1)(i)(F) is revised and three new sentences are added between the third and fourth sentences.

h. A new sentence is added to the end of new redesignated paragraph (k)(1)(i)(I).

i. The second sentence of newly redesignated paragraph (k)(1)(i)(J) is amended by adding the words "unless the applicant is a resident of an institution as described in § 273.1(e)(2)." to the end of the sentence.

The revisions and additions read as follows:

§ 273.2 Application processing.

* * * * *

(c) *Filing an application—(1) Household's right to file.* * * * The length of time a State agency has to deliver benefits is calculated from the date the application is filed in the food stamp office designated by the State agency to accept the household's application, except when a resident of a public institution is jointly applying for SSI and food stamps prior to his/her release from an institution as described in § 273.1(e)(2). Residents of public institutions who apply for food stamps prior to their release from an institution shall be certified in accordance with § 273.2(g)(1) or § 273.2(i)(3)(i), as appropriate. * * * When a resident of an institution is jointly applying for SSI and food stamps prior to leaving the institution, the filing date of the application to be recorded by the State agency on the application is the date of release of the application from the institution.

* * * * *

(g) *Normal processing standard—(1) Thirty-day processing.* The State agency shall provide eligible households that complete the initial application process an opportunity to participate as soon as possible, but no later than 30 calendar days following the date application was filed, except for residents of public institutions who apply for SSI and food stamp benefits prior to release from the institution as described in § 273.1(e)(2). * * * For residents of public institutions who apply for food stamps prior to their release from the institution as described in § 273.1(e)(2), the State agency shall provide an opportunity to participate as soon as possible, but no later than 30 calendar days from the date of release of the applicant from the institution.

* * * * *

(i) *Expedited Service* * * *

(3) *Processing standards.* * * *

(i) *General.* * * * For a resident of a public institution who applies for benefits prior to his/her release from the institution as described in § 273.1(e)(2) and who is entitled to expedited service, the date of filing of his/her application is the date of release of the applicant from the institution. * * *

* * * * *

(j) *PA, GA and categorically eligible households.* * * *

(1) *Applicant PA households.* * * *

(iv) Except for residents of public institutions who apply jointly for SSI and food stamp benefits prior to their release from a public institution as described in § 273.1(e)(2), benefits shall be paid from the beginning of the period for which PA or SSI benefits are paid, the food original food stamp application date, or December 23, 1985, whichever is later. Residents of public institutions who apply jointly for SSI and food stamp benefits prior to their release from the institution shall be paid benefits from the date of their release from the institution. * * *

(2) *Categorically eligible households.* (i) * * * Residents of public institutions who apply jointly for SSI and food stamp benefits prior of their release from the institution as described in § 273.1(e)(2), shall not be categorically eligible upon a finding by SSA of potential SSI eligibility prior to such release. These individuals shall be considered categorically eligible at such time as a final SSI eligibility determination has been made and the individual has been released from the institution. * * *

* * * * *

(k) *SSI households.* * * *

(1) *Initial application and eligibility determination.* * * *

(i) * * *

(D) The SSA staff shall complete joint SSI and food stamp, applications for residents of public institutions as described in § 273.1(e)(2). For such applicants, the SSA staff shall use a

joint SSI and food stamp application prescribed by both FNS and SSA.

* * * * *

(F) Except for applications taken in accordance with paragraph (k)(1)(i)(D) of this section, the State agency shall make an eligibility determination and issue food stamp benefits to eligible SSI households within 30 days following the date the application was received by the SSA. * * * The State agency shall make an eligibility determination and issue food stamp benefits to residents of public institutions who applying jointly for SSI and food stamps within 30 days following the date of the applicant's release from the institution. Expedited processing time standards shall also begin on the date of applicant's release from the institution in accordance with § 273.2(i)(3)(i). SSA shall notify the State agency of the date of release of the resident of an institution who has applied prior to release for SSA and food stamps. If, for any reason, the State agency is not notified on a timely basis of the applicant's release date, the State agency shall restore benefits in accordance with § 273.17 to such applicant back to the date of release. * * *

* * * * *

(I) * * * This provision does not apply to applications described in paragraph (k)(1)(i)(D) of this section.

* * * * *

4. In § 273.10:

a. A new sentence is added to the end of paragraph (a)(1)(i).

b. The first and second sentences of paragraph (a)(1)(ii) are revised.

The revision and additions read as follows:

§ 273.10 Determining household eligibility and benefit levels.

(a) *Month of application—(1) Determination of eligibility and benefit levels.* * * *

(i) * * * Applicant households consisting of residents of a public institution who apply jointly for SSI and food stamps prior to release from the public institution as described in § 273.1(e)(2) will have their eligibility determined for the calendar month in which the applicant household was released from the institution.

(ii) A household's benefit level for the initial month of certification shall be based on the day of the month it applies for benefits and the household shall receive benefits from the date of application to the end of the month unless the applicant household consists of residents of a public institution. For households which apply for SSI prior to their release from a public institution as described in § 273.1(e)(2), the benefit level for the initial month of certification shall be based on the date of the month the household is released from the institution and the household shall receive benefits from the date of the household's release from the institution to the end of the month. * * *

* * * * *

5. In § 273.11, paragraphs (i), (j), and (k) are redesignated as paragraphs (j), (k), and (l), respectively and a new paragraph (i) is added to read as follows:

§ 273.11 Action on households with special circumstances.

* * * * *

(i) *Prerelease applicants.* A household which consists of a resident or residents of a public institution(s) which applies for SSI under SSA's Prerelease Program for the Institutionalized shall be allowed to apply for food stamp benefits jointly with their application for SSI prior to their release from the institution. Such households shall be certified in accordance with the provisions of §§ 273.1(e), 273.2 (c), (g), (i), (j), and (k), and 273.10(a), as appropriate.

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Docket No. 87-NM-130-AD]

Airworthiness Directives; Short Brothers, Ltd., Model SD3-60 Series Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of Proposed Rulemaking (NPRM).

SUMMARY: This notice proposes an airworthiness directive (AD), applicable to certain Short Model SD3-60 series airplanes, that would require replacement of certain pitot tubes. This proposal is prompted by reports of inoperative pitot tues due to icing. This condition, if not corrected, could result in erroneous airspeed and altitude indications.

DATES: Comments must be received no later than November 13, 1987.

ADDRESSES: Send comments on the proposal in duplicate to the Federal Aviation Administration, Northwest Mountain Region, Office of the Regional Counsel (Attention: ANM-103), Attention: Airworthiness Rules Docket No. 87-NM-130-AD, 17900 Pacific Highway South, C-68966, Seattle, Washington 98168. The applicable service information may be obtained from the Short Brothers, Ltd., Service Representative, 2011 Crystal Drive, Suite 713, Arlington, Virginia 22202-3702. This information may be examined at the FAA, Northwest Mountain Region, 17900 Pacific Highway South, Seattle, Washington, or the Seattle Aircraft Certification Office, 9010 East Marginal Way South, Seattle, Washington.

FOR FURTHER INFORMATION CONTACT: Mr. Donald L. Kurle, Systems and Equipment Branch, Seattle Aircraft Certification Office, ANM-130S; telephone (206) 431-1946. Mailing address: FAA, Northwest Mountain Region, 17900 Pacific Highway South, C-68966, Seattle, Washington 98168.

SUPPLEMENTARY INFORMATION:

Comments Invited

Interested persons are invited to participate in the making of the proposed rule by submitting such written data, views, or arguments as they may desire. Communications should identify the regulatory docket number and be submitted in duplicate to the address specified above. All communications received on or before the closing date for comments specified above will be considered by the Administrator before taking action on the proposed rule. The proposals contained in this Notice may be changed in light of the comments received. All comments submitted will be available, both before and after the closing date for comments, in the Rules Docket for examination by interested persons. A report summarizing each FAA-public contact concerned with the substance of this proposal will be filed in the Rules Docket.

Availability of NPRM

Any person may obtain a copy of this Notice of Proposed Rulemaking (NPRM) by submitting a request to the FAA, Northwest Mountain Region, Office of the Regional Counsel (Attention: ANM-103), Attention: Airworthiness Rules Docket No. 87-NM-130-AD, 17900 Pacific Highway South, C-68966, Seattle, Washington 98168.

Discussion

The United Kingdom Civil Aviation Authority (CAA) has, in accordance

BEST COPY AVAILABLE

VOL
52
ISS
198
OC
14
1987
UMI

with existing provisions of a bilateral airworthiness agreement, notified the FAA of an unsafe condition which may exist on certain Shorts Model SD3–60 series airplanes. There have been several reports of inoperative pitot tubes due to icing, which have resulted in erroneous airspeed and altitude indications.

Short Brothers, Ltd., issued Service Bulletin SD3–34–26, Revision 1, dated September 1985, which indicates that pitot tubes produced between October 1982 and October 1983 were manufactured from stainless steel, in lieu of copper, with a resultant reduction of efficiency of the anti-icing system. These stainless steel pitot tubes bear a code letter "Z" adjacent to the serial number. The service bulletin describes inspection of pitot tubes for code letter "Z," and replacement, if necessary, with copper pitot tubes bearing a code letter other than "Z." The CAA has classified the service bulletin as mandatory.

This airplane model is manufactured in the United Kingdom and type certificated in the United States under the provisions of § 21.29 of the Federal Aviation Regulations and the applicable bilateral airworthiness agreement.

Since these conditions are likely to exist or develop on airplanes of this model registered in the United States, an AD is proposed that would require replacement of left and right pitot tubes bearing code letter "Z" adjacent to the serial number with pitot tubes bearing a code letter other than "Z," in accordance with the service bulletin previously mentioned.

It is estimated that 66 airplanes of U.S. registry would be affected by this AD, that it would take approximately 3 manhours per airplane to accomplish the required actions, and that the average labor cost would be $40 per manhour. Based on these figures, the total cost impact of this AD to U.S. operators is estimated to be $7,920.

For the reasons discussed above, the FAA has determined that this document (1) involves a proposed regulation which is not major under Executive Order 12291 and (2) is not a significant rule pursuant to the Department of Transportation Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and it is further certified under the criteria of the Regulatory Flexibility Act that this proposed rule, if promulgated, will not have a significant economic impact on a substantial number of small entities because of the minimal cost of compliance per airplane ($120). A copy of a draft regulatory evaluation prepared for this action is contained in the regulatory docket.

Aviation safety, Aircraft.

The Proposed Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration proposes to amend § 39.13 of Part 39 of the Federal Aviation Regulations as follows:

PART 39—[AMENDED]

1. The authority citation for Part 39 continues to read as follows:

Authority: 49 U.S.C. 1354(a), 1421 and 1423; 49 U.S.C. 106(g) (Revised Pub. L. 97–449, January 12, 1983); and 14 CFR 11.89.

§ 39.13 [Amended]

2. By adding the following new airworthiness directive:

Short Brothers, Ltd.: Applies to Model SD3–60 series airplanes; serial numbers SH3002 through SH3096, inclusive; certificated in any category. Compliance required as indicated, unless previously accompanied.

To prevent pitot tubes from becoming inoperative due to icing, which could result in erroneous airspeed and altitude indication, accomplish the following:

A. Within the next 180 days after the effective date of this AD, replace pitot tubes having the code letter "Z" adjacent to the serial number with one containing a code letter other than "Z," in accordance with accomplishment instructions in Service Bulletin SD3–34–26, Revision 1, dated September 1, 1985.

B. An alternate means of compliance or adjustment of the compliance time, which provides an acceptable level of safety, may be used when approved by the Manager, Standardization Branch, ANM–113, FAA, Northwest Mountain Region.

C. Special flight permits may be issued in accordance with FAR 21.197 and 21.199 to operate airplanes to a base for the accomplishment of the requirements required by this AD.

All persons affected by this proposal who have not already received the appropriate service documents from the manufacturer may obtain copies upon request to Short Brothers, Ltd., Service Representative, 2011 Crystal Drive, Suite 713, Arlington, Virginia 22202–3702. These documents may be examined at the FAA, Northwest Mountain Region, 17900 Pacific Highway South, Seattle, Washington, or at the Seattle Aircraft Certification Office, 9010 East Marginal Way South, Seattle, Washington.

Issued in Seattle, Washington, on September 22, 1987.

Frederick M. Isaac,

Acting Director, Northwest Mountain Region.

FEDERAL TRADE COMMISSION

16 CFR Part 13

[File No. 861–0019]

Wyoming State Board of Chiropractic Examiners; Proposed Consent Agreement With Analysis To Aid Public Comment

AGENCY: Federal Trade Commission.

ACTION: Proposed consent agreement.

SUMMARY: In settlement of alleged violations of federal law prohibiting unfair acts and practices and unfair methods of competition, this consent agreement, accepted subject to final Commission approval, would require, among other things, the Landers, Wyoming board, which has exclusive authority to license chiropractors in the state, to refrain from prohibiting, restricting, impeding or discouraging any person from advertising truthful, nondeceptive information made available by any licensed chiropractor. In addition, respondent would agree not to characterize such advertising as unethical or unprofessional.

DATE: Comments must be received on or before December 14, 1987.

ADDRESSES: Comments should be addressed to: FTC/Office of the Secretary, Room 136, 6th St. and Pa. Ave., NW., Washington, DC 20580.

FOR FURTHER INFORMATION CONTACT: Claude C. Wild, III, Denver Regional Office, Federal Trade Commission, 1405 Curtis Street, Suite 2900, Denver, CO 80202, (303) 844–2271.

SUPPLEMENTARY INFORMATION: Pursuant to section 6(f) of the Federal Trade Commission Act, 38 Stat. 721, 15 U.S.C. 46 and § 2.34 of the Commission's Rules of Practice (16 CFR 2.34), notice is hereby given that the following consent agreement containing a consent order to cease and desist, having been filed with and accepted, subject to final approval, by the Commission, has been placed on the public record for a period of sixty (60) days. Public comment is invited. Such comments or views will be considered by the Commission and will be available for inspection and copying at its principal office in accordance with § 4.9(b)(14) of the Commission's Rules of Practice (16 CFR 4.9(b)(14)).

List of Subjects in 16 CFR Part 13

Chiropractors, Trade practices.

The Federal Trade Commission having initiated an investigation of certain acts and practices of the Wyoming State Board of Chiropractic Examiners (hereafter sometimes

referred to as "proposed respondent") and it now appearing that proposed respondent is willing to enter into an agreement containing an order to cease and desist from the use of the acts and practices being investigated,

It is hereby agreed by and between the Wyoming State Board of Chiropractic Examiners, by its duly authorized officers and its attorneys, and counsel for the Federal Trade Commission that:

1. Proposed respondent is organized, exists and transacts business under the laws of the State of Wyoming. The Board's principal office and place of business is located at the office of Glenn R. Harrison, DC, its Secretary-Treasurer, at 550 Main Street, Lander, Wyoming 82520.

2. Proposed respondent admits all of the jurisdictional allegations set forth in the attached draft complaint.

3. Proposed respondent waives:

(a) Any further procedural steps;

(b) The requirement that the Commission's decision contain a statement of findings of fact and conclusions of law;

(c) All rights to seek judicial review or otherwise to challenge or contest the validity of the order entered pursuant to this agreement; and

(d) Any claim under the Equal Access to Justice Act.

4. This agreement shall not become part of the public record of the proceeding unless and until it is accepted by the Commission. If this agreement is accepted by the Commission, both it and the draft complaint will be placed on the public record for a period of sixty (60) days and information with respect thereto publicly released. The Commission thereafter may either withdraw its acceptance of this agreement and so notify proposed respondent, in which event it will take such action as it may consider appropriate, or issue and serve its complaint (in such form as the circumstances may require) and decision, in disposition of the proceeding.

5. This agreement is for settlement purposes only and does not constitute an admission by proposed respondent that the law has been violated as alleged in the attached draft complaint.

6. This agreement contemplates that, if it is accepted by the Commission, and if such acceptance is not subsequently withdrawn by the Commission pursuant to the provisions of § 2.34 of the Commission's Rules, the Commission may, in disposition of the proceeding, and without further notice to proposed respondent, (1) issue its complaint corresponding in form and substance with the attached draft complaint and its decision containing the following order to cease and desist, and (2) make information public with respect thereto. When so entered, the order to cease and desist shall have the same force and effect and may be altered, modified or set aside in the same manner and within the same time provided by statute for other orders. The order shall become final upon service. Delivery by the U.S. Postal Service of the decision containing the agreed-to order, to proposed respondent's address as stated in this agreement, shall constitute service. Proposed respondent waives any right it may have to any other manner of service. The complaint may be used in construing the terms of the order, and no agreement, understanding, representation, or interpretation not contained in the order or the agreement may be used to vary or contradict the terms of the order.

7. Proposed respondent has read the proposed complaint and order. It understands that once the order has been issued, it will be required to file one or more compliance reports showing that it has fully complied with the order. Proposed respondent further understands that it may be liable for civil penalties in the amount provided by law for each violation of the order after it becomes final.

Order

I.

It is ordered that for the purposes of this Order, the following definitions shall apply:

A. "Board" shall mean the Wyoming State Board of Chiropractic Examiners, its members, officers, agents, representatives, employees, successors and assigns.

B. "Disciplinary action" shall mean:

(1) A refusal to grant, or the revocation or suspension of, a license to practice chiropractic in Wyoming; (2) a refusal to admit a person to examination for a license to practice chiropractic; (3) the issuance of a formal or informal warning, reprimand, censure, or cease and desist order against any person or organization; (4) the imposition of a fine, probation, or other penalty or condition; or (5) the initiation of an administrative, criminal, or civil court proceeding against any person or organization.

C. "Person" shall mean any natural person, corporation, partnership, governmental entity, association, organization, or other entity.

II.

It is further ordered that after the date of service of this Order, the Board, directly or indirectly, or through any device, in or in connection with its activities in or affecting commerce, as "commerce" is defined in the Federal Trade Commission Act, shall forthwith cease and desist from:

A. Prohibiting, restricting, impeding or discouraging any person from offering, publishing or advertising any price, term or condition of, or any other information concerning, any chiropractic service offered for sale or made available by any licensed chiropractor. The practices from which the Board shall cease and desist include, but are not limited to:

1. Adopting or maintaining any rule, regulation, policy, or course of conduct that prohibits or seeks to prohibit advertising information about any chiropractic service;

2. Taking or threatening to take any disciplinary action against any person for advertising information about any chiropractic service; or

3. Declaring it to be an illegal, unethical, unprofessional, or otherwise improper or questionable practice for any person to advertise information about any chiropractic service; and

B. Inducing, urging, encouraging or assisting any nongovernmental person to take any action that if taken by the Board would be prohibited by part II(A) above.

Provided that, nothing contained in this part shall prohibit the Board from formulating, adopting, disseminating and enforcing reasonable rules or taking disciplinary or other action, to prohibit advertising that the Board reasonably believes to be false or deceptive within the meaning of Wyo. Stat. Section 33–10–110(a)(vi), as limited by the First and Fourteenth Amendments to the United States Constitution.

Provided further that, this Order shall not be construed to prevent the Board from petitioning for or seeking legislation concerning the practice of chiropractic.

III.

It is further ordered that the Board shall:

A. Distribute by first-class mail a copy of the announcement attached hereto as Appendix A, a copy of this Order and a copy of the accompanying Complaint:

1. Within thirty (30) days after the date of service of this Order, to each person licensed to practice chiropractic in Wyoming as of the date of service of this Order and to each person whose application for, or a request for reinstatement of, a license is pending on such date; and

2. For five (5) years after the date of service of this Order, to each person

who applies for a license to practice chiropractic in Wyoming within (30) days after the Board receives such application;

B. Within ninety (90) days after the date of service of this Order, remove from its Rules and Regulations and any other policy statement or guidelines, any provision, interpretation or statement that is inconsistent with Part II of this Order;

C. For five (5) years after the date of service of this Order, maintain and upon request make available to the Federal Trade Commission (or its staff), for inspection and copying, copies of all records relating to advertising, including but not limited to written communications and any summaries of oral communications to or from the Board regarding the offering, publishing or advertising of information about any chiropractic service;

D. Notify the Federal Trade Commission at least thirty (30) days in advance if possible, or otherwise as soon as possible, of any change in the Board's authority to regulate the practice of chiropractic in Wyoming that may affect compliance obligations arising out of this Order, such as the complete or partial elimination of that authority, the complete or partial assumption of that authority by another governmental entity, or the dissolution of (or other relevant change in) the Board; and

E. Within one hundred twenty (120) days after the date of service of this Order, submit to the Federal Trade Commission a written report setting forth in detail the manner and form in which the Board has complied and is complying with this Order.

Appendix A

Announcement

As you may be aware, the Federal Trade Commission has issued a consent order against the Wyoming State Board of Chiropractic Examiners that became final on [date]. The order provides that the Board may not prohibit chiropractors from advertising their services in a truthful, nondeceptive manner. The Board may not (1) adopt or maintain rules, regulations or policies that prohibit truthful, nondeceptive advertising with respect to the sale of chiropractic services; (2) take disciplinary action (such as the suspension, revocation or refusal to issue a license) or threaten disciplinary action against any person or organization that so advertises; or (3) declare it to be illegal, unethical, unprofessional, or otherwise improper or questionable for persons to engage in truthful, nondeceptive advertising. The Board is also prohibited from encouraging any person or organization to take actions that the order prohibits the Board from taking. The order does not affect the Board's authority to prohibit advertising that is likely to deceive or mislead the public, nor does the order prevent the Board from disciplining licensees for engaging in such advertising. Further, the order does not prevent the Board from seeking legislation concerning the practice of chiropractic.

For more specific information, you should refer to the FTC Order itself. A copy of the order is enclosed.

Wyoming State Board of Chiropractic Examiners

Analysis of Proposed Consent Order to Aid Public Comment

The Federal Trade Commission has accepted an agreement to a proposed consent order from the Wyoming State Board of Chiropractic Examiners (the "Board").

The proposed consent order has been placed on the public record for sixty (60) days for reception of comments by interested persons. Comments received during this period will become part of the public record. After sixty (60) days, the Commission will again review the agreement and the comments received and will decide whether it should withdraw from the agreement or make final the agreement's proposed order.

Description of the Complaint

A complaint prepared for issuance by the Commission along with the proposed order alleges that:

The Board is subject to the Commission's jurisdiction pursuant to section 5 of the Federal Trade Commission Act.

The Board has acted as a combination or conspiracy of its members or combined or conspired with others to restrain unreasonably competition among chiropractors in Wyoming by adopting and maintaining "Standards to be Followed" prohibiting the dissemination of truthful, nondeceptive information about chiropractic services. These activities constitute unfair methods of competition and unfair acts or practices in violation of section 5 of the Federal Trade Commission Act.

The Board is organized and exists under the laws of the State of Wyoming. Membership on the Board is limited to chiropractors who by law must have practiced chiropractic for three years before becoming a Board member and must continue to be engaged in the practice of chiropractic while serving their membership terms. Except to the extent that competition is restrained as alleged in the complaint, chiropractors compete with one another, and the Board's members compete with the chiropractors they regulate.

The Board is the sole licensing authority for chiropractors in Wyoming. Under state law the Board is responsible for establishing standards governing the examination and licensing of chiropractors in Wyoming. It may adopt rules and regulations necessary for the performance of its duties. The Board is also authorized to refuse to issue a license to, or to suspend or revoke an existing license of, any person found guilty of certain enumerated offenses, which include "dishonest, unethical or unprofessional conduct likely to deceive, defraud or harm the public." The State of Wyoming has no articulated policy to restrict truthful, nondeceptive advertising by chiropractors.

In furtherance of the combination or conspiracy, the Board has restrained competition among chiropractors in Wyoming by unreasonably restricting the dissemination of truthful, nondeceptive information by chiropractors. Specifically, all telephone book advertising is prohibited with the exception of a statement of the chiropractor's name, address and two additional lines of information. Further, there are a variety of restrictions regarding what can be included in "public relations" materials such as prohibitions against: (1) "flamboyant" copy; (2) promising cures; (3) offering free consultations or examinations; (4) statements regarding fees; (5) claims of superiority; (6) criticisms of other health sciences; and (7) claims that cannot be substantiated by standard laboratory and diagnostic procedures.

The Board has directed individual chiropractors to abandon their efforts to advertise the availability of chiropractic services and the offering of free examinations or consultations. The Board has also encouraged competing chiropractors to agree on the extent of advertising the competitors would permit in their market. The Board has continued its course of conduct although it has known since at least 1978 that its restrictions on truthful, nondeceptive advertising were invalid and probably unenforceable.

As a result of the Board's restraints on advertising, consumers have been deprived of the benefits of vigorous competition and of truthful information about chiropractic services. Chiropractors have been prevented from competing on the basis of making this

information available to consumers through advertising.

Description of the Proposed Consent Order

The proposed consent order would require the Board to cease and desist from prohibiting, restricting, impeding or discouraging any person from offering, publishing or advertising any price, term or condition of, or any other information concerning, any chiropractic service offered for sale or made available by any licensed chiropractor. Thus, the Board would have to repeal its prohibitions on advertising truthful, nondeceptive services and would have to refrain from adopting any other rule or policy that would prohibit or discourage such advertising. The order would further prohibit the Board from inducing, urging, encouraging or assisting others to take any of the actions prohibited by the order.

The order provides, however, that the Board may adopt and enforce reasonable rules and take disciplinary action to prohibit advertising that the Board reasonably believes to be false or deceptive within the meaning of Wyoming State Law, provided that such action is consistent with the First and Fourteenth Amendments to the United States Constitution. The order also provides that the Board is entitled to petition for legislation concerning the practice of chiropractic.

The proposed order would require that the Board distribute a copy of the order and an explanatory announcement notifying all licensees, as well as all persons with applications pending, of the existence and terms of the consent agreement within thirty (30) days after the order becomes final. The Board would be required to send the same notice to each person who applied for a license for a period of five (5) years thereafter. To ensure that the proposed order is obeyed, the Board would be required within one hundred twenty (120) days after the order becomes final to file a written report with the Commission setting forth the manner and form of its compliance. The Board would also be required, for a period of five (5) years, to make its records available to the Commission, and to notify the Commission within thirty (30) days of any change in the Board's authority to regulate the practice of chiropractic that might affect its ability to comply with the order.

The purpose of this analysis is to facilitate public comment on the proposed order, and it is not intended to constitute an official interpretation of the agreement and proposed order or to modify in any way their terms.

Emily H. Rock,

Secretary.

BILLING CODE 6750-01-M

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 261

[SW-FRL-3276-3]

Hazardous Waste Management System; Identification and Listing of Hazardous Waste; Extension of Comment Period

AGENCY: U.S. Environmental Protection Agency.

ACTION: Extension of public comment period for a previously published proposed exclusion for a delisting petition.

SUMMARY: Today's notice announces a 30 day extension of the public comment period for a proposed Agency decision (52 FR 33439, September 3, 1987) to grant Syntex Agribusiness, Inc. (Syntex), located in Springfield, Missouri, a conditional exclusion from hazardous waste regulations. The comment period for the proposed decision was originally scheduled to end on October 5, 1987. Today's notice responds to a request for an extension to the public comment period received on September 24, 1987 from Syntex.

DATES: EPA will accept public comments on the previously proposed decision until November 4, 1987. This date reflects a 30 day extension of the original comment period cited in the proposed rule. Comments postmarked after the close of the extended comment period will be stamped "late".

ADDRESSES: Send three copies of your comments to EPA. Two copies should be sent to the Docket Clerk, Office of Solid Waste (WH-562), 401 M Street SW., Washington, DC 20460. A third copy should be sent to Jim Kent, Variances Section, Assistance Branch, PSPD/OSW (WH-563), U.S. Environmental Protection Agency, 401 M Street SW., Washington, DC 20460. All comments must be identified at the top with docket number "F-87-SSDP-FFFFF".

The public docket where the information can be viewed for the proposed rule is located in the sub-basement of the U.S. Environmental Protection Agency, 401 M Street SW., Washington, DC 20460. The docket is open from 9:00 a.m. to 4:00 p.m., Monday through Frieday, excluding Federal holidays. Call (202) 475-9327 for appointments. The public may copy a maximum of 50 pages of material from any one regulatory docket at no cost. Additional copies cost $0.20 per page.

FOR FURTHER INFORMATION CONTACT: RCRA Hotline, toll free at (800) 424-9346, or at (202) 382-3000. For technical information, contact Myles Morse, Office of Solid Waste (WH-563), U.S. Environmental Protection Agency, 401 M Street SW., Washington, DC 20460, (202) 382-4788.

SUPPLEMENTARY INFORMATION: Syntex Agribusiness, Inc., located in Springfield, Missouri petitioned the Agency to exclude the residue, generated from the off-site incineration of waste sludges, from hazardous waste control. The delisting petition was submitted under 40 CFR 260.20 and 260.22 which allows any person to petition the Administrator to modify or revoke any provision of Parts 260 through 268, 124, 270, and 271 of Title 40 of the code of regulations, and specifically provides generators the opportunity to petition the Administrator to exclude a waste on a "generator-specific" basis from the hazardous waste list.

On September 3, 1987 the Agency proposed to conditionally exclude the petitioned waste residue that will result when wastewater treatment sludges generated by Syntex are incinerated at EPA's Mobile Incineration System (MIS), located in McDowell, Missouri. The effect of the proposed action, if made final, would be to conditionally exclude (from listing as a hazardous waste) the waste residue resulting from the off-site incineration of sludges generated by Syntex. The comment period for the proposed rule was originally scheduled to end on October 5, 1987.

During the original public comment period for the proposed rule, Syntex requested the Agency to extend the public comment period to allow additional time for the review of docket materials and preparation of comments to support their petition. The Agency has agreed to extend the comment period for this proposed rule and will now accept public comments until November 4, 1987.

Date: October 6, 1987.

Marcia Williams,

Director, Office of Solid Waste.

INTERSTATE COMMERCE COMMISSION

49 CFR Ch. X

[Ex Parte No. 290 (Sub-No. 2)]

Railroad Cost Recovery Procedures

AGENCY: Interstate Commerce Commission.

ACTION: Extension of time to file replies to notice of proposed rules.

SUMMARY: In a Federal Register notice of August 31, 1987 (52 FR 32819) the Commission postponed the due date for comments to September 30, 1987 and the due date for replies to October 15, 1987 concerning its proposal to release to the public all non-proprietary data used in calculating the all inclusive index of railroad input prices. The index is used to calculate the quarterly rail cost adjustment factor. At the request of the Association of American Railroads the due date for filing replies has been postponed to October 30, 1987.

DATE: Replies are due October 30, 1987.

Wednesday, October 14, 1987

This section of the FEDERAL REGISTER contains documents other than rules or proposed rules that are applicable to the public. Notices of hearings and investigations, committee meetings, agency decisions and rulings, delegations of authority, filing of petitions and applications and agency statements of organization and functions are examples of documents appearing in this section.

ACTION

Agency Information Collection Activities Under OMB Review

AGENCY: ACTION.

ACTION: Information Collection Request Under Review.

SUMMARY: This notice sets forth certain information about an information collection proposal by ACTION, the Federal Domestic Volunteer Agency.

Background: Under the Paperwork Reduction Act (44 U.S.C., Chapter 35), the Office of Management and Budget (OMB) reviews and acts upon proposals to collect information from the public or to impose recordkeeping requirements. ACTION has submitted the information collection proposal described below to OMB. OMB and ACTION will consider comments on the proposed collection of information and recordkeeping requirements. Copies of the proposed forms and supporting documents [requests for clearance (SF 83), supporting statement, instructions, transmittal letter, and other documents may be obtained from the agency clearance officer.

Need and Use: The information in the Project Application is submitted by potential and existing project sponsors and reveiwed by ACTION staff in making funding decisions. The agency would be unable to make decisions regarding grant funding and project renewals without the information.

To obtain information about or to submit comments on this proposed information collection, please contact both:

Melvin E. Beetle, ACTION Clearnace Officer, ACTION, Room M–601, 806 Connecticut Ave., NW., Washington, DC 20525, Tel: (202) 634–9318

and

James Houser, Desk Officer for ACTION, Office of Management and Budget, New Executive Office Bldg., Room 3002, Washington, DC 20503, Tel: (202) 395–7316.

Office of ACTION issuing the Proposal: Domestic & Anti-Poverty Operations—Student Community Service Program.

Title of Form: Student Community Service Program Federal Assistance Project Application.

Type of Request: Revision.

DEPARTMENT OF COMMERCE

International Trade Administration

[A–588–703]

Postponement of Preliminary Antidumping Duty Determination; Certain Internal-Combustion, Industrial Forklift Trucks From Japan

AGENCY: International Trade Administration, Import Administration, Commerce.

ACTION: Notice.

SUMMARY: This notice informs the public that we have received a request from the petitioners in this investigation to postpone the preliminary determination as permitted by section 733(c)(1)(A) of the Tariff Act of 1930, as amended (the Act). Based on this request, we are postponing our preliminary determination of whether sales of certain internal-combustion, industrial forklift trucks from Japan have occurred at less than fair value until not later than November 18, 1987.

EFFECTIVE DATE: October 14, 1987.

FOR FURTHER INFORMATION CONTACT: Gary Taverman or Rick Herring, Office of Investigations, Import Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue, NW., Washington, DC 20230, telephone: (202) 377–0161 or 377–0187.

SUPPLEMENTARY INFORMATION: On September 11, 1987 (52 FR 34399), we published the notice of postponement of the antidumping duty investigation to determine whether certain internal-combustion, industrial forklift trucks from Japan are being, or are likely to be, sold in the United States at less than fair value. The notice stated that we would issue our preliminary determination by October 29, 1987.

On October 2, 1987, petitioners requested that the Department postpone the preliminary determination by an additional 20 days, i.e., until not later than 210 days after the date of receipt of the petition, in accordance with section 733(c)(1)(A) of the Act. Accordingly, the period for the preliminary determination in this investigation is hereby extended. We intend to issue a preliminary determination not later than November 18, 1987.

This notice is published pursuant to section 733(c)(2) of the Act.

Gilbert B. Kaplan,

Acting Assistant Secretary for Import Administration.

October 7, 1987.

[C–307–702]

Preliminary Affirmative Countervailing Duty Determination; Certain Electrical Conductor Aluminum Redraw Rod from Venezuela

AGENCY: Import Administration, International Trade Administration, Commerce.

ACTION: Notice.

SUMMARY: We preliminarily determine that certain benefits which constitute subsidies within the meaning of the countervailing duty law are being provided to manufcturers, producers, or exporters in Venezuela of certain electrical conductor aluminum redraw rod. The estimated net subsidy is 60.11 percent ad valorem, and the rate for duty deposit purposes is 12.99 percent ad valorem.

We have notified the U.S. International Trade Commission (ITC) of our determination. We are directing the U.S. Customs Service to suspend

VOL
52
ISS
198
OC
14

UMI

liquidation of all entries of certain electrical conductor aluminum redraw rod from Venezuela that are entered, or withdrawn from warehouse, for consumption on or after the date of publication of this notice, and to require a cash deposit or bond for each such entry equal to 12.99 percent ad valorem.

If this investigation proceeds normally, we will make our final determination not later than December 21, 1987.

EFFECTIVE DATE: Octobr 14, 1987.

FOR FURTHER INFORMATION CONTACT: Barbara Tillman or Thomas Bombelles, office of Investigations, Import Administration, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue, NW., Washington, DC 20230; telephone: 202/377–2438 (Tillman) or 202/377–3174 (Bombelles).

SUPPLEMENTARY INFORMATION:

Preliminary Determination

Based upon our investigation, we preliminarily detemine that there is reason to believe or suspect that certain benefits which constitute subsidies within the meaning of section 701 of the Tariff Act of 1930, as amended (the Act), are being provided to manufacturers, producers, or exporters of certain electrical conductor aluminum redraw rod (redraw rod) in Venezuela. For purposes of this investigation, the following programs are preliminarily found to confer subsidies:

- Multiple Exchange Rate System.
- Export Bonds for Credits Against Income Taxes.

We preliminarily determine the estimated net subsidy to be 60.11 percent ad valorem. However, consistent with our policy of taking into account program-wide changes that occur before our preliminary determination, we are adjusting the cash deposit rate to reflect changes in the Multiple Exchange Rate System. Therefore, the rate for duty deposit purposes is 12.99 percent ad valorem.

Case History

Since the last **Federal Register** publication pertaining to this investigation [the Notice of Initiation (52 FR 29559, August 10, 1987)], the following events have occurred. On August 13, 1987, we presented a questionnaire to the Government of Venezuela in Washington, DC concerning petitioner's allegations. On September 14, 1987, we received responses from Suramerica de Aleaciones Laminadas, C.A. (SURAL), Conductores de Aluminio del Caroni, C.A. (CABELUM), Industria de Conductores Electricos, C.A. (ICONEL), Aliminio del Caroni, S.A. (ALCASA) and Industria Venezolana de Aluminio, C.A. (VENALUM). On Septermber 23, 1987, we received a response from the Government of Venezuela. SURAL, CABELUM, and ICONEL are the only known manufacturers, producers or exporters in Venezuela of the subject merchandise to the United States. ALCASA and VENALUM provided information in reponse to a specific allegation of Preferential Pricing of Inputs Used to Produce Exports.

On August 31, 1987, we received a letter from Reynolds Aluminum stating that the company takes no position with respect to the petition filed by Southwire. On September 7, 1987, we received a letter from counsel for the respondents challenging Southwire's standing to file the petition. On September 24, 1987, we received a letter from the Alcoa Conductor Products Company (ACPC), a division of the Aluminum Company of America (Alcoa), stating the ACPC does not support the positions taken by Southwire in its petition. As we have frequently stated, (see, e.g., "Final Affirmative Countervailing Duty Determination: Certain Stainless Steel Hollow Products from Sweden" (52 FR 5794, Febraury 28, 1987), and "Final Affirmative Countervailing Duty Determination: Certain Fresh Atlantic Groundfish from Canada" (51 FR 10041, March 24, 1986)), there is nothing in the statute, its legislaitve history, or our regulations which requires that petitioners establish affirmatively that they have the support of a majority of their industries. In many cases such a requirement would be so onerous as to preclude access to import relief under the antidumping and countervailing duty laws. Therefore, the Department relies on petitioner's representation that it has, in fact, filed on behalf of the domestic industry, until it is affirmatively shown that this is not the case. Where domestic industry members opposing an investigation provide a clear indication that there are gounds to doubt a petitioner's standing, the Department will review whether the opposing parties do, in fact, represent a major portion of the domestic industry. We are requesting clarification from ACPC on the question of petitioner's standing and ACPC's opposition. If it becomes necessary, we will send questionnaires to the domestic industry to detemine the extent of any industry opposition.

Scope of Investigation

The product covered by this investigation is certain electrical conductor aluminum redraw rod, which is wrought rod of aluminum which is electrically conductive and contains not less than 99 percent aluminum by weight, as provided for the *Tariff Schedules of the United States, Annotated (TSUSA)* under item numbers 618.1520 and 618.1540. This product is currently classifiable under the Harmonized System (HS) item numbers 7604.10.30 and 7604.29.30.

Analysis of Programs

Throughout this notice, we refer to certain general principles applied to the facts of the current investigation. These principles are described in the "Subsidies Appendix" attached to the notice of "Cold-Rolled Carbon Steel Flat-Rolled Products from Argentina: Final Affirmative Countervailing Duty Determination and Countervailing Duty Order" (49 FR 18009, April 26, 1984).

Consistent with our practice in preliminary determinations, when a response to an allegation denies the existence of a program, receipt of benefits under a program, or eligibility of a company or industry under a program, and the Department has no persuasive evidence showing that the response is incorrect, we accept the response for purposes of the preliminary determination. All such response are subject to verification. If the response cannot be supported at verification, and the program is otherwise countervailable, the program will be considered a subsidy in the final determination.

For purposes of this preliminary determination, the period for which we are measuring subsidization (the "review period") is calendar year 1986. As is common in our method of analysis, if the companies under ivestigation have different fiscal years, our review period is then the most recently completed calendar year.

Based upon our analysis of the petition and the responses to our questionnaire, we preliminarily determine the following:

I. Programs Preliminarily Determined To Confer Subsidies

We preliminarily determine that subsidies are being provided to manufacturers, producers, or exporters of certain electrical conductor aluminum redraw rod in Venezuela under the following programs.

A. Multiple Exchange Rates

On February 22, 1983, the Government of Venezuela authorized the establishment of a multiple exchange rate system after more than 19 years under a fixed rate system of 4.30

bolivares (Bs.) to the dollar. In its response, the Government of Venezuela stated that this change in the exchange rate was made in an attempt to establish greater control over Venezuela's foreign exchange reserves without precipitating a serious crisis in the development of the national economy.

The Central Bank of Venezuela (CBV) and the Ministry of Finance (MOF) signed an Exchange Agreement on February 28, 1983, establishing a four-tiered exchange rate system. The first exchange rate was a fixed rate of Bs. 4.30 to the dollar. This rate was applied to the sale of foreign exchange by the CBV for payments on foreign-source private and public debt, the importation of essential goods and services, and the sale of foreign exchange from the state-owned oil industries (PDVSA), iron ore industry (FERROMINERA), and the Venezuelan Investment Fund. The second rate was also a fixed rate, at Bs. 6.00 to the dollar. This rate was applied to the sale of foreign exchange by the CBV for the importation of less essential goods, foreign exchange obtained from the export of goods and services from state-owned enterprises (other than PDVSA and FERROMINERA), and foreign exchange received from exports by the private sector when offered to the CBV.

The other two rates that were established were a foreign exchange free market rate (an average Bs. 19.88 to the dollar during 1986) for all exchange operations not specifically provided for elsewhere, and a "free-but-official" rate for the purchase and sale of dollars by the CBV in the free market.

Under this Exchange Agreement, the government also established the Office of Preferential Exchange Regime (RECADI) to administer the multiple exchange rate system. RECADI is responsible for handling applications from importers for merchandise categorized as essential or less essential and also for companies registering foreign debt to be paid at the Bs. 4.30 to the dollar rate. To receive the more preferential exchange rate for imports an importer must submit an application to RECADI identifying the value, quantity and payment terms of the intended purchase. After RECADI reviews the application, it may authorize the use of the more preferential exchange rate to cover the particular purchase. Similarly, companies that desire access to the preferential rate for paying foreign currency debt must register the debt with RECADI and obtain approval for receiving the preferential rate to make loan payments.

In May 1983, the government began gradually to allow the public sector companies (other than PDVSA and FERROMINERA) to use the free market rate to exchange foreign currency earned from export sales. Under this time, only private companies has access to the free market. On February 24, 1984, the Government of Venezuela signed an Exchange Control Agreement between the MOF and the CBV which increased the exchange rate for importation of less essential goods and the payment of most foreign debt to Bs. 7.50 to the dollar. In addition, this Agreement created the "quota share" policy which required all exporters to sell back to the Central Bank the dollars earned on the imported component of the finished product at the same exchange rate used for the importation. Until the 1984 Agreement was signed, exporters could buy imports at the Bs. 4.30 or the Bs. 7.50 to the dollar rate and upon exportation sell the dollars earned on the imported component at the free market exchange rate. The difference in the exchange rate between the lower rate used to purchase imports and the free market rate for selling dollars provided a benefit to exporters.

To implement the quota share policy, the government published Resolution No. 84–05–01 in May 1984. This resolution required that 50 percent of the value of the import content of the exported product, as calculated in the ICE certificates used for granting export bonds, be sold to the CBV at the lower exchange rate of Bs. 7.50 to the dollar (the same rate at which they buy foreign exchange for imports). To enforce the quota share program, the CBV required exporters to sign a contract upon exportation stating that the specified proportion of export earnings will be sold to the CBV at the same rate used for importation of the material inputs.

We preliminarily determine that, under this multiple exchange rate system, a subsidy was conferred on exports because one dollar received for export sales yielded more bolivares than exporters paid to purchase one dollar for imports. Because receipt of the higher exchange rate is contingent upon selling dollars earned from export sales, we consider that the multiple exchange rate conferred an export subsidy.

To calculate the benefit from this program during the review period, we subtracted the exchange rate applicable to each company's purchase of imports from the weighted average exchange rate received by each company when selling dollars earned from export sales. We multiplied this difference by the total 1986 export value for each company in dollars and allocated the resulting amount over the companies' total 1986 export sales in bolivares. On this basis, we calculated an estimated net subsidy of 47.12 percent ad valorem.

On December 6, 1986, the Government of Venezuela substantially changed the Multiple Exchange Rate System. According to the government and company responses, under the revised system, while certain "essential" imports (such as medicine) may qualify for a rate of Bs. 7.50 to the dollar, most dollars for imports must be purchased at the rate of Bs. 14.50 to the dollar. According to information in the government response, the Bs. 4.30 to the dollar rate has been abolished for the purchase of dollars with which to buy imported inputs but still applies to certain categories of foreign currency denominated debt. All imports made by redraw rod producers may be purchased at the Bs. 14.50 rate; however, companies are free to purchase dollars at the free market rate if they choose not to wait for approval from RECADI to purchase dollars at the Bs. 14.50 rate. As of December 1986, all export earnings by all exporters in the economy, both private and public sector, must be exchanged into bolivares at the Bs. 14.50 rate. Furthermore, according to the company response, no foreign currency denominated debt held by the companies under investigation is now payable at the rate of Bs. 4.30 to the dollar.

Because the Government of Venezuela has eliminated the differential between the rate for purchasing imports and the rate at which export proceeds are converted for all companies in the economy, and this program-wide change has been decreed in the Exchange Agreements which administer the Mulitple Exchange Rate System, we preliminarily consider that the export benefit which existed in the earlier system has been eliminated effective December 6, 1986. Therefore, consistent with our policy of taking into account program-wide changes that occur before our preliminary determination, we preliminarily determine that the Multiple Exchange Rate System no longer confers an export subsidy on exports of redraw rod. At verification, we will seek complete information from the relevant government agencies as to the nature and effect of these changes.

B. Export Bonds for Credits Against Income Taxes

Petitioner alleges that Venezuelan redraw rod exporters are remunerated for their exports by the Government of Venezuela in the form of export bonds

VOL
52
ISS
198
OC
14
1987
UMI

which may be used to pay income taxes or sold for cash.

According to the responses of the government and the companies under investigation, all three producers of redraw rod took advantage of the export bond program during the review period. The program allows exporters a return of a percentage of the value of their exports. This percentage is based on a combination of the domestic value-added of the exported product and certain governmental policy objectives relating to a firm's employment and other considerations. Once derived, this percentage is multiplied by the FOB value of the exported goods expressed in bolivares (converted at the official, Bs. 14.50 to the dollar, rate of exchange). The resulting figure is the face value of the export bond. To receive an export bond, a firm submits to its commercial bank the invoice and shipping documents for the exported merchandise. The bank reviews the documents and remits them to the Central Bank of Venezuela which, after an interval of up to one year, issues the export bond. Because this program is limited to exporters and does not operate to rebate any indirect taxes, we preliminarily determine that this program confers an export subsidy on the products under investigation.

To calculate the benefit, we allocated the bolivar amount of bonds received by the companies in 1986 over their total export sales. On this basis, we calculated an estimated net subsidy of 12.99 percent ad valorem.

II. Programs Preliminarily Determined Not To Confer a Subsidy

We preliminarily determine that subsidies are not being provided to manufacturers, producers, or exporters of certain electrical conductor aluminum redraw rod in Venezuela under the following program.

A. Import Duty Reductions

Petitioner alleges that a system of import duty reductions is maintained by the Government of Venezuela which is aimed specifically at encouraging the aluminum products industry. The government's response indicates that the sole program allowing import duty reductions is provided by Title IV of the Venezuelan Organic Customs Law. Duty reductions under this law are provided to a diverse range of industries and, according to the government, are granted whenever national production or supply is inadequate to meet the demand for a particular item. Since import duty reductions are not limited to a specific enterprise or industry, or group of enterprises or industries, nor do they operate to stimulate export performance, we preliminarily detemine that this program does not provide benefits which constitute subsidies.

B. Government Loans Through the Industrial Credit Fund and the Financing Company of Venezuela on Terms Inconsistent with Commercial Considerations

Petitioner alleges that loans are made available by the Government of Venezuela to the companies under investigation on terms inconsistent with commercial considerations. While one respondent company was found to have loans from the Industrial Credit Fund (FONCREI) and the Financing Company of Venezuela (FIVCA), both named in the petition, the response by the government indicated that both institutions offer financing to all sectors of the economy and both operate on commercial terms. Because these loan programs are not limited to a specific enterprise or industry, or group of enterprises or industries, and do not offer financing on terms inconsistent with commercial considerations. We preliminarily determine that they do not provide a countervailable benefit.

III. Programs Preliminarily Determined Not To Be Used

We preliminarily determine that the following programs were not used by the manufacturers, producers, or exporters of certain electrical conductor aluminum redraw rod in Venezuela during the review period.

A. Preferential Tax Incentives

Petitioner alleges that through Decree numbers 1374, 1384, and 1776, the Government of Venezuela authorizes income tax rebates to the domestic capital goods industry, and that manufacturers, producers, and exporters of redraw rod benefits from this program.

According to the responses of the Government of Venezuela and the companies under investigation, the redraw rod producers have not utilized any of the programs provided for under the subject decrees.

B. Preferential Export Financing

Petitioner alleges that Venezuela redraw rod manufacturers, producers and exporters may receive preferential export financing through the Export Financing Fund (FINEXPO).

According to the responses, FINEXPO offers three different forms of financing to assist exports. First, through a series of credit lines, importers in other countries may obtain financing for the purchase of goods in Venezuela. However, no credit lines exist for the United States. Second, Venezuelan exporters may qualify for financing for working capital, technical services and other expenses. Third, importers may obtain financing directly from FINEXPO if they provide appropriate collateral.

According to the responses, the companies under investigation did not receive, have outstanding or pay any interest on any FINEXPO loans during the review period.

C. Preferential Pricing of Inputs Used to Produce Exports

Petitioner alleges that ALCASA and VENALUM, government-owned producers of primary aluminum, are directed by the Government of Venezuela to charge preferential prices to domestic customers who purchase aluminum for further processing and subsequent export. According to the responses of the producers of redraw rod, and the government-owned producers of primary aluminum, there was no preferential pricing of inputs used to produce exports during the review period; accordingly, we preliminarily determine that this program was not used.

D. Other Government Loans on Terms Inconsistent with Commercial Considerations

Petitioner alleges that producers and exporters of redraw rod received financing on terms inconsistent with commercial considerations from the following government agencies listed in our Notice of Initiation: The Ministry of Finance; the Venezuelan Investment Fund; and the Industrial Bank of Venezuela (BIV). According to the responses, none of the respondent companies had loans from these institutions outstanding during the review period.

IV. Programs Preliminarily Determined Not To Exist

We preliminarily determine that the following programs do not exist.

A. Tax Contributions to Cover Debt Service Costs

Petitioner alleges that tax contributions authorized by the Ministry of Finance to meet interest obligations are provided to a specific enterprise or industry, or group thereof, and that manufacturers, producers, and exporters of redraw rod may benefit from this program.

According to the responses, there is no program under which any agency of the Government of Venezuela provides tax contributions or other forms of

assistance to help redraw rod producers or exporters meet their debt financing obligations.

B. Sales Tax Exemption

Petitioner alleges that the Government of Venezuela negotiates, through various regional authorities, exemptions from payment of local sales taxes for a specific enterprise or industry, or group thereof, and that manufacturers, producers, and exporters of redraw rod may benefit from this program.

According to the responses, no program exists in Venezuela for the elimination of municipal sales or other taxes, nor has the Government of Venezuela been involved in the negotiation of any such tax reductions or eliminations regarding the respondent companies.

C. Assumption of Foreign Currency Debt

Petitioner alleges that the Government of Venezuela administers a program whereby the Central Bank of Venezuela assumes the foreign currency debt of selected companies and that manufacturers, producers, and exporters of redraw rod may benefit from this program. According to the responses, no agency of the Venezuelan Government has assumed any responsibility for the payment of foreign currency debts of any private sector Venezuelan company and no statutory provisions exist authorizing any agency of the Government of Venezuela to take such action.

D. Loan Guarantees

Petitioner alleges that the Government of Venezuela provides loan guarantees to a specific enterprise or industry, or group thereof, on terms inconsistent with commercial considerations and that manufacturers, producers, and exporters of redraw rod may benefit from this program. According to the responses, the Government of Venezuela does not offer loan guarantees to private companies either directly or through any governmental agency. The BIV, which is owned by the Government of Venezuela, operates as a commercial bank and, therefore, offers loan guarantees in the ordinary course of business under terms and conditions that reflect ordinary commercial of business under terms and conditions that reflect ordinary commercial banking practice as well as the credit risk of the particular customer. During the review period, the BIV did not issue, or have outstanding, any loan guarantees with respect to the companies under investigation.

IV. Program for Which We Need Additional Information

Government Equity Investment in CABELUM

According to the CABELUM's response, 30 percent of its capital stock is owned by a government-owned supplier of primary aluminim, ALCASA. In order for the Department to investigate any equity investments by a government for the purpose of determining if they are on terms inconsistent with commercial considerations, we must have evidence of the following: First, there must be some government equity participation in the company or project; and, second, there must be some showing that the investment was on terms inconsistent with commercial considerations.

In this case, ALCASA is majority-owned by agencies of the Government of Venezuela. Furthermore, based on the information in the responses of the government and CABELUM, there is some reason to believe that ALCASA's purchase of equity was on terms inconsistent with commercial considerations. Therefore, we will seek additional information on ALCASA's equity investment in CABELUM.

Verification

In accordance with section 776(a) of the Act, we will verify the data used in making our final determination. We will not accept for our final determination any statement in a response that cannot be verified.

Suspension of Liquidation

In accordance with section 703(d) of the Act, we are directing the U.S. Customs Service to suspend liquidation of all entries of certain electrical conductor aluminum redraw rod from Venezuela which are entered, or withdrawn from warehouse, for consumption on or after the date of publication of this notice in the **Federal Register**, and to require a cash deposit or bond equal to 12.99 percent ad valorem for each such entry of this merchandise. This suspension will remain in effect until further notice.

ITC Notification

In accordance with section 703(f) of the Act, we will notify the ITC of our determination. In addition, we are making available to the ITC all nonprivileged and nonproprietary information relating to this investigation. We will allow the ITC access to all privileged and business proprietary information in our files, provided the ITC confirms that it will not disclose such information, either publicly or under an administrative protective order, without the written consent of the Acting Assistant Secretary for Import Administration.

If our final determination is affirmative, the ITC will determine whether these imports materially injure, or threaten material injury to, a U.S. industry within 120 days after the Department makes its preliminary affirmative determination, or 45 days after the Department makes its final determination, whichever is latest.

Public Comment

In accordance with § 355.35 of the Commerce Regulations (19 CFR 355.35) we will hold a public hearing, if requested, to afford interested parties an opportunity to comment on this preliminary determination, at 2 p.m. on November 2, 1987, at the U.S. Department of Commerce, Room 3708, 14th Street and Constitution Avenue NW., Washington, DC 20230. Individuals who wish to participate in the hearing must submit a request to the Acting Assistant Secretary, Import Administration, Room B–099, at the above address within 10 days of the publication of this notice in the **Federal Register**.

Requests should contain: (1) The party's name, address, and telephone number; (2) the number of participants; (3) the reason for attending; and (4) a li t of the issues to be discussed. In addition, at least 10 copies of the business propietary version and seven copies of the nonproprietary version of the pre-hearing briefs must be submitted to the Acting Assistant Secretary by October 26, 1987. Oral presentations will be limited to issues raised in the briefs. In accordance with 19 CFR 355.33(d) and 19 CFR 355.34, all written views will be considered if received not less than 30 days before the final determination is due, or, if a hearing is held, within 10 days after the hearing transcript is available.

This determination is published pursuant to section 703(f) of the Act (19 U.S.C. 1671b(f)).

Gilbert B. Kaplan,

Acting Assistant Secretary for Import Administrtion.

October 7, 1987.

[Application 83-A0027]

Export Trade Certificate of Review

ACTION: Notice of Issuance of an amended export trade certificate of review.

SUMMARY: The Department of Commerce has issued a second amendment to the export trade certificate of review of SOR, Inc. ("SOR") granted on April 2, 1984 (48 FR 13723, April 6, 1984). The first amendment was granted on August 30, 1985, effective as of July 15, 1985 (50 FR 36126, Sept. 5, 1985). The second amendment consists of the following changes: (1) The section captioned "Export Trade," at subsection "a" captioned "Products," is amended to add "level and flow switches" to read as follows: "Pressure, vacuum, differential pressure and temperature switches, liquid level and flow switches, and hand calibration pumps, and components and accessories thereof, typically used in the power and process industries." (2) The following sentence under the caption "Protection Provided by Certificate" is deleted: "The protections afforded by this certificate shall apply only to SOR and the following members: Controls International, Ltd., and its shareholders; SOR Export, Inc., and its shareholders; including, without limitation, Roy E. Dunlap and Ross E. Johnson; and to the directors, officers and employees of the foregoing acting on their behalf." The following sentence is inserted in place of the deleted sentence: "The protections afforded by this certificate shall apply only to SOR and the following members: SOR Controls Group, Ltd., and its shareholders; Mr. Roy E. Dunlap of Overland Park, Kansas; Mr. James R. Johnson of Stillwell, Kansas; SOR Texas, Inc. and its shareholders; and SOR Europe Ltd. and its shareholders; and to the directors, officers and employees of the foregoing acting on their behalf." (3) The section captioned "Export Trade Activities and Methods of Operation" is amended to replace all references to "SOR" with "SOR and its Members." Effective date: July 7, 1987.

FOR FURTHER INFORMATION CONTACT: George Muller, Acting Director, Office of Export Trading Company Affairs, International Trade Administration, 202-377-5131. This is not a toll-free number.

SUPPLEMENTARY INFORMATION: .Title III of the Export Trading Company Act of 1982 ("the Act") (Pub. L. No. 97-290) authorizes the Secretary of Commerce to issue export trade certificates of review. The regulations implementing Title III are found at 15 CFR Part 325 (50 FR 1804, January 11, 1985).

The Office of Export Trading Company Affairs is issuing this notice pursuant to 15 CFR 325.6(b), which requires the Department of Commerce to publish a summary of a certificate in the Federal Register. Under section 305(a) of the Act and 15 CFR 325.11(a), any person aggrieved by the Secretary's determination may, within 30 days of the date of this notice, bring an action in any appropriate district court of the United States to set aside the determination on the ground that the determination is erroneous.

A copy of the certificate will be kept in the International Trade Administration's Freedom of Information Records Inspection Facility, Room 4102, U.S. Department of Commerce, 14th Street and Constitution Avenue NW., Washington, DC 20230.

Date: October 7, 1987.

George Muller,

Acting Director, Office of Export Trading Company Affairs.

National Oceanic and Atmospheric Administration

[P250A; Modification No. 2 to Permit No. 473]

Marine Mammals; Permit Modification; Washington Department of Wildlife

Notice is hereby given that, pursuant to the provisions of § 216.33(d) and (e) of the Regulations Governing the Taking and Importing of Marine Mammals (50 CFR Part 216), Scientific Permit No. 473 issued to the Washington Department of Wildlife, Marine Mammal Investigations, 7801 Phillips Road SW., Tacoma, Washington 98498 on June 15, 1984 (49 FR 25892) as modified on November 5, 1986 (51 FR 40997) is further modified as follows:

Section A-8 is added: 8. Oxytocin may be administered intermuscularly to a maximum of 30 lactating harbor seal females (*Phoca vitulina* authorized in A.3 at a dosage of C.a. 1cc of a 20-30 IU/cc solution. Milk samples may be collected.

Section B.1 is deleted and replaced by: "1. This research shall be conducted in the areas and for the purposes set forth in the application and modification requests."

Section B.7 is deleted.

This modification became effective October 6, 1987.

Documents submitted in connection with the above Permit and modification are available for review in the following offices:

Office of Protected Resources and Habitat Programs, 1825 Connecticut Avenue NW., Room 805, Washington, DC; and

Director, Northwest Region, National Marine Fisheries Service, 7600 Sand Point Way NE., BIN C15700, Seattle, Washington 98115.

Dated: October 8, 1987.

BILLING CODE 3510-22-M

COMMISSION ON EDUCATION OF THE DEAF

Educational Programs for the Deaf; Meetings

AGENCY: Commission on Education of the Deaf.

ACTION: Notice of meetings.

SUMMARY: Pursuant to Pub. L. 92-463, notice is hereby given of forthcoming meetings of the Commission on Education of the Deaf and its Committees. The purposes of the Commission and Committee meetings are to address professional certification in mainstreamed programs and needs of rural education, and to review comments and counterproposals received in response to the first set of draft recommendations. These meetings will be open to the public.

DATES: October 28, 1987, 8:30 a.m. to 5:00 p.m.; October 29, 1987, 8:30 a.m. to 4:30 p.m.

ADDRESS: All meetings will be held in the Holiday Inn-Capitol, 550 C Street SW., Washington, DC. On Wednesday morning, the Precollege Committee will meet in the Columbia B Room, and the Postsecondary Committee in the Saturn and Venus Room. On Wednesday afternoon and Thursday, all meetings will be in the Columbia B Room.

FOR FURTHER INFORMATION CONTACT: Monica Hawkins, Commission on Education of the Deaf, GSA Regional Office Building, Room 6646, 7th and D Streets SW., Washington, DC 20407. (202) 453-4353 (TDD) or (202) 453-4684 (Voice). These are not toll-free numbers.

SUPPLEMENTARY INFORMATION: The Precollege Committee will meet Wednesday, October 28, from 8:30 a.m. to 12:00 noon in the Columbia B Room to discuss comments received on appropriate education, parents' rights, and early identification. It will also

address professional certification in mainstreamed programs and discuss the agreement between the U.S. Department of Education and Gallaudet University's (GU) Precollege Programs. The Postsecondary Committee will meet at the same time in the Saturn and Venus Room to discuss comments received on the proposed expansion of the Regional Postsecondary Education Programs for the Deaf (RPEPD) the funding cycle of the RPEPD, admissions policies at GU/NTID, funding of research at GU/NTID, setting of research priorities, outside review of GU/NTID research plans, and consumer orientation of GU products/outreach. From 1:00 p.m. to 5:00 p.m. that afternoon, the Joint Committee will meet to review comments on the draft recommendations relating to captioning services, distribution of decoders, federal funding for research on speech recognition and captioning, and the impact of captioning on illiteracy. The Joint Committee will also consider the needs in rural education.

Thursday, October 29th, the Executive Committee will meet from 8:30 a.m.–9:30 a.m. in the Columbia B Room to receive reports. The Joint Committee will meet from 1:00 p.m.–3:00 p.m. to continue its Wednesday afternoon meeting. The full Commission will meet from 3:30 p.m. to 4:30 p.m. The proposed agenda for the Commission meeting on October 29 includes the following:

I. Approval of minutes.

II. Reports.

- Chairperson's Report.
- Vice Chairperson's Report.
- Executive Committee Chairperson's Report.
- Staff Director's Report.

III. New Business.

IV. Agenda for December meeting.

V. Adjournment.

These meeting will be open to the public. Interpreters and captioning will be provided. If you need audio-loop systems or other special accommodations, please contact Monica Hawkins at (202) 453–4353 (TDD) or (202) 453–4684 (Voice) no later than October 21, 1987, 5:00 p.m. e.s.t. These are not toil free numbers.

Records will be kept of the proceedings and will be available for public inspection at the office of the Commission on Education of the Deaf, GSA Regional Office Building, Room 6646, 7th and D Streets SW., Washington, DC.

Pat Johnson,

Staff Director.

BILLING CODE 6820–SD–M

DEPARTMENT OF DEFENSE

GENERAL SERVICES ADMINISTRATION

NATIONAL AERONAUTICS AND SPACE ADMINISTRATION

Federal Acquisition Regulation (FAR); Information Collection Under OMB Review

AGENCIES: Department of Defense (DOD), General Services Administration (GSA), and National Aeronautics and Space Administration (NASA).

ACTION: Notice.

SUMMARY: Under the provisions of the Paperwork Reduction Act of 1980 (44 U.S.C. Chapter 35), the Federal Acquisition Regulation (FAR) Secretariat has submitted to the Office of Management and Budget (OMB) a request to review and approve a new information collection concerning Government Furnished Property Requirements.

ADDRESS: Send comments to Mr. Ed Springer, FAR Desk Officer, Room 3235, NEOB, Washington, DC 20503.

FOR FURTHER INFORMATION CONTACT: Mr. Roger Schwartz, Office of Federal Acquisition and Regulatory Policy, (202) 523–3780 or Mr. Owen Green, Defense Acquisition Regulatory Council, (703) 697–7268.

SUPPLEMENTARY INFORMATION: a. *Purpose:* When Government-furnished or contractor-acquired property is provided under federal contracts, Government policy requires the contractor to notify the contracting officer—

(a) When the property is delivered, verification of quantity, condition, and acknowledge receipt in writing;

(b) If Government-furnished property is received in a condition not suitable for the intended use;

(c) Upon loss or destruction of or damage to the property, the time and origin of the loss, destruction or damage, all known interests in commingled property is apart and the insurance, if any, covering any part of or interest in such commingled property;

(d) By clear and convincing evidence that such loss, destruction, or damage (1) did not result from the contractor's failure to maintain an approved program or system, or (2) occurred while an approved program or system was maintained by the contrator; and

(e) Upon the completion of the contract, inventory schedules covering all items of Government property not consumed in the performance of the contract or delivered to the Government. The contractor shall establish and maintain a system to control, protect, preserve, and maintain all Government property because the contractor is responsible and accountable for all Government property under the provisions of the contract. This responsibility and accountability extends to the contractor's subcontractors.

The contractor's property control records shall constitute the Government's official property records and shall be used to:

(a) Provide financial accounts for Government-owned facilities in the contractor's possession or control;

(b) Identify all Government property (to include a complete, current, auditable record of all transactions);

(c) Record special tooling and special test equipment fabricated from Government property materials; and

(d) Locate any item of Government property within a reasonable period of time and more.

This information is used to facilitate the management of Government property in the possession of contractors.

b. *Annual reporting burden:* The annual reporting burden is estimated as follows: Respondents, *6,000* responses per respondent, *3.33* total annual responses *20,000*; hours per response, *.25*; and total reporting burden hours, *5.000*.

c. *Annual recordkeeping burden*: The annual recordkeeping burden is estimated as follows: Number of recordkeepers, *6,000*; annual hours per recordkeeper, *4*; and total recordkeeping burden hours, *24,000*.

Obtaining Copies of Proposals:

Requesters may obtain copies from General Services Administration, FAR Secretariat (VRS), Room 4041, Washington, DC 20405, telephone (202) 523–4755. Please cite OMB Control No. 9000–0075, Government Furnished Property Requirements.

Dated: October 7, 1987.

Margaret A. Willis,

FAR Secretariat.

DEPARTMENT OF EDUCATION

[CFDA No. 84.116F]

Invitation of Applications for New Awards To Be Made in Fiscal Year 1988 Under the Innovative Projects for Student Community Service Competition Conducted by the Fund for the Improvement of Postsecondary Education

Purpose: Provides grants to institutions of higher education and other public and private, non-profit institutions and agencies to support projects encouraging students to participate in community service activities in exchange for educational services or financial assistance, thereby reducing the debt incurred by these students in completing their postsecondary educational program.

Deadline for Transmittal of Applications: January 12, 1988

Applications Available: November 12, 1987.

Available Funds: The Administration's budget request for fiscal year 1988 does not include funds for this program. However applications are invited to allow for sufficient time to evaluate applications and complete the grant process before the end of the fiscal year, should the Congress appropriate funds for this program. The following estimates are based upon the FY 1987 appropriation.

Estimated Size of Awards: $45,000.

Estimated Number of Awards: 16.

Project Peroid: Not to exceed 24 months.

Applicable Regulations: (a) The Education Department General Administrative Regulations, 34 CFR Parts 74, 75, 77, and 78, and (b) the regulations in 34 CFR Part 630, with the exceptions noted in 34 CFR 630.4.

For Applications and Information Contact: The Fund for the Improvement of Postsecondary Education, 400 Maryland Avenue SW., Room 3100, ROB–3, Washington, DC 20202. Telephone (202) 245–8091/8100.

Program Authority: 20 U.S.C. 1135e–1

Dated: October 6, 1987.

BILLING CODE 4000–01–M

Office of Bilingual Education and Minority Languages Affairs

Request for Data and Information Under the Bilingual Education; State Education Agency Program for Fiscal Year 1986

AGENCY: Department of Education.

ACTION: Notice.

Programatic Information: This program provides financial assistance to State educational agencies (SEAs) to collect and report data and information on limited English proficient (LEP) persons under section 732 of the Bilingual Education Act (20 U.S.C. 3242), and 34 CFR Part 548, published in the **Federal Register** on August 16, 1985 at 50 FR 33204. SEAs are required to report data and information to the Secretary in accordance with section 732(b) of the Act, and 34 CFR 548.10.

(Approved under OMB Control number 1885–0509)

Date for Submitting Data and Information: SEA grantees are required to submit Fiscal Year 1986 data and information on LEP persons to the U.S. Department of Education by November 27, 1987.

ADDRESSES: Information should be sent to Luis A. Catarineau, U.S. Department of Education, Office of Bilingual Education and Minority Language Affairs, 400 Maryland Avenue, SW. (Room 421, Reporters Building), Washington, DC 20202.

FOR FURTHER INFORMATION CONTACT: For further information contact Luis A. Catarineau. Telephone: (202) 245–2922.

Authority: 20 U.S.C. 3242(b).

Dated: October 7, 1987.

Alicia Coro,

Director, Office of Bilingual Education and Minority Languages Affairs.

BILLING CODE 4000–01–M

DEPARTMENT OF ENERGY

Liquid Transportation Task Group, Coordinating Subcommittee on Petroleum Storage and Transportation; National Petroleum Council; Open Meeting

Notice is hereby given of the following meeting:

Name: Liquid Transportation Task Group, Coordinating Subcommittee on Petroleum Storage & Transportation of the National Petroleum Council.

Date and Time: Friday, October 30, 1987, 8:00 AM.

Place: Sun Building, Fourteenth Floor Conference Room, 907 S. Detroit Avenue, Tulsa, Oklahoma.

Contact: Margie D. Biggerstaff, U.S. Department of Energy, Office of Fossil Energy (FE–1), Washington, DC 20585, Telephone: 202/586–4695.

Purpose of the Parent Council: To provide advice, information, and recommendations to the Secretary of Energy on matters relating to oil and gas or the oil and gas industries.

Purpose of the Meeting: Discuss Task Group organization and individual assignments.

Tentative Agenda

—Opening remarks by Chairman and Government Cochairman
—Establish the Task Group organization
—Discuss the individual assignments
—Discuss any other matters pertinent to the overall assignment from the Secretary of Energy.

Public Participation: The meeting is open to the public. The Chairman of the Task Group is empowered to conduct the meeting in a fashion that will, in his judgment, facilitate the orderly conduct of business. Any member of the public who wishes to file a written statement with the Task Group will be permitted to do so, either before or after the meeting. Members of the public who wish to make oral statements pertaining to agenda items should contact Ms. Margie D. Biggerstaff at the address or telephone number listed above. Requests must be received at least 5 days prior to the meeting and reasonable provisions will be made to include the presentation on the agenda.

Transcripts: Available for public review and copying at the Public Reading Room, Room 1E–190, Forrestal Building, 1000 Independence Avenue SW., Washington, DC, between 9:00 AM and 4:00 PM Monday through Friday, except Federal holidays.

Issued at Washington, DC, on October 6, 1987.

J. Allen Wampler,

Assistant Secretary, Fossil Energy.

BILLING CODE 6450–01–M

Federal Energy Regulatory Commission

[Docket No. ER88–2–000, et al.]

Iowa Public Service Co., et al., Electric Rate and Corporate Regulation Filings

October 6, 1987.

Take notice that the following filings have been made with the Commission:

1. Iowa Public Service Company

[Docket No. ER88–2–000]

Take notice that on October 1, 1987, Iowa Public Service Company (Iowa) tendered for filing an executed Letter Agreement dated July 21, 1987, as supplemented by a Letter Agreement dated September 5, 1987 whereby Iowa

will supply the Southern Minnesota Municipal Power Agency (SMP) with firm electric capacity and associated energy, commencing July 8, 1987 and continuing through October 2, 1987. Iowa requests that the negotiated Agreement be made effective as of July 8, 1987.

Comment date: October 20, 1987, in accordance with Standard Paragraph E at the end of this document.

2. Carolina Power & Light Company

[Docket No. ER88–3–000]

Take notice that on October 1, 1987, Carolina Power & Light Company (CP&L) tendered for filing pursuant to the Commission's Order No. 475 dated June 26, 1987, updated applicable rates in four different contracts that have been changed to include 34 percent Federal corporate income tax in the formula calculations. These contracts include (1) two agreements with the Southeastern Power Administration for wheeling Kerr Project power and Cumberland Projects power; (2) the backstand and transmission use rate to the City of Fayetteville, North Carolina; and (3) the amendment with Duke Power Company for interchange service.

Comment date: October 20, 1987, in accordance with Standard Paragraph E at the end of this notice.

3. New England Power Company

[Docket No. ER88–4–000]

Take notice that on October 1, 1987, New England Power Company (NEP) tendered for filing an executed Agreement for Transmission of Firm Power (Agreement) between NEP and the Pascoag Fire District (Pascoag) located in Pascoag, Rhode Island. NEP states that the purpose of the Agreement is to facilitate the delivery of New York Authority (NYPA) power to Pascoag's customers.

NEP requests waiver of the Commission's notice requirements so that the Agreement may become effective July 1, 1985. As good cause for this request, NEP states that service to Pascoag had inadvertently been provided since that date pursuant to a similar agreement with the Massachusetts Municipal Wholesale Electric Company (MMWEC). Erroneous billings to MMWEC for Pascoag's service, according to NEP, have been refunded to MMWEC, and Pascoag has agreed to pay NEP for the arrears.

Comment date: October 20, 1987, in accordance with Standard Paragraph E at the end of this notice.

4. Cleveland Electric Illuminating Company

[Docket No. ER88–5–000]

Take notice that on October 1, 1987, Cleveland Electric Illuminating Company (CEI) tendered for filing Revised Service Schedule B—Firm Power Service to its Rate Schedule FERC No. 12, and Fifth Revised Sheet No. 4 under its FERC Electric Tariff, 1st Revised Volume No 1. CEI states that the revised rates and charges have been filed pursuant to FERC Order No. 475, in order to reflect the effect of the tax rate changes enacted in the Tax Reform Act of 1986. CEI proposes to make such changes effective as of July 1, 1987.

Comment date: October 20, 1987, in accordance with Standard Paragraph E at the end of this notice.

Standard Paragraph

E. Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, DC 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 385.214). All such motions or protests should be filed on or before the comment date. Protexts will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

[FR Doc. 87–23748 Filed 10–13–87; 8:45 am]

BILLING CODE 6717–01–M

[Docket Nos. ER88–1–000, et al.]

Pacific Gas and Electric Co., et al.; Electric Rate and Corporate Regulation Filings

October 6, 1987.

Take notice that the following filings have been made with the Commission:

1. Pacific Gas and Electric Company

[Docket No. ER88–1–000]

Take notice that on October 1, 1987, Pacific Gas and Electric Company (PGandE) tendered for filing a revised rate schedule for Firm System Sales to the Cities of Anaheim, Azusa, Banning, Colton, and Riverside (Cities).

The energy rates for these Agreements are calculated using PGandE's cost of natural gas and nuclear fuel. Under the terms of the revised rate schedule, when the California Public Utilities Commission (CPUC) authorizes a change in the G–55 natural gas rate, PGandE must make a rate change filing for the Cities to revise the natural gas and nuclear fuel cost inputs to the energy rates. The present filing represents a rate decrease to the Cities of at least $217,290.35 for the first year of service. The amount of the decrease depends upon the amount of energy purchased. The contract requires a minimum annual take, and the above figure is based upon that contract minimum.

PGandE has requested waivers to allow this rate decrease to become effective as of May 1, 1987, and to allow for an abbreviated informational filing procedure for future rate changes where the change is simply a revision of one of the rate formulae inputs. These informational filings would include a revised G–55 gas rate, a revised nuclear fuel rate (if this has changed), the effective date of the CPUC decision authorizing the G–55 rate change, and a showing of the customers' concurrence. PGandE requests that when the above information is filed, the filing fee be waived, and the changed energy rates be deemed effective on the effective date of the CPUC decision authorizing the changed G–55 gas rate.

Comment date: October 20, 1987, in accordance with Standard Paragraph E at the end of this notice.

2. Pacific Gas and Electric Company

[Docket No. ER87–590–000]

Take notice that on October 1, 1987, Pacific Gas and Electric Company (PGandE) tendered for filing an amendment to Docket No. ER87–590–000. Docket No. ER87–590–000 proposed five identical initial rate schedules for Economy Energy Sales to the southern California cities of Anaheim, Azusa, Banning, Colton, and Riverside (Cities).

The proposed amendment affects the calculation of the fixed-cost portion of a rate cap, pursuant to section 6.3 of each of the Agreements, under which energy may be sold. At the request of FERC Staff, PGandE has voluntarily:

1. Reduced the tax component of the rate cap from taxes at a 46-percent federal corporate income tax rate to a 34-percent federal corporate income tax rate.

2. Allocated the annual costs to the kilowatt-hours associated with a 72.9-percent Equivalent Availability Factor, as opposed to the initial kilowatt-hours

VOL 52 ISS 198 OCT 14 1987 UMI

associated with a 38.5-percent capacity factor.

The effects of the two adjustments reduces the fixed-cost portion of the rate cap from 16.2890 mills per kilowatt-hour to 8.1388 mills per kilowatt-hour.

Comment date: October 20, 1987, in accordance with Standard Paragraph E at the end of this notice.

In the matter of Virginia Electric and Power Company (Referred to as VEPCo); and Public Service Electric and Gas Company, Philadelphia Electric Company, Pennsylvania Power & Light Company, Baltimore Gas and Electric Company, Jersey Central Power & Light Company, Metropolitan Edison Company, Pennsylvania Electric Company, Potomac Electric Power Company, Atlantic City Electric Company and Delmarva Power & Light Company (Referred to collectively as the PJM Group).

3. VEPCo and PJM Group

[Docket No. ER87-348-000]

Take notice that on September 3, 1987, the Office of the Pennsylvania-New Jersey-Maryland (PJM) Interconnection tendered for filing, on behalf of the above listed parties to the VEPCo-PJM Agreement, additional information, at the Commission's request, with respect to modification of charges for Short Term Power services. The parties have requested a revised effective date of August 31, 1987 for the filing originally submitted on March 24, 1987, as modified.

Comment date: October 20, 1987, in accordance with Standard Paragraph E at the end of this notice.

In the matter of West Penn Power Company, Potomac Edison Company, and Monongahela Power Company, (Referred to collectively as the APS Group); and Public Service Electric and Gas Company, Philadelphia Electric Company, Pennsylvania Power & Light Company, Baltimore Gas and Electric Company, Jersey Central Power & Light Company, Metropolitan Edison Company, Pennsylvania Electric Company, Potomac Electirc Power Company, Atlantic City Electric Company and Delmarva Power & Light Company, (Referred to collectively as the PJM Group).

4. APS Group and PJM Group

[Docket No. ER87-338-000]

Take notice that on September 3, 1987, the Office of the Pennsylvania-New Jersey-Maryland (PJM) Interconnection tendered for filing, on behalf of the above listed parties to the APS-PJM Agreement, additional information, at the Commission's request, with respect to modification of charges for Short Term Power services. The parties have requested a revised effective date of August 31, 1987 for the filings orignially submitted on March 24, 1987, as modified.

Comment date: October 20, 1987, in accordance with Standard Paragraph E at the end of this notice.

In the matter of Cleveland Electric Illuminating Company, (Referred to as CEI); and Public Service Electric and Gas Company, Philadelphia Electric Company, Pennsylvania Power & Light Company, Baltimore Gas and Electric Company, Jersey Central Power & Light Company, Metropolitan Edison Company, Pennsylvania Electric Company, Potomac Electric Power Company, Atlantic City Electric Company, and Delmarva Power & Light Company, (Referred to collectively as the PJM Group).

5. CEI and PJM Group

[Docket No. ER87-389-000]

Take notice that on September 3, 1987, the Office of the Pennsylvania-New Jersey-Maryland (PJM) Interconnection tendered for filing, on behalf of the above listed parties to the CEI-PJM Agreement, additional information, at the Commission's request, with respect to modification of charges for Short Term Power services. The parties have requested a revised effective date of August 31, 1987 for the filings orignially submitted on April 16, 1987, as modified.

Comment date: October 20, 1987, in accordance with Standard Paragraph E at the end of this notice.

Standard Paragraph

E. Any person desiring to be heard or to protest said filing should file a motion to intevene or protest with the Federal Energy Regulatory Commisison, 835 North Capital Street, NE., Washington, DC 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 385.214). All such motions or protests should be filed on or before the comment date. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

[FR Doc. 87-23749 Filed 10-13-87; 8:45 am]

BILLING CODE 6717-01-M

[Docket No. CS72-73, et al.]

Joseph B. Gould, et al., Applications for Small Producer Certificates [1]

October 8, 1987.

Take notice that each of the Applicants listed herein has filed an application pursuant to section 7(c) of the Natural Gas Act and § 157.40 of the Commission's Regulations thereunder for a small producer certificate of public convenience and necessity authorizing the sale for resale and delivery of natural gas in interstate commerce, all as more fully set forth in the applications which are on file with the Commission and open to public inspection.

Any person desiring to be heard or to make any protest with reference to said applications should on or before October 23, 1987, file with the Federal Energy Regulatory Commission, Washington, DC 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's rules.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicants to appear or to be represented at the hearing.

Kenneth F. Plumb,

Secretary.

[1] This notice does not provide for consolidation for hearing of the several matters covered herein.

[1] By letter dated September 9, 1987, Applicant requests that his small producer certificate issued in Docket No. CS72-73 be amended to include the entity of Joseph B. Gould, Trust.

[2] By letter dated May 21, 1987, as supplemented by letters dated May 23 and August 13, 1987, received May 27 and August 17, 1987, respectively, Applicant states that Camille Chilocote and Mildred Moore inherited the interests of Barbara Price Mayhew in 1974. Applicant further states that Mildred Moore passed away in 1982 and devised here interest to Robin R. Williams. Applicant requests that the small producer certificate issued in Docket No. CS72-1183 to Barbara Price Mayhew be redesignated under the names of the Estate of Barbara Price Mayhew, Camille Chilcote and Robin R. Williams.

[3] By letter dated September 4, 1987, requesting redesignation of the small producer certificate issued to Roy Furr in Docket No. CS76-185 under the name of the Estate of Roy Furr.

[4] By letter dated August 7, 1987, received August 12, 1987, as supplemented by letter dated September 15, 1987, Applicant states that through corporate reorganization certain properties were transferred from OXOCO, the parent company and small producer certificate holder in Docket No. CS76-1068, to its wholly-owned subsidiary, Hawthorne Oil and Gas Corporation. Applicant requests that the small producer certificate issued to OXOCO in Docket No. CS76-1068 be amended to include Hawthorne Oil and Gas Corporation as co-holder of the small producer certificate issued in Docket No. CS76-1068

[5] By letter dated September 9, 1987, Applicant states that Billy W. Lee, as president of Resources Reserves Co., also owns various properties individually, and that the volume for his personal properties was included in the jurisdictional sales volumes shown in the original application for small producer certificate of Resource Reserves Co. Applicant requests that the name of Billy W. Lee be added to the small producer certificate in Docket No. CS87-29-000 as certificate co-holder.

[6] By letter dated September 10, 1987, Applicant states that Thomas R. Fuller, as president of Wyogram Oil Co., als owns various properties individually, and that the volume for his personal properties was included in the jurisdictional sales volume shown in the original application for small producer certificate of Wyogram Oil Co. Applicant requests that the name of Robert R. Fuller be added to the small producer certificate in Docket No. CS87-30-000 as certificate co-holder.

BILLING CODE 6717-01-M

[Project No. 8707-004]

Yakima—Tieton Irrigation District; Surrender of Preliminary Permit

October 8, 1987.

Take notice that Yakima—Tieton Irrigation District, permittee for the proposed Cle Elum Project, has requested that its preliminary permit be terminated. The permit was issued on September 30, 1985, and would have expired on August 31, 1988. The project would have been located on the Yakima River near the town of Easton, in Kittitas County, Washington. The permittee cites that the proposed project is not economically feasible as the basis for the surrender request.

The permittee filed the request on September 2, 1987, and the preliminary permit for Project No. 8707 shall remain in effect through the thirtieth day after issuance of this notice unless that day is a Saturday, Sunday or holiday as described in 18 CFR 385.2007, in which case the permit shall remain in effect through the first business day following that day. New applications involving this project site, to the extent provided for under 18 CFR Part 4, may be filed on the next business day.

Kenneth F. Plumb,
Secretary.

BILLING CODE 6717-01-M

[Docket Nos. CI78-781-003 and CI87-917-000]

Fina Oil and Chemical Co.; Application for Permanent Abandonment and Blanket Limited-Term Certificate With Pregranted Abandonment

October 8, 1987.

Take notice that on September 23, 1987, as supplemented on October 2, 1987, Fina Oil and Chemical Company (Fina) of P. O. Box 2159, Dallas, Texas 75221 filed applications pursuant to section 7 of the Natural Gas Act (NGA) and Parts 154 and 157 and § 2.7 of the Commission's Regulations under the NGA and the Natural Gas Policy Act of 1978 (NGPA). Fina requests in Docket No. CI78-781-003 permission and approval to abandon permanently a portion of its sales of natural gas to Northern Natural Gas Company, Division of Enron Corp. (Northern), from Platform B, Block A-571, High Island Area, South Addition, Outer Continental Shelf, Offshore Texas (Block 571 Gas). The gas is dedicated to Northern by certificate authorization in Docket No. CI78-781 and contract dated March 17, 1977, which is on file as Fina's FERC Gas Rate Schedule No. 117.

Fina's application in Docket No. CI78-781-003 involves the abandonment of up to 17,000 Mcf per day on a firm basis, and up to an additional 17,000 Mcf per day on an interruptible basis depending on the amount of gas Northern elects not to take on each day. Fina asserts that all Block 571 Gas is duly qualified under section 102(d) of the NGPA. Fina states that approval of its applications will relieve Northern of take-or-pay

obligations and permit Fina to sell the subject gas to others at market-clearing prices. Fina also requests in Docket No. CI87–917–000 the issuance of a blanket limited-term certificate of public convenience and necessity with three-year pregranted abandonment.

Fina requests that its application be considered on an expedited basis under procedures established by Order No. 436, Docket No. RM85–1–000, at 18 CFR 2.77. [1] Fina also requests waiver of certain of the Commission's regulations, including those Parts 154 and 271 thereof relating to the filing and maintenance of rate schedules.

Since Fina has requested that its application be considered on an expedited basis, all as more fully described in the application which is on file with the Commission and open to public inspection, any person desiring to be heard or to make protest with reference to said application should on or before 15 days after the date of publication of this notice in the **Federal Register**, file with the Federal Energy Regulatory Commission, Washington, DC 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceedings. Any person wishing to become a party to the proceeding herein must file a petition to intervene in accordance with the Commission's rules.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Fina to appear or to be represented at the hearing.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717–01–M

[Docket No. TA88–1–5–000]

Midwestern Gas Transmission Co.; Rate Filing Pursuant to Tariff Rate Adjustment Provisions

October 7, 1987.

Take notice that on September 30, 1987, Midwestern Gas Transmission Company (Midwestern) tendered for filing ten copies of Twenty-sixth Revised Sheet No. 6 of its FERC Gas Tariff, to be effective November 1, 1987. Midwestern states that this filing implements a Current Purchased Gas Cost Adjustment pursuant to Article XVIII of the General Terms and Conditions (the Northern System PGA clause) in order to reflect in the rates for Midwestern's Northern System Rate Schedules CR–2, CRL–2, SR–2 and I–2 the effective gas charges from TransCanada PipeLines Ltd. (TransCanada), the sole supplier of gas to Midwestern's Northern System. Midwestern also states that this filing does not change the present Northern System Gas Surcharge.

Midwestern states that the Current Purchased Gas Cost Adjustment reflected on Twenty-sixth Revised Sheet No. 6 consists of Unit Demand Rate Changes of $2.07 per Dkt for Rate Schedules CR–2 and CRL–2, $0.1701 per Dkt for Rate Schedule SR–2, and $0.0681 per Dkt for Rate Schedule I–2, and a negative Unit Gas Rate Change of $0.3602 per Dkt. Midwestern states further that the Unit rate changes are based upon the demand and commodity gas rates under Midwestern's gas contracts with TransCanada, and Midwestern's estimated sales billing units and system fuel requirements for the November 1987—March 1988 PGA period.

Midwestern states that copies of the filing have been mailed to all of its jurisdictional customers and affected state regulatory commissions.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practices and Procedure. All such motions or protests must be filed on or before October 14, 1987. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

Natural Gas Pipeline Company of America; Change in FERC Gas Tariff

October 8, 1987.

Take notice that on October 1, 1987, Natural Gas Pipeline Company of America (Natural) submitted for filing as part of its FERC Gas Tariff, Third Revised Volume No. 1, the below listing tariff sheets to be effective April 1, 1988:

Second Substitute Twenty-fifth Revised Sheet No. 301
Second Substitute Twenty-third Revised Sheet No. 302
Substitute Twenty-fourth Revised Sheet No. 303
Substitute Twenty-fourth Revised Sheet No. 304
Second Substitute Twenty-third Revised Sheet No. 305
Second Substitute Tenth Revised Sheet No. 306
Second Substitute Eleventh Revised Sheet No. 307
Substitute Eleventh Revised Sheet No. 308
Second Substitute Tenth Revised Sheet No. 309

Natural states that the puropose of the filing is to set out the Buyer's quantity entitlements under section 22 of the General Terms and Conditions of Natural's FERC Gas Tariff for the service year April 1, 1988 through March 31, 1989. Natural requested waiver of the Commission's regulations to the extent necessary to permit the revised sheets to become effective April 1, 1988, the beginning of the 1988–89 service year.

Natural states that the Monthly Quantity Entitlements on Sheet Nos. 301 through 309 have been changed, where required, to reflect requested changes in such entitlements by it's sixteen (16) DMQ–1 and thirty-three (33) G–1 customers. Customers requesting changes in Daily Quantity Entitlements were accommodated where feasible by Natural. Natural states that the Monthly and Daily Entitlements on these sheets provide sufficient gas volumes to allow each customer to fully meet (within contractual limits) its nominated requirements for Natural.

A copy of the filing was mailed to Natural's jurisdictional customers and to interested state regulatory agencies.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, DC 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practices and Procedure. All such motions or protests must be filed on or

---

[1] The United States Court of Appeals for the District of Columbia vacated the Commission's Order No. 436 on June 23, 1987. In vacating Order No. 436, the Court rejected challenges to the Commission's statement of policy in § 2.77 of its regulations. Section 2.77 states that applications for certificate and abandonment authority where the producers assert they are subject to substantially reduced takes without payment.

before October 15, 1987. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

[Docket No. TA87-2-27-001]

North Penn Gas Co.; Proposed Changes in FERC Gas Tariff

October 8, 1987.

Take notice that North Penn Gas Company (North Penn) on October 1, 1987, tendered for filing proposed changes to its FERC Gas Tariff, First Revised Volume No. 1 pursuant to its PGA Clause and the Federal Energy Regulatory Commission's (Commission) letter order dated September 18, 1987, in Docket No. TA87-2-27-000 to be effective September 1, 1987.

North Penn states that the Commission's letter order dated September 18, 1987 accepted North Penn's PGA filing "subject to downward revisions to reflect any modifications in its pipeline supplier rates tracked herein effective September 1, 1987."

North Penn states that this filing reflects its pipeline supplier rates filed and approved to be effective September 1, 1987.

North Penn states that additionally submitted as Appendix E are the data required by the Commission letter order dated September 18, 1987 pertaining to the minimum bill costs from Transcontinental Gas Pipeline Corporation (Transco) as were included in North Penn's August 20, 1987 PGA filing.

North Penn states that in all other aspects this filing contains the same changes as filed on August 20, 1987 in Docket No. TA87-2-27-000 and approved by the Commission's letter order dated September 18, 1987.

North Penn respectfully requests wavier of any of the Commission's Rules and Regulations as may be required to permit this filing to become effective September 1, 1987 as proposed.

Copies of this letter of transmittal and all enclosures are being mailed to each of North Penn's jurisdictional customers and interested State Commissions.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NW., Washington, DC 20426, in accordance with 211 and 214 of the Commission's Rules of Practice and Procedure. All such motions or protests should be filed on or before October 15, 1987. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

[Docket No. RP86-3-000]

Sabine Pipe Line Co.; Proposed Changes in FERC Gas Tariff

October 8, 1987.

Take notice that Sabine Pipe Line Company (Sabine) on October 1, 1987, tendered for filing the following proposed changes to its FERC Gas Tariff, First Revised Volume No. 1, to be effective November 1, 1987:

Fourth Revised Sheet No. 20
Second Revised Sheet No. 100
Second Revised Sheet No. 101
Second Revised Sheet No. 120
Second Revised Sheet No. 121
Second Revised Sheet No. 130
Second Revised Sheet No. 131
Second Revised Sheet No. 140
Second Revised Sheet No. 141

Sabine states that the listed tariff sheets set forth the transportation rates and applicable tariff provisions required to place the rates into effect, applicable to the Annual Charge Adjustment, pursuant to the Commission's Regulations as set forth in Order No. 472 and 472-A issued May 29, 1987 and June 17, 1987, respectively.

Copies of the filing were served upon the Sabine customers, the Louisiana Department of Natural Resources and the Railroad Commission of Texas.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure. All such motions or protests must be filed on or before October 15, 1987. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of Sabine's filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

Economic Regulatory Administration

[ERA Docket No. 87-38-NG]

Vector Energy (U.S.A.) Inc.

AGENCY: Economic Regulatory Administration, DOE.

ACTION: Notice of order granting blanket authorization to export natural gas.

SUMMARY: The Economic Regulatory Administration (ERA) of the Department of Energy gives notice that it has issued an order granting blanket authorization to Vector Energy (U.S.A.) Inc. (Vector) to export natural gas. The order issued in ERA Docket No. 87-38-NG authorizes Vector to export up to 60 Bcf of natural gas over a two-year period, beginning on the date of first delivery.

A copy of this order is available for inspection and copying in the Natural Gas Division Docket Room, GA-076, Forrestal Building, 1000 Independence Ave., SW., Washington DC 20585, (202) 586-9478. The docket room is open between the hours of 8:00 a.m. and 4:30 p.m., Monday through Friday, except Federal holidays.

Issued in Washington, DC, October 5, 1987.

Constance L. Buckley,

Director, Natural Gas Division, Office of Fuels Programs, Economic Regulatory Administration.

BILLING CODE 6450-01-D

Office of Hearings and Appeals

Issuance of Proposed Decisions and Orders; Period of August 17 through September 11, 1987

During the period of August 17 through September 11, 1987, the proposed decision and order summarized below was issued by the Office of Hearings and Appeals of the Department of Energy with regard to an application for exception.

Under the procedural regulations that apply to exception proceedings (10 CFR Part 205, Subpart D), any person who will be aggrieved by the issuance of a proposed decision and order in final form may file a written notice of objection within ten days of service. For purposes of the procedural regulations, the date of service of notice is deemed to be the date of publication of this Notice or the date an aggrieved person receives actual notice, whichever occurs first.

The procedural regulations provide that an aggrieved party who fails to file a Notice of Objection within the time period specified in the regulations will be deemed to consent to the issuance of the proposed decision and order in final form. An aggrieved party who wishes to contest a determination made in a proposed decision and order must also file a detailed statement of objections within 30 days of the date of service of the proposed decision and order. In the statement of objections, the aggrieved party must specify each issue of fact or law that it intends to contest in any further proceeding involving the exception matter.

Copies of the full text of this proposed decision and order are available in the Public Reference Room of the Office of Hearings and Appeals, Room 1E-234, Forrestal Building, 1000 Independence Avenue, SW., Washington, DC 20585, Monday through Friday, between the hours of 1:00 p.m. and 5:00 p.m., except Federal holidays.

October 2, 1987.

George B. Breznay,

Director, Office of Hearings and Appeals.

Sellers Oil Co., Bainbridge, GA; KEE-0144; Reporting Requirements

Sellers Oil Company filed an Application for Exception from the requirement that it file Form EIA-782B, entitled "Resellers/Retailers' Monthly Petroleum Product Sales Report." On September 9, 1987, the Department of Energy issued a Proposed Decision and Order which tentatively determined that the exception request be denied.

[FR Doc. 87-23575 Filed 10-13-87; 8:45 am]

BILLING CODE 6450-01-D

Issuance of Proposed Decisions and Orders; Week of September 14 through September 18, 1987

During the week of September 14 through September 18, 1987, the proposed decisions and orders summarized below were issued by the Office of Hearings and Appeals of the Department of Energy with regard to applications for exception.

Under the procedural regulations that apply to exception proceedings (10 CFR Part 205, Subpart D), any person who will be aggrieved by the issuance of a proposed decision and order in final form may file a written notice of objection within ten days of service. For purposes of the procedural regulations, the date of service of notice is deemed to be the date of publication of this Notice or the date an aggrieved person receives actual notice, whichever occurs first.

The procedural regulations provide that an aggrieved party who fails to file a Notice of Objection within the time period specified in the regulations will be deemed to consent to the issuance of the proposed decision and order in final form. An aggrieved party who wishes to contest a determination made in a proposed decision and order must also file a detailed statement of objections within 30 days of the date of service of the proposed decision and order. In the statement of objections, the aggrieved party must specify each issue of fact or law that it intends to contest in any further proceeding involving the exception matter.

Copies of the full text of these proposed decisions and orders are available in the Public Reference Room of the Office of Hearings and Appeals, Room 1E-234, Forrestal Building, 1000 Independence Avenue, SW., Washington, DC 20585, Monday through Friday, between the hours of 1:00 p.m. and 5:00 p.m., except Federal holidays.

October 2, 1987.

George B. Breznay,

Director, Office of Hearings and Appeals.

Coble Oil Co., Jim Woods Marketing Co.; Treece, KS; KEE-0146, KEE-0148; Reporting Requirements

Coble Oil Company and Jim Woods Marketing Company filed Applications for Exception from the provisions of the EIA's reporting requirement for resellers. The exception request, if granted, would permit Coble and Woods to be relieved of the requirements to complete and submit Form EIA-782B, entitled "Resellers'/Retailers' Monthly Petroleum Product Sales Report." On September 15, 1987, the Department of Energy issued a Proposed Decision and Order which determined that the exception requests be denied.

Le Paul Oil Co., Inc.; Troy, OH; KEE-0147; Reporting Requirements

Le Paul Oil Company, Inc. (Le Paul) filed an Application for Exception from the requirement to file Form EIA-782B. The exception request, if granted, would permit Le Paul to be exempt from the filing requirement due to undue hardship. On September 14, 1987, the Department of Energy issued a Proposed Decision and Order which determined that the exception request be denied.

[FR Doc. 87-23576 Filed 10-13-87; 8:45 am]

BILLING CODE 6450-01-D

Cases Filed; Week of August 28 Through September 4, 1987

During the Week of August 28 through September 4, 1987, the appeals and applications for exception or other relief listed in the Appendix to this Notice were filed with the Office of Hearings and Appeals of the Department of Energy. Submissions inadvertently omitted from earlier lists have also been included.

Under DOE procedural regulations, 10 CFR Part 205, any person who will be aggrieved by the DOE action sought in these cases may file written comments on the application within ten days of service of notice, as prescribed in the procedural regulations. For purposes of the regulations, the date of service of notice is deemed to be the date of publication of this Notice or the date of receipt by an aggreived person of actual notice, whichever occurs first. All such comments shall be filed with the Office of Hearings and Appeals, Department of Energy, Washington, DC 20585.

George B. Breznay,

Director, Office of Hearings and Appeals.

October 6, 1987.

LIST OF CASES RECEIVED BY THE OFFICE OF HEARINGS AND APPEALS

[Week of Aug. 28 through Sept. 4, 1987]

Date	Name and location of applicant	Case No	Type of submission
July 8, 1987	California, Kern County, CA	KRZ-0521	Interlocutory. If granted: California would be permitted to participate in all aspects of the enforcement proceeding involving Kern Oil Refining Company (Case No KRO-0520)
Aug. 25, 1987	Brookville Leasing Ltd., Austin, TX	RR270-14	Request for Modification/rescission. If granted: The May 12, 1987, determination issued to Brookville Leasing Ltd. (Case No. RF270-1635) would be modified regarding the firm's application for refund in the surface transporter refund proceeding.
July 28, 1987	Texaco Inc., White Plains, NY	KRZ-0066	Interlocutory. If granted: The Office of Hearings and Appeals would issue an order imposing sanctions on the Economic Regulatory Administration and directing additional discovery with respect to the April 12, 1987 Decision and Order issued to Texaco Inc. (Case No. KRD-0021).
Aug. 31, 1987	Miller, Nash, Wiener, Hager & Carlsen, Portland, OR	KFA-0117	Appeal of an information request denial. If granted: The July 29, 1987 denial of a request for waiver of fees issued by Bonneville Power Administration in connection with a Freedom of Information Act request would be rescinded and Miller, Nash, Wiener, Hager & Carlsen would be refunded $2,513.50
Do	Time Oil Company, Washington, DC	KFA-0119	Appeal of an information request denial. If granted: The Office of Hearings and Appeals would determine if data submitted by Time Oil Company should be exempted from disclosure pursuant to a Decision and Order granting in part Steptoe and Johnson's Freedom of Information Request (Case No. KFA-0103)
Sept. 1, 1987	Lintel Technology, Inc., Roslyn, NY	KFA-0118	Appeal of an information request denial. If granted: The Freedom of Information Request Denial issued by the DOE Office of Energy Research would be rescinded and Lintel Technology, Inc. would receive access to documents relating to the internal reviews of proposal Number 4571-86-II submitted in response to Program Solicitation DOE/ER-01-0180/2.
Sept. 2, 1987	Vanderbilt Energy Corporation, Washington, DC	KEF-0097	Implementation of special refund procedures. If granted: The Office of Hearings and Appeals would implement special refund procedures pursuant to 10 CFR Part 205, Subpart V, in connection with the June 24, 1987 consent order which the DOE entered into with Vanderbilt Energy Corporation
Sept. 11, 1987	Clean Machine, Inc., Washington, DC	KEF-0017	Implementation of special refund procedures. If granted: The Office of Hearings and Appeals would implement special refund procedures pursuant to 10 CFR Part 205, Subpart V, in connection with the consent order which the DOE entered into on July 6, 1987, with Clean Machine, Inc.

REFUND APPLICATIONS RECEIVED

[Week of Aug. 28 to Sept. 4, 1987]

Date received	Name of refund proceeding/name of refund applicant	Case No
8/18/87	M. & R. Coutermarsh	RF265-2550
8/28/87	Louis DeLorenzo	RF265-2549
8/28/87	Vickers/Iowa	RQ1-393
8/28/87	Amoco/Iowa	RQ521-394
8/28/87 Thru 9/4/87	Crude Oil Applications Received.	RF272-5034 Thru RF272-5537
9/1/87	Chula Enterprises, Inc	RF225-10904
9/2/87	James S. Passantino	RF225-10905

[FR Doc. 87-23688 Filed 10-13-87; 8:45 am]

BILLING CODE 6450-01-M

Issuance of Decisions and Orders; Week of September 7 Through September 11, 1987

During the week of September 7 through September 11, 1987, the decisions and orders summarized below were issued with respect to applications for exception or other relief filed with the Office of Hearings and Appeals of the Department of Energy. The following summary also contains a list of submissions that were dismissed by the Office of Hearings and Appeals.

Requests for Exception

Deaton Oil Company, 9/8/87; KEE-0142

Deaton Oil Company (Deaton Oil) filed an Application for Exception from the requirement that it file Form EIA-821, entitled "Annual Fuel Oil and Kerosene Sales Report." In considering the firm's request, the Office of Hearings and Appeals found that Deaton Oil is in the midst of bankruptcy proceedings and has therefore reduced its staff. Furthermore, the OHA found that the President of Deaton Oil, Mr. J.D. Beavert, had limited access to the records of the company because they are currently being reviewed by an accountant. The OHA concluded that Deaton Oil's lack of personnel, along with the difficulty of obtaining the company's records, result in a significant burden which exceeds the burden normally associated with the completion of Form EIA-821. Consequently, the OHA granted Deaton Oil permanent relief from the requirement to file Form EIA-821.

Site Oil Company, 9/8/87; KEE-0145

Site Oil Company (Site) filed an Application for Exception from the requirement that it file Form EIA-782B, entitled "Reseller/Retailers' Monthly Petroleum Product Sales Report." In considering the request, the DOE found that Site's reporting burden was not significantly different from that of other firms participating in the EIA-782B survey. Accordingly, exception relief was denied.

Motion for Discovery

Economic Regulatory Administration, 9/11/87; KRD-0028

The Economic Regulatory Administration (ERA) filed a Motion for Discovery in connection with an enforcement proceeding pending against Cities Service Oil and Gas Corporation (Cities). In its discovery request, the ERA requested Cities to produce documents in order to permit the ERA to prepare for the upcoming evidentiary hearing to be held in the Cities case. The DOE held that Cities need not produce the deposition testimony of Mr. Frank Bowen since discovery of that testimony was denied in a previous Decision and Order. With respect to the remainder of the documents, the DOE found that an order compelling discovery was not warranted since Cities was willing to provide the ERA with documents responsive to its request. Accordingly, the Motion for Discovery was denied.

Implementation of Special Refund Procedures

Bernard A. Krouse d/b/a BAK Ltd., Krouse Fuel Company, Allan Fuel Company, Kealy Fuel Company, Walter T. Hoff & Son, 9/10/87; HEF-0034

The DOE issued a Decision and Order which established procedures to be used in evaluating claims for refunds from the $250,000 settlement fund obtained through a consent order entered into by Bernard A. Krouse, Krouse Fuel Company, Allan Fuel Company, Kealy Fuel Company, and Walter T. Hoff & Son (collectively referred to as BAK Ltd.) and the DOE. The settlement fund was provided by BAK Ltd. to settle alleged pricing violations which occurred in the sales of No. 2 heating oil

BEST COPY AVAILABLE

VOL 52 ISS 198 OCT 14 1987 UMI

by the firm. The transactions covered by the BAK consent order occurred between November 1, 1973 and July 31, 1974. Refunds will be made to applicants who can demonstrate that they were injured as a result of BAK's pricing practices during the consent order period. However, reseller applicants whose claim is for $5,000 or less and end-users of BAK's No. 2 heating oil need only document their purchase claims in order to receive a refund.

Gulf Oil Corporation, 9/8/87; HEF–0590

The DOE issued a Decision and Order establishing procedures for distribution of approximately $31 million received from Gulf Oil Corporation and related to alleged overcharges with respect to Gulf's sales of refined petroleum products. The Decision describes the presumptions that will be used in analyzing refund applications and sets forth information which refund applicants must include.

Refund Applications

Austin Tupler Trucking, Inc., 9/11/87; RF270–1725

The Department of Energy (DOE) issued a Decision and Order regarding an Application for Refund from the Surface Transporters Escrow, established as a result of the Stripper Well Settlement Agreement. The refund application was filed by American Trucking Associations, Inc. on behalf of Austin Tupler Trucking, Inc. (Austin Tupler). The DOE determined that owner operator volumes should be excluded from Austin Tupler's claim because the firm's owner-operators paid for the products. Since Austin Tupler purchased for use in its own vehicles less than the 250,000 gallon minimum for the Surface Transporters proceeding, the firm was deemed by the DOE to be ineligible to receive a refund from the Surface Transporters Escrow.

Bicentennial Transport, Inc.; Betz Laboratories, Inc., 9/9/87; RF270–1183, RF270–1250

The Department of Energy issued a Decision and Order approving applications submitted by Bicentennial Transport, Inc. and Betz Laboratories, Inc. for refunds from the Surface Transporters Escrow established as a result of the Stripper Well Agreement. These companies each purchased over 250,000 gallons of motor gasoline and diesel fuel between August 19, 1973 and January 27, 1981, and demonstrated that they were Surface Transporters. The total number of gallons approved in this Decision was 1,686,858.

Frank Martz Coach Company, et al., 9/11/87; RF270–1344 et al.

The Department of Energy (DOE) issued a decision and Order approving in full the volumes claimed in seven Applications for Refund and approving in part the volumes claimed in ten Applications for Refund from the Surface Transporters Escrow established as a result of the Stripper Well Settlement Agreement. The DOE eliminated from the ten applications a portion of each claim that was based on gallons of fuel purchased by owner-operators of the applicant. The DOE will determine a per gallon refund amount and establish the amount of the 17 companies' refunds based on their approved volumes after it completes its analysis of all Surface Transporter claims.

Getty Oil Company/A & D Oil Company, et al., 9/11/87; RF265–2395, et al.

The DOE issued a Decision and Order concerning 18 Applications for Refund filed by resellers or retailers of products covered by a consent order that the DOE entered into with Getty Oil Company. Each applicant submitted information indicating the volume of its Getty purchases. In 14 of these cases, the applicants were eligible for a claim below the $5,000 threshold. In the remaining four cases, the applicants elected to limit their claims to $5,000. The total refunds approved in this decision are $63,279, representing $31,663 in principal and $31,616 in accrued interest.

Getty Oil Company/Adams Skelly, et al., 9/9/87; RF265–1627, et al.

The DOE issued a Decision and Order concerning 70 Applications for Refund filed by resellers or retailers of products covered by a consent order that the DOE entered into with Getty Oil Company. Each applicant submitted information indicating the volume of its Getty purchases. None of them was entitled to a refund greater than the $5,000 small claim refund amount. The total refunds approved in this decision is $181,740, representing $90,928 in principal and $90,812 in accrued interest.

Gulf Oil Corporation/Barefoot Oil Company of Concord, 9/11/87; RF40–2639

The DOE issued a Decision and Order concerning an Application for Refund filed by Barefoot Oi1 Company of Concord, a Concord, North Carolina firm that operated as both a retailer and as a consignee agent of Gulf Oil corporation petroleum products. The firm applied for a refund based on the procedures outlined in *Gulf Oil Corp.*, 12 DOE ¶ 85,048 (1984), governing the disbursement of settlement funds received from Gulf pursuant to a 1978 Consent Order. With respect to its purchases of 4,385,667 gallons of Gulf middle distillates during the consent order period, Barefoot demonstrated that it would not have been required to pass through to its customers a cost reduction equal to the amount of the refund claimed. Using data that compared North Carolina's increasing motor gasoline consumption to Barefoot's declining sales volumes, the firm also showed that Gulf's competitive prices caused it to lose 3,428,383 gallons of motor gasoline consignment sales during the consent order period. After examining the application and supporting documentation submitted by Barefoot, the DOE concluded that the firm should receive a refund of $12,034, representing $9,533 in principal and $2,501 in accrued interest.

Gulf Oil Corp./Glenn's Gulf Coast Service, 9/11/87; RF40–3409

The DOE issued a Decision granting the Application for Refund from the Gulf Oil Corp. consent order fund filed by Glenn's Gulf Coast Service (Glenn's), a retailer of Gulf motor gasoline. In considering the application, the DOE found that Glenn's would not have been required to pass through to its customers a cost reduction equal to the refund claimed. Accordingly, Glenn's was granted a refund of $232, representing $184 in principal and $48 in interest.

Gulf Oil Corporation/Harvey Oil Company, 9/11/87; RF40–3656

The DOE issued a Decision and Order concerning an Application for Refund filed by Stoel, Rives, Boley, Jones & Grey on behalf of Harvey Oil Company. The firm applied for a refund based on the procedures outlined in *Gulf Oil Corp.*, 12 DOE ¶ 85,048 (1984). After examining the supporting data submitted by the applicant, the DOE concluded that the firm should receive a refund of $10,704 ($8,480 principal plus $2,224 interest).

Marathon Petroleum Company/Capitol Oil Company, 9/8/87; RF250–2725

The DOE issued a Decision and Order concerning an Application for Refund filed by Capitol Oil Company, a retailer of motor gasoline covered by a consent order that the agency entered into with Marathon Petroleum Company. The Applicant demonstrated the volume of its purchases from Marathon, and requested a refund amount below the $5,000 small claims threshold. The refund approved in this Decision is $4,602 in principal and $537 in interest.

Mobil Oil Corp./Adams & Ruxton Construction Co. et al., 9/8/87; RF225–522 et al.

The DOE issued a Decision and Order granting 32 applications of end-users and retailers requesting refunds from the Mobil Oil Corporation consent order fund. Each applicant presented evidence that it purchased refined petroleum products from Mobil during the consent order period. The end-user applicants purchased product both directly and indirectly supplied by Mobil. According to the methodology set forth in *Mobil Oil Corp.*, 13 DOE ¶ 85,339 (1985) (*Mobil*), each end-user applicant was found to be eligible for a refund from the Mobil consent order fund based on the volume of its purchases times 100 percent of the volumetric refund amount, except that refunds for indirect motor gasoline purchases were based on the volume times 60 percent of the volumetric refund amount. Two of the applications were filed by retailers supplied directly by Mobil. According to the presumptions set forth in *Mobil*, these applicants were eligible for a refund from the Mobil consent order fund based on the volume of its motor gasoline purchases times 30 percent of the volumetric refund amount. Retailers of products other than motor gasoline received the full volumetric refund amount. The refunds approved in the Decision totaled $34,073.

Mobil Oil Corporation/Alden Oil Company et al., 9/11/87; RF225–5833 et al.

The DOE issued a Decision granting 33 Applications for Refund from the Mobil Oil Corporation escrow account filed by retailers and resellers of Mobil refined petroleum products. Each applicant elected to apply for a refund based upon the presumptions set forth in *Mobil Oil Corp.*, 13 DOE ¶ 85,339 (1985). The DOE granted refunds totalling $47,965 ($38,957 in principal plus $9,008 in interest).

Mobil Oil Corporation, Bauer Service, Inc., et al., 9/8/87; RF225–3118 et al.

The DOE issued a Decision granting twelve Applications for Refund from the Mobil Oil Corporation escrow account filed by retailers and resellers of Mobil refined petroleum products. Each applicant elected to apply for a refund based upon the presumptions set forth in *Mobil Oil Corp.*, 13 DOE ¶ 85,339 (1985). The DOE granted refunds totalling $19,377 ($15,770 in principal plus $3,607 in interest).

Morgan Drive Away, Inc., 9/9/87; RF271–2483, RF271–81

The Office of Hearings and Appeals (OHA) issued a Decision and Order to two affiliated companies regarding their respective Applications for Refunds from the Rail and Water Transporters (RTW) Escrow and the Surface Transporters (ST) Escrow. Based on prior decisions, OHA held that the two firms could not receive refunds from both the RWT and the ST Escrows. Consequently, OHA first considered the larger RWT application, and finding that it was supported, granted a refund based on the firm's use of 52,980,820 gallons of U.S. petroleum products. OHA then dismissed the small ST application.

Norman Borthers, Inc., Port Terminal Railroad, 9/11/87; RF271–190, RF271–191

The Office of Hearings and Appeals (OHA) issued a Decision and Order to two companies granting their respective Applications for Refunds from the Rail and Water Transporters Escrow. OHA found that both applicants had established that they were members of the RWT class, and had substantiated their purchases of the volumes of U.S. petroleum products claimed in their respective applications. The total number of gallons approved in the Decision and Order was 18,202,397.

TNT North America, Inc., 9/11/87; RF270–923

TNT North America, Inc. filed an Application for Refund, seeking funds from the Surface Transporters Escrow established pursuant to the Settlement Agreement in *In Re: The Department of Energy Stripper Well Exemption Litigation*, M.D.L. 378. The DOE examined the firm's claim and ascertained that it is an eligible surface transporter, and its claim did not exceed the gallons of petroleum products that the applicant consumed in vehicle operations. The total volume approved in this Decision and Order is 143,264,710 gallons.

Wisconsin Michigan, Coaches, Inc., et al. 9/11/87; RF270–1658 et al.

The Department of Energy (DOE) issued a Decision and Order approving the volumes claimed in seven Applications for Refund from the Surface Transporters Escrow established as the result of the Stripper Well Settlement Agreement. The DOE will determine a per gallon refund amount and establish the amount of each company's refund after it completes its analysis of all Surface Transporter claims.

Dismissals

The following submissions were dismissed:

Alexandria Yellow Cab—RF270–1685
Algoma Central Railway—Marine Division—RF271–154
Coalition for Safe Power—KFA–0118
Eureka Equity Exchange—RF270–854
Hawaiian Tug & Barge Corporation—RF271–151
Ramona Oil Company—RF157–4
Rusty's Gulf—RF40–223
Seattle Oil Service, Inc.—KEE–0149
Young Brothers, Ltd.—RF271–150

Copies of the full text of these decisions and orders are available in the Public Reference Room of the Office of Hearings and Appeals, Room lE–234, Forrestal Building, 1000 Independence Avenue, SW., Washington, DC 20585, Monday through Friday, between the hours of 1:00 p.m. and 5:00 p.m., except federal holidays. They are also available in *Energy Management: Federal Energy Guidelines*, a commercially published loose leaf reporter system.

October 6, 1987.

George B. Breznay,

Director, Office of Hearings and Appeals.

Agency Information Collection Activities Under OMB Review

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: Section 3507(a)(2)(B) of the Paperwork Reduction Act of 1980 (44 U.S.C. 3501 *et seq.*) requires the Agency to publish in the **Federal Register** a notice of proposed information collection requests (ICRs) that have been forwarded to the Office of Management and Budget (OMB) for review. The ICR describes the nature of the solicitation and the expected impact, and where appropriate includes the actual data collection instrument. The following ICRs are available for review and comment.

FOR FURTHER INFORMATION CONTACT: Carla Levesque at EPA, (202) 382–2740 (FTS 382–2740).

SUPPLEMENTARY INFORMATION:

Office of Water

Title: National Tapwater Consumption Survey (Pilot Survey); (EPA ICR #1383).

Abstract: A small sample of individuals will be surveyed on tapwater consumption patterns. EPA will use the results to design a national survey.

Respondents: Individuals.

Estimated Annual Burden: 195 hours.

Frequency of Collection: One time.

Title: Public Water System Program Information (Monitoring for Volatile Synthetic Organic Chemicals). (EPA ICR #0270–VOC).

Abstract: Community water systems must monitor for chemicals as specified in EPA and State regulations. EPA and the States use the data to determine the systems' compliance with Maximum Contaminent Level regulations (40 CFR Part 141).

Respondents: Community Water Systems.

Estimated Annual Burden: 106,485 hours.

Frequency of Collection: Ranges from quarterly to once every five years, depending on initial monitoring results.

National Emission Standards for Hazardous Air Pollutants (NESHAPS); Extension Under Standards for Radon-222 Emissions From Licensed Uranium Mill Tailings

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice of application.

SUMMARY: Notice is being given in accordance with the provisions of 40 CFR 61.252(e)(4), that Pathfinder Mines Corporation has applied for a five year extension so that it can continue to place uranium mill tailings on existing mill tailings piles at its Shirley Basin mill site and at its Lucky Mc mill site. EPA is inviting public comment as to whether or not the application should be approved for any of the piles at either the Shirley Basin facility or the Lucky Mc facility, or both.

DATE: The period for public comment will end on November 13, 1987.

ADDRESSES: Comments should be sent to: Central Docket Section (LE–131), U.S. Environmental Protection Agency, 401 M Street SW., Washington, DC 20460. The decision making record is contained in Docket No. A 79–11. This docket is available for public inspection between 8:00 a.m. and 3:00 p.m., Monday through Friday, at EPA's Central Docket Section, Room 4, South Conference Center, Waterside Mall, 401 M Street SW., Washington, DC 20460. A reasonable fee may be charged for copying.

FOR FURTHER INFORMATION CONTACT: Jay Silhanek, Environmental Standards Branch, Criteria and Standards Division (ANR–460), Office of Radiation Programs, U.S. Environmental Protection Agency, Washington, DC 20460, (202) 475–9610.

SUPPLEMENTARY INFORMATION:

I. Background

On August 15, 1986, the Environmental Protection Agency (EPA) promulgated a National Emission Standard for Hazardous Air Pollutants (NESHAS) under the authority of section 112 of the Clean Air Act for radon-222 emissions from licensed uranium mill tailings. This NESHAPS is a work practice standard which requires that no new tailings be placed on existing uranium tailing piles after December 31, 1992. However, the rule allows for the continued use of those piles to December 31, 2001, if the owners are granted either an exception or an extension by the Administrator of EPA. On January 7, 1987, Pathfinder Mines Corporation applied for five year extensions pursuant to 40 CFR 61.252(e)(1)(ii). EPA requested more information from Pathfinder and on April 11, 1987, received complete applications.

As required by 40 CFR 61.252(e)(4), EPA is providing public notice and is requesting comment on the applications before deciding whether or not the applications will be approved. EPA will hold a public hearing on this action, if such a hearing is requested by the public.

Although Pathfinder has simultaneously applied for an extension at two facilities, EPA will make a separate decision on each tailings pile. To aid this process commentors should denote which of their comments apply to piles at Shirley Basin, which comments apply to piles at Licky Mc and which comments apply to both facilities. Comments on the adequacy of protection to public health and amount of risk would be appreciated.

II. Grounds for Approval

Pursuant to 40 CFR 61.252(e)(1)(ii) an extension will be granted if the owner demonstrates there will be protection of the public health with an ample margin of safety. The EPA decision on whether or not to grant the applications will be based on an analysis of the risk to the public health that will result from the continued use of the mill tailings facilities for the period of the extension. EPA will take into account the size and condition of the pile, the size and location of the nearby population, the length of the extension requested, the existence and effectiveness of any risk reduction practices that are or will be taken and the expected level of future mill activity. Additional information on these factors was provided by the applicant to assist EPA in its analysis. As part of the action, Pathfinder must certify that the operations of both sites are in compliance with applicable existing Nuclear Regulatory Commission (NRC) regulations and license conditions. Comments from the public will also be considered in our decision.

In determining whether or not to grant an extension for a tailings pile, EPA will not examine the condition of the ground water at the mill sites. Ground water is already protected under existing EPA rules which are implemented by NRC.

III. Lucky Mc Mill

A. Location and Description

The Lucky Mc Uranium Mill is located in the Gas Hills region of Fremont County, Wyoming, about 25 mi northeast of Jeffrey City. This mill first began producing yellowcake in 1958 with a nominal ore processing capacity of 935 tons/day. Since then, the capacity has been expanded to the current level of about 2,800 tons of ore per day.

Pathfinder's open pit mining operations, located 1 to 2 miles from the mill, supply most of the ore. The ore grade has averaged 0.21 percent U_3O_8 in past operations and is expected to average 0.11 percent in the future.

The tailings retention system consists of four tailings impoundments. The impoundments are situated sequentially in the head of a gully north by northeast of the mill and are dug into an underlying shale formation. The clay core dams are keyed into the shale. The average tailings depth is now 40 ft and is expected to increase to 60 ft by the end of the projected milling operation in 1996 (end of extension). Water is sprayed over the dry tailings during warm weather to control dust, but not radon. As of August 1986, the dry beaches account for 172 acres of the total area, whereas 96 acres are covered with tailings solution. The remaining 21 acres of exposed tailings were saturated with water. This ration will change with time. The amount of tailings under management was 12×10^6 tons.

Separate measurements have been made for the homogeneous solid tailings, cycloned tailings sand, and the slimes. EPA estimates the radium-226 content at 420 PCi/g for the total pile. This activity was used to make estimates of radon emissions to air which were 16 kCi/yr when dry and 9 kCi/yr when partially wet for all the piles.

The Pathfinder Lucky Mc Mill is in a remote location away from permanent habitation. A 1983 survey indicated 58 people living within a 5 km radius of the tailings piles. These people lived at a camp for the mill workers and their families. This camp was closed in 1984. There are no known residences within 22 km of the site of this time.

B. Size and Use of Piles

Pathfinder has provided the following information concerning the size and capacity of the tailings impoundments at the Lucky Mc Mill in Table 1:

TABLE 1.—LUCKY MC TAILINGS FACILITIES PILE SIZE AND CAPACITIES

Pile	Total storage capacity (tons)	Current tailings (tons)	Remaining capacity (tons)	Surface area (A) (acres)
1	5,100,000	4,800,000	350,000	53
2	4,800,000	3,900,000	890,000	77
2A	7,500,000	3,100,000	4,500,000	102
3 and 4 Currently licensed for solution storage only.				149
Total	17,400,000	11,800,000	5,740,000	381

(*) Surface area will remain the same as capacity of pile is used.

If the Lucky Mc Mill operates at the licensed rate of 2,800 tons/day, the amount of time left to fill the existing impoundments would be about 7 years. However, they are estimating that they will operate at an average of 850 tons/day during 1987 and 430 tons/day from 1988–1990. After 1990 the average rate would be even lower. The applicant feels they could operate through 2006 with their current capacity. However, they will have to cease using the existing impoundments in 2001 to comply with the mill tailings NESHAPS even if multiple extensions are granted.

Piles 1 and 2 are being used for water control. It is unclear at this time whether these ponds are necessary since pile 2A has sufficient capacity to continue operations at a reduced rate of operation.

C. Condition of the Tailings System

The tailings system has not received new tailings since 1985. As a result, it has been temporarily stabilized with an interim soil cover to prevent windblown tailings off the site. During operation the surface area would be covered with wet tailings minimizing the dry beach area. The discharge line would be relocated periodically to keep most of the surface area wet.

All the dams are inspected on a daily basis for any signs of instability. The NRC also inspects the dams at least once a year. In November 1986, a local engineering firm conducted an investigation of the stability of the dams. It concluded that the existing dam slopes are stable. No seepage was observed.

A pump back system for seepage through the dams was installed in 1984. This was checked in 1985 by a private consulting firm and was felt to be adequate for the planned addition of more wet tailings. Monthly monitoring of wells around the piles are done to determine water level changes.

EPA is not considering the possible water contamination of the ground water with this action. Water pollution from active tailings piles has been covered under the Uranium Mill Tailings Radiation Control Act (UMTRCA). The NRC is implementing standards developed by EPA under this Act.

D. Assessment of Risk

The AIRDOS EPA and DARTAB codes and an assumed radon-222 deay product equilibrium fraction of 0.7 were used by EPA to estimate the increased chance of lung cancer for individuals living near a tailings impoundment and receiving the maximum exposure. For the Lucky Mc Mill, the maximum lifetime risk for an individual living downwind of the tailings site is 7.4×10^{-5} at 22 km from the site. The extension may increase the risk by 5/70 of the lifetime estimate or 5.3×10^{-6}. The estimated health effects from the Lucky Mc impoundment in its current condition are 2.7×10^{-3} fatal cancers per year for the region and 1.2×10^{-1} cancers per year for the nation. The risks can vary by a factor of 2.

E. Current and Proposed Risk Reduction Practices

Interim clay cover or soil is being used on the tailings piles while on standby. Additional wet tailings will be placed on the current dry portions of the pile during operation. Sprinkler systems will be used when necessary to control blowing tailings; but they do not control the radon emissions. Following completion of the mill activities, the site will be reclaimed according to a plan approved by NRC.

IV. Shirley Basin Mill

A. Location and Description

The Pathfinder Mines Corporation Shirley Basin uranium mill is located in an area of plains and rolling hills about 45 mi south of Casper, Wyoming. The mill, which began operation in 1971, uses processes of grinding, leaching, and ion exchange of the ore to produce yellowcake. Current mill capacity is 1,800 tons of ore per day. The mill is currently active and has a throughput of 990 tons/day.

Tailings are contained in a single on site tailings impoundment with three separate piles created by building a single sided earthen retention dam 18 m high. The surface area of the tailings impoundment is 261 acres, of which 179 acres are covered with ponded tailings solution. Sixty acres are dry beaches and 22 acres are wet. The impoundment contains 6.4×10^6 tons of tailings. The tailings are estimated by EPA to contain 540 pCi/g of radium-226. This activity was used to estimate radon emissions to air which were 18 kCi/yr when dry and 4 kCi/yr when partially wet.

A 1983 survey of the population in the vicinity of the Pathfinder Shirley Basin

VOL
52
ISS
198
OC
14
1987
UMI

Mill indicated the closest inhabitant was living about 5 km from the tailings impoundment. In 1986 this situation had not changed.

B. Size and Use of Piles

The size and capacity of the Shirley Basin tailings impoundment are given in Table 2 as follows:

TABLE 2.—SHIRLEY BASIN TAILINGS FACILITIES PILE SIZE AND CAPACITIES

Piles[a]	Total storage capacity (tons)	Current tailings (tons)	Remaining capacity (tons)	Surface area (acres)
3 Currently used for solution storage only				32
4	7,600,000	3,900,000	3,700,000	175
5	4,000,000	3,200,000	800,000	100
Total	11,600,000	7,100,000	4,500,000	307

a Piles 1 & 2 have been combined in piles 3, 4, and 5.

If the design operating rate of 1,800 tons/day is assumed, the amount of time left to fill the existing impoundments would be about 8 years. One option would be to close pile 5 because of its low remaining capacity but it can be used for water control. The mill plans to operate at about 1,000 tons/day which means they could operate another 15 years. Even lower operations rates are projected after 1989.

C. Condition of Piles

The Shirley Basin tailings system has operated at a reduced rate since 1980. Dry tailings areas are covered with mine overburden to control blowing tailings and to reduce radon emission rates. Additional wet tailings are placed on the dry areas of the pile during operation.

The dams are inspected on a daily basis for any signs of instability. The NRC also inspects the dams on their routine inspections each year.

Seepage from the tailings dam has been observed in the monitoring wells. A collection system for thje seepage has been installed. Monitoring wells will indicate if an additional seepage problem develops in the future. The seepage system is checked by the company and NRC on a routine basis.

EPA is not considering the possible water contamination of the ground water this action. Water pollution from tailings piles has been covered under UMTRCA.

D. Assessment of Risk

The AIRDOS EPA and DARTAB codes and assumed radon-222 decay product equilibrium fraction of 0.7 were used by EPA to estimate the increased chance of lung cancer for the closest individual living near a tailings impoundment and receiving the maximum exposure. For the Shirley Basin Mill, the estimated maximum lifetime risk for the individual living downwind of the tailings piles is 1×10^{-4} at 5 km from the site. The extenstion may increase the risk by 5% of the lifetime estimate or 7.1×10^{-6} The estimated health effects from the Shirley Basin impoundment in its current condition are 4.8×10^{-3} fatal cancers per year for the region and 5.4×10^{-2} cancers per year for the nation. The risks can vary by a factor of two.

E. Current and Proposed Risk Reduction Practices

Interim clay cover or soil is being used on the operating tailings piles. Additional wet tailings will be placed on the current dry portions of the pile. Sprinkler systems will be used when necessary to control blowing tailings but not to control radon emissions. Following completion of the mill activities, the site will be reclaimed according to a plan approved by NRC.

Dated: October 1, 1987.

J. Craig Potter,

Assistant Administrator for Air and Radiation.

BILLING CODE 6560-50-M

[FRL-3276-5]

PSD Permit for the North Broward County Resource Recovery Facility; Broward County, FL

AGENCY: Environmental Protection Agency.

ACTION: Notice.

SUMMARY: Notice is hereby given that the Prevention of Significant, Deterioration (PSD) permit (PSD-FL-112) issued to Broward County, Florida, on July 28, 1987, became effective on September 3, 1987. The permit was issued for the construction of the Broward County 2420 tons per days municipal solid waste incineration facility with electrical generation capability.

DATE: This action is effective as of September 3, 1987, the effective date of the PSD permit. Construction must begin within eighteen (18) months of this date or the permit will become invalid.

ADDRESSES: Copies of the PSD permit, permit application, and preliminary and final determinations are available for public inspection upon request at the folllowing locations:

U.S. Envioronmental Protection Agency, Air Programs Branch, 345 Courtland Street NE., Atlanta, Georgia 30365

Bureau of Air Quality Management, Florida Department of Environmental Regulation, Twin Towers Office Building, 2600 Blair Stone Road, Tallahassee, Florida 32399-2400

FOR FURTHER INFORMATION CONTACT: Michael Brandon of the EPA Region IV, Air Programs Branch at the Atlanta address given above, telephone (404) 347-2864; (FTS) 257-2864.

SUPPLEMENTARY INFORMATION: On February 14, 1986, the Broward County Resource Recovery Office submitted an application to EPA for the construction of the North Broward County Resource Recovery Facility. The facility will consist of four 605 tons per day municipal solid waste incinerators located in Broward County, Florida. The preliminary determination was made by the Florida Department of Environmental Regulation and the public comment period commenced on September 13, 1986. Comments on the preliminary determination were made by EPA and Broward County in reference to various permit conditions and by numerous citizens supporting the requirements for acid gas controls. On

June 26, 1987, EPA prepared the Final Determination and Permit Conditions. These conditions require, in part, the installation of an acid gas control device to control 90% of the acid gases, and 65% control or 0.14 lbs per million Btu of the sulfur dioxide emissions. In addition, the permit limits the emission of particulate matter to 0.015 gr/dscf corrected to 12% CO_2. The facility was also allowed to burn municipal solid waste at 110% of its rated capacity (i.e., 2420 tons per day). No other comments were received during the public comment period.

The federal PSD permit (PAD–FL–112) was issued on July 28, 1987, and became effective on September 3, 1987. The effective date of this permit constitutes final agency action uder 40 CFR 124.19 (f)(1) and section 307 of the Clean Air Act, for purposes of judicial review. Under section 307 (b)(1) of the Act, petitions for judicial review of this action must be filed in the United States Court of Appeals for the appropriate circuit by 60 days from today. This action may not be challanged later in proceedings to enforce its requirements (see section 307 (b)(2)).

If construction does not commence within eighteen (18) months after the effective date, that is, by March 3, 1989, or if construction is not completed within a reasonable time, the permit shall expire and the authorization to construct shall become invalid.

(Sections 160–169 of the Clean Air Act (42 U.S.C. 7470–7479))

Dated: October 1, 1987.

Charles H. Sutfin,

Acting Deputy Regional Administrator.

BILLING CODE 6560–50–M

[FRL–3275–9]

Science Advisory Board; Water Quality Advisories Subcommittee; Open Meeting

Under the Federal Advisory Committee Act, Pub. L. 92–463, notice is hereby given that a two day meeting of the Water Quality Advisories Subcommittee of the Science Advisory Board will be held on October 22 and 23, 1987. The meeting will begin at 9:00 a.m. on October 22, and will be held in the Laboratory Conference Room of EPA, Region 3, Annapolis Office at 839 Bestgate Road, Annapolis, MD. Adjournment on October 23 will take place no later than 3:00 p.m.

The main purpose of the meeting is to review draft guidelines developed for preparation of water quality advisories for both human health and aquatic life protection. Water quality advisories are intended to be used as a supplement to development of water quality criteria recommendations under section 304(a) of the Clean Water Act. Advisories are designed to fill the gap between the large number of pollutants and the limited number of criteria documents currently produced, and represent the best scientific judgement given the existing information.

The meeting will be open to the public; however, space is limited. Anyone who wishes to attend, present information to the Subcommittee, or obtain information concerning the meeting should contact Ms. Janis Kurtz, Executive Secretary, or Mrs. Lutithia Barbee, Staff Secretary, (A101–F), Environmental Effects, Transport and Fate Committee, Science Advisory Board, U.S. Environmental Protection Agency, 401 M. Street SW., Washington, DC 20460, Telephone (202) 382–2552 or FTS 8–382–2552. Written comments will be accepted, and can be sent to Ms. Kurtz at the above address. Persons interested in making statements before the Subcommittee must contact Ms. Kurtz no later than October 19, 1987, in order to be assured of space on the agenda.

Date: October 5, 1987.

Kathleen Conway,

Deputy Director, Science Advisory Board.

[FR Doc. 87–23722 Filed 10–13–87; 8:45 am]

BILLING CODE 6560–50–M

[FRL–3276–1]

Announcement of a Public Hearing on the Proposed Determination To Prohibit or Restrict the Specification of an Area for Use as a Disposal Site

AGENCY: Environmental Protection Agency.

ACTION: Notice.

SUMMARY: A public notice entitled "Proposed Determination to Prohibit or Restrict the Specification of an Area for Use as a Disposal Site" was published in the **Federal Register** and the New Jersey *Star Ledger* on August 7, 1987. (Request for a copy of that notice should be made to the person listed in the section below entitled **FURTHER INFORMATION**.) The August 7, 1987 notice announced the Environmental Protection Agency's (EPA) Region II Administrator's proposed determination to prohibit or restrict the discharge of dredged or fill material into wetlands owned by the Russo Development Corporation—71 Hudson Street, Hackensack, New Jersey. The Russo Development Corporation has sought after-the-fact Department of the Army authorization to maintain 52.5 acres of fill and authorization to discharge additional fill material into the remaining five wetland acres on site in Carlstadt, New Jersey (Block 131.1, Lots 59, 64.01–64.06) for the purpose of constructing warehouses. The Regional Administrator has reason to believe that the unauthorized discharge of fill and the proposed discharge of fill into the subject wetlands may have unacceptable adverse effects on wildlife. The Russo site was/and remains wetlands and waters of the United States pursuant to 33 CFR 328.3 and 40 CFR 230.3. The site therefore is subject to regulations under section 404 of the Clean Water Act and a Department of the Army 404 permit is required to discharge fill onto the site.

The Corps of Engineers (COE) advised EPA of its intention to issue a permit as requested by the Russo Development Corporaton. Section 404(c) of the Clean Water Act authorizes EPA to prohibit or restrict the discharge of fill material at defined sites in waters of the United States (including wetlands) if EPA determines, after notice and opportunity for hearing, that the use of the site for discharge of dredged or fill material would have an unacceptable adverse effect on various resources, including wildlife. The purpose of this notice is to announce the scheduling of a hearing to provide the opportunity to comment on the Regional Administrator's proposed determination to prohibit or restrict the discharge of dredged or fill material onto the subject site pursuant to section 404(c) of the Clear Water Act.

Public Hearing

A public hearing is scheduled for November 5 1987 at the Hackensack Meadowlands Development Commission's auditorium at One De Korte Park Plaza, Lyndhurst, New Jersey from 3 pm to 5:30 pm and continuing at 7 pm after a dinner break. Written comments may be submittd prior to the hearing. Any person may appear at the hearing and present oral or written statements and may be represented by counsel or other authorized representative. Participants will be afforded an opportunity for rebuttal. The Regional Administrator's designee will be the Presiding Officer at the hearing. The Presiding Officer will establish reasonable limits on the nature and length of the oral presentations. No cross examinations of any hearing participant will be permitted, although the Presiding Officer may make appropriate inquiries of any such participant. The hearing record will remain open for the submittal of written

comments until November 20, 1987, 15 days from the close of the public hearing. A record of the hearing proceeding shall be made by a verbatim transcript. Copies of the transcript of the proceedings may be purchased by any person from EPA after the close of the comment period. Copies will be available for public inspection at the Region II EPA office, 26 Federal Plaza, New York, NY after the close of the comment period. The cost of a copy will correspond directly to the number of pages enclosed within the transcript.

All written statement and information offered in evidence at the hearing will constitute a part of the hearing file which will become part of the administrative record of the Regional Administrator's determination.

DATES: All written comments should be submitted to the person listed under ADDRESSES, below, no later than November 20, 1987, 15 days from the close of the public hearing. Written comments may be submitted to the Presiding Officer at the time of the hearing.

ADDRESSES: Comments should be sent to Mr. Mario Del Vicario, Chief, Marine and Wetlands Protection Branch, U.S. Environmental Protection Agency Region II, 26 Federal Plaza, New York, NY 10278. The public hearing will be held in the Hackensack Meadowlands Development Commission's auditorium located at One De Korte Park Plaza, Lyndhurst, New Jersey.

FOR FURTHER INFORMATION CONTACT: Mr. Mario Del Vicario, Chief, Marine and Wetlands Protection Branch, U.S. EPA Region II, 26 Federal Plaza, New York, NY 10278, (212) 264–5170. If you wish to receive a copy of the public notice entitled "Proposed Determination to Prohibit or Restrict the Specification of an Area for Use as a Disposal Site" published on August 7, 1987, please contact Mr. Del Vicario and a copy will be mailed to you.

SUPPLEMENTARY INFORMATION: The August 7, 1987 public notice entitled "Proposed Determination to Prohibit or Restrict the Specification of an Area for Use as a Disposal Site: reviewed the section 404(c) process, provided a description of the subject wetland site, reviewed the proceedings to date on the subject action, discussed the basis for the proposed determination and, solicited comments.

During the scheduled hearing, EPA would like to obtain comments on: (1) Whether the impacts of the subject discharge would represent an unacceptable adverse effect as described in section 404(c) of the Clean Water Act; (2) the vegetative and hydrologic characteristics of the subject site and, observations of our information concerning wildlife on the site prior to and after the placement of fill material; (3) observations of or information concerning wildlife in wetlands similar to the subject site and in the Hackensack Meadowlands in general (4) what corrective action, if any, could be taken to reduce the adverse impacts of the discharge; (5) whether the Regional Administrator should recommend to the Assistant Administrator for Water the determination to prohibit or restrict the discharge of dredged or fill material on the site. Comments should be submitted no later than November 20, 1987 to the person listed above under **ADDRESSES.** All comments received will be fully considered by the Regional Administrator in making his determination to prohibit or restrict filling of the Russo site or to withdraw this proposed determination.

Christopher J. Dagget,

Regional Administrator.

BILLING CODE 6560–50–M

[FRL–3275–S]

Water Pollution; Final NPDES General Permit for Private Domestic Discharges in East Baton Rouge Parish in the State of Louisiana

AGENCY: Environment Protection Agency.

ACTION: Notice of Final NPDES General Permit.

SUMMARY: The Regional Administrator of Region IV is today issuing a Final NPDES General Permit for certain dischargers who treat private domestic wastes. This final NPDES general permit establishes effluent limitations, standards, prohibitions and other conditions on these discharges. The facilities covered by this permit are located in East Baton Rouge Parish within the State of Louisiana. A copy of the permit is reprinted as required by 40 CFR 122.28.

EFFECTIVE DATE: This NPDES general permit shall become effective November 13, 1987.

ADDRESSES: Notifications required under this permit should be sent to the Director, Water Management Division (6W), U.S. Environmental Protection Agency, Region VI, Allied Bank Tower, 1445 Ross Avenue, Dallas Texas 75202–2733.

FOR FURTHER INFORMATION CONTACT: Ms. Ellen Caldwell (6W–PS), U.S. Environmental Protection Agency, Region VI, Allied Bank Tower, 1445 Ross Avenue, Dallas Texas 75202–2733. (214) 655–7190.

SUPPLEMENTARY INFORMATION: Public notice of the draft permit was published in the **Federal Register** on July 29, 1987 (52 FR 28337). The comment period closed on August 28, 1987. One comment received from the Louisiana Department of Environmental Quality (LDEQ) who submitted several significant comments on the draft permit. In accordance with 40 CFR 124.17(a)(2), EPA describes and responds to these comments as follows. This response supplements the fact sheet which was published with the draft permit and is incorporated by reference. Changes have been made to the permit as noted in this response.

Comment: LDEQ suggested that EPA should extend coverage of the general permit to public owned treatment works (POTWs) as well as private facilities, because East Baton Rouge Parish has a policy of taking over new subdivision treatment facilities for operation and maintenance after they have been permitted.

Response: EPA clearly states in the fact sheet and the permit that this general permit applies only to private domestic treatment works and not to POTWs. Furthermore, a consent decree is presently being issued in East Baton Rouge Parish to require that most small POTWs be connected to central treatment plants. Therefore, this general permit will not be applied to POTWs. If a private domestic treatment works becomes a POTW, it will no longer be covered by this permit and must be covered by an individual NPDES permit.

Comment: LDEQ points out that the area policy on which the general permit is based covers only facilities discharging to water in the Amite/Comite drainage system and questions if EPA wishes to extend the coverage of the general permit beyond the area policy.

Response: The area policy also applies to the Bayou Manchac drainage system. However, under best professional judgment (BPJ), EPA has applied the limitations under the area policy to the entire East Baton Rouge Parish.

Comment: LDEQ requests that the flow based for assigned limitatinos be changed from "facility design flow" to "expected flow."

Response: EPA concurs and has made the change.

Comment: LDEQ requests that the permittee be given the choice of fecal coliform limits of 200/100 ml average

and 400/100 ml maximum or total residual chlorine limits of 0.8 mg/1 minimum and 2.0 mg/1 maximum.

Response: EPA will retain only the fecal coliform limits which allow the permittees to apply any of several types of disinfection which may be most appropriate.

Comment: LDEQ requests that flow ranges be modified to:

2,500< flow < 10,000;
10,000< flow < 25,000;
25,000< flow < 100,000;
100,00 < flow <1,000,000

Response: EPA concurs and has made the changes.

Comment: LDEQ requests that annual reports of monitoring data contain the monthly average and monthly maximum data.

Response: EPA modified the reporting to require that the monthly data also be submitted to the LDEQ with the annual reports.

Comment: LDEQ requests that the time period for submission of a request for exclusion/application for an individual permit for existing facilities be unlimited because many permittees may remain unaware of a general permit until it is called to their attention.

Response: EPA retains the time to request an individual permit to 90 days after publication.

Comment: LDEQ requests that the requirement for requests for coverage under the general permit be changed from fourteen to sixty days prior to commencement of discharge.

Response: EPA concurs and has made the change.

Comment: LDEQ questions the need for new applications for individual permits from those not wishing to be covered by the general permit.

Response: As an administrative matter EPA retains this requirement for a new application.

Paperwork Reduction Act

No comments were received on the information collection requirements contained in this final permit.

Dated: September 18, 1987.

Robert E. Layton Jr.,

Regional Administrator, Region VI.

[Permit No. LAG550000]

Authorization to Discharge Under the National Pollutant Discharge Elimination System

In compliance with the provisions of the Federal Water Pollution Control Act, as amended, [33 U.S.C. 1251 et. seq.; the "Act"), within East Baton Rouge Parish, Louisiana, operators engaged in the gneration of private domestic wastes with design flows equal to or greater than 2500 gpd and less than 1 MGD are authorized to discharge to various storm sewers, tributaries, stream segments are river basins, which are waters of the United States as defined in 40 CFR 122.2, in accordance with effluent limitations, monitoring requirements and other conditions set forth in Parts I, II, and III hereof.

Operators within the general permit area must make a written notification to the Regional Administrator that they intend to be covered by this general permit (See Part III.B.)

This permit shall become effective on November 13, 1987.

This permit and the authorization to discharge shall expire at midnight, November 12, 1992.

Signed this 18th day of September, 1987.

Kenton Kirkpatrick,

Acting Director, Water Management Division (6W).

Part I—Requirements for NPDES Permits

Section A. Effluent Limitations and Monitoring Requirements

Outfall 101

During the period beginning the effective date and lasting through the expiration date, the permittee is authorized to discharge from Outfall 101-treated sanitary wastes from private domestic facilities with expected flows equal to or greater than 2500 gpd and less than 10,000 gpd.

Such discharges shall be limited and monitored by the permittee as specified below:

Effluent characteristic	Discharge limitations—units (specify)	
	Daily avg	Daily max
Flow (MGD)	(1)	(1)
Total Suspended Solids.	30 mg/l (4)	45 mg/l (4)
Biochemical Oxygen Demand (5-day).	30 mg/l	45 mg/l
Fecal Coliform.	200/100 ml (3)	400/100 ml

Effluent charcteristic	Monioring requirements	
	Measurement frequency	Sample type
Flow (MGD)	1/Quarter (2)	Estimate.
Total Suspended Solids.	1/Quarter	Grab.
Biochemical Oxygen Demand (5-day).	1/Quarter	Grab.
Fecal Coliform.	1/Quarter	Grab.

(1) Report.
(2) When discharge occurs.
(3) Monthy log mean.
(4) For facilities in which waste stabilization ponds are the primary treatment, 90 mg/l daily average and 135 mg/l daily maximum.

The pH shall not be less than 6.0 standard units nor greater than 9.0 standard units and shall be monitered 1/quarter by grab sample.

Sample taken in complaince wih the monitoring requirements specified above shall be taken at the following location(s): At the point of discharge from the treatment plant.

Outfall 201

During the period beginning the effective date and lasting through the expiration date, the permittee is authorized to discharge from Outfall 101-treated sanitary wastes from private domestic facilities with expected flows equal to or greater than 10,000 gpd and less than 25,000 gpd.

Such discharges shall be limited and monitored by the permittee as specified below:

Effluent characteristic	Discharge limitations—units (specify)	
	Daily avg	Daily max
Flow (MGD)	(1)	(1)
Total Suspended Solids.	30 mg/l (4)	45 mg/l(4)
Biochemical Oxygen Demand (5-day).	30 mg/l	45 mg/l
Fecal Coliform.	200/100 ml (3)	400/100 ml

Effluent charcteristic	Monioring requirements	
	Measurement frequency	Sample type
Flow (MGD)	1/Month (2)	Estimate.
Total Suspended Solids.	1/Month	Grab.
Biochemical Oxygen Demand (5-day).	1/Month	Grab.

VOL 52 ISS 198 OCT 14 1987 UMI

Effluent charcteristic	Monioring requirements	
	Measurement frequency	Sample type
Fecal Coliform.	1/Month.....	Grab.

(1) Report.
(2) When discharge occurs.
(3) Monthy log mean.
(4) For facilities in which waste stabilization ponds are the primary treatment, 90 mg/l daily average and 135 mg/l daily maximum.

The pH shall not be less than 6.0 standard units nor greater than 9.0 standard units and shall be monitered 1/month by grab sample.

Sample taken in complaince wih the monitoring rquirements specified above shall be taken at the following location(s): At the point of discharge from the treatment plant.

Outfall 301

During the period beginning the effective date and lasting through the expiration date, the permittee is authorized to discharge from Outfall 301-treated sanitary wastes from private domestic facilities with expected flows equal to or greater than 25,000 gpd and less than 100,000 gpd.

Such discharges shall be limited and monitored by the permittee as specified below:

Effluent charactristic	Discharge limitations units (specify)	
	Daily Avg	Daily max
Flow (MGD).....	(1).....	(1)
Total Suspended Solids.	30 mg/l (5).....	45 mg/l (5).
	15 mg/l (2).....	23 mg/l (2).
Biochemical Oxygen Demand (5-day).	30 mg/l.....	45 mg/l.
	10 mg/l (2).....	15 mg/l (2).
Fecal Coliform.	200/100 ml (4)..	400/100 ml (4).

Effluent charactristic	Monitoring requirements	
	Measurement frequency	Sample type
Flow (MGD).....	1/Week (3)	Estimate.
Total Suspended Solids.	1/Month.....	Grab.
Biochemical Oxygen Demand (5-day).	1/Month.....	Grab.
Fecal Coliform.	1/Month.....	Grab.

(1) Report.
(2) Applicable to facilitries schedule (a) from the permit effective date for facilities which were built, modified or upgraded after September 30, 1986, or schedule (b) by October 1, 1991, for facilities existing as of September 30, 1986.
(3) When discharge occurs.
(4) Monthly log mean.
(5) For faiclities in which waste stabilization ponds are the primary treatment, 90 mg/l daily average and 135 mg/l daily maximum.

The pH shall not be less than 6.0 standard units nor greater than 9.0 standard units and shall be monitored 1/month by grab sample.

Samples taken in compliance with the monitoring requirements specified above shall be taken at the following location(s): At the point of discharge from the treatment plant.

Outfall 401

During the period beginning the effective date and lasting through the expiration date, the permittee is authorized to discharge from Outfall 401-treated sanitary wastes from private domestic facilities with expected flows equal to or greater than 100,000 gpd and less than 1 MGD.

Such discharges shall be limited and monitored by the permittee as specified below:

Effluent charactristic	Discharge limitations units (specify)	
	Daily Avg	Daily max
Flow (MGD).....	(1).....	(1)
Total Suspended Solids.	30 mg/l (5).....	45 mg/l (5).
	15 mg/l (2).....	23 mg/l (2).
Biochemical Oxygen Demand (5-day).	30 mg/l.....	45 mg/l.
	10 mg/l (2).....	15 mg/l (2).
Fecal Coliform.	200/100 ml (4)..	400/100 ml (4).

Effluent charactristic	Monitoring requirements	
	Measurement frequency	Sample type
Flow (MGD).....	5/Week (3)	Instantaneous.
Total Suspended Solids.	1/Week.....	Grab.
Biochemical Oxygen Demand (5-day).	1/Week.....	Grab.
Fecal Coliform.	1/Week.....	Grab.

(1) Report.
(2) Applicable to facilitries schedule (a) from the permit effective date for facilities which were built, modified or upgraded after September 30, 1986, or schedule (b) by October 1, 1991, for facilities existing as of September 30, 1986.
(3) When discharge occurs.
(4) Monthly log mean.
(5) For faiclities in which waste stabilization ponds are the primary treatment, 90 mg/l daily average and 135 mg/l daily maximum.

The pH shall not be less than 6.0 standard units nor greater than 9.0 standard units and shall be monitored 1/week by grab sample.

Samples taken in compliance with the monitoring requirements specified above shall be taken at the following location(s): At the point of discharge from the treatment plant.

Section B. Other Discharge Limitations

There shall be no discharge of floating solids or visible foam in other than trace amounts.

Section C. Permit Area

The area covered by this general permit includes all areas within East Baton Rouge Parish, Louisiana.

Section D. Schedule of Compliance

The permittee shall achieve compliance with the effluent limitations specified for discharges in accordance with the requirements of Section A of Part I.

Part II—Standard Conditions for NPDES Permits

Section A. General Conditions

1. Duty to Comply

The permittee must comply with all conditions of this permit. Any permit noncompliance constitutes a violation of the Clean Water Act and is grounds for enforcement action; for permit termination, revocation and reissuance, or modification; or for denial of a permit renewal application.

2. Penalties for Violations of Permit Conditions

The Clean Water Act provides that any person who violates sections 301,

302, 306, 307, 308, 318, or 405 or any permit condition or limitation implementing any of such sections in a permit issued under section 402 of the Act is subject to a civil penalty not to exceed $25,000 per day for each violation provided that a single operational upset which leads to simultaneous violations of more than one pollutant parameter shall be treated as a single violation. The Act also provides for criminal penalties.

3. Permit Actions

This permit may be modified, revoked and reissued, or terminated for cause including, but not limited to, the following:

a. Violation of any terms or conditions of this permit;

b. Obtaining this permit by misrepresentation or failure to disclose fully all relevant facts;

c. A change in any condition that requires either a temporary or a permanent reduction or elimination of the authorized discharge; or,

d. A determination that the permitted activity endangers human health or the environment and can only be regulated to acceptable levels by permit modification or termination.

The filing of a request by the permittee for a permit modification, revocation and reissuance, or termination, or a notification of planned changes or anticipated noncompliance, does not stay any permit condition.

This permit shall be modified, or alternatively, revoked and reissued, to comply with any applicable effluent standard or limitation issued or approved under section 301(b)(2)(C), and (D), 304(b)(2), and 307(a)(2) of the Clean Water Act, if the effluent standard or limitation so issued or approved:

a. Contains different conditions or is otherwise more stringent than any effluent limitation in the permit; or

b. Controls any pollutant not limited in the permit.

The permit as modified or reissued under this paragraph shall also contain any other requirements of the Act then applicable.

4. Civil and Criminal Liability

Except as provided in permit conditions on "Bypassing" Section B, paragraph 4.b. and "Upsets" Section B, paragraph 5.b., nothing in this permit shall be construed to relieve the permittee from civil or criminal penalties for noncompliance.

5. Oil and Hazardous Substance Liability

Nothing in this permit shall be construed to preclude the institution of any legal action or relieve the permittee from any responsibilities, liabilities, or penalties to which the permittee is or may be subject under section 311 of the Clean Water Act.

6. State Laws

Nothing in this permit shall be construed to preclude the institution of any lagal action or relieve the permittee from any responsibilities, liabilities, or penalties established pursuant to any applicable State law or regulatiaon under authority preserved by section 510 of the Clean Water Act.

7. Property Rights

The issuance of this permit does not convey any property rights of any sort, or any exclusive privileges, nor does it authorize any injury to private property or any invasion of personal rights, nor any infringement of Federal, State, or local laws or regulations.

8. Severability

The provisions of this permit are severable, and if any provision of this permit or a the application of any provision of this permit to any circumstance is held invalid, the application of such provision to other circumstances, and the remainder of this permit, shall not be affected thereby.

9. Definitions

The following definitions shall apply unless otherwise specified in this permit:

a. "Daily Average" discharge limitation means the highest allowable average of discharges over a calendar month, calculated as the sum of all discharges measured during a calendar month divided by the number of discharges measured during that month.

b. "Daily Maximum" discharge limitation means the highest allowable discharage during the calendar month.

c. The term "mg/1" shall mean milligrams per liter or parts per million (ppm).

Section B. Operation and Maintenance of Pollution Controls

1. Proper Operation and Maintenance

The permittee shall at all times properly operate and maintain all facialities and systems of treatment and control (and related appurtenances) which are installed or used by the permittee to achieve compliance with the conditions of this permit. Proper operation and maintenance also includes adequate laboratory controls and appropriate quality assurance procedures. This provision requires the operation of backup or auxiliary facilities or similar systems which are installed by a permittee only when the operation is necessary to achieve compliance with the conditions of the permit.

2. Need to Halt or Reduce not a Defense

It shall not be a defense for a permittee in enforcement action that it would have been necessary to halt or reduce the permitted activity in order to maintain compliance with the conditions of this permit.

3. Duty of Mitigate

The permittee shall take all reasonable steps to minimize or prevent any discharge in violation of this permit which has a reasonable likelihood of adversely affecting human health or the environment.

4. Bypass of Treatment Facilities

a. Definitions

(1) "Bypass" means the intentional diversion of waste streams from any portion of a treatment facility.

(2) "Severe property damage" means substantial physical damage to property, damage to the treatment facilities which causes them to become inoperable, or substantial and permanent loss of natural resources which can reasonably be expected to occur in the absence of a bypass. Severe property damage does not mean economic loss caused by delays in production.

b. Bypass not exceeding limitations. The permittee may allow any bypass to occur which does not cause effluent limitations to be exceeded, but only if it also is for essential maintenance to assure efficient operation. These bypasses are not subject to the provisions of Section B, paragraphs 4.c. and 4.d. of this section.

c. Notice

(1) Anticipated bypass. If the permittee knows in advance of the need for a bypass, it shall submit prior notice, if possible at least ten days before the date of the bypass.

(2) Unanticipated bypass. The permittee shall submit notice of an unanticipated bypass as required in Section D, paragraph 6 (24-hour notice).

d. Prohibition of bypass

(1) Bypass is prohibited, and the Director Administrator may take enforcement action against a permittee for bypass, unless:

(a) Bypass was unavoidable to prevent loss of life, personal injury, or severe property damage;

(b) There were no feasible alternatives to the bypass, such as the use of auxiliary treatment facilities, retention of untreated wastes, or maintenance during normal periods of equipment downtime. This condition is

not satisfied if adequate back-up equipment should have been installed in the exercise of reasonable engineering judgment to prevent a bypass which occured during normal periods of equipment downtime or preventive maintenance; and,

(c) The permittee submitted notices as required under Section B, paragrpah 4.c.

(2) The Regional Administrator may approve an anticipated bypass, after cosidering its adverse effects, if the Regional Administrator determines that it will meet the three conditions listed above in Section B, paragraph 4.d.(1)

5. Upset Conditions

a. Definition. "Upset" means and exceptional incident in which there is unintentional and temporary noncompliance with technology-based permit effluent limitations because of factors beyond the reasonable control of the permittee. An upset does not include noncompliance to the extent caused by operational error, improperly designed treatment facilities, inadequate treatment facilities, lack of preventive maintenance, or careless or improper operation.

b. Effect of an upset. An upset constitutes an affirmative defense to an action brough for noncompliance with such technology-based permit effluent limitations if the requirements of Section B, paragraph 5.c. are met. No determination made during administrative review of claims that noncompliance was caused by upset, and before an action for noncompliance, is final administrative action subject to judicial review.

c. Conditions necessary for a demonstration of upset. A permitted who wishes to establish the affirmative defense of upset shall demonstrate, through properly signed, contemporaneous operating logs, or other relevant evidence that:

(1) An upset occurred and that the permittee can identify the cause(s) of the upset;

(2) The permitted facility was at the time being properly operated;

(3) The permittee submitted notice of the upset as required in Section D, paragraph 6.

(4) The permitee complied with any remedial measures required under Section B, paragraph 3.

d. Burden of proof. In any anforcement proceeding the permittee seeking to establish the occurrence of an upset has the burden of proof.

6. Removed Substances

Solids, sludges, filter backwash, or other pollutants removed in the course of treatment or control of wastewaters shall be disposed of in a manner such as to prevent any pollutant from such materials from entering navigable waters.

Section C. Monitoring and Records

1. Representative Sampling

Samples and measurements taken as required herein shall be representative of the volume and nature of the monitored discharge.

2. Monitoring Procedures

Monitoring must be conducted according to test procedures approved under 40 CFR Part 136, unless other test procedures have been specified in this permit.

3. False Statements

Any person who knowingly makes any false material statement, representation, or certification in any application, record, report, plan, or other document filed or required to be maintanined under this Act or who knowingly falsifies, tampers with, or renders inaccurate any monitoring device or method required to be maintained under this Act, shall upon conviction, be punished by a fine of not more than $10.000, or by imprisonment for not more than 2 years, or by both. If a conviction of a person is for a violation committed after a first conviction of such person under this paragraph, punishment shall be by a fine of not more than $20,000 per day of violation, or by imprisonment of not more than 4 years, or by both.

4. Reporting of Monitoring Results

Monitoring results obtained during the previous 12 months shall be summarized and reported on a Discharge Monitoring Report (DMR) From (EPA No. 3320–1). The annual average reported shall be the average for the twelve months of the highest sample for each month. The highest daily maximum sample taken during the reporting period shall be reported as the daily maximum concentration. In addition, for each of the twelve preceeding months a DMR Form shall be submitted only to the LDEQ, reporting the monthly average and maximum data for that month.

The first report is due on the 28th day of the 13th month month from the day this permit first becomes applicable to a permittee. Signed and certified copies of these and other reports required herein, shall be submitted to EPA and to the State at the following addresses:

Director Water Management Division (6W), Regional, VI, U.S. Environmental Protection Agency, P.O. Box 50625, Dallas, Texas 75250

J. Dale Givens, Assistant Secretary for Water, Office of Water Resources, Louisiana Department of Environmental Quality, P.O. Box 44091, Baton Rouge, Louisiana 70804–4091

5. Additional Monitoring by the Permittee

If the permittee monitors any pollutant more frequently than reqired by this permit, using test procedures approved under 40 CFR Part 136 or as specified in this permit, the results of this monitoring in the DMR. Such increased monitoring frequency shall also be indicted on the DMR.

Calculations for all limitations which require averaging of measurements shall utilize an arithmetic mean unless otherwise specified by the Regional Administrator in the permit.

7. Retention of Records

The permittee shall retain records of all monitoring information, inlcuding all calibration and maintenance records and all original strip chart recordings for continuous monitoring instrumentation, copies of all reports required by this permit, and records of all data used to complete the application for this permit, for a period of at least 3 years from the date of the sample, measurement, report, or application. This period may be extended by request of the Regional Administrator at any time.

8. Record Contents

Records of monitoring information shall include:

a. The date, exact place, and time of sampling or measurements;

b. The individual(s) who performed the sampling or measurements;

c. The date(s) analyses were performed;

d. The individual(s) who performed the analyses;

e. The analytical techniques or methods used; and,

f. The results of such analyses.

9. Inspection and Entry.

The permittee shall allow the Regional Administrator, or an authorized representative, upon the presentation of credentials and other documents as may be required by law, to:

a. Enter upon the permittee's premises where a regulated facility or activity is located or conducted, or where records must be kept under the conditions of this permit;

b. Have access to and copy, at reasonable times, any records that must be kept under the conditions of this permit;

c. Inspect at reasonable times any facilities, equipment (including monitoring and control equipment), practices, or operations regulated or required under the this permit; and

d. Sample or monitor at reasonable times, for the purposes of assuring permit compliance or as otherwise authorized by the Clean Water Act, any substances or parameters at any location.

Section D. Reporting Requirements

1. Planned Changes

The permittee shall give notice to the Regional Administrator as soon as possible of any planned physical alterations or additions to the permitted facility. Notice is requried only when:

a. The alteration or addition to a permitted facility may meet one of the criteria for determining whether a facility is a new source in 40 CFR 122.29(b) [48 FR 14153, April 1, 1983, as amended at 49 FR 38046, September 26, 1984]; or

b. The alteration or addition could significantly change the nature or increase the quantity of pollutants discharged. This notification applies to pollutants wich are subject neither to effluent limitations in the permit, nor to notification requirements under 40 CFR 122.42(a)(1) (48 FR 14153, April 1, 1983, as amended at 49 38046, September 26, 1984).

2. Anticipated Noncompliance

The permittee shall give advance notice to the Regional Administrator of any planned changes in the permitted facility or activity which may result in noncompliance with permit requirements.

3. Transfers

This permit is not transferable to any person except after notice to the Regional Administrator. The Regional Administrator may require modification or revocation and reissuance of the permit to change the name of the permittee and incorporate such other requirements as may be necessary under the Clean Water Act.

4. Monitoring Reports

Monitoring results shall be reported at the intervals and in the form specified in Section C, paragraph 5 (Monitoring).

5. Compliance Schedules

Reports of compliance or noncompliance with, or any progress reports on, interim and final requirements contained in any compliance schedule of this permit shall be submitted no later than 14 days following each schedule date. Any reports of noncompliance shall include the cause of noncompliance, any remedial actions taken, and the probability of meeting the next scheduled requirement.

6. Twenty-Four Hour Reporting

The permittee shall report any noncompliance which may endanger health or the environment. Any information shall be provided orally within 24 hours from the time permittee becomes aware of the circumstances. A written submission shall also be provided within 5 days of the time the permittee becomes aware of the circumstances. The written submission shall contain a description of the noncompliance and its cause; the period of noncompliance including exact dates and times, and if noncompliance, including dates and times, and if the noncompliance has not been corrected, the anticipated time it is expected to continue; and steps taken or planned to reduce, eliminate, and prevent reoccurrence of the noncompliance. The Regional Administrator may waive the written report on a case-by-case basis if the oral report has been received within 24 hours.

The following shall be included as information which must be reported within 24 hours:

a. Any unanticipated bypass which excees any effulent limitation in the permit.

b. Any upset which exceed any effluent limitation in the permit.

c. Violation of a maximum daily discharge limitation for any of the pollutants listed by the Regional Administrator in Part III of the permit to be reported within 24 hours.

7. Other Noncompliance

The permittee shall report all instances of noncompliance not reported under Section D, paragraphs 4, 5, and 6, at the time monitoring reports are submitted. The reports shall contain the information listed in Section D, paragraph 6.

8. Changes in Discharges of Toxic Substances

The permittee shall notify the Regional Administrator as soon as it knows or has reason to believe:

a. That any activity has occurred or will occur which would result in the discharge, in a routine or frequent basis, of any toxic pollutant which is not limited in the permit, if that discharge will exceed the highest of the "notification levels" described in 40 CFR 122.42(a)(1) i & ii.

b. That any activity has occurred or will occur which would result in any discharge, on a non-routine or infrequent basis, of a toxic pollutant which is not limited in the premit, if that discharge will exceed the highest of the "notification levels" described in 40 CFR 122.42(a)(2) i & ii.

9. *Duty to Provide Information*

The premittee shall furnish to the Regional Administrator, within a reasonable time, any information which the Regional Administrator may request to determine whether cause exists for modifying, revoking and reissuing, or terminating this permit, or to determine compliance with this permit. The premittee shall also furnish to the Regional Administrator upon request, copies of records to be kept by this permit.

10. *Signatory Requirements*

All applications, reports, or information submitted to the Regional Administrator shall be signed and certified.

a. All permit applications shall be signed as follows:

(1) For a corporation—by a responsible corporate officer. For the purpose of this section, a responsible corporate officer means:

(i) A president, secretary, treasure, or vice-president of the corporation in charge of a principal business function, or any other person who performs similar policy or decision making functions for the corporation, or

(ii) The manager of one or more manufacturing, production, or operating facilities employing more than 250 persons or havings gross annual sales or expenditures exceeding $25 million (in second-quarter 1980 dollars), if authority to sign documents has been assigned or delegated to the manager in accordance with corporate procedures.

(2) For a partnership or sole proprietorship: by general partner or the proprietor, respectively.

(3) For a municipality, State, Federal, or other public agency: by either a principal executive officer or ranking elected official. For purposes of this section, a principal executive officer of a Federal agency includes:

(i) The chief executive officer of the agency, or

(ii) A senior executive officer having responsibility for the overall operations of a principal geographic unit of the agency.

b. All reports required by the permit and other information requested by the Regional Administrator shall be signed by a person described above or by a duly authorized representative of that person.

A person is a duly authorized representative only if:

(1) The authorization is made in writing by a person described above.

(2) The authorization specifies either an individual or a positon having responsibility for the over operation of the regulated facility or activity, such as the postion of plant manager, operation of a well or a well field, superintendent, or position of equivalent responsibility, or an individual or position having overall responsibility for environmental matters for the company. A duly authorized representative may thus be either a named individual or any individual occupying a named position; and,

(3) The written authorizatons is submitted to the Regional Administrator.

c. Certification. Any person signing a document under this section shall make the following certification:

I certify under penalty of law that this document and all attachments were prepared under may direction or supervision in accordance with a system designed to assure that qualified personnel properly gather and evaluate the information submitted. Based on my inquiry of the person or persons who manage the system, on my inquiry of the person or person who manage the system, or those persons directly responsible for gathering the information, the informatoin submitted is, to the best of my knowledte and belief, true, accurate, and complete. I am aware that there are significant penalties for submitting false infomation, including the possibility of fine and imprisonment for knowing violations.

11. Availability of Reports

Except for data determined to be confidential under 40 CFR Part 2, all reports prepared inaccordance with the terms of this permit shall be availble for public inspection at the office of the Director. As required by the Clean Water Act, the name and address of any permit applicant or permittee, permit appliclations, permits, and effluent data shall not be considered confidential.

Section E. Notification Requirements

1. Commencement of Operations

Written notification of commencement of operations, including the legal name and address of the discharger and the name commonly assigned to the facility shall be submitted:

a. Within 45 days of the effective date of this permit by operators whose facilities are discharging into the general permit area on the effective date of the permit.

b. Sixty days prior to the commencement of discharge by operator whose facilities commence discharge subsequent to the effective date of this permit.

2. Termination of Operations

Operators shall notify the Regional Administrator upon the permanent termination of discharges from their facilities.

Section F. Additional General Permit Conditions

1. When the Regional Administrator May Require Application for an Individual NPDES Permit

The Regional Administrator may require any person authorized by this permit to apply for and obtain an individual NPDES permit when:

(a) The discharge(s) is a significant contributor of pollution;

(b) The discharger is not in compliance with the conditions of this permit;

(c) A change has occured in the availability of the demonstrated technology or practices for the control or abatement of pollutants applicable to the point sources;

(d) Effluent limitation guidelines are promulgated for point sources covered by this permit;

(e) A Water Quality Management Plan containing requirements applicable to such point source is approved;

or

(f) The point source(s) covered by this permit no longer:

(1) Involve the same or substantially similar types of operations;

(2) Discharge the same types of wastes;

(3) Require the same effluent limitations or operating conditions;

(4) Require the same or similar monitoring;

and

(5) In the opinion of the Regional Administrator, are more appropriately controlled under a general permit than under individual NPDES permits.

The Regional Administrator may require any operator authorized by this permit to apply for an individual NPDES permit only if the operator has been notified in writing that a permit application is required.

2. When an Individual NPDES Permit may be Requested

(a) Any operator authorized by this permit may request to be excluded from the coverage of this general permit by applying for an individual permit. The operator shall submit an application together with the reasons supporting the request to the Regional Administrator no later than (90 days after the publication).

(b) When an individual NPDES permit is issued to an operator otherwise subject to this general permit, the applicability of this permit to the owner or operator is automatically terminated on the effective date of the individual permit.

(c) A source excluded from coverage under this general permit solely because it already has an individual permit may request that its individual permit be revoked, and that it be covered by this general permit. Upon revocation of the individual permit, this general permit shall apply to the source.

Part III—Other Conditions

A. Private Domestic Treatment Works means any device or system which is (a) used to treat domestic wastes and (b) is not a "POTW" as defined under 40 CFR 122.2

B. Operators requesting to be covered by this general permit shall notify the Regional Administrator of any prior application for an individual permit or issued individual permit and shall identify any NPDES number which was assigned to the application or individual permit. Operators who have applied for but have not been issued an individual NPDES permit, and not wishing to be covered by this general permit, shall also notify the Regional Administrator of the NPDES number for the prior application and shall be required to reapply for an individual NPDES permit.

C. With notification, operators requesting to be covered by this general permit shall report 1) the design flow of the facility and identify the outfall and schedule (where applicable) to their facilities, i.e., Outfall 101, Outfall 201, Outfall 301 schedule (a), Outfall 301 schedule (b), Outfall 401 schedule (a) or Outfall 401 schedule (b); and 2) identify if waste stabilization ponds are the primary treatment.

FEDERAL COMMUNICATIONS COMMISSION

[CC Docket No. 83-1376; RM-4436; FCC 87-299]

Intergration of Rates and Services for Provision of Communications

AGENCY: Federal Communications Commission.

ACTION: Order appointing commissioners.

SUMMARY: This order appoints two state commissions nominated by the National

Association of Regulatory Utility Commissioners to the Alaska Joint Board. The two commissioners are Susan M. Knowles of the Alaska Public Utilities Commission and Nels J. Smith of the Wyoming Public Service Commission.

ADDRESS: Federal Communications Commission, Washington, DC 20554.

FOR FURTHER INFORMATION CONTACT: Douglas Slotten, Common Carrier Bureau, Policy and Program Planning Division, 202–632–9342.

Federal Communications Commission.

William J. Tricarico,

Secretary.

[FR Doc. 87–23591 Filed 10–13–87; 8:45 am]

BILLING CODE 6712–01–M

FEDERAL EMERGENCY MANAGEMENT AGENCY

Guidance on Offsite Emergency Radiation Measurement Systems; Phase 2, the Milk Pathway, FEMA REP–12

AGENCY: Federal Emergency Management Agency (FEMA).

ACTION: Notice of availability of a guidance document on offsite emergency radiation systems for measurement of the potential radiation dose to the public from the milk pathway in the event of an accident at a light-water nuclear power plant and invitation for submittal of comments.

SUMMARY: The document, Guidance on Offsite Emergency Radiation Measurement Systems, Phase 2—The Milk Pathway, FEMA, REP–12, dated September 1987, will be available for public distribution and comment on October 30, 1987. Copies will be distributed to State and local government emergency planners with nuclear power plants operating or under construction, and other affected Federal agencies for review, comment, and interim use.

As lead Agency under a Memorandum of Understanding (MOU) with the Nuclear Regulatory Commission (NRC), the Federal Emergency Management Agency (FEMA) is responsible for the approval of offsite radiological emergency preparedness around nuclear power plants throughout the United States. FEMA's Rule 44 CFR Part 350 creates the regulatory framework by which FEMA will evaluate and assess State and local radiological emergency plans and preparedness of which offsite emergency radiation systems for measurements of the milk pathway are a part. The document, "Guidance on Offsite Emergency Radiation Measurements Systems, Phase 2—The Milk Pathway," FEMA REP–12, was developed to elaborate upon the requirements of 44 CFR 350 as related to offsite emergency radiation systems for measurement of the milk pathway. The guidance is intented to assist State and local planners and utilities in understanding standards that FEMA will use to assess the adequacy of offsite emergency radiation systems for measurement of the milk pathway and to assist FEMA personnel in uniformly interpreting and applying the applicable planning standards and criteria from NUREG–0654/FEMA-REP–1, Rev. 1 during plan reviews and exercises.

This is the second of a series of guidance documents of offsite emergency radiation measurements systems prepared by the Federal Radiological Preparedness Coordinating Committee, Subcommittee on Offsite Emergency Instrumentation. This report provides guidance on the selection and use of radiation instrumentation and methodologies that are currently available to detect and measure the dose commitment to individuals from the milk pathway.

Protective action levels recommended by the Food and Drug Administration (FDA) for milk are used as the basis for monitoring requirements. Measurement of radionuclides in milk should be made at the earliest practical point in the production chain: Dairy farms, receiving and transfer stations, processing plants or marketing facilities. Early monitoring will provide data to keep significantly contaminated milk out of distribution and will provide the basis for the most timely emergency response action. Radioiodine plus four other radionuclides, cesium–134, cesium–137, strontium–89, and strontium–90, contribute significantly to dose via the milk pathway. For the most severe potential accident, the short-term dose via the milk pathway from the radioiodine is significantly greater than that of cesium or strontium.

There is no emergency field monitoring instrumentation available for accurately monitoring cesium and strontium, particularly in the presence of radioiodine. Radioiodine can be a potential contamination problem in liquid milk, whereas radiocesium and radiostrontium can be a contamination problem is processed milk products. Monitoring for the long half-life nuclides such as cesium and strontium requires sophisticated equipment or chemistry procedures which are only available in a laboratory.

This document is intended for interim use until a final edition can be published early next calendar year. Comments received by FEMA on this document will be analyzed with the results being used to develop the final edition. Single copies of this document may be requested in writing from the Federal Emergency Management Agency, P.O. Box 70274, Washington, DC 20024. Please reference FEMA-REP–12 and the title of the document in your request.

Comments on this document will be accepted through January 31, 1988, and should be addressed to : Rules Docket Clerk, Federal Emergency Management Agency, Room 835, 500 C Street Southwest, Washington, DC 20472.

Dated: September 30, 1987.

For the Federal Emergency Management Agency.

Dave McLoughlin,

Deputy Associate Director, State and Local Programs and Support.

BILLING CODE 6718–20–M

FEDERAL MARITIME COMMISSION

Item Submitted for OMB Review

The Federal Maritime Commission hereby gives notice that the following item has been submitted to OMB for review pursuant to the Paperwork Reduction Act of 1980 (44 U.S.C. 3601, *et seq.*). Requests for information, including copies of the collection of information and supporting documentation, may be obtained from John Robert Ewers, Director, Bureau of Administration, Federal Maritime Commission, 1100 L Street, NW., Room 12211, Washington, DC 20573, telephone number (202) 523–5866. Comments may be submitted to the agency and to the Office of Information and Regulatory Affairs, Office of Management and Budget, Washington, DC 20503, Attention: Desk Officer for the Federal Maritime Commission, within 15 days after the date of the **Federal Register** in which this notice appears.

Summary of Item Submitted for OMB Review

Fact Finding Investigation 15 Voluntary Questionnaire

FMC requests clearance for a voluntary, one-time questionnaire to be sent pursuant to Fact Finding Investigation 15. Information will be sought from approximately 22 shippers' associations regarding their organizational structure, membership composition, service contract negotiations, physical cargo handling, and documentation methods.

Information will be sought from approximately 80 carriers/conferences relating to their dealings with shippers' associations and any difficulties they may have experienced with the definition of "shipper" in the Shipping Act of 1984. The Commission estimates a 102 manhour burden to respondents. Total cost to the Federal Government, including overhead, is estimated at $1600; total cost to respondents, is estimated at $2600.

Joseph C. Polking,

Secretary.

[FR Doc. 87-23770 Filed 10-13-87; 8:45 am]

BILLING CODE 6730-01-M

Agreement(s) Filed

The Federal Maritime Commission hereby gives notice of the filing of the following agreement(s) pursuant to section 5 of the Shipping Act of 1984.

Interested parties may inspect and obtain a copy of each agreement at the Washington, DC Office of the Federal Maritime Commission, 1100 L Street NW., Room 10325. Interested parties may submit comments on each agreement to the Secretary, Federal Maritime Commission, Washington, DC 20573, within 10 days after the date of the **Federal Register** in which this notice appears. The requirements for comments are found in § 572.603 of Title 46 of the Code of Federal Regulations. Interested persons should consult this section before communicating with the Commission regarding a pending agreement.

Agreement No.: 224-011080-001.

Title: Philadelphia Port Corporation Terminal Agreement.

Parties:

Philadelphia Port Corporation
I.T.O. Corporation

Synopsis: The proposed agreement amendment extends the term for the agreement 90 days as provided for under Article 2.4 of the basic agreement.

Agreement No.: 224-200044.

Title: Port of Tacoma Lease and Operating Agreement.

Parties:

Port of Tacoma
Moller Steamship Company, Inc.

Synopsis: The proposed agreement provides for the lease of approximately 22 acres of land adjacent to Pier 4, Berth B, and the preferential non-exclusive use of 850 foot Berth B, Pier 4, Port of Tacoma piers. The agreement also provides for the preferential non-exclusive use of two Sumitomo container cranes. The initial term shall be until December 31, 1990.

Agreement No.: 224-200043.

Title: Port of Long Beach Preferential Assignment Agreement.

Parties:

City of Long Beach (City)
Forest Terminals Corporation (Assignee)

Synopsis: The proposed agreement provides that the City grants to Assignee a nonexclusive preferential assignment of the wharf and contiguous wharf premises together with improvements located at Pier I, Berth 50, in the Harbor District of the City of Long Beach.

Agreement No.: 224-200042.

Title: Ryan-Walsh Stevedoring Company Terminal Agreement.

Parties:

Ryan-Walsh Stevedoring Company, Inc. (Ryan-Walsh)
Cooper/T. Smith Stevedoring Company, Inc. (Cooper)

Synopsis: The proposed agreement provides that Ryan-Walsh will provide terminal services to Cooper at Ryan Walsh's terminal at Nashville Avenue in New Orleans, Louisiana. The terminal services will include: Clerking for the receipt and delivery of cargo handled by Cooper; unloading/loading of inland conveyances; tiering, stacking, recoopering, etc, of cargo within the terminal; security services and other miscellaneous services.

By Order of the Federal Maritime Commission.

Joseph C. Polking,

Secretary.

Dated: October 8, 1987.

[FR Doc. 87-23771 Filed 10-13-87; 8:45 am]

BILLING CODE 6730-01-M

FEDERAL RESERVE SYSTEM

Acquisitions of Shares of Banks or Bank Holding Companies; Crawford A. Bishop et al.

The notificants listed below have applied under the Change in Bank Control Act (12 U.S.C. 1817(j)) and § 225.41 of the Board's Regulation Y (12 CFR 225.41) to acquire a bank or bank holding company. The factors that are considered in acting on the notices are set forth in paragraph 7 of the Act (12 U.S.C. 1817(j)(7)).

The notices are available for immediate inspection at the Federal Reserve Bank indicated. Once the notices have been accepted for processing, they will also be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing to the Reserve Bank indicated for that notice or to the offices of the Board of Governors. Comments must be received not later than October 29, 1987.

A. **Federal Reserve Bank of Atlanta** (Robert E. Heck, Vice President) 104 Marietta Street, NW., Atlanta, Georgia 30303:

1. *Crawford A. Bishop,* St. Amant, Louisiana; to retain an additional 2.50 precent of the voting shares of Bank of Gonzales Holding Co., Gonzales, Louisiana, and thereby indirectly acquire Bank of Gonzales, Gonzales, Louisiana.

2. *Errol Cautreau,* Baton Rouge, Louisiana, trustee for Bank of Gonzales Employee Stock Ownership Plan; to retain an additional 2.92 percent of the voting shares of Bank of Gonzales Holding Co., Gonzales, Louisiana, and thereby indirectly acquire Bank of Gonzales, Gonzales, Louisiana.

3. *Kenneth A. Jewell,* Lake Worth, Florida; to acquire an additional 7.67 percent of the voting shares of Gold Coast Bancshares, Inc., Hypoluxo, Florida, and thereby indirectly acquire Bank of South Palm Beaches, Lake Worth, Florida.

B. **Federal Reserve Bank of Kansas City** (Thomas M. Hoenig, Vice President) 925 Grand Avenue, Kansas City, Missouri 64198:

1. *Ellis and Nancy Clark,* Hiawatha, Kansas; to acquire an additional 17.65 percent of the voting shares of Morrill & Janes Bancshares, Inc., Hiawatha, Kansas, and thereby indirectly acquire Morrill & Janes Bank, Hiawatha, Kansas.

2. *Robert Minter,* Wichita, Kansas, to acquire 11.6; D. Michael Case, Wichita, Kansas, to acquire 4.97; Douglas W. Gugler, Howard, Kansas, to acquire 16.48; Gene Kelly, Severy, Kansas, to acquire 16.48; and Neal Osborn, Elk Falls, Kansas, to acquire 16.49 percent of the voting shares of Elk County Bancshares, Inc., Howard, Kansas, and thereby indirectly acquire Howard State Bank, Howard, Kansas.

Board of Governors of the Federal Reserve System, October 7, 1987.

James McAfee,

Associate Secretary of the Board.

BILLING CODE 6210-01-M

Applications to Engage de Novo in Permissible Nonbanking Activities; The Fuji Bank, Ltd., et al.

The companies listed in this notice have filed an application under § 225.23(a)(1) of the Board's Regulation Y (12 CFR 225.23(a)(1)) for the Board's approval under section 4(c)(8) of the Bank Holding Company Act (12 U.S.C. 1843(c)(8) and § 225.21(a) of Regulation

Y (12 CFR 225.21(a)) to commence or to engage do novo, either directly or through a subsidiary, in a nonbanking activity that is listed in § 225.25 of Regulation Y as closely related to banking and permissible for bank holding companies. Unless otherwise noted, such activities will be conducted throughout the United States.

Each application is available for immediate inspection at the Federal Reserve Bank indicated. Once the application has been accepted for processing, it will also be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing on the question whether consummation of the proposal can "reasonably be expected to produce benefits to the public, such as greater convenience, competition, or gains in efficiency, that outweigh possible adverse effects, such as undue concentration of resources, decreased or unfair competition, conflicts of interests, or unsound banking practices." Any request for a hearing on this question must be accompanied by a statement of the reasons a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute, summarizing the evidence that would be presented at a hearing, and indicating how the party commenting would be aggrieved by approval of the proposal.

Unless otherwise noted, comments regarding the applications must be received at the Reserve Bank indicated or the offices of the Board of Governors not later than November 4, 1987.

A. **Federal Reserve Bank of New York** (William L. Rutledge, Vice President) 33 Liberty Street, New York, New York 10045:

1. *The Fuji Bank, Ltd.*, Tokyo, Japan; to engage *de novo* in providing data processing and data transmission services pursuant to § 225.25(b)(7) of the Board's Regulation Y. Comments on this application must be received by October 26, 1987.

B. **Federal Reserve Bank of San Francisco** (Harry W. Green, Vice President) 101 Market Street, San Francisco, California 94105:

1. *Security Bank Holding Company*, Coos Bay, Oregon; to engage *de novo* through its subsidiary, Security Mortgage Company, Coos Bay, Oregon, in making, acquiring, or servicing loans or other extensions of credit for the subsidiary's account or the account of others, such as would be made by mortgage companies pursuant to § 225.25(b)(1) of the Board's Regulation Y.

Board of Governors of the Federal Reserve System, October 7, 1987.

James McAfee,

Associate Secretary of the Board.

BILLING CODE 6210-01-M

Formations of; Acquisitions by; and Mergers of Bank Holding Companies; Southwest Financial Group of Iowa, Inc., et al.

The companies listed in this notice have applied for the Board's approval under section 3 of the Bank Holding Company Act (12 U.S.C. 1842) and § 225.14 of the Board's Regulation Y (12 CFR 225.12) to become a bank holding company or to acquire a bank or bank holding company. The factors that are considered in acting on the applications are set forth in section 3(c) of the Act (12 U.S.C. 1842(c)).

Each application is available for immediate inspection at the Federal Reserve Bank indicated. Once the application has been accepted for processing, it will also be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing to the Reserve Bank or to the offices of the Board of Governors. Any comment on an application that requests a hearing must include a statement of why a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute and summarizing the evidence that would be presented at a hearing.

Unless otherwise noted, comments regarding each of these applications must be received not later than November 4, 1987.

A. **Federal Reserve Bank of Chicago** (David S. Epstein, Assistant Vice President) 230 South LaSalle Street, Chicago, Illinois 60690:

1. *Southwest Financial Group of Iowa, Inc.* Red Oak, Iowa; to become a bank holding company by acquiring at least 98.73 percent of the voting shares of Houthton State Bank, Red Oak, Iowa.

B. **Federal Reserve Bank of St. Louis** (Randall C. Summer, Vice President) 411 Locust Street, St. Louis, Missouri 63166:

1. **First Commercial Corporation,** Little Rock Arkansas; to acquire at least 80 percent of the voting shares of First Security Corporation, Harrison, Arkansas, and thereby indirectly acquire The Security Bank, Harrison, Arkansas.

James McAfee,

Associate Secretary of the Board.

[FR Doc. 87-23677 Filed 10-13-87; 8:45 am]

BILLING CODE 6210-01-M

FEDERAL TRADE COMMISSION

Granting of Request for Early Termination of the Waiting Period Under the Premerger Notification Rules

Section 7A of the Clayton Act, 15 U.S.C. 18a, as added by Title II of the Hart-Scott-Rodino Antitrust Improvements Act of 1976, requires persons contemplating certain mergers or acquisitions to give the Federal Trade Commission and the Assistant Attorney General advance notice and to wait designated periods before consummation of such plans. Section 7A(b)(2) of the Act permits the agencies, in individual cases, to terminate this waiting period prior to its expiration and requires that notice of this action be published in the **Federal Register.**

The following transactions were granted early termination of the waiting period provided by law and the premerger notification rules. The grants were made by the Federal Trade Commission and the Assistant Attorney General for the Antitrust Division of the Department of Justice. Neither agency intends to take any action with respect to these proposed acquisitions during the applicable waiting period:

BILLING CODE 6750–01–M

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

[Docket No. 87F–0277]

The Stroh Brewery Co.; Filing of Food Additive Petition

AGENCY: Food and Drug Administration.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA) is announcing that The Stroh Brewery Co. has filed a petition proposing that the food additive regulations be amended to provide for the safe use of aspartame as a sweetener in malt beverages of less than 7 percent ethanol by volume and containing fruit juice.

FOR FURTHER INFORMATION CONTACT: Carl L. Giannetta, Center for Food Safety and Applied Nutrition (HFF–334), Food and Drug Administration, 200 C Street SW., Washington, DC 20204, 202–426–5487.

SUPPLEMENTARY INFORMATION: Under the Federal Food, Drug, and Cosmetic Act (sec. 409(b)(5), 72 Stat. 1786 (21 U.S.C. 348(b) (5))), notice is given that a petition (FAP 7A4029) has been filed by The Stroh Brewery Co., 100 River Place,

Detroit, MI 48207–4291, proposing that § 172.804 *Aspartame* (21 CFR 172.804) be amended to provide for the safe use of aspartame as a sweetner in malt beverages of less than 7 percent ethanol by volume and containing fruit juice.

The potential environmental impact of this action is being reviewed. If the agency finds that an environmental impact statement is not required and this petition results in a regulation, the notice of availability of the agency's finding of no significant impact and the evidence supporting that finding will be published with the regulation in the **Federal Register** in accordance with 21 CFR 25.40(c).

Dated: October 5, 1987.

Richard J. Ronk,

Acting Director, Center for Food Safety and Applied Nutrition.

BILLING CODE 4160–01–M

Health Care Financing Administration

[OACT–015–N]

Medicare Program: Medicare Economic Index for 1988

AGENCY: Health Care Financing Administration (HCFA), HHS.

ACTION: Notice.

SUMMARY: This notice announces that the increase in the Medicare Economic Index for fee screen year (FSY) 1988, beginning on January 1, 1988, is 3.6 percent.

EFFECTIVE DATE: This notice is effective on January 1, 1988.

FOR FURTHER INFORMATION CONTACT: Ross H. Arnett III, (301) 594–6714.

SUPPLEMENTARY INFORMATION: Payment under Medicare Part B for a physician's service is based on a reasonable charge which, under section 1842(b) of the Social Security Act (the Act), may not exceed the lowest of: (1) The physician's actual charge for the service, (2) his or her customary charge for that service, (3) the prevailing charges of physicians for similar services in the locality adjusted for the Medicare Economic Index (MEI), or (4) a special reasonable charge limit for a service or category of services that a carrier or the Health Care Financing Administration (HCFA) determines results in grossly excessive charges when the rules previously mentioned are applied. (In a case where the use of the customary and prevailing charges results in a payment that is grossly deficient, a higher reasonable charge may be recognized.)

The prevailing charge for a service, before adjustment by the MEI, is calculated at the 75th percentile of physicians' customary charges for a similar service in the same locality. (In computing prevailing charges, the carrier uses the customary charges of all physicians in the locality, weighted by frequency. However, for payment purposes, the prevailing charge for non-participating physicians is 96 percent of the computed MEI adjusted prevailing charge.) Section 1842(b)(3) of the Social Security Act, and our regulations at 42 CFR 405.504(a)(3)(i), require that the prevailing charge for a physician service furnished before January 1, 1988 not exceed the level in effect for that service in the locality determined for the fiscal year ending on June 30, 1973, except to the extent justified on the basis of appropriate indicators of economic change as discussed below. The prevailing charge for a physician service furnished on or after January 1, 1988 must not exceed the level in effect for that service in the locality, determined for the previous year, except to the extent justified on the basis of appropriate indicators.

We have established an MEI for the purpose of adjusting prevailing charge levels in light of economic changes. The basis for this index is set forth in § 405.504(a)(3)(i). The basic methodology for the calculation of the MEI has not changed and can be reviewed in detail in our September 30, 1985 notice (50 FR 39941). Section 9331(c)(4) of the Omnibus Budget Reconciliation Act of 1986, Pub. L. 99–509, prohibits the Secretary from changing the methodology for the MEI until consultation with experts and completion of a study. To date, we have consulted with experts and are working on a study, but are not yet prepared to propose changes to the MEI methodology. We will afford public notice and an opportunity for comment prior to changing that methodology.

The MEI is comprised of two components: One measuring changes in general earnings levels (attributable to factors other than changes in productivity) and the other measuring changes in expenses of the kind incurred by physicians in office practice (42 CFR 405.504(a)(3)(i)(A) and (B)). The physician practice expense portion is currently composed of six components: (1) Salaries and wages; (2) office space; (3) drugs and supplies; (4) automobile expense; (5) malpractice insurance premiums; and (6) all other miscellaneous expenses. A detailed explanation of the calculation of weights for each type of practice expense can be found in the above-mentioned notice of September 30, 1985. The table found in this notice shows the factors and weights used in calculating the MEI for fee screen year (FSY) 1988; that is, the 12 month period beginning January 1, 1988. Items 1 through 6 in the table are the elements used to compute the increase in the physician practice expense component of the economic index. Item 9, the net income component, is derived from information contained in items 7 and 8 and reflects increases in general earnings levels exclusive of productivity increases.

The MEI reflects a base year of calendar 1971. Prior to enactment of Pub. L. 99–509, the cumulative effects of subsequent changes in the MEI for past periods were implemented prospectively. That is, any changes in the measure (based on more accurate data, for example) required recomputing the MEI back to its 1971 base period. This was done to ensure the computation of the most accurate percentage change in the MEI for prospective application in a given fee screen year (FSY). However, section 9331(c)(1) of Pub. L. 99–509 provides that for FSY 1987 the Medicare economic index (as defined in section 1842(b)(4)(E)(ii) of the Act) is 3.2 percent for physicians' services. The fourth sentence of section 1842(b)(3) of the Act, as amended by section 9331(c)(3) of Pub. L. 99–509, additionally provides that for subsequent fee screen years the MEI will be revised only to reflect year-to-year economic changes.

In accordance with this requirement, we have determined that the "annualized" MEI increase for FSY 1988 beginning on January 1, 1988 is 3.6 percent.

A major portion of the 1988 MEI increase is due to the large rate of increase in malpractice insurance premiums. The satute requires us to use the MEI methodology published on October 1, 1985 to determine the malpractice portion, as well as all other portions, of the 1988 MEI. Our previously mentioned study of the MEI will include an analysis that reflects recent economic changes regarding premiums for malpractice insurance.

The Congress is considering various proposals that may affect the MEI, as it did last year. If proposals are implemented that affect the MEI, we will advise the Medicare contractors through an appropriate manual issuance and the general public by means of a notice published in the **Federal Register**.

VOL 52 ISS 198 OCT 14 1987 UMI

ANNUAL PERCENT CHANGE OF THE COMPONENTS OF THE MEDICARE ECONOMIC INDEX [1]

	Percent change [2]
1. Hourly earnings of non-supervisory workers in finance, insurance, & real estate [3]	4.9
2. Housing component of the consumer price index	2.3
3. Private transportation component of the consumer price index	−3.6
4. Drugs and pharmaceutical component of the consumer price index	6.8
5. All other, miscellaneous, expenses (tied to the entire consumer price index)	1.9
6. Premiums for malpractice insurance [4]	42.7
7. Average weekly earnings of production and nonsupervisory workers [3]	1.7
8. Index of output per man hour of employed nonfarm workers [3]	0.7
9. Change in average weekly earnings net of change in output per man hour	1.0

[1] The weights for the MEI components, including the malpractice component, were derived from a special study done for HCFA by a consultant in 1982. The values are 0.47, 0.23, 0.07, 0.09, 0.04, and 0.10 for components one through six, respectively. In addition to the above weights, a 40–60 percent breakdown of gross income between physician practice expenses and physicians' earnings was used.

[2] The rates of change are for the 12-month period ended June 30, 1987. The same base period is used for computing customary and prevailing charges.

[3] Figures are published monthly in the Bureau of Labor Statistics' Monthly Labor Review.

[4] Derived from a survey of several major insurers (latest available percent change data are for calendar year 1986). This is consistent with prior computations of the malpractice insurance component of the MEI.

Regulatory Impact Statement

This notice merely announces the MEI percentage increase for participating physicians' services. (By law, the prevailing charge for non-participating physicians is 96 percent of the prevailing charge for participating physicians.) This notice is not a proposed rule or a final rule issued after a proposal, and does not alter any regulations. Therefore, we have determined and the Secretary certifies that no analyses are required under Executive Order 12291 or the Regulatory Flexibility Act (5 U.S.C. 601 through 612).

Paperwork Reduction Act

The changes in this notice do not impose information collection requirements. Consequently, they need not be reviewed by the Executive Office of Management and Budget under the authority of the Paperwork Reduction Act of 1980 (44 U.S.C. 3501 et seq.).

Waiver of Public Comment Procedures

We are not publishing this notice for public comment prior to its taking effect since it merely announces the rate of change in the MEI required by legislation. As noted above, the basic methodology for the calculation of the figures has not changed. In order for carriers to complete the calculation of the 1988 prevailing charges they need to be furnished with an MEI factor. Carriers must have this factor immediately in order to complete the update process and initiate a timely participation enrollment in accordance with section 1842(h) of the Act. Thus, we find it impracticable and not in the public interest to publish this document in proposed form with a prior public comment period.

(Section 1842(b)(3) of the Social Security Act (42 U.S.C. 1395u); 42 CFR 405.504)

(Catalog of Federal Domestic Assistance, Program No. 13.774, Medicare-Supplementary Medical Insurance)

Dated: September 24, 1987.

William L. Roper,

Administrator, Health Care Financing Administration.

BILLING CODE 4120–03–M

Public Health Service

National Commission on Orphan Diseases; Public Hearing and Public Meeting

AGENCY: Office of the Assistant Secretary for Health; HHS.

ACTION: Notice.

SUMMARY: The Department of Health and Human Services (DHHS) and the Office of the Assistant Secretary for Health are announcing a meeting and hearing of the National Commission on Orphan Diseases scheduled on November 5 and 6, 1987 respectively.

DATE: Date, time and place: Commission meeting on November 5, 1987, 1:30 p.m.; Public Hearing, November 6, 1987 at 8:30 a.m.; Sheraton International at O'Hare, 6810 North Mannheim Rd., Salon A of the O'Hare Ballroom, Chicago/Rosemont, IL 60018. The entire proceedings are open to the public.

FOR FURTHER INFORMATION CONTACT: Written requests to participate in the public hearing should be sent to: Mary C. Custer, Ph.D., Executive Secretary, National Commission on Orphan Diseases, Office of the Assistant Secretary for Health, 5600 Fishers Lane, Room 18–38, Rockville MD 20857, 301–443–6156. Persons desiring more information regarding the responsibilities and activities of the Commission should contact Stephen C. Groft, Pharm. D., Executive Director, National Commission on Orphan Diseases, at the same address and phone number.

Agenda: Open Public Meeting (November 5)

The Commission will discuss the availability of health insurance for patients with rare diseases and reimbursement policies of the Health Care Financing Adminsitration. The Commission will also discuss reports from workgroups on the liability issue and the peer review process for grants in the Federal sector. Other workgroups established to review the rare disease research activities of drug and medical device manufacturers, voluntary support groups, and private foundations will present their information gathering plans.

Agenda: Open Public Hearing (November 6)

The Commission has identified a series of issuance and questions to be addressed at the public hearings. These issues were published in the **Federal Register** notice announcing the Commission's first public hearing (52 FR 23083, June 17, 1987). Copies of these issues may be obtained from the contact persons listed above.

Persons desiring to make oral presentations that address these issues should notify either of the contact persons before October 26, 1987 and submit a written copy of the statement to be presented to the Commission. Oral presentations will be limited to ten minutes. Longer presentations should be summarized orally and submitted in writing in their entirety. Any person attending the hearing who did not request an opportunity to speak in advance ma be allowed to make an oral presentation at the conclusion of the hearing, if time permits, at the chairperson's discretion.

Persons who are not able to attend the public hearing, but want to submit information, may do so in writing. These statements should be forwarded to the Executive Secretary. Other issues indentified by the participants may also be included. Such information should be mailed to either of the contact persons at the address shown above.

The Commission has scheduled one additional public hearing, in Dallas, Texas, on February 4, 1988.

SUPPLEMENTARY INFORMATION: Meetings of the Commission will be conducted, as far as it is practical in accordance with the agenda published in this **Federal Register** notice. Any changes in the agenda will be announced at the beginning of the meeting.

Persons interested in specific agenda items may contact Mary Custer, Ph.D., Executive Secretary of the Commission, for the approximate time of discussion.

A list of Commission members and the charter of the Commission will be available at the meeting. Interested persons who are unable to attend the meeting may request this information or summary minutes of the meeting from the Executive Secretary.

This notice is issued under 10(a)(1) and (2) of the Federal Advisory Committee Act, Pub. L. 92–463 (5 U.S.C. Appendix I).

Dated: October 5, 1987.

Robert E. Windom,

Assistant Secretary for Health.

[FR Doc. 87–23695 Filed 10–13–87; 8:45am]

BILLING CODE 4140–01–M

Office of Refugee Resettlement

Refugee Resettlement Program; Statement of Goals, Priorities, Standards, and Guidelines for the Unaccompanied Minor Refugee and Cuban/Haitian Entrant Programs

ACTION: Final notice.

SUMMARY: This notice establishes goals, priorities, standards, and guidelines for the Unaccompanied Minor Refugee and Cuban/Haitian Entrant Programs. The Standards are amplifications of Office of Refugee Resettlement (ORR) child welfare regulations (45 CFR Part 400, Subpart H, §§ 400.110–400.120). The Guidelines in most cases reflect recommendations of a National Interagency Work Group on Unaccompanied Minors.

A proposed statement was published in the **Federal Register** of November 5, 1986 (51 FR 40260). This final statement reflects changes made in response to the public comments received, which are discussed below.

EFFECTIVE DATE: October 14, 1987.

ADDRESS: Office of Refugee Resettlement, Room 1229 Switzer Building, 330 C Street SW., Washington, DC 20201.

FOR FURTHER INFORMATION CONTACT: William R. Eckhof, (202) 245–0980.

SUPPLEMENTARY INFORMATION:

Authority

Section 412(a)(6) of the Immigration and Nationality Act (the "INA), as amended by the Refugee Act of 1980 (the "Act"), 8 U.S.C. 1522(a)(6):

> As a condition for receiving assistance under this section, a State must * * * (B) meet standards, goals, and priorities, developed by the Director [of the Office of Refugee Resettlement], which assure the effective resettlement of refugees * * * and the effective provision of services * * *.

Section 412(d)(2)(A) of the INA, 8 U.S.C. 1522(d)(2)(A):

> The Director is authorized to provide assistance, reimbursement to States, and grants to and contracts with public and private nonprofit agencies, for the provision of child welfare services, including foster care maintenance payments and services and health care * * *

Section 412(d)(2)(B) of the INA, 8 U.S.C. 1522(d)(2)(B):

> (i) In the case of a refugee child who is unaccompanied by a parent or other close adult relative (as defined by the Director), the services described in subparagraph (A) may be furnished until the month after the child attains eighteen years of age (or such higher age as the State's child welfare services plan under part B of title IV of the Social Security Act prescribes for the availability of such services to any other child in that State).
>
> (ii) The Director shall attempt to arrange for the placement under the laws of the States of such unaccompanied refugee children, who have been accepted for admission to the United States, before (or as soon as possible after) their arrival in the United States. During any interim period while such a child is in the United States or in transit to the United States but before the child is so placed, the Director shall assume legal responsibility (including financial responsibility) for the child, if necessary, and is authorized to make necessary decisions to provide for the child's immediate care.

Title V of the Refugee Education Assistance Act of 1980, enacted on October 10, 1980, provides for Federal assistance and services to individuals having Cuban/Haitian Entrant status. Under this Act, the President is required to exercise authorities identical to those under chapter 2 of title IV of the Immigration and Nationality Act (INA) with respect to Cuban/Haitian entrants.

Background

On January 30, 1986, ORR published final regulations (45 CFR Part 400, Subpart H, Child Welfare Services), prescribing requirements concerning grants to States under section 412(d)(2)(B) of the INA for child welfare services to unaccompanied minor refugees. In addition, between February 14, 1985, and June 12, 1986, an interagency work group composed of institutional entities active in the Unaccompanied Minors Program met periodically and developed a series of criteria against which individual agencies could be evaluated, and as a basis for determining allocation of future cases. A Proposed Statement of Program Goals, Priorities, Standards, and Guidelines evolved from these two documents, the Standards being elaboration of Subpart H of the Regulations, and the Guidelines reflecting recommendations adopted by the work group. The Proposed Statement was published in the **Federal Register** of November 5, 1986, inviting public comments until December 22, 1986. In addition, the Proposed Statement was distributed and explained at a Naitonal Conference on Unaccompanied Minor Refugees November 17, 1986, in Philadelphia, with attendees given the opportunity to comment verbally at that time; their verbal comments were transcribed and considered, along with the written comments received, in the development of this final Statement.

Discussion of Comments

ORR received 18 letters from State government agencies, national and local voluntary agencies, and service providers. In addition, seven persons representing similar agencies offered comments at the Philadelphia conference. The following sections address specific points which commenters raised:

1. 90-Day Parental Reunion

Comment: Fifteen commenters expressed the concern that the proposed 90-day period during which ORR would support services to unaccompanied minor refugees following arrival of a parent in the United States was inadequate in some particularly difficult cases. Most acknowledged that for the vast majority of such cases, 90 days was sufficient, but they cited instances in which difficulties were encountered in reuniting a child, who had been separated from his or her parents and placed in a new environment during a particularly volatile stage of development, with his or her newly arrived parent who was unprepared for the cultural and developmental changes of the child. They urged flexibility in implementing this provision.

Response: ORR expects that the overwhelming majority of cases involving parental reunification can be accommodated under the 90-day period, or through foster care assistance under title IV–E of the Social Security Act, or through Refugee Child Welfare Services. However, in order to take into consideration the rare case that might

BEST COPY AVAILABLE

not be accommodated by these means, we have amended the policy statement to provide that the Director of ORR may extend the 90-day period in a compelling case with the objective of encouraging family reunion and strengthening the refugee family. This change appears in the section on Legal Considerations, Standard B, Criterion 3.

2. Parental Reunification

Comment: One commenter stated that he believed that parental reunification is not always the best option for unaccompanied minor refugees and that unaccompanied minor status should be continued in such instances.

Response: While recognizing that this may be the case in a very limited number of instances, ORR notes congressional intent to provide funding for unaccompanied minors in the absence of their parents who normally would be expected to provide for them.

ORR's concern for the well-being of the child in such an instance must be weighed against the limitations of statutory authority and legislative intent which limit our ability to continue to provide funding for formerly unaccompanied minors whose parent or parents have reached the United States.

Two other avenues of funding for cases where there is a barrier to parental reunification are: (1) Possible conversion of the case to funding under the foster care authority of title IV–E of the Social Security Act; or (2) payment of support costs (from ORR's social service grant to the State) through the authority for refugee child welfare services, as outlined in 45 CFR Part 400, Subpart H, if the child has been in the United States less than 36 months.

Unaccompanied minor refugees normally are not eligible for support under title IV–E because reunion with their parents is not possible due to geographic considerations. The arrival of a child's parent(s) may make such eligibility possible if reunification is not in the best interest of the child.

3. Program Services and Benefits

Comment: Eight commenters objected to the proposed Administration/Management Standard B, Criterion 2, which required that "State rules and regulations provide the same child welfare services and benefits for refugee children, to the same extent, as those which are provided to other children of the same age in the State under a State's title IV–B plan, and in accordance with the State's child welfare standards, practices, and procedures." The commenters cited special needs of unaccompanied minor refugees, which they felt would not be met under this standard.

Response: This standard is based on program regulations at 45 CFR 400.116(a). It is intended to insure that refugee children, at a minimum, receive such services, consistent with their legal rights in the U.S. Section 400.116(b) allows additional services, if reasonable and necessary, if the ORR Director authorizes them. The language "at a minimum" has been inserted in Criterion 2 to clarify our intent and to address the commenters' concern.

4. Ethnically Matched Foster Parents

Comment: Three commenters stressed the desirability of placing unaccompanied minor refugees with ethnically matched foster parents. One of these commenters expressed the view that all other types of placement should be excluded.

In contrast, two other commenters objected to the guideline which calls for placing children under age 12 in ethnically matched foster homes "to the maximum extent feasible."

Response: The National Work Group recognized the importance of the availability of ethnically matched foster parents, as evidenced by Guidelines C. 1 and 2. Moreover, Guideline E focuses on efforts to help a child retain an understanding of, and respect for, his or her native culture and religion.

The National Work Group on several occasions regarded its approach as described in Guideline C.1 as adequate, and ORR is not persuaded to change this approach which we believe provides a needed measure of flexibility while emphasizing the importance of ethnically matched foster parents.

5. Adoption Procedures

Comment: Several commenters expressed concern that inasmuch as attempts to contact natural parents were discouraged by both the standards and 45 CFR Part 400 Subpart H, it would be difficult for a court to assure the protection of parental rights as specified in Legal Considerations, Criterion 5. One commenter opposed any adoption of unaccompanied minor refugees, and another asked for more detailed guidelines to assist the court in determining if parental rights might be terminated.

Response: In most cases, termination of parental rights will not be legally possible. These children were generally separated from their parents by forces beyond their control—by war and by political and social upheaval—and reunification is the basic objective of the program.

However, 45 CFR 400.115(c) allows for adoption when it is (1) in the best interest of the child and (2) there is termination of parental rights as determined by the appropriate State court, as when parents are dead or are missing and presumed dead. ORR, taking into consideration the wide number of variables in State law throughout the country, believes that such cases must be decided on their own merit, on a case-by-case basis, by local courts empowered to make such decisions based on State law and the best evidence available.

6. Bilingual Workers

Comment: Three commenters stated that bilingual workers might not always be available or be cost-effective to utilize.

Response: The National Work Group felt strongly about the need for good communication with the children under care as a cornerstone of an effective program, a view which ORR strongly supports. For this communication, bilingual workers are clearly required.

7. Caseworker Training

Comment: Three commenters felt that the proposed 50 hours per year of caseworker training would be excessive and unnecessary. A fourth commenter stated that no special training for caseworkers working with refugee youths was being provided in his State.

Response: The National Work Group expressed great concern during its deliberations about the need for training in order to meet the special needs of refugee children. At a time of program constriction, however, and in response to comments, ORR has lowered this period to 30 hours, with the understanding that this represents a minimum, and not necessarily a maximum, of training time, which should be determined by the specific needs of caseworkers.

8. Replacement Rates

Comment: The proposed guideline on placement options specified that (with certain exceptions for temporary care) no more than 30% of a provider agency's existing caseload have had more than two placements and no more than 10% have had more than three placements. Six commenters expressed concern that this guideline would counter-productively encourage agencies to leave children in unsuitable care rather than exceed the recommended replacement rates.

Response: In adopting this guideline, the National Work Group weighed such potential counter-productivity against

the importance of agency care in selecting foster parents. Work-group members, including provider-agency representatives, felt that the margins for change in placements which are permitted by the guideline are adequate to address the concern expressed by the commenters, and ORR is not persuaded to change this decision.

9. Cost-effective Program Size

Comment: Seven persons questioned the implications for the programs of public provider agencies of the guideline which stated that 30 children was the minimum-size program that could be expected to be cost-effective.

Response: The 30-child caseload was intended by the National Work Group to apply to contracted private provider agencies, and not to whatever size caseload might be under the care of a public child welfare agency. We have revised the wording of this criterion to make clear that it refers to "private, voluntary provider-operated local programs."

ORR envisions that private provider agencies whose caseloads are expected to drop below the 30 level within the next 12 months will plan for appropriate administrative adjustments to assure continued cost-effectiveness.

With respect to public agencies, good child welfare practice would seem to require that public agencies with an unaccompanied minor refugee caseload maintain culturally appropriate resources for as long as necessary, regardless of the number of children served.

10. Reunification of Amerasian Unaccompanied Minors

Comment: Three persons requested a statement of ORR policy with respect to reunification of Amerasian unaccompanied minors with their (American) fathers, when the names and whereabouts of the fathers are known.

Response: ORR has no intent to press for such reunifications unless they are desired by both the child and the father. When they do occur, unaccompanied minor status would terminate and the father would be expected to assume legal (and financial) responsibility.

11. "Least Restrictive Care Settings"

Comment: Two commenters asked ORR to clarify the meaning of the term "least restrictive care settings" as it appears in the section of the Statement entitled "Priorities for State Program Administration."

Response: The term "least restrictive care setting" in the child welfare context refers to the smallest and most open type of placement that is manageable, considering the needs of the child being served.

12. Completion of High School

Comment: Two commenters suggested that ORR funding for well-motivated unaccompanied minors should be allowed to enable them to complete high school, even if it required them to remain in care beyond their 21st birthday. A third commenter proposed that the age limit be reduced to age 17 to conform with AFDC–FC age requirement regulations.

Response: The Refugee Act requires that eligibility for unaccompanied minor status be consistent with the State's title IV–B plan "for the availability of such services to any other child in that State." (Section 412(d)(2)(B)(i) of the INA.) Therefore ORR cannot set higher or lower ages of eligibility that differ from a State's title IV–B plan.

13. Case Planning

Comment: One commenter noted that Programmatic Standard A, Case Planning, is not consistent with his State's procedure, policy, and program guidelines for administration of the unaccompanied minors program, and asked for clarification.

Response: This standard is based upon regulations governing operation of the unaccompanied minors program at 45 CFR 400.118 which carries with it the force of law.

14. Applicability of Title IV–E

Comment: One commenter stated that the reference to title IV–E in Administration/Management Standard B, Criterion 3, was irrelevant because, in most cases, unaccompanied minor refugees are ineligible for services under that title.

Response: This criterion is based on ORR child welfare regulations at 45 CFR 400.112(c). ORR recognizes that most unaccompanied minors will not be eligible under title IV–E but feels that in the few instances where such eligibility can be established, funding should be through that mechanism, with ORR providing the share of costs that normally would be borne by the State or local government.

15. Establishing Legal Responsibility

Comment: Three commenters asked for clarification of Legal Considerations Standard A, Criterion 1, which requires that, within 30 days of a child's arrival, the State or State-authorized child welfare agency petition an appropriate court to establish legal responsibility (if action by a court is required by State law).

Response: ORR recognizes that a variety of State legal mechanisms are used to establish responsibility for unaccompanied minor refugees. In some States, responsibility is established within hours of arrival, while, in others, backlogged dockets and court procedures can delay formal establishment of legal responsibility for weeks. ORR's intent is to assure that the process ultimately leading to legal responsibility is commenced promptly (within 30 days) while allowing sufficient flexibility for the State legal system to function normally.

16. Filing of Reports

Comment: One commenter stated that the Administrative/Management Standard C, Criterion 4, requiring the filing of a placement report within 30 days of a child's arrival, provided an unrealistically brief period.

Response: This standard is based on existing regulations at 45 CFR 400.120(a). In view of the Refugee Act's requirement for maintaining current lists of unaccompanied minor refugees, ORR considers this requirement to be both justified and important.

17. Tracking of Children

Comment: One commenter suggested that ORR should require semi-annual, rather than annual, progress reports (ORR–4) on unaccompanied minors to improve tracking of the children.

Response: ORR believes that properly filed ORR–3 Placement Reports together with annual ORR–4 Progress Reports will permit adequate tracking, and that doubling the progress-report workload would yield little aggregate national information while increasing the workload of caseworkers.

18. Religious Heritage

Comment; One commenter questioned the reference, in Programmatic Standard A, Criterion 1, relating to "preservation of * * * religious heritage," expressing the belief that the unaccompanied minor should be accorded "freedom to attend or not attend religious ceremonies."

Response: The language of this standard is taken from existing program regulations at 45 CFR 400.118(b)(6), and ORR is not persuaded of the need for changing the regulatory language.

19. Health and Mental Health Plans

Comment: One commenter asked how frequently ORR expected that the health/mental health plan described in the Health and Mental Health Guideline would be updated.

VOL
52
ISS
198
OC
14
1987
UMI

Response: ORR expects that the plan would be current, in order to be available in case of emergency.

20. Program Audit

Comment: One commenter proposed that the statement include a section defining standards and responsibility for program audits, in order to assess cost-effectiveness.

Response: ORR believes that the financial records currently required, which must meet HHS grant requirements, are adequate for effective audit purposes.

Statement of Goals, Priorities, Standards, and Guidelines for the Unaccompanied Minor Refugee and Cuban/Haitian Entrant Programs

Introduction

Basis and Purpose of the Program

It is the basis and purpose of the program to provide appropriate care, consistent with State and Federal child welfare laws and practices, for unaccompanied minor refugees and entrants and to prepare them for productive lives in the United States.

To ensure the most effective possible resettlement of unaccompanied minor refugees in the United States consistent with and as mandated by the applicable provisions of the Refugee Act of 1980, as well as compliance with 45 CFR Part 400, Subpart H, "Child Welfare Services," the Office of Refugee Resettlement (ORR) establishes the following program goals, priorities, standards, and guidelines for the State-administered refugee resettlement program (RRP) for FY 1988 and the following fiscal years. These goals and standards will be applied to the Cuban/Haitian Entrant Unaccompanied Minor Program, for the States which participate in that program.

Definitions

The provider agency. An organization, either public or private, which provides placement and direct service to the unaccompanied minor.

The supervising agency. The public agency, either State or local, which supervises the provider agency.

The contracting agency. The public agency which either contracts with a private contractor or a county for care of the child.

I. Program Goals

The goals of the program for unaccompanied minor refugees and entrants are:

To reunify unaccompanied refugee children with their parents or, within the context of State child welfare practice, with non-parental adult relatives.

To help unaccompanied minors develop appropriate skills to enter adulthood and to achieve economic and social self-sufficiency, through delivery of child welfare services in a culturally sensitive manner.

II. Priorities for State Program Administration

To place unaccompanied minor refugees and entrants in least restrictive care settings as soon as possible, and to establish legal responsibility in such a way, under State law, as to ensure that these children receive the full range of assistance, care, and services to which all children in the State are entitled, and to designate a legal authority to act in place of the child's unavailable parent(s).

To encourage reunification of minors with their parents, or other appropriate adult relatives, and to work with supportive resources, such as voluntary refugee resettlement agencies, at the State and local levels, to facilitate such reunion.

To provide child welfare services and refugee-specific services that will help children adjust to their communities, with emphasis on those services most likely to help children prepare for emancipation/self-supporting status, appropriate to their age and development. States should strive to ensure provision of services in a cost-effective manner. Cost should generally parallel those of the State's regular domestic child welfare program, except where consideration given to unique cultural, language, and psychological needs of the refugee clientele mandates different costs.

In attempting to arrange placement of unaccompanied minor refugees under State child welfare laws, to make every effort to ensure a cooperative and effective working relationship between the State, voluntary agencies, and provider agencies participating in the Refugee and Entrant Unaccompanied Minors Programs.

III. Program Standards

The program for unaccompanied minor refugees requires a unique blend of services and program management, with specific cognizance of both refugee resettlement concerns and child welfare practices. Likewise, it requires a high degree of cooperation, coordination, and planning among numerous entities at various levels.

In requiring the Director of the Office of Refugee Resettlement to "attempt to arrange for the placement under the laws of the State * * *" of unaccompanied minor refugees, the Refugee Act implies an effort by the Director to effect this cooperation, coordination, and planning. In consequence, the Director of the Office of Refugee Resettlement hereby establishes the following standards for operation of the State-administered unaccompanied minor refugee and entrant program. Compliance with these standards is mandatory.

Administration/Management

A. Annual Planning

Standard: A cooperative, effective, well-coordinated, and culture-sensitive working relationship exists among agencies involved in the unaccompanied minors program.

Criterion: A State or county supervising and/or contracting agency for refugee children confers at least annually with provider agencies therein to discuss program needs and problems, and to establish numbers of children to be served in the coming year within the State.

B. State Leadership Role

Standard: The State provides adequate organizational leadership and administrative support for the State unaccompanied minors program.

Criteria: 1. Basic requirements of 45 CFR 400.5 (Refugee Resettlement Program State Regulations) and 45 CFR 400.110–400.120 are in place and are adhered to.

2. State rules or regulations provide at a minimum the same child welfare services and benefits for refugee children, to the same extent, as those which are provided to other children of the same age in the State under a State's title IV–B plan, and in accordance with the State's child welfare standards, practices, and procedures.

3. The State provides foster care maintenance payments under the State's title IV–E program to any refugee children eligible under that program.

4. Rules, regulations, and procedures are in place whereby the State assumes program accountability for all aspects of the program, including fiscal and program reporting.

5. The program is structured within State government in such a way that meaningful input into programmatic issues is provided by *both* the State's refugee program and child welfare staffs.

6. State goals and objectives do not alter or infringe upon program goals of ORR as set forth herein.

7. Child welfare services, assistance procedures, and facilities meet

recognized standards consistent with the State Plan pursuant to title IV–B of the Social Security Act.

C. Monitoring and Reporting

Standard: The State effectively monitors services to unaccompanied minor refugees and entrants.

Criteria: 1. Written State procedures, consistent with the State's Refugee Resettlement Plan, ensure that the appropriate supervising child welfare agency monitors activity of the provider agency at least annually.

2. The monitoring instruments reflect regular State standards for foster care, and ORR standards for unaccompanied minors care as applicable.

3. Corrective actions are taken promptly on problems identified during fiscal and program monitoring.

4. All ORR–3 (Placement) Reports are filed with ORR within 30 days of the date of placement, and within 60 days of a change of status (e.g., change of placement or legal responsibility, reunification with adult relatives, and termination from the program (e.g., emancipation or reunification with parent(s))).

5. All ORR–4 (Progress) Reports are filed with ORR annually.

Legal Considerations

A. Legal Responsibility

Standard: Legal responsibility is established promptly under State child welfare laws.

Criteria: 1. The State or State-authorized child welfare provider agency petitions an appropriate court to establish legal responsibility within 30 days of the child's arrival at the location of resettlement and placement, if action by a court is required by State law.

2. The section of State law under which legal responsibility is established makes the unaccompanied minor eligible for the full range of assistance, care, and services to which all children in the State are entitled.

3. The section of State law under which legal responsibility is established designates a legal authority to act in place of the child's unavailable parent(s).

4. Procedures exist to ensure that mechanisms of the Interstate Compact on Placement of Children are utilized when an interstate placement is required subsequent to initial placement.

5. Procedural safeguards exist which ensure that the rights of the minor's unavailable parent(s) are protected, and are not terminated as long as reunification with the parents remains reasonably possible, as determined by an appropriate State court.

B. Family Reunion

Standard: Written State policy encourages the reunion in the United States of unaccompanied minor refugees with their parents or other appropriate relatives.

Criteria: 1. Programs for unaccompanied minor refugees are located in areas which have, or have ready access to, existing refugee resettlement agencies which are able to assist in family reunion.

2. Children are encouraged to apply for admission of their parents to the United States, and are assisted with preparation of the necessary documentation, including applications.

3. When reunion becomes possible following arrival of a parent or parents in the United States, the provider agency assists children and parent(s) in the process, as necessary, for up to 90 days after the agency has knowledge of the presence of the parents, after which ORR unaccompanied minor benefits cease, unless the Director of ORR has extended the time period beyond 90 days by specific waiver.

Programmatic

A. Case Planning

Standard: The unaccompanied minor is provided appropriate child welfare and refugee-specific services to develop the skills necessary for social, emotional, and economic self-sufficiency.

Criteria: 1. State regulations or rules provide that a written case plan for the care and supervision of each child, including a service plan, leading to non-dependent emancipation or family reunion, is developed, and reviewed for each child semi-annually. The case plan at a minimum addresses each of the following areas:

—Social adjustment
—English language training
—Career planning
—Education/training as appropriate
—Health needs
—Suitable mode of care in the least restrictive setting
—Development of socialization skills
—Family reunification
—Preservation of ethnic and religious heritage
—Mental health needs, if necessary.

IV. Guidelines for Program Development

The Director of the Office of Refugee Resettlement further establishes the following Guidelines for Program Development, developed by a special national work group of experts in care for unaccompanied minors, composed of representatives of national voluntary agencies, local provider agencies, State government, the Department of State, and ORR. These guidelines are strongly recommended by the Director as a yardstick against which current provider activities may be evaluated by State or county supervising/contracting agencies, and against which possible future placements may be planned by national voluntary agencies.

A. Cost-Effectiveness

Guideline: The program is administered in a cost-effective manner

Criteria: 1. Costs for refugee children are consistent with costs for other children in care in the State.

2. Cost is a consideration when evaluating overall program effectiveness, but should not exist as an isolated criterion. Minimum program standards must be addressed at first as a context from which to evaluate the effectiveness and costs of unaccompanied minors programs.

3. To assure effective staff utilization and to provide a sufficiently broad range of services and types of care, at least 30 children are participating in private, voluntary provider-operated local programs.

4. The provider agency attempts to access non-ORR funded resources (such as the Job Training Partnership Act, Job Corps, vocational education, scholarships to preparatory schools and colleges).

B. Provider-Agency Staff Qualifications

Guideline: A well-qualified provider-agency staff is utilized to provide services.

Criteria: 1. Supervisors, at a minimum, meet established State standards for persons providing similar services in non-refugee child care agencies.

2. The provider agency has on-staff (a) bilingual, bicultural worker(s) specific to the clientele served.

3. The bilingual, bicultural worker(s) are utilized as an integral part of the program's service function, and not merely as translator(s).

4. Bilingual, bicultural workers are encouraged to actively pursue training opportunities that will help them to become qualified under State standards.

5. At least 30 hours, annually, of ongoing, planned staff development activities are provided for each staff member, including program supervisors, directly involved in provision of services.

6. The direct-services staff ratio of clients to service workers is not greater

VOL 52 ISS 198 OC 14 1987 UMI

than the State's standard for non-refugee child care.

C. Placement Options

Guideline: The provider agency maintains, or has access to, a range of suitable placement options.

Criteria: 1. Placement options include family foster homes, ethnically matched foster homes, group homes, and supervised independent living.

2. To the maximum feasible extent, children 12 years of age and younger are placed in ethnically matched foster homes to support their understanding of their native culture.

3. No more than 30 percent of the existing caseload have had more than two placements (exclusive of placements in reception centers, reception homes, temporary/emergency placements not exceeding 45 days, or planned independent living situations).

4. No more than 10 percent of the existing caseload have had more than three placements (same exclusions as item 3 above).

5. Before family foster care is utilized, the foster family receives training and information related to cultural sensitivities of the caseload.

D. Preparation for Emancipation

Guideline: The program actively and formally promotes the responsible emancipation of unaccompanied minors.

Criteria: 1. Program components provide independent living skills services to assist unaccompanied minors to prepare adequately for emancipation without reliance on public assistance.

2. The public cash assistance dependency rate for employable former unaccompanied minors, subsequent to their emancipation, is no greater than 10 percent of all the provider agency's refugee emancipees 90 days following emancipation.

3. State law is sufficiently flexible to permit an unaccompanied minor to remain in care through the completion of high school (but not beyond the 21st birthday).

E. Retention of Ethnic Heritage

Guideline: Children are encouraged to retain an understanding of, and respect for, their native culture and religion.

Criteria: 1. Programs for unaccompanied minor refugees are located in geographic areas which have ethnic communities similar to those of the children placed.

2. Children are placed within ethnically similar communities, or in areas that are readily accessible to the activities of those communities.

3. Provider agencies maintain a written plan and periodic schedule for exposure to and participation in appropriate cultural events.

F. Health and Mental Health

Guideline: Children are provided with necessary health and mental health services.

Criteria: 1. The provider agency maintains ongoing access to health and mental health services.

2. The provider agency has a written contingency plan involving identification of potential resources for coping with cases of severe mental health disorders.

Dated: September 24, 1987.

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

[NV-040-08-4322-12]

Ely District Advisory Council; Meeting

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice of meeting.

SUMMARY: Notice is hereby given that a meeting of the Ely District Advisory Council will be held on Wednesday, November 18, 1987.

The meeting will convene at 10:00 a.m. in the Conference Room of the Ely District Office located on the Pioche Highway one mile south of Ely, Nevada.

The main agenda items will be the status of various resource programs in the district, the status of the wildlife reintroduction and augmentation programs on Bureau administered lands in the Ely District and a discussion of the issues and conflicts in the Wilson Greek Allotment where a public scoping and planning process has been initiated by the Ely District.

Public comment time is scheduled for 1:00 p.m. The public is invited to attend this meeting and may, at the designated time, submit written or oral statements for the advisory council's consideration. Minutes of the meeting will be available for public inspection and reproduction during regular office hours within 30 days following the meeting.

DATE: October 2, 1987.

ADDRESS: Comment and suggestions should be sent to: Bureau of Land Management, Star Route 5, Box 1, Ely, Nevada 89301.

FOR FURTHER INFORMATION CONTACT: Terry Dailey, (702) 289-4865.

Date: October 2, 1987.

Kenneth G. Walker,

District Manager.

BILLING CODE 4310-HC-M

Federal-State Coal Advisory Board; Meeting

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice of meeting.

SUMMARY: This notice is to inform the public that the Federal-State Coal Advisory Board (Board) will meet in Denver, Colorado, December 2, 1987. The public is invited to attend. The Board will (1) review the status of the implementation of the Secretary's coal program decisions of February 21, 1986, (2) discuss the Department's policies and procedures for processing coal preference right lease applications (PRLAs), (3) review the Board's charter with respect to its renewal, and (4) formulate a recommendation to the Secretary on a Departmental long-range lease sale plan, based on information provided by the regional coal teams.

DATE: The Board will meet at 8:30 a.m. on December 2, 1987.

ADDRESS: The Board meeting will be held at the Clarion Hotel, 3202 Quebec Street, Denver, Colorado 80207, telephone 1-800-252-7466.

FOR FURTHER INFORMATION CONTACT: Walt Rewinski or John Carlson, Division of Solid Mineral Leasing, Bureau of Land Management (650), 18th and C Streets NW., Washington, DC 20240, telephone (202/FTS) 343-4636.

SUPPLEMENTARY INFORMATION: Implementation of the Secretary's coal program decisions of February 21, 1986, involved the drafting and publication of several rule changes and the development of a comprehensive set of instructions to the field for carrying out the Federal coal program. The Board will hear a presentation of the current status of these efforts along with a presentation on the Bureau's recently adopted procedures for processing coal preference right lease applications. Regional coal team representatives will provide the Board with an update on activities within their respective regions. Board members will also review and discuss proposed regional lease sale plans, provided by the regional coal teams, and develop a proposed long-range Departmental lease sale plan for submission to the Secretary.

Additionally, the Board will review its charter, which expires in October 1988, and discuss several proposed changes in anticipation of charter renewal, which is required every two years. .

The public will have an opportunity to address the Board on agenda topics during the public comment periods, as noted on the agenda, below. Written copies of a speaker's remarks would be appreciated. Any comments will become a part of the record of the Board meeting. The Chairperson may impose a time limit on speakers' comments to ensure that all those wishing to address the Board are heard.

Realty Action; Noncompetitive Sale of Public Land in Graham County, AZ

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice.

SUMMARY: The following lands have been examined and identified as suitable for disposal under the Federal Land Policy and Management Act of 1976 (90 Stat. 2750; 43 U.S.C. 1713) at fair market value:

Gila and Salt River Meridian, Arizona

T. 6 S., R. 27 E.,
Sec. 35, S½SE¼NW¼SW¼.
Containing 5.0 acres, more or less.

The land is being offered to Mr. Lowell Hively to settle an unauthorized use of public lands.

The land is not required for any federal purpose. Conveyance of the parcel would best serve the public interest. This action is consistent with the Bureau's planning recommendations.

The patent issued as the result of the sale will be subject to all valid existing rights and reservations of record. It will contain the following reservations:

1. Rights-of-Way thereon for ditches and canals constructed by the authority of the United States. Act of August 30, 1890, 26 Stat, 391; 43 U.S.C. 945.

2. All the oil and gas in the land so patented, and to it or persons authorized by it, the right to prospect for, mine, and remove the same, subject to such conditions as are or may hereafter be provided by such laws reserving such deposits (30 U.S.C. 121–124; 186).

The patent will be issued subject to:

1. Such rights as Harold Carpenter, Tillie Carpenter, Hearold Elmer, Charleen Elmer, William Sorsen, Loraine Sorsen, Michael Maryott, Laura Maryott, Sean Maryott and Gillian Maryott may have to the Gem No. 67 mining claim (AMC 46188).

2. Such rights for water pipeline right-of-way purpose as the City of Safford may have. (A 19088)

3. Such rights for buried telephone cable right-of-way purpose as Mountain States Telephone and Telegraph Company may have. (A 11856)

4. Such rights for road right-of-way purpose as Graham County may have. (A 22710)

Publication of this notice in the **Federal Register** segregates the public lands from the operation of the public land laws and the mining laws. The segregative effect will end upon issuance of a patent or 270 days from the date of the publication, whichever occurs first.

DATE: For a period of 45 days from the date of this notice in the **Federal Register**, interested parties may submit comments to the District Manager at the above address. Any adverse comments will be evaluated by the State Director who may sustain, vacate or modify this realty action and issue a final determination. In the absence of any action by the State Director, this realty action will become the final determination of the Department of the Interior.

SUPPLEMENTARY INFORMATION: Detailed information concerning reservations, conditions, appraised other items may be obtained from the Safford District Office or by calling (602) 428–4040 during the office hours 7:45 to 4:15 MTS.

Dated: October 1, 1987.

Ray A. Brady,

District Manager.

[FR Doc. 87-23708 Filed 10-13-87; 8:45 am]

BILLING CODE 4310-32-M

[NV-930-08-4212-11; N-44619]

Realty Action; Lease Purchase for Recreation and Public Purposes; Clark County, NV

The following described public land in Las Vegas, Clark County, Nevada has been identified and examined and will be classified as suitable for lease/purchase under the Recreation and Public Purposes Act, as amended (43 U.S.C. 869 *et seq.*). The lands will not be offered for lease/purchase until at least 60 days after the date of publication of this notice in the **Federal Register**.

Mount Diablo Meridian, Nevada

T. 21 S., R. 61 E.,
Sec. 13, W½NE¼NE¼SE¼.

This parcel of land contains approximately 5 acres. The Clark County School District intends to use the land for an education center complex. The lease and/or patent, when issued, will be subject to the provisions of the Recreation and Public Purposes Act and applicable regulations of the Secretary of the Interior, and will contain the following reservations to the United States:

1. A right-of-way thereon for ditches and canals constructed by the authority of the United States, Act of August 30, 1890, 26 Stat. 391, 43 U.S.C. 945.

2. All minerals shall be reserved to the United States, together with the right to prospect for, mine and remove such deposits from the same under applicable law and such regulations as the Secretary of the Interior may prescribe.

and will be subject to:

An easement for streets, roads and public utilities in accordance with the transportation plan for Clark County.

The land is not required for any federal purpose. The lease/purchase is consistent with the Bureau's planning for this area.

Detailed information concerning this action is available for review at the office of the Bureau of Land Management, Las Vegas District, 4765 W. Vegas Drive, Las Vegas, Nevada.

Upon publication of this notice in the **Federal Register**, the above described land will be segregated from all forms of appropriation under the public land laws, including the general mining laws, except for recreation and public purposes and leasing under the mining leasing laws.

For a period of 45 days from the date of publication of this notice in the **Federal Register**, interested parties may submit comments to the District Manager, Las Vegas District, P.O. Box 26569, Las Vegas 89126. Any adverse comments will be reviewed by the State Director. In the absence of any adverse comments, the classification of the land described in this Notice will become effective 60 days from the date of publication in the **Federal Register**.

Date: October 5, 1987.

Ben F. Collins,

District Manger, Las Vegas, NV.

BILLING CODE 4310-HC-M

Fish and Wildlife Service

Endangered and Threatened Species Permit; Receipt of Applications for Permits

The following applicants have applied for permits to conduct certain activities with endangered species. This notice is provided pursuant to section 10(c) of the Endangered Species Act of 1973, as amended (16 U.S.C. 1531, *et seq.*):

PRT-721879

Applicant: William P. Thomas, Orlando, FL

The applicant requests a permit to import the personal sport-hunted trophy of a bontebok (Damaliscus dorcas dorcas), culled from the captive herd of F.W.M. Bowker, Grahamstown, Republic of South Africa, for the purpose of enhancement of propagation.

PRT-721915

Applicant: David S. Conant, Dept. of Biological Sciences, Dartmouth College, Hanover, NH

The applicant requests a permit to collect a total of 80 mature leaves from 40-80 elfin tree ferns (Cyathea druopteroides) to study hybyid specification.

PRT-721880

Applicant: San Diego Zoological Society, San Diego, CA

The applicant requests a permit to import one male and one female captive-born white eared pheasant (Crossoptilon crossoptilon) from Tierpark Berlin, German Democratic Republic, for the purpose of introducing new bloodlines to their captive propagation program.

PRT-721400

Applicant: San Diego Zoological Society, San Diego, CA

This is to amend the **Federal Register** notice, Vol. 52, No. 183, page 35593, published September 22, 1987, to allow theimport of five pairs of golden-shouldered parakeets (Psephotus chrysopterygius) from the Royal Zooloigical Society of South Australia.

Documents and other information submitted with these application are available to the public during normal business hours (7:45 a.m. to 4:15 p.m.) Room 611, 1000 North Glebe Road, Arlington, Virginia 22201, or by writing to the Director, U.S. Fish and Wildlife Service of the above address.

Interested persons may comment on any of these applications within 30 days of the date of this publication by submitting written views, arguments, or data to the Director at the above address. Please refer to the appropriate PRT number when submitting comments.

Dated: October 6, 1987.

Larry LaRochelle,

Acting Chief, Branch of Permits.

BILLING CODE 4310-55-M

Klamath Fishery Management Council; Meeting

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Notice of meeting.

SUMMARY: Pursuanty to section 10(a)(2) of the Federal Advisory Committee Act (5 U.S.C. App. I), this notice announces a meeting of the Klamath Fishery Management Council established under the authority of the Klamath River Basin Fishery Resources Restoration Act (16 U.S.C. 460ss *et seq.*). The meeting is open to the public.

DATES: The Council meeting will be held from 9:00 a.m. to 4:00 p.m. Thursday, October 29, 1987.

ADDRESS: The meeting will be held at the Eureka Inn, 7th and F Streets, Eureka, California.

FOR FURTHER INFORMATION CONTACT: Dr. Ronald A. Iverson, Project Leader, Klamath Field Office, U.S. Fish and Wildlife Service, 1312 Fairlane Road, Yreka, CA 96097; telephone (916) 842-5763.

SUPPLEMENTARY INFORMATION: For background information on the Klamath Fishery Management Council, please refer to the notice of its initial meeting that appeared in the **Federal Register** on July 8, 1987 (52 FR 25639). During the October 29 meeting, the Council will discuss 1987 fall chinook harvest and escapement, enforcement of gillnet fishing regulations, amendments of the Klamath River Basin Fishery Resources Restoration Act under consideration.

Council operating procedures, appointments to the Council's Technical Advisory Team, in-season management measures to control fall chinook harvest reates, deficit accounting of salmon harvests, and other pertinent topics.

Dated: October 8, 1987.

Frank Dunkle,

Director, U.S. Fish and Wildlife Service.

BILLING CODE 4310-55-M

National Park Service

Upper Delaware Citizens Advisory Council; Meeting

AGENCY: National Park Service, Interior.
ACTION: Notice of meeting.

SUMMARY: This notice sets forth the date of the forthcoming meeting of the Upper Delaware Citizens Advisory Council. Notice of this meeting is required under the Federal Advisory Committee Act.

DATE: October 23, 1987, 7:00 p.m.[1]

Inclement Weather Reschedule Date: None.

ADDRESS: Town of Tusten Hall, Narrowsburg, New York.

FOR FURTHER INFORMATION CONTACT: John T. Hutzky, Superintendent; Upper Delaware Scenic and Recreational River, P.O. Box C, Narrowsburg, NY 12764-0159; 717-729-8251.

SUPPLEMENTARY INFORMATION: The Advisory Council was established under section 704(f) of the National Parks and Recreation Act of 1978, Pub. L. 95-625, 16 U.S.C. 1724 note, to encourage maximum public involvement in the development and implementation of the plans and programs authorized by the Act. The Council is to meet and report to the Delaware River Basin Commission, the Secretary of the Interior, and the Governors of New York and Pennsylvania in the preparation and implementation of the management plan, and on programs which relate to land and water use in the Upper Delaware region. The agenda for the meeting will surround the issue of the "strand" along the Upper Delaware Scenic and Recreational River.

The meeting will be open to the public.

Any member of the public may file with the Council a written statement concerning agenda items. The statement should be addressed to the Upper Delaware Citizens Advisory Council, P.O. Box 84, Narrowsburg, NY 12764.

Minutes of the meeting will be available for inspection four weeks after the meeting, at the permanent headquarters of the Upper Delaware Scenic and Recreational River; River Road, 1¾ miles north of Narrowsburg, New York; Damascus Township, Pennsylvania.

Dated: October 5, 1987.

Sandra C. Rosencrans,

Acting Regional Director, Mid-Atlantic Region.

INTERSTATE COMMERCE COMMISSION

[Finance Docket No. 30900; Finance Docket No. 30900 (Sub-No. 1]

Joint Application of CSX Corp. and Sea-Land Corp.

AGENCY: Interstate Commerce Commission.

ACTION: Notice of exemption.

SUMMARY: Pursuant to 49 U.S.C. 10505, the Commission exempts from the prior approval requirements of 49 U.S.C. 11343, the acquisition of control by CSX Corporation of two motor carrier subsidiaries of Sea-Land Corporation (Sea-Land Freight Service, Inc., and Intermodal Services, Inc.), subject to labor protective conditions for rail employees.

ADDRESSES: Send petitions referring to Finance Docket No. 30900 and Finance Docket No. 30900 (Sub-No. 1) to:

(1) Office of the Secretarty, Case Control Branch, Interstate Commerce Commission, Washington, DC 20423

(2) Petitioner's representative: G. Paul Moates, Sidley & Austin, 1722 Eye Street, NW., Washington, DC 20006

FOR FURTHER INFORMATION CONTACT: Joseph H. Dettmar, (202) 275–7245, TDD for hearing impaired (202) 275–1721.

SUPPLEMENTARY INFORMATION: This notice revises and supplements the previous notice in this proceeding published September 4, 1986 at 51 FR 31734–31735.

Additional information is contained in the Commission's decision. To purchase a copy of the decision, write to Dynamic Concepts, Inc., Room 2229, Interstate Commerce Commission Building, Washington, DC 20423 or call (202 289–4357, (assistance for hearing impaired is available through TDD services, (202) 275–1721) of by pickup from Dynamic Concepts, Inc., in Room 2229 at Commission headquarters.

Decided: October 2, 1987.

By the Commission, Chairman Gradison, Vice Chairman Lamboley, Commissioners Sterrett, Andre, and Simmons.

Noreta R. McGee,

Secretary.

[Finance Docket No. 31102]

Wisconsin Central Ltd.; Exemption Acquisition and Operation; Certain Lines of Soo Line Railroad Co.

AGENCY: Interstate Commerce Commission.

ACTION: Vacation of stay.

SUMMARY: The Commission vacates its stay of September 11, 1987, published at 52 FR 35505 on September 16, 1987. This action allows the exemption from 49 U.S.C. 10901 to become effective on October 11, 1987. The Commission will issue a decision at a later date addressing in more detail the comments submitted as a result of its earlier request.

FOR FURTHER INFORMATION CONTACT: Joseph H. Dettmar, (202) 275–7245. [TDD for hearing impaired: (202) 275–1721].

SUPPLEMENTARY INFORMATION: By decision served September 11, 1987, we stayed until October 26, 1987, the effective date of an exemption that would allow Wisconsin Central Ltd. to acquire and operate certain properties of the Soo Line Railroad Company and requested comments from interested parties concerning the transaction. On September 22, 1987, we declined to consider a vacation of the stay until we had received the requested comments. Numerous parties filed comments. Upon consideration of the comments filed, the Commission vacates the stay, but continues to study the transaction.

Additional information is contained in the Commission's decision. To purchase a copy of the full decision, write to Dynamic Concepts, Inc., Room 2229, Interstate Commerce Commission Building, Washington, DC 20423, or call 202–289–4357 or 289–4359 (assistance for the hearing impaired is available through TDD services (202) 275–1721) or by pickup from Dynamic Concepts, Inc., in Room 2229 at Commission headquarters.

Decided: October 7, 1987.

By the Commission, Chairman Gradison, Vice Chairman Lamboley, Commissioners Sterrett, Andre, and Simmons. Vice Chairman Lamboley and Commissioner Simmons

dissented with a separate expression which will be served at a later date.

Noreta R. McGee,

Secretary.

National Cooperative Research Notifications; Joint Venture of All-Terrain Vehicle Distributors; American Honda Motor Co., Inc., et al.

Notice is hereby given that, pursuant to section 6(a) of the National Cooperative Research Act of 1984, 15 U.S.C. 4301 *et seq.*, written notice has been filed by the parties to a joint venture of all-terrain vehicle distributors (the "Venture") simultaneously with the Attorney General and the Federal Trade Commission disclosing (1) the identities of the parties to the Venture and (2) the nature and objectives of the Venture. The notification was filed for the purpose of invoking the Act's provisions limiting the recovery of antitrust plaintiffs to actual damages under specified circumstances. Pursuant to section 6(b) of the Act, the identities of the parties to the Venture, and its general areas of planned activity, are given below.

The parties to the Venture are American Honda Motor Co., Inc., Kawasaki Motors Corp., U.S.C., U.S. Suzuki Motor Corporation, and Yamaha Motor Corporation, U.S.A. The objective of the Venture is to develop voluntary standards pursuant to section 9(b) of the Consumer Product Safety Act, 15 U.S.C. 2058(b), covering certain engineering aspects of All-Terrain Vehicles ("ATVs"). The above-mentioned parties have agreed to collaborate jointly with technical staff of the Consumer Product Safety Commission in research and development activities relating to the development of certain engineering aspects of a voluntary standard for ATVs.

Joseph H. Widmar,

Director of Operations, Antitrust Division.

BILLING CODE 7537-01-M

NATIONAL SCIENCE FOUNDATION

Permit Applications Received Under the Antarctic Conservation Act of 1978

AGENCY: National Science Foundation.

ACTION: Notice of Permit Applications Received Under the Antarctic Conservation Act of 1978, Pub.L. 95-541.

SUMMARY: The National Science Foundation (NSF) is required to publish notice of permit applications received to conduct activities regulated under the Antarctic Conservation Act of 1978. NSF has published regulations under the Antarctic Conservation Act of 1978 at Title 45, Part 670 of the Code of the Federal Regulations. This is the required notice of permit applications received.

DATES: Interested parties are invited to submit written data, comments, or views with respect to this permit application by November 13, 1987. Permit applications may be inspected by interested parties at the Permit Office, address below.

ADDRESS: Comments should be addressed to Permit Office, Room 627, Division of Polar Progams, National Science Foundation, Washington, DC.

FOR FURTHER INFORMATION CONTACT: Charles E. Myers at the above address or (202) 357-7934.

SUPPLEMENTARY INFORMATION: The National Science Foundation, as directed by the Antarctic Conservation Act of 1978 (Pub. L. 95-541), has developed regulations that implement the "Agreed Measures for the Conservation of Antarctic Fauna and Flora" for all United States citizens. The Agreed Measures, developed in 1964 by the Antarctic Treaty Consultative Parties, recommended establishment of a permit system for various activities in Antarctic and designation of certain animals and certain geographic areas as required special protection. The regulations establish such a permit system to designate Specially Protected Areas and Sites of Special Scientific Interest. Additional information was published in the **Federal Register** on July 24, 1987.

The application received is as follows:

1. Applicant

William L. Stockton, Scripps Institution of Oceanography, La Jolla, California 92093.

Activity for Which Permit Requested

Taking. The applicant will be making observations of *Catharacta maccormicki* (South Polar Skua) incidental to other NSF supported research. No specimens will be captured or handled.

Location

Explorers Cove, McMurdo Sound, Antarctica

Dates

November 1987—February 1988

Charles E. Myers,

Permit Office.

BILLING CODE 7555-01-M

NUCLEAR REGULATORY COMMISSION

[Docket No. 50-293]

Boston Edison Co., Pilgrim Nuclear Power Station: Exemption

I

The Boston Edison Company (BECo), the licensee, is the holder of Operating License No. DPR-35 which authorizes operation of Pilgrim Nuclear Power Station. The license provides, among other things, that the Pilgrim Nuclear Power Station is subject to all rules, regulations, and Orders of the Commission now or hereafter in effect.

The plant is a boiling water reactor at the licensee's site located in Plymouth County, Massachusetts.

II

On November 19, 1980, the Commission published a revised § 50.48 and a new Appendix R to 10 CFR Part 50 regarding fire protection features of nuclear power plants (45 FR 76602). The revised § 50.48 and Appendix R became effective of February 17, 1981. Section III of Appendix R contains 15 subsections, lettered A through O, each of which specifies requirements for a particular aspect of the fire protection features at a nuclear power plant One of these subsections, III.J., is the subject of the licensee's exemption request.

Section III.J., of Appendix R to 10 CFR Part 50, Emergency Lighting, requires emergency lighting units with a least an 8-hour battery power supply in areas needed for operation of safe shutdown equipment and along access and egress routs thereto.

III

By letter dated April 1, 1987 (BECo 87-053), the licensee requested an exemption from the specific technical requirements of section III.J of Appendix R to 10 CFR Part 50 pertaining to the installation of our 8-hour battery powered lighting units in the yard area outside the process buliding (which includes the reactor building).

Section III.J of Appendix R states, that, "Emergency lighting units with at least an 8-hour battery supply shall be provided in all areas needed for operation of safe shutdown equipment and in access and egress routes threto." The yard area in questions is outside of the process building, and in the access/egress route to alternative shutdown stations located in the Emergency Diesel Rooms, the reactor building Auxiliary Bay, and other portions of the reactor building that would not be involved in a postulated fire.

Lighting is already provided throughout the outside yard area (including this part of the yard area which is the access route to the various alternative safe shutdown stations) to satisfy security requirements. This existing security lighting is powered by normal off-site power and by an emergency security diesel-generator unit, an independent on-site unit which starts automatically upon loss off-site power. The licensee states that the security lights are adequate to illuminate the access routes in the outside yard area and are as reliable as individual battery powered lights. The existing security lighting installation does not expressly satisfy the technical requirements of section III.J of Appendix R in the yard area outside of the process building, since individual 8-hour battery powered lighting units are not provided for safe shutdown access and egress routes.

The licensee states that granting this exemption would not present undue risk to the public health and safety because the yard area is adequately lighted by the existing security lighting system. The staff agree with the licensee's statement. The security lighting is sufficient to allow security surveillance of the yard area, and is adequate to allow safe passage by the plant operators to those buildings housing alternate safe shutdown panels. Since there are no alternative safe shutdown sations in the yard are, operators would be simply traversing the yard and not performing any safe shutdown actions in the yard area.

The licensee states that application of the requirements of section III.J of Appendix R regarding 8-hour battery powered lighting units would not serve the underlying purpose of the rule. The staff agrees with the licensee's statement. The standby security lighting system in the yard are provides lighting for a minimum of 8 hours and would serve the underlying purpose of Appendix R. It provides emergency lighting in the access and egress routes leading to the operation of safe shutdown equipment in the Diesel Generator Room and other loctions outside the process building. Providing emergency lighting units with a least an 8-hour battery power supply would not provide any additional protection to the provided by the Security lighting system.

Regarding reliability of the existing yard lighting, the security lighting is supplied from the security diesel, an independent on-site power source initiated automatically on loss of off-site power. The security diesel and the security lighting are located outside of the process building remote from any fire areas within the Plant. Also, the licensee states that the entire security yard-lighting system is installed and maintained to requirements at least as stringent as those contained in section III.J of Appendix R.

Based on the above evaluation, the staff concludes that application of the regulation in this particular circumstance is not necessary to achieve the underlying purpose of Appendix R to 10 CFR Part 50.

Therefore, the licensee's request for an exemption to the requirements of section III.J of Appendix R for the yard area outside the process building should be granted.

IV

Accordingly, the Commission has determined that, pursuant to 10 CFR 50.12(a), that (1) the exemption as described in section III is authorized by law, will not present an undue risk to the public health and safety, and is consistent with the common defense and security and (2) in this case, special circumstances are present in that application of the regulation is not necessary to achieve the underlying purpose of Appendix R to 10 CFR Part 50. Therefore, the Commission hereby grants the exemption from the requirements of section III.J of Appendix R to 10 CFR Part 50 regarding emergency lighting units with 8-hour battery power supply in the yard outside of the process building, including areas outside of the reactor building.

Pursuant to 10 CFR 51.32, the Commission has determined that the granting of this exemption will not result in any significant environmental impact

(52 FR 32979 September 1, 1987). A copy of the licensee's request for exemption dated April 1, 1987 is available for public inspection at the Commission's Public Document Room, 1717 H Street NW., Washington, DC and at the Plymouth Public Library, 11 North Street, Plymouth, Massachusetts 02360. Copies may be obtained upon written request addressed to the U.S. Nuclear Regulatory Commission, Washington, DC 20555, Attention: Director, Division of Reactor Projects I/II.

This Exemption is effective upon issuance.

Dated at Bethesda, Maryland, this 6th day of October 1987.

For the Nuclear Regulatory Commission.

Steven A. Varga,

Director, Division of Reactor Projects I/II, Office of Nuclear Reactor Regulation.

[FR Doc. 87-23739 Filed 10-13-87; 8:45 am]

BILLING CODE 7590-01-M

[Docket Nos. 50-250-OLA-1 and 50-251-OLA-1]

Florida Power & Light Co., (Turkey Point Plant, Units 3 & 4); Vessel Flux Reduction

Notice is hereby given that, in accordance with the authority conferred by 10 CFR 2.787(a), the Chairman of the Atomic Safety and Licensing Appeal Panel has reconstituted the Atomic Safety and Licensing Appeal Board for this operating license amendment proceeding. As reconstituted, the Appeal Board for this proceeding will consist of the following members: Alan S. Rosenthal, Chairman, Dr. W. Reed Johnson, Howard A. Wilber.

Eleanor E. Hagins,

Secretary to the Appeal Board.

Dated: October 7, 1987.

BILLING CODE 7590-01-M

[Docket No. 50-220]

Withdrawal of Application for Amendment to Facility Operating License; Niagara Mohawk Power Corp.

The U.S. Nuclear Regulatory Commission (the Commission) has granted the request of Niagara Mohawk Power Corporation (the licensee) to withdraw its May 2, 1983 application for amendment to Facility Operating License No. DPR-63 issued to the licensee for operation of the Nine Mile Point Nuclear Station Unit 1 (NMP-1) located in Oswego County, New York. Notice of Consideration of Issuance of the amendments was published in the **Federal Register** on August 23, 1983 (48 FR 38409).

The request proposed changes to Section 4.2.2, Minimum Reactor Vessel Temperature for Pressurization, of the Appendix A Technical Specifications. The amendment was to reflect a change in the surveillance requirements for the Nine Mile Point Unit 1 reactor vessel material samples because one of the sample capsules had been inadvertently mispalced during a previous refueling outage. However, during the Spring 1986 refueling outage, additional surveillance capsules and material samples were installed in the reactor vessel. Since the current surveillance requirements can be met, the request for amendment is no longer required.

By letter dated January 29, 1986, the licensee requested, pursuant to 10 CFR 2.107, withdrawal of its May 2, 1983 application. The Commission has considered the licensee's request and has determined that withdrawal of the May 2, 1983 application for amendment should be granted.

For further details with respect to this action, see (1) the application for amendment dated May 2, 1983, (2) the licensee's request for withdrawal dated January 29, 1986, and (3) our letter dated September 30, 1987. All of the above documents are available for public inspection at the Commission's Public Document Room, 1717 H Street NW., Washington, DC, and at the State University College at Oswego, Penfield Library Documents, Oswego, New York 13126.

Dated at Bethesda, Maryland, this 30th day of September, 1987.

For the Nuclear Regulatory Commission.

Robert A. Capra,

Acting Director Project Directorate I-1, Division of Reactor Projects, I/II.

BILLING CODE 7590-01-M

[Docket Nos. 50-445-OL2, 50-446-OL2; ASLBP No. 79-430-06AOL]

Texas Utilities Electric Co. et al, (Comanche Peak Steam Electric Station, Units 1 and 2); Prehearing Conference

October 7, 1987.

On October 20, 1987, beginning at 9 am, we will convene a Prehearing Conference in the Embassy West Room at the Downtown Dallas Hilton, 1914 Commerce Street, Dallas, Texas 75201, for the purpose of discussing the schedule for filings and hearings for the remainder of this case.

For the Atomic Safety and Licensing Board.

Peter B. Bloch,

Chair, Administrative Judge.

BILLING CODE 7590-01-M

Advisory Committee on Reactor Safeguards, Instrumentation and Control Systems; Meeting

The ACRS Subcommittee on Instrumentation and Control Systems will hold a meeting on October 29, 1987, Room 1046, 1717 H Street, NW., Washington, DC.

The entire meeting will be open to public attendance.

The agenda for the subject meeting shall be as follows: *Thursday, October 29, 1987—8:30 a.m. until the conclusion of business.*

The Subcommittee will discuss the NRC's proposed final resolution of USI A-47, "Safety Implications of Control Systems." In addition, the Subcommittee will discuss and consider the comments by Mr. Basdekas regarding the resolution of this USI.

Oral statements may be presented by members of the public with the concurrence of the Subcommittee Chairman; written statements will be accepted and made available to the Committee. Recordings will be permitted only during those portions of the meeting when a transcript is being kept, and questions may be asked only by members of the Subcommittee, its consultants, and Staff. Persons desiring to make oral statements should notify the ACRS staff member named below as far in advance as is practicable so that appropriate arrangements can be made.

During the initial portion of the meeting, the Subcommittee, along with any of its consultants who may be present, may exchange preliminary views regarding matters to be considered during the balance of the meeting.

The Subcommittee will then hear presentations by and hold discussions with representatives of the NRC Staff, its consultants, and other interested persons regarding this review.

Further information regarding topics to be discussed, whether the meeting has been cancelled or rescheduled, the Chairman's ruling on requests for the opportunity to present oral statements and the time allotted therefor can be obtained by a prepaid telephone call to the cognizant ACRS staff member, Mr. Medhat El-Zeftawy (telephone 202/634-3267) between 8:15 a.m. and 5:00 p.m. Persons planning to attend this meeting are urged to contact the above named

individual one or two days before the scheduled meeting to be advised of any changes in schedule, etc., which may have occurred.

Date: October 8, 1987.

Morton W. Libarkin,

Assistant Executive DIrector for Project Review.

[FR Doc. 87-23741 Filed 10-13-87; 8:45am]

BILLING CODE 7590-01-M

Advisory Committee on Reactor Safeguards, Maintenance Practices and Procedures; Meeting

The ACRS Subcommittee on Maintenance Practices and Procedures will hold a meeting on October 30, 1987, Room 1046, 1717 H Street NW., Washington, DC.

The entire meeting will be open to public attendance.

The agenda for the subject meeting shall be as follows:

Friday, October 30, 1987—8:00 a.m. until 11:00 a.m.

The Subcommittee will be briefed and will discuss the proposed Policy Statement on Maintenance of Nuclear Power Plants.

Oral statements may be presented by members of the public with the concurrence of the Subcommittee Chairman; written statements will be accepted and made available to the Committee. Recordings will be permitted only during those portions of the meeting when a transcript is being kept, and questions may be asked only by members of the Subcommittee, its consultants, and Staff. Persons desiring to make oral statements should notify the ACRS staff member named below as far in advance as is practicable so that appropriate arrangements can be made.

During the initial portion of the meeting, the Subcommittee, along with any of its consultants who may be present, may exchange preliminary views regarding matters to be considered during the balance of the meeting.

The Subcommittee will then hear presentations by and hold discussions with representatives of the NRC Staff, its consultants, and other interested persons regarding this review.

Further information regarding topics to be discussed, whether the meeting has been canceled or rescheduled, the Chairman's ruling on requests for the opportunity to present oral statements and the time allotted therefor can be obtained by a prepaid telephone call to the cognizant ACRS staff member, Mr. Herman Alderman (telephone 202/634-1413) between 8:15 a.m. and 5:00 p.m. Persons planning to attend this meeting are urged to contact the above named individual one or two days before the scheduled meeting to be advised of any changes in schedule, etc., which may have occurred.

Date: October 7, 1987.

Morton W. Libarkin,

Assistant Executive Director for Project Review.

BILLING CODE 7590-01-M

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34-24995; File No. SR-NASD-86-22]

Self-Regulatory Organizations; Proposed Amended Rule Change by National Association of Securities Dealers, Inc.

On August 5, 1986, the NASD filed with the Commission proposed rule change SR-NASD-86-22 ("original proposed rule change") pursuant to Rule 19b-4 under the Securities Exchange Act of 1934 ("Act").[1] In response to concerns raised by the public commentators and expressed by the Commission to the NASD, the NASD on May 15, 1987 filed with the Commission its first amendment (the "May 15 amendment") to the original proposed rule change.[2] Subsequently, the NASD filed this second amendment ("amended rule change") to the original proposed rule change, incorporating into this amended rule change the changes reflected in the May 15 amendment as well as additional changes formulated since May 15. For purposes of clarity, all references herein to the "amended rule change" shall refer to this filing.[3]

Pursuant to section 19(b)(1) of the Securities Exchange Act of 1934, 15 U.S.C. 78s(b)(1), notice is hereby given that on August 10, 1987, the National Association of Securities Dealers, Inc. ("NASD") filed with the Securities and Exchange Commission ("Commission") the proposed amended rule change as described in Items I, II, and III below, which Items have been prepared by the NASD. The Commission is publishing this notice to solicit comments on the proposed amended rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The following is the text of the proposed amendments to subsections 5(e) and (f) of Appendix F to Article III, section 34 of the Rules of Fair Practice ("Appendix F"). Additions are italicized; deletions are in brackets.

Section 5—Organization and Offering Expenses

(e) No [sponsor, affiliate of a sponsor (other than a member dealing with persons associated with member), or program] *member or person associated with a member* shall *directly or indirectly accept* [provide] any *non-cash compensation or* sales incentive item[.] *including, but not limited to, travel bonuses, prizes, and awards offered or provided to such member or its associated persons by any sponsor, affiliate of a sponsor or program. Notwithstanding the foregoing, a member may provide non-cash compensation or sales incentive items to its associated persons provided that no sponsor, affiliate of a sponsor or program, including specifically an affiliate of the member, directly or indirectly participates in or contributes to providing such non-cash compensation. Further, this section shall not prohibit* [directly to] a person associated with a member *from accepting any non-cash sales incentive item offered directly to that person by a sponsor, affiliate of a sponsor or program* [unless] *where*:

(1) The aggregate value of all such items [to be received] *paid* by *any sponsor or affiliate of a sponsor to* each associated person during any year does not exceed $50.00;

(2) The value of all such items to be made available in connection with an offering is included as compensation to be received in connection with the offering for purposes of subsection (b) of this section; and

(3) The proposed payment or transfer of all such items is disclosed in the prospectus or similar offering document.

(f) *Subject to the limitations on direct and indirect non-cash compensation provided in subsection (e) of this section,* [N]*no* [sponsor, affiliate of a sponsor, or program shall provide compensation to a [member, [in the form of sales incentives or bonuses] *shall accept any cash compension* unless all the following conditions are satisfied:

---

[1] The proposed rule change was published for comment in the **Federal Register** on August 20, 1986 (51 FR 29729).

[2] To permit the NASD to make further changes to that May 15 amendment and to incorporate those changes into an all-inclusive amended rule change, the Commission did not publish the May 15 amendment for public comment.

[3] Both the May 15 amendment and this current filing are available for inspection and copying at the Commission's Public Reference Room.

(1) All [sales incentives and bonuses are] *compensation is* paid directly to the member in cash and the distribution, if any, of [incentives or bonuses] *all compensation* to *the member's* associated persons in controlled solely by the member;

(2) The value of all [incentives and bonuses are] *compensation,* to be [made available] *paid* in connection with an offering is included as compensation to be received in connection with the offering for purposes of subsection (b) of this section;

(3) Arrangements relating to the proposed payment of all [incentives and bonuses] *compensation* are disclosed in the prospectus or similar offering document; [and]

(4) The value of all [incentives and bonuses] *compensation,* is reflected on the books and records of the recipient member as compensation received in connection with the offering; *and*

(5) No compensation paid in connection with an offering is directly or indirectly related to any non-cash compensation or sales incentive items provided by the member to its associated persons.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Amended Rule Change

In its filing with the Commission, the NASD included statements concerning the purpose of, and basis for, the proposed amended rule change and discussed any comments it received on the proposed amended rule change. The text of these statements may be examined at the places specified in Item IV below. The NASD has prepared summaries, set forth in sections (A), (B), and (C) below of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Amended Rule Change

As noted above, on August 5, 1986, the NASD filed with the Commission SR–NASD–86–22, pursuant to Rule 19b–4 under the Act. The original rule change proposed to amend subsections 5 (e) and (f) of Appendix F to Article III, section 34 of the NASD's Rules of Fair Practice. The original rule change to subsection 5(e) of Appendix F proposed to prohibit a sponsor, affiliate of a sponsor (other than a member dealing with persons associated with that member) or a program from directly or indirectly offering or providing non-cash compensation with a value in excess of $50.00 in the form of sales incentive items to any member or its associated persons, including but not limited to travel bonuses, prizes and awards. In addition, members and their associated persons were proposed to be prohibited from accepting such non-cash compensation. Finally, the original rule change proposed to clarify that souvenir-type non-cash sales incentives given by a sponsor directly to a person associated with a member may not exceed $50.00 per year per associated person for all programs of that sponsor.

The Commission published the original rule change for pulic comment in Release No. 34–23527 on August 13, 1986 (51 FR 29729, August 20, 1986).

As a result of comments received by the NASD to Notice to Members 85–17 (March 15, 1985) and by the Commission in response to the publication of the original rule change in the **Federal Register**, the NASD is proposing to amend the original rule change to address concerns of commentators regarding the provision that would permit member firms to continue to offer non-cash compensation to their associated persons in connection with sales of direct participation programs sponsored by affiliates of the member.[4] A number of commentators, both in favor of and opposed to the original rule change, urged that the proposal would be anticompetitive and discriminatory with respect to sponsors unaffiliated with a member firm which utilized unaffiliated member firms to distribute their product. The NASD does not believe that the original rule change results in a competitive advantage to members affiliated with program sponsors nor to sponsors affiliated with members. The original rule change to subsections 5(e) and 5(f) of Appendix F was intended to prohibit any sponsor, affiliate of a sponsor or program from providing non-cash sales incentives to any member and/or their associated persons. However, in response to the comments received, the NASD is amending the original rule change to ensure that a member's own internal sales incentive program is funded entirely by the member and to ensure that no sponsor, including an affiliate of a member, will directly or indirectly participate in or contribute to such internal sales incentive program.

Therefore, the NASD is proposing to amend section 5(e) of the original rule change to clarify that members may provide non-cash compensation or sales incentive items to the members' associated persons, provided that no sponsor, affiliate of a sponsor or program, including specifically an affiliate of the member, directly or indirectly participates in or contributes to providing such non-cash compensation. Pursuant to the proposed amendment, no sponsor or program would be permitted to participate in or contribute to any member's non-cash internal sales incentive program, including the internal sales incentive program of a member affiliated with that program or sponsor. The language "participates in" is intended to prohibit a sponsor, affiliate of a sponsor, or program (including an affiliate of the member), from participating in the selection of and arrangements for any trip or merchandise sales incentive provided by a member to its associated persons as part of the member's internal sales incentive program. The language "contributes to" is intended to prohibit a sponsor, affiliate of a sponsor, or program (including an affiliate of a member), from contributing monetarily to any non-cash sales incentive provided by a member to its associated persons as part of the member's internal sales incentive program.

Further, the NASD is concerned that subsection 5(f) as amended by the original rule change may appear to permit the payment of compensation in a manner not permitted by the provisions of subsection 5(e). In particular, the NASD is concerned that subsection 5(f) may appear to permit members to request sponsors to reimburse their expenses related to internal non-cash sales incentive programs. As stated in the original rule filing, at page 21, the language of subsection 5(e) of Appendix F was not only intended to prohibit sponsors from directly or indirectly offering, providing or paying for non-cash compensation to members and their associated persons, but was also intended to prohibit members from directly or indirectly requiring sponsors to pay in cash for the member's internal non-cash sales incentive programs. Rather, a member is permitted to utilize any cash compensation it may receive, including a cash sales incentive, to defray the expenses of the member's internal non-cash sales incentive program.

Therefore, the NASD is proposing to amend subsection 5(f) by the addition of new introductory language and a new subprovision to clarify that any payment of cash compensation is subject to the limitations on non-cash compensation in subsection 5(e). The proposed introductory language provides that any payment in cash to a member pursuant to subsection 5(f) is subject to the limitations on direct and indirect non-cash compensation under subsection

[4] *See* SR–NASD–86–22, at 13, 16–17, 18, 21.

5(e). Further, new subprovision 5(f)(5) provides that no compensation paid in connection with an offering may be directly or indirectly related to any non-cash compensation or sales incentive items provided by a member to its associated persons. The NASD believes that the foregoing amendments will ensure that affiliated and non-affiliated sponsors may not offer and that affiliated and non-affiliated members may not request participation in or contribution to the member's internal noncash sales incentive program.

The proposed amendments to the original rule change are consistent with the underlying rationale of the rule change to ensure the member's supervisory control over its sales force and to ensure that no sponsor participates in or contributes to any member's internal program of compensation. The NASD continues to believe that with respect to a member's internal compensation program, the member has control over the suitability of the product sold by its associated persons and is in a position to exercise control over the sales practices of its associated persons where such persons are free from the influence of an outside sponsor. It is the influence of entities outside the member which has acted to undermine the ability of members to control their sales force.

Further, the NASD determined that the focus of the prohibitions contained in subsections 5(e) and 5(f) should be on members and persons associated with members, rather than on sponsors, affiliates of sponsors or programs. Therefore, the NASD proposes to amend the original rule change to clarify in subsections 5(e) and 5(f) that the prohibition on the receipt of compensation from a sponsor, affiliate of a sponsor or program is directed to members and persons associated with such members.

The NASD is also concerned that it may not be clear that subsection 5(f) as amended by the original rule change is intended to regulate compensation other than that permitted under subsection 5(e) of Appendix F, which permits persons associated with a member to receive non-cash items of compensation not in excess of $50.00 per year directly from a sponsor. Therefore, the NASD is proposing to amend subsection 5(f) to clarify that the provision is applicable to cash compensation, while Subsection 5(e) is applicable to non-cash compensation. Finally, subsection 5(f) is proposed to be amended to delete references to cash sales incentives as unnecessary, and to otherwise make minor grammatical changes.

The proposed amended rule change is consistent with the provisions of section 15A(b)(6) of the Securities Exchange Act of 1934, as the proposal will strengthen the ability of member firms to supervise their associated persons, thereby providing greater protection to the public.

B. Self-Regulatory Organization's Statement on Burden on Competition

The amendments to the proposed original rule change are intended to address concerns regarding a potential competitive advantage afforded members affiliated with sponsors of direct participation programs and sponsors affiliated with members. The NASD continues to believe that such competitive advantage does not, in fact, exist and that the rule change presents no impact on competition which is not in furtherance of the purposes of the Securities Exchange Act of 1934, as amended.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Amended Rule Change Received From Members, Participants, or Others

No comments were requested or received with respect to the proposed amended rule change. The original rule change was proposed for comment in NASD Notice to Members 85–17 (March 15, 1985). *See* SR–NASD–86–22, at 22–27.

III. Date of Effectiveness of the Proposed Amended Rule Change and Timing for Commission Action

Within 35 days of the date of publication of this notice in the **Federal Register** or within such longer period (i) as the Commission may designate up to 90 days of such date if it finds such longer period to be appropriate and publishes its reasons for so finding or (ii) as to which the self-regulatory organization consents, the Commission will:

A. By order approve such proposed rule change, or

B. Institute proceedings to determine whether the proposed rule change should be disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing. Persons making written submissions should file six copies thereof with the Secretary, Securities and Exchange Commission, 450 Fifth Street, NW., Washington, DC 20549. Copies of the submissions, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with provisions 5 U.S.C. 552, will be available for inspection and copying in the Commission's Public Reference Room, at the above address. Copies of the filing will also be available for inspection and copying at the principal office of the NASD. All submissions should refer to the file number in the caption above and should be submitted by November 4, 1987.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority, 17 CFR 200.30–3(a)(12).

Jonathan G. Katz,

Secretary.

Dated: October 5, 1987.

Exhibit 1—Copy of Proposed Rule Change as Originally Filed Marked To Show Amendments Filed Herein

Section 5

Organization and Offering Expenses

(e) No [sponsor, affiliate of a sponsor (other than a member dealing with persons associated with that member), or program] *member or person associated with a member* shall directly or indirectly [offer or provide] *accept any* non-cash compensation or sales incentive item[s] including, but not limited to, travel bonuses, prizes, and awards [to a member or a person associated with a member and no member or person associated with a member shall agree to accept such compensation.] *offered or provided to such member or its associated persons by any sponsor, affiliate of a sponsor or program. Notwithstanding the foregoing, a member may provide non-cash compensation or sales incentive items to its associated persons provided that no sponsor, affiliate of a sponsor or program, including specifically an affiliate of the member, directly or indirectly participates in or contributes to providing such non-cash compensation. Further,* [T]*this* section shall not prohibit [a sponsor, affiliate of a sponsor, or program from providing any sales incentive items directly to] a person associated with a member *from accepting any non-cash sales incentive item offered directly to that person by a sponsor, affiliate of a sponsor or program* where:

(1) The aggregate value of all such items paid by any sponsor or affiliate of a sponsor to each associated person during any year does not exceed $50.00;

(2) The value of all such items to be made available in connection with an offering is included as compensation to be received in connection with the offering for purposes of subsection (b) of this section; and

(3) The proposed payment or transfer of all such items is disclosed in the prospectus or similar offering document.

(f) *Subject to the limitations on direct and indirect non-cash compensation provided in subsection (e) of this section,* [N] *no* [sponsor, affiliate of a sponsor, or program shall provide compensation to a] member *shall accept any cash compensation,* [including cash sales incentives] unless all of the following conditions are satisfied:

(1) All compensation is paid directly to the member in cash and the distribution, if any, of *all* compensation [, including cash sales incentives,] to *the member's* associated persons is controlled solely by the member;

(2) The value of all [items of] compensation [, including cash sales incentives,] to be made available in connection with an offering [are] *is* included as compensation to be received in connection with the offering for purposes of subsection (b) of this section;

(3) Arrangements relating to the proposed payment of all [items of] compensation [, including cash sales incentives,] are disclosed in the prospectus or similar offering document; [and]

(4) The value of all items of compensation [, including cash sales incentives, are] *paid in connection with an offering is* reflected on the books and records of the recipient member as compensation received in connection with the offering; *and*

(5) No compensation paid in connection with an offering is directly or indirectly related to any non-cash compensation or sales incentive item provided by the member to its associated persons.

BILLING CODE 8010-01-M

[Release No. IC-16041; File No. 812-6850]

Anchor National Life Insurance Co.; Application for Exemption

AGENCY: Securities and Exchange Commission ("SEC").

ACTION: Notice of Application for Exemption under the Investment Company Act of 1940 ("the Act").

Applicants: Anchor National Life Insurance Company ("Company") and American Pathway II—Separate Account of Anchor National Life Insurance Company ("Separate Account").

Relevant Sections of the Act: Order requested pursuant to section 26(b) of the Act.

Summary of Applications: Applicants seek an order to permit them to substitute shares of Anchor Pathway Fund ("Proposed Fund") for shares of the American Pathway Fund ("Present Fund") held by the Separate Account.

Filing Date: The application was filed on August 25, 1987.

Hearing or Notification of Hearing: If no hearing is ordered, the application will be granted. Any interested person may request a hearing on this application, or ask to be notified if a hearing is ordered. Any request must be received by the SEC by 5:30 p.m., on October 28, 1987. Any interested person must request a hearing in writing, giving the nature of the interest, the reason for the request, and the issues to be contested. A person requesting a hearing must serve the Applicants with the request, either personally or by mail, and send it to the Secretary of the SEC, along the proof of service by affidavit, or, for lawyers, by certificate. Notification of the date of a hearing may be requested by writing to the Secretary of the SEC.

ADDRESSES: Secretary, SEC, 450 5th Street NW., Washington, DC 20549; Anchor National Life Insurance Company, 2201 East Camelback Road, Phoenix, Arizona 85016.

FOR FURTHER INFORMATION CONTACT: Financial Analyst Denise M. Furey, (202) 272-2067 or Special Counsel Lewis B. Rich, (202) 272-2061 (Division of Investment Management).

SUPPLEMENTARY INFORMATION: The following is a summary of the application; the complete application is available from either the SEC's Public Reference Branch in person or, for a fee, from the SEC's commercial copier (800) 231-3282 (in Maryland (301) 253-4300).

Applicant's Representations

1. The Separate Account was established by the Company to fund deferred variable annuity contracts. The Separate Account is registered as a unit investment trust under the Act. The contracts funded in the Separate Account are registered under the Securities Act of 1933. The Separate Account is divided into five divisions, each of which invests its assets in the shares of a designated series of the Present Fund. The Present Fund is organized as a Massachusetts business trust and is registered under the Act as a diversified, open-end management investment company. It is advised by Capital Research and Management Company ("Capital").

2. It is proposed that shares of the Proposed Fund be substituted for shares of the Present Fund. The Proposed Fund is organized as a Massachusetts business trust, and is registered under the Act as a diversified, open-end management investment company. The Proposed Fund consists of five series with the same investment objectives, policies and restricitons as the series of the Present Fund. Capital will serve as the adviser and Anchor Investment Adviser, Inc., a subsidiary of the Company, will administer the business affairs of the Proposed Fund.

3. Applicants state that the creation of the Proposed Fund is in keeping with a formal Agreement of Settlement and Mutual Release ("Agreement") disposing of a dispute between Applicants and Capital with respect to a proposal to offer shares of the Present Fund to variable annuity and variable life separate accounts of both affiliated ("mixed funding") and unaffiliated ("shared funding") life insurance companies.

Under the terms of the Agreement, the parties agreed that the Company would establish the Proposed Fund, which would serve as the underlying investment medium solely for the insurance products of Anchor National and that SEC approval would be sought to substitute shares of the Proposed Fund for shares of the Present Fund.

4. Applicants represent that investment in shares of the Present Fund is no longer appropriate in view of the purpose of the Separate Account.

5. Applicants that the fees and charges will be the same under the proposed arrangement as existed in regard to the Present Fund prior to the proposed substitution.

6. Applicants represent that the rationale for effecting the substitution is to avoid the potential conflicts of interest inherent in shared funding arrangements and therefore such substitution is not contrary to the interests of Anchor National contractowners.

7. Applicants represent that the substitution of Proposed Fund shares for Present Fund shares represents a negotiated settlement of a dispute between the parties which has been acknowledged by all such parties.

Applicants represent that the proposed substitution would be consistent with the protection of investors and the purposes fairly intended by the policy and provisions of the Act.

For the Commission, by the Division of Investment Management, under delegated authority.

Jonathan G. Katz,

Secretary,

Dated: October 8, 1987.

BILLING CODE 8010-01-M

[File No. 22-17302]

Citicorp; Application and Opportunity for Hearing

October 6, 1987.

Notice is hereby given that Citicorp (the "Applicant") has filed an application under clause (ii) of section 310(b)(1) of the Trust Indenture Act of 1939 (the "Act") for a finding that the trusteeship of United States Trust Company of New York (the "Trust Company" or the "Trustee") under four existing indentures, and two pooling and servicing agreements each dated May 1, 1987, under which certificates evidencing interests in a pool of mortgage loans have been issued, are not so likely to involve a material conflict of interest as to make it necessary in the public interest or for the protection of investors to disqualify the Trust Company from acting as Trustee under any of such indentures or agreements. Section 310(b) of this Act provides, in pertinent part, that if a trustee under an indenture qualified under the Act has or shall acquire any conflicting interest, it shall within ninety days after ascertaining that it has such a conflicting interest, either eliminate the conflicting interest or resign.

Subsection (1) of section 310(b) provides, with certain exceptions, that a trustee under a qualified indenture shall be deemed to have a conflicting interest if such trustee is trustee under which securities of an obligor upon the indenture securities are outstanding. However, under clause (ii) of subsection (1), there may be excluded from the operation of the subsection another indenture under which the other securities of the same obligor are outstanding, if the issuer shall have sustained the burden of proving, on application to the Commission and after opportunity for hearing thereon, that trusteeship under both the qualified indenture and such other indenture is not so likely to involve a material conflict of interest as to make it necessary in the public interst or for the protection of investors to disqualify such trustee from acting as trustee under such other indenture. The Applicant alleges that:

(1) The Trust Company currently is acting as Trustee under four indentures under which the Applicant is the obligor. The Indenture dated February 15, 1972 involved the issuance of Floating Rate Notes due 1989; the Indenture dated March 15, 1977 involved the issuance of various series of unsecured and unsubordinated Notes; the Indenture dated August 25, 1977 involved the issuance of Rising-Rate Notes, Series A; and the Indenture dated April 21, 1980 involved the issuance of various series of unsecured and unsubordinated Notes. Said indentures were filed as, respectively, Exhibits 4(a), 2(b), and 2(a) to Applicant's respective Registration Statements Nos. 2-42915, 2-58355, 2-59396 and 2-64862 filed under the Securities Act of 1933, and have been qualified under the Trust Indenture Act of 1939. The four indentures are hereinafter called the "Indentures" and the Securities issued pursuant to the Indentures are hereinafter called the "Notes."

(2) The Applicant is not in default in any respect under the Indentures or under any other existing indenture.

(3) On May 26, 1987, the Trust Company entered into a Pooling and Servicing Agreement dated May 1, 1987 (the "1987-3 Agreement") with Citicorp Mortgage Securities, Inc. ("CMSI"), Packager and Servicer, and Citicorp Homeowners, Inc., under which there were issued on May 26, 1987 Mortgage Pass-Through Citicertificates Series 1987-3 9.00% Pass-Through Rate (the "Series 1987-3 Certificates"), which evidence fractional undivided interest in a pool of conventional one-to-four-family mortgage loans (the "1987-3 Mortgage Pool") originated and serviced by Citibank, N.A. and having adjusted principal balance aggregating $77,982,439.31 at the close of business on May 1, 1987, which mortgage loans were assigned to the Trust Conpany as Trustee simultaneously with the issuance of the Series 1987-3 Certificates. On May 26, 1987, Applicant, the parent of CMSI, entered into a guaranty of even date (the "1987-3 Guaranty") pursuant to which Applicant agreed, for the benefit of the holders of the Series 1987-3 Certificates, to be liable for 7.75% of the initial aggregate principal balance of the 1987-3 Mortgage Pool and for lesser amounts in later years pursuant to the provisions of the 1987-3 Guaranty. The 1987-3 states that Applicant's obligations thereunder rank *pari passu* with all unsecured and unsubordinated indebtedness of Applicant, and accordingly, in enforced against Applicant, the 1987-3 Guaranty would rank on a parity with the obligations evidenced by the Notes. The Series 1987-3 Certificates were registered under the Securities Act of 1933 (Registration Statements on Forms S-11 and S-3, File No. 33-123788) as part of a delayed or continuous offering of $2,000,000,000 aggregate amount of Mortgage Pass-Through Certificates pursuant to Rule 415 under the 1933 Act. The Series 1987-3 Certificates were offered by a prospectus supplement dated May 8, 1987, supplemental to a prospectus dated May 8, 1986. The 1987-3 Agreement has not been qualified under the Trust Indenture Act of 1939.

(4) On May 26, 1987, the Trust Company entered into a Pooling and Servicing Agreement dated May 1, 1987 the "1987-4 Agreement") with CMSI, Packager and Servicer, and Citicorp Homeowners, Inc., under which there were issued on May 26, 1987 Mortgage Pass-through Citi-Certificates, Series 1987-4 9.00% Pass-Through Rate (the Series 1987-4 Certificates"), which evidence fractional undivided interests in a pool of conventional one-to-four-family mortgage loans (the "1987-4 Mortgage Pool") originated and serviced by Citibank, N.A. and have adjusted principal balances aggregating $102,405,896.20 at the close of business on May 1, 1987. On May 26, 1987, Applicant entered into a guaranty of even date (the "1987-4 Guaranty") pursuant to which Applicant agreed, for the benefit of the holders of the Series 1987-4 Certificates, to be liable for 7.00% of initial aggregate principal balance of the 1987-4 Mortgage Pool and for lesser amounts in later years pursuant to the provisions of the 1987-4 Guaranty. The 1987-4 Guaranty states that Applicant's obligations thereunder rank *pari passu* with all unsecured and unsubordinated indebtedness of Applicant, and accordingly, if enforced against Applicant, the 1987-4 Guaranty would rank on a parity with the obligations evidenced by the Notes. The 1987-4 Certificates were registered under the Securities Act of 1933 (Registration Statements on Forms S-11 and S-3, File No. 33-12788) as part of a delayed or continuous offering of $2,000,000,000 aggregate amount of Mortgage Pass-Through CitiCertificates pursuant to Rule 415 under the Act. The Series 1987-4 Certificates were offered by a prospectus supplement dated March 8, 1987 supplemental to a prospectus dated May 8, 1987. The 1987-4 Agreement has not been qualified under the Trust Indenture Act of 1939. The 1987-3 Agreement and the 1987-4 Agreement are hereinafter called the "1987 Agreements" and the 1987-3 Guaranty and the 1987-4 Guaranty are hereinafter called the "1987 Guarantees."

(5) The obligations of Applicant under the Indentures and the 1987 Guarantees are wholly unsecured, are unsorbinated and rank *pari passu*. Any differences that exist between the provisions of the Indentures and the 1987 Guarantees are unlikely to cause any conflict of interest in the trusteeship of the Trust Company under the Indentures and 1987 Agreements.

(6) The Applicant has waived notice of hearing, hearing, and any and all rights to specify procedures under Rule 8(b) of the Commission's Rules of Practice in connection with this matter.

For a more detailed statement of the matter of fact and law asserted, all persons are referred to said application, File No. 22–17302, which is a public document on file in the Commission's Public Reference Section, 450 5th Street, NW., Washington, DC 20549.

Notice is further given that an interested person may, not later than November 1, 1987, request in writing that a hearing be held on such matter, stating the nature of the interest, the reasons for such request, and the issues of law or fact raised by said application that are controverted or request notification if the Commission should order such a hearing.

Any such request should be addressed: Secretary, Securities and Exchange Commission, Washington, DC 20549.

At any time after said date, the Commission may issue an Order granting the application upon such terms and conditions as the Commission may deem necessary or appropriate in the public interest and for the protection of investors, unless a hearing is ordered by the Commission.

For the Commission, by the Division of Corporation Finance, pursuant to delegated authority.

Jonathan G. Katz,

Secretary.

[Rel. No. IC–16035; File No. 811–3798]

Providentmutual Variable Life Bond Account; Application

October 6, 1987.

AGENCY: Securities and Exchange Commission ("SEC").

ACTION: Notice of Application for an order pursuant to section 8(f) of the Investment Company Act of 1940 (the "1940 Act") declaring that Applicant has ceased to be an investment company.

Applicant: Providentmutual Variable Life Bond Account.

Relevant 1940 Act Sections: Order requested under section 8(f).

Summary of Application: Applicant seeks an order declaring that it has ceased to be an investment company.

Filing Date: August 19, 1987.

Hearing or Notification of Hearing: If no hearing is ordered the application will be granted. Any interested person may request a hearing on the application or ask to be notified if a hearing is ordered. Any requests must be received by the SEC by 5:30 p.m., on November 2, 1987. Request a hearing in writing, giving the nature of your interest, the reason for the request, and the issues you contest. Serve the applicant with the request, either personally or by mail, and also send a copy to the Secretary of the SEC, along with proof of service by affidavit or, in the case of an attorney-at-law, by certificate. Request notifications of the date of a hearing by writing to the Secretary of the SEC.

ADDRESSES: Secretary, SEC, 450 5th Street NW., Washington, DC 20549. Provident Mutual Variable Life Bond Account, 1600 Market Street. Philadelphia, PA 19103.

FOR FURTHER INFORMATION CONTACT: Jeffrey M. Ulness, Attorney, at (202) 272–2026 or Lewis B. Reich, Special Counsel, at (202) 272–2061

Summary Information: Following is a summary of the application; the complete application is available for a fee from either the SEC's Public Reference Branch in person or the SEC's commercial copier (800) 231–3282 (in Maryland (301) 253–4300).

Applicant's Representations

1. Applicant states that on July 8, 1983, it registered under the Act on Form N–8A, and filed a registration statement on Form N–1 pursuant to section 8(b) of the Act. Applicant was a separate account formed to serve as a funding vehicle for certain scheduled premium variable life insurance policies issued by Providentmutual Variable Life Insurance Company ("PVLICO").

2. Pursuant to an Agreement and Plan of Reorganization ("Plan"), on December 12, 1985, Applicant ceased to function as a diversified management investment company and was converted to unit investment trust ("Bond Account"). Applicant, Providentmutual Variable Life Growth Account, and Providentmutual Variable Life Money Market Account (the "Accounts") were registered with the Commission as a single unit investment trust. In accordance with the Plan, PVLICO, acting on behalf of Applicant, transferred all of Applicant's assets to the Market Street Fund, Inc. (the "Fund"), in exchange for shares of the Fund's Bond Portfolio. PVLICO then recorded and held on its records the shares received issued by the Fund's Bond Portfolio as assets of the Bond Account. Thus, the policyowners' interest in the Bond Account was equivalent to their interest in Applicant prior to its reorganization.

3. The number of shares of the Fund's Bond Portfolio received by PVLICO was determined by dividing the value of the net assets of the Applicant on close of business on the first business day preceding the reorganization by the net asset value per share of the Bond Portfolio ($10.00). Accordingly, the assets of Applicant were exchanged for an aggregate of 44,622,703 shares of the Bond Portfolio, having a total value of $446,227.03.

4. Applicant represents that it has no security holders and is not now engaged in, nor does it propose to engage in, any business activities and has ceased to function as a diversified management investment company. However, the Bond Account, into which applicant was converted, does continue to act as an investment company as part of a registered unit investment trust. Applicant further represents that it has retained no assets, no debts or other liabilities, and it is not a party to any litigation or administrative proceedings.

For the Commission, by the Division of Investment Management, pursuant to delegated authority.

Jonathan G. Katz,

Secretary.

will be granted. Any interested person may request a hearing on the application or ask to be notified if a hearing is ordered. Any requests must be received by the SEC by 5:30 p.m., on November 2, 1987. Request a hearing in writing, giving the nature of your interest, the reason for the request, and the issues you contest. Serve the applicant with the request, either personally or by mail, and also send a copy to the Secretary of the SEC, along with proof of service by affidavit or, in the case of an attorney-at-law, by certificate. Request notifications of the date of a hearing by writing to the Secretary of the SEC.

ADDRESSES: Secretary, SEC, 450 5th Street, NW., Washington, DC 20549. Provident Mutual Variable Life Money Market Account, 1600 Market Street, Philadelphia, PA 19103.

FOR FURTHER INFORMATION CONTACT: Jeffrey M. Ulness, Attorney, at (2020 272–2026 or Lewis B. Reich, Special Counsel, at (202) 272–2061.

Summary Information: Following is a summary of the application; the complete application is available for a fee from either the SEC's Public Reference Branch in person or the SEC's commercial copier (800) 231–3282 (in Maryland (301) 253–4300).

Applicant's Representations

1. Applicant states that on July 8, 1983, it registered under the Act on Form N–8A, and filed a registration statement on Form N–1 pursuant to section 8(b) of the Act. Applicant was a separate account formed to serve as a funding vehicle for certain scheduled premium variable life insurance policies issued by Providentmutual Variable Life Insurance Company ("PVLICO").

2. Pursuant to an Agreement and Plan of Reorganization ("Plan"), on December 12, 1985, Applicant ceased to function as a diversified management investment company and was converted to unit investment trust ("Money Market Account"). Applicant, Providentmutual Variable Life Growth Account, and Providentmutual Variable Life Bond Account (the "Accounts") were registered with the Commission as a single unit investment trust. In accordance with the Plan, PVLICO, acting on behalf of Applicant, transferred all of Applicant's assets to the Market Street Fund, Inc. (the "Fund"), in exchange for shares of the Fund's Money Market Portfolio. PVLICO then recorded and held on its records the shares received issued by the Fund's Money Market Portfolio as assets of the Money Market Account. Thus, the policyowners' interest in the Money Market Account was equivalent to their interest in Applicant prior to its reorganization.

3. The number of shares of the Fund's Money Market Portfolio received by PVLICO was determined by deviding the value of the net assets of the Applicant on close of business on the first business day proceeding the reorganization by the net asset value per share of the Bond Portfolio ($1.00). Accordingly, the assets of Applicant were exchanged for an aggregate of 2,188,537.40 shares of the Money Market Portfolio, having a total value of $2,188,537.40.

4. Applicant represents that it has no securityholders and is not now engaged in, nor does it propose to engage in, any business activities and has ceased to function as a diversified management investment company. However, the Money Market Account, into which applicant was converted, does continue to act as an investment company as part of a registered unit investment trust. Applicant further represents that it has retained no assets, no debts or other liabilities, and it is not a party to any litigation or administrative proceedings.

For the Commission, by the Division of Investment Management, pursuant to delegated authority.

Jonathan G. Katz,

Secretary.

Short-Term Yield Securities, Inc.; Application

October 6, 1987.

AGENCY: Securities and Exchange Commission ("SEC").

ACTION: Notice of Application for De-Registration under the Investment Company Act of 1940 ("1940 Act").

Applicant: Short-Term Yield Securities, Inc.

Relevant 1940 Act Sections: Application filed pursuant to section 8(f).

Summary of Application: Applicant requests an order declaring that it has ceased to be an investment company under the 1940 Act.

Filing Date: The application was filed on August 12, 1987.

Hearing or Notification of Hearing: If no hearing is ordered, the application will be granted. Any interested person may request a hearing on this application, or ask to be notified if a hearing is ordered. Any requests must be received by the SEC by 5:30 p.m., on November 2, 1987. Request a hearing in writing, giving the nature of your interest, the reason for the request, and the issues you contest. Serve the Applicant with the request, either personally or by mail, and also send it to the Secretary of the SEC, along with proof of service by affidavit or, for attorneys, by certificate. Request notification of the date of a hearing by writing to the Secretary of the SEC.

ADDRESSES: Secretary, SEC, 450 Fifth Street NW., Washington, DC 20549; Applicant, Eleven Greenway Plaza, Suite 1919, Houston, TX 77046.

FOR FURTHER INFORMATION CONTACT: Thomas Mira, Staff Attorney, (202) 272–3033, or Brion R. Thompson, Special Counsel, (202) 272–3016 (Office of Investment Company Regulation).

SUPPLEMENTARY INFORMATION: The following is a summary of the application; the complete application is available for a fee from either the SEC's Public Reference Branch in person, or the SEC's commerical copier (800) 231–3282 (in Maryland (301) 258–4300).

Applicant's Representations

1. Applicant is an open-end, diversified management investment company registered under the 1940 Act. Organized under the laws of the State of Maryland, Applicant filed its Notification of Registration on Form N–8A and its registration statement pursuant to section 8(b) of the 1940 Act on February 25, 1977. Applicant also filed a registration statement under the Securities Act of 1933, which was declared effective on May 25, 1978, and an initial public offering of Applicant's stock commenced on May 25, 1978.

2. Applicant's Board of Directors resolved on May 16, 1987, to approve Applicant's Plan of Liquidation and Dissolution, which in turn was approved by Applicant's shareholders on June 30, 1987. Subsequently, a distribution was made to its shareholders of the Applicant's remaining assets after payment of all costs and expenses associated with the winding up of Applicant's affairs.

3. There was thirty-four shareholders to whom checks were mailed in complete liquidation of their interests at their address of record whose whereabouts Applicant could not ascertain after diligent efforts. Those checks which were returned unclaimed remain with Applicant's transfer agent in its outstanding check file and will remain there during the applicable escheatment period.

4. Applicant has no assets, no outstanding debt, and is not a party to any litigation or administrative proceeding. Applicant has not, within the last 18 months, transferred any of its assets to a separate trust, and is not now engaged, nor does it propose to engage, in any business activity other than that necessary for the winding up of its affairs.

For the SEC, by the Division of Investment Management, pursuant to delegated authority.

Jonathan G. Katz,

Secretary.

Thomson McKinnon Global Trust; Application

October 6, 1987.

AGENCY: Securities and Exchange Commission ("SEC").

ACTION: Notice of Application for Deregistration under the Investment Company Act of 1940 (the "1940 Act").

Applicant: Thomson McKinnon Global Trust ("Applicant").

Relevant 1940 Act Section: Section 8(f) and Rule 8f-1 thereunder.

Summary of Application: Applicant seeks an order declaring that it has ceased to be an investment company.

Filing Date: The application on Form N-8F was filed on June 30, 1987 and amended on October 6, 1987.

Hearing or Notification of Hearing: If no hearing is ordered, the application will be granted. Any interested person may request a hearing on this application, or ask to be notified if a hearing is ordered. Any requests must be received by the SEC by 5:30 p.m., on November 2, 1987. Request a hearing in writing, giving the nature of your interest, the reason for the request, and the issues you contest. Serve the Applicant with the request, either personally or by mail, and also send it to the Secretary of the SEC, along with proof of service by affidavit or, for lawyers, by certificate. Request notification of the date of a hearing by writing to the Secretary of the SEC.

ADDRESSES: Secretary, SEC, 450 Fifth Street NW., Washington, DC 20549 Applicant, One New York Plaza, New York, New York 10004.

FOR FURTHER INFORMATION CONTACT: Paul J. Heaney, Financial Analyst, (202) 272-2847, or Brion R. Thompson, Special Counsel, (202) 272-3016 (Division of Investment Management).

SUPPLEMENTARY INFORMATION: Following is a summary of the application; the complete application on Form N-8F is available for a fee from either the SEC's Public Reference Branch in person or the SEC's commercial copier who may be contacted at (800) 231-3282 (in Maryland (301) 258-4300).

Applicant's Representations

1. Applicant registered under the 1940 Act on February 27, 1985 as a diversified, open-end management investment company and was initially named the Thomson McKinnon Government Securities Fund. Thomson McKinnon Global Fund (the "Fund") is the sole series of Applicant.

2. Applicant is a voluntary association with transferable shares, organized and existing under and by virtue of the laws of The Commonwealth of Massachusetts.

3. Applicant sold all of the Fund's assets to the Thomson McKinnon Global Fund series (the "Series") of Thomson McKinnon Investment Trust, a Massachusetts business trust ("TMIT") pursuant to an Agreement and Plan of Reorganization dated July 31, 1986 (the "Plan"). Each share of the Fund was converted into one share of the Series. A total of 8,434,070.644 shares of the Series having a total net asset value of $103,781,970 ($12.31 per share) were issued to the Fund's shareholders pursuant to the Plan adopted on July 31, 1986 by Applicant's then sole shareholder.

4. Applicant has no outstanding assets or liabilities. Applicant, to the best of its knowledge, is not a party to any litigation or administrative proceeding.

5. Applicant is not engaged, nor does it propose to engage, in any business activities other than those necessary to wind up its affairs. Applicant will file a Notice of Termination of Trust with the Secretary of State of The Commonwealth of Massachusetts.

6. Applicant has no security holders. There are no former security holders to whom disbursements in complete liquidation of their interests in Applicant have not been made.

For the SEC, by the Division of Investment Management, pursuant to delegated authority.

Jonathan G. Katz,

Secretary.

BILLING CODE 8010-01-M

OFFICE OF THE UNITED STATES TRADE REPRESENTATIVE

Increase in the Level of Permissible Imports of Certain Articles From the European Community

AGENCY: Office of the United States Trade Representative.

SUMMARY: This notice increases the level of permissible imports for 1987 and subsequent years of certain articles the product of member countries of the European Community (EC) that are subject to limitation under Presidential Proclamation 5478 of May 15, 1986.

EFFECTIVE DATE: October 14, 1987.

FOR FURTHER INFORMATION CONTACT: Laura Kneale, ((202) 395-3074) or John C. Kingery, ((202) 395-6800), Office of the United States Trade Representative, 600 17th Street NW., Washington, DC 20506.

SUPPLEMENTARY INFORMATION: On May 15, 1986, the President determined pursuant to section 301(a) of the Trade Act of 1974, that certain restrictions imposed by the EC on imports of grain and oilseeds deny benefits to the United States under the General Agreement on Tariffs and Trade (GATT), are unreasonable and constitute a burden or restriction on U.S. commerce. In Proclamation 5478 (51 FR 18294), the President proclaimed quantitative restrictions on imports into the United States of specified articles the product of any member country of the EC, effective May 19, 1986. In that proclamation, the President authorized the United States Trade Representative (USTR) to suspend, modify or terminate any of the quantitative restrictions upon publication in the **Federal Register** of the USTR's determination that such action is justified by actions of the EC or is otherwise appropriate.

The intent of the U.S. quantitative restrictions is to have an effect on EC trade comparable to the EC's restrictions imposed on imports following Portugal's entry into the EC. The EC has not been willing to remove or significantly ease its restrictions with respect to oilseeds. However, pursuant to negotiations under Article XXIV(6) of the GATT, the EC agreed on January 30, 1987, not to apply quantitative restrictions respecting grain imports into Portugal. The EC has also adjusted the level of the EC quotas on soybean oil consumption in a manner that alleviates the immediate risk of damage to U.S. export interests from these measures in 1987.

In response to these actions of the EC, it is appropriate to adjust the level of U.S. restrictions in order to avoid a more

BEST COPY AVAILABLE

damaging effect on EC trade than is warranted by the current operation of the EC restrictions in Portugal.

Action

Pursuant to the authority delegated to me in Proclamation 5478 of May 15, 1986, I have determined that a modification of the quantitative restrictions provided for in that proclamation is justified by actions taken by the EC with respect to this matter and is otherwise appropriate, taking into account the interests of the United States.

Accordingly, for calendar year 1987 and any subsequent calendar year, the level of permissible imports under the quantitative restrictions provided for in items 946.08 through 946.13, inclusive, of Subpart B of Part 2 of the Appendix to the Tariff Schedules of the United States (TSUS), is increased, and effective on the date of publication of this notice and determination in the **Federal Register**, the quantities specified in those TSUS items are modified to read as follows:

946.08	Chocolate, sweetened, in bars or blocks weighing 10 pounds or more each (provided for in item 156.25, Part 10A, schedule 1).	14,128 thousand lbs.
946.09	Candy, and other confectionery, not specifically provided for (provided for in item 157.10, Part 10C, schedule 1).	235,287 thousand lbs.
946.10	Apple or pear juice, not mixed and not containing over 1.0 percent of ethyl alcohol by volume (provided for in item 165.15, Part 12A, schedule 1).	140,339 thousand gals.
	Ale, porter, stout and beer:	
946.11	In containers other than glass each holding not over 1 gallon (provided for in item 167.05, Part 12C, schedule 1).	4,766 thousand gals.
946.12	In containers each holding over 1 gallon (provided for in item 167.05, Part 12C, schedule 1).	14,218 thousand gals.
946.13	White still wines produced from grapes, containing not over 14 percent of alcohol by volume, in containers each holding not over 1 gallon, valued over $4 per gallon (provided for in item 167.30, Part 12C, schedule 1).	48,369 thousand gals.

Clayton Yeutter,

United States Trade Representative.

Office of the Secretary

Minority Business Resource Center Advisory Committee; Meeting

Pursuant to section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92-463; 5 U.S.C. App. 1), notice is hereby given of a meeting of the Minority Business Center Advisory Committee to be he held Monday, November 16, 1987, at 5:30 p.m. at the Hyatt Regency Miami, 400 SE 2nd Avenue, Tuttle Room South, Miami, FL 33131. The agenda for the meeting is as follows:

—Overview of the OSDBU Short-term Loan and Bonding Assistance Programs

—The Historically Black Colleges and Universities Business Management Skills Training Program

Attendance is open to the interested public but limited to the space available. With the approval of the Chairman, members of the public may present oral statements at the meeting. Persons wishing to attend and persons wishing to present oral statements should notify the Minority Business Resource Center not later than the day before the meeting. Information pertaining to the meeting may be obtained from Ms. Josie Graziadio, Office of Small and Disadvantaged Business Utilization, 400 7th Street, SW., Washington, DC 20590, telephone (202) 366-1930. Any member of the public may present a written statement to the Committee at any time.

Issued in Washington, DC, on October 7, 1987.

Amparo B. Bouchey,

Director, Office of Small and Disadvantaged Business Utilization.

DEPARTMENT OF THE TREASURY

Public Information Collection Requirements Submitted to OMB for Review

Date: October 7, 1987.

The Department of Treasury has made revisions and resubmitted the following public information collection requirement(s) to OMB for review and clearance under the Paperwork Reduction Act of 1980, Pub. L. 96–511. Copies of the submission(s) may be obtained by calling the Treasury Bureau Clearance Officer listed. Comments regarding these information collections should be addressed to the OMB reviewer listed and to the Treasury Department Clearance Officer, Room 2224, Main Treasury Building, 15th and Pennsylvania Avenue NW., Washington, DC 20220.

Internal Revenue Service

OMB Number: 1545–0130.
Form Number: IRS Form 1120S and Schedule D (Form 1120S).
Type of Review: Resubmission.
Title: Capital Gains and Losses and Built-In Gains.
Description: Form 1120S and Schedule D (Form 1120S) are used by an S Corporation to figure its tax liability and income and other tax-related information to pass through to its shareholders.
Respondents: Farms, Businesses or other for-profit, Small businesses or organizations.
Estimated Burden: 10,239,435 hours.

OMB Number: 1545–1008.
Form Number: IRS Form 8582.
Type of Review: Resubmission.
Title: Passive Activity Loss Limitations.
Description: Under section 469, losses from passive activities, to the extent that they exceed income from passive activities, cannot be deducted against nonpassive income. Form 8582 is used to figure the activity loss allowed and the loss to be reported on the tax return. The worksheets 1 and 2 in the instructions are used to figure the amount to be entered on lines 1 and 2 of Form 8582 and worksheet 3 through 6 are used to allocate the loss allowed back to individual activities.
Respondents: Individuals or households, Farms, Businesses or other for-profit.
Estimated Burden: 18,285,326 hours

Clearance Officer: Garrick Shear, (202) 535–4297 Room 5571, 1111 Constitution Avenue NW., Washington, DC 20224.
OMB Reviewer: Milo Sunderhauf, (202) 395–6880, Office of Managament and Budget, Room 3208, New Executive Office Building, Washington, DC 20503.

Lois K. Holland,

Departmental Reports Management Officer.

Sunshine Act Meetings

Federal Register
Vol. 52, No. 198
Wednesday, October 14, 1987

This section of the FEDERAL REGISTER contains notices of meetings published under the "Government in the Sunshine Act" (Pub. L. 94-409) 5 U.S.C. 552b(e)(3).

NATIONAL FOUNDATION ON THE ARTS AND HUMANITIES, INSTITUTE OF MUSEUM SERVICES

SUMMARY: This notice sets forth the agenda of a forthcoming meeting of the National Museum Services Board. This notice also describes the functions of the Board. Notice of this meeting is required under the Government in the Sunshine Act (Pub. L. No. 94-409) and regulations of the Institute of Museum Services, 45 CFR 1180.84.

TIME AND DATE: 10:00 a.m., Wednesday, October 21, 1987.

STATUS: Open.

ADDRESS: 1100 Pennsylvania Avenue, NW., Room MO-9, Washington, DC 20506 (202) 786-0536.

FOR FURTHER INFORMATION CONTACT: Ms. Christine Forbes, Executive Assistant to the National Museum Services Board, Room 510, 1100 Pennsylvania Avenue NW., Washington, DC 20506, (202) 786-0536.

SUPPLEMENTARY INFORMATION: The National Museum Services Board is established under the Museum Services Act, Title LL of the Arts, Humanities, and Cultural Affairs Act of 1976, Pub. L. 94-462. The Board has responsibility for the general policies with respect to the powers, duties, and authorities invested in the Institute under this Title. Grants are awarded by the Institute of Museum Services after review by the Board. If you need special accommodations due to a disability, please contact Institute of Museum Services, 1100 Pennsylvania Avenue NW., Washington, DC, (202) 786-0536, TDD (202) 682-5496 at least seven (7) days prior to the meeting.

National Museum Services Board

October 21, 1987 Meeting Agenda

I. Approval of Minutes of July 17, 1987 Meeting
II. Director's Report
III. Legislative and Regulatory Update
IV. Other Business
V. Program Report
  A. Museum Assessment Program
  B. Conservation Support Program
  C. General Operating Support
VI. Discussion of Peer Review Process

Dated: October 8, 1987.

Lois Burke Shepard,

Director.

BILLING CODE 7036-01-M

NUCLEAR REGULATORY COMMISSION

DATE: Weeks of October 12, 19, 26, and November 2, 1987.

PLACE: Commissioners' Conference Room, 1717 H Street NW., Washington, DC.

STATUS: Open and Closed.

MATTERS TO BE CONSIDERED:

Week of October 12

Friday, October 16

9:30 a.m.
  Discussion of Pending Investigations (Closed—Ex. 5 & 7)
10:00 a.m.
  Briefing on Status of Rancho Seco (Public Meeting)
11:30 a.m.
  Affirmation/Discussion and Vote (Public Meeting)
  a. Final Rulemaking "Uranium Mill Tailings Regulations: Ground Water Protection and Other Issues" (Tentative)
  b. Commission Review of ALAB-832 (Shoreham) (Tentative)

Week of October 19—Tentative

Wednesday, October 21

10:00 a.m.
  Briefing on Status of Unresolved Safety/Generic Issues (Public Meeting)
2:00 p.m.
  Briefing on the Federally Funded Research Development Center (FFRDC) (Public Meeting)

Thursday, October 22

10:00 a.m.
  Briefing on Emergency Planning Rule (Public Meeting)
3:30 p.m.
  Affirmative/Discussion and Vote (Public Meeting) (if needed)

Week of October 26—Tentative

Wednesday, October 28

2:00 p.m.
  Discussion/Possible Vote on Full Power Operating License for Palo Verde-3 (Public Meeting)

Thursday, October 29

3:30 p.m.
  Affirmative/Discussion and Vote (Public Meeting) (if needed)

Week of November 2

Tuesday, November 3

10:00 a.m.
  Briefing on the Status of High Level Waste Issues (Public Meeting)

Wednesday, November 4

2:30 p.m.
  Briefing on Integrated Safety Assessment Program (ISAP) (Public Meeting)

Thursday, November 5

2:00 p.m.
  Discussion of Management-Organization and Internal Personnel Matters (Closed—Ex. 2 & 6)
3:30 p.m.
  Affirmative/Discussion and Vote (Public Meeting) (if needed)

Note.—Affirmation sessions are initially scheduled and announced to the public on a time-reserved basis. Supplementary notice is provided in accordance with the Sunshine Act as specific items are identified and added to the meeting agenda. If there is no specific subject listed for affirmation, this means that no item has as yet been identified as requiring any Commission vote on this date.

TO VERIFY THE STATUS OF MEETINGS CALL (RECORDING) (202) 634-1498.

CONTACT PERSON FOR MORE INFORMATION: Andrew Bates, (202) 634-1410.

Andrew L. Bates,

Office of the Secretary.

October 9, 1987.

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

Office of Assistant Secretary for Community Planning and Development

[Docket No. N-87-1726; FR-2401]

Urban Development Action Grants; Revised Minimum Standards for Large Cities and Urban Counties

AGENCY: Office of the Assistant Secretary for Community Planning and Development, HUD.

ACTION: Notice.

SUMMARY: In accordance with 24 CFR 570.452(b)(1), the Department is providing Notice of the most current minimum standards of physical and economic distress for large cities (metropolitan cities and other cities over 50,000 population), and urban counties for the Urban Development Action Grant (UDAG) program.

This Notice supersedes the Notice published on February 13, 1986 (51 FR 5413).

The minimum standards of distress have changed primarily as a result of applying new data from the Bureau of the Census, the Bureau of Labor Statistics, and the Employment Training Administraton of the Department of Labor.

The Notice contains three lists: The first list identifies all those cities and urban counties which qualify as distressed communities based upon the new minimum standards. The second list identifies those cities and urban counties which did not qualify when the February 13, 1986 list was published but which do qualify now. The third list identifies those cities and urban counties which were classified as distressed on the February 13, 1986 list, but which no longer qualify under the new minimum standards.

EFFECTIVE DATE: October 2, 1987.

FOR FURTHER INFORMATION CONTACT: Jean Samuels, Office of Urban Development Action Grants, Department of Housing and Urban Development, 451 Seventh Street, SW., Washington, DC 20410, Telephone: 202/755-6784. For information on minimum distress standards or the data used to determine whether a community qualifies as distressed contact: Larry Blume, Telephone: 202/755-7390.

SUPPLEMENTARY INFORMATION: On February 13, 1986 we published a Notice that provided the minimum standards of physical and economic distress which were applicable up to the effective date of this Notice for large cities and urban counties.

Part I of this Notice specifies the new minimum standards of physical and economic distress. Part II contains a revised list of all the large cities and urban counties which meet the new standards. Part III lists those large cities and urban counties which, based upon the new minimum standards, appear on the list in Part II, but did not qualify when the February 13, 1986 list was published. Part IV is a list of those cities which were classified as distressed on the February 13, 1986 list, but which no longer qualify under the new minimum standards. These cities listed in Part IV have a specified period of time during which they may submit UDAG applications.

The seven minimum standards of distress have been changed as a result of new data from the Bureau of the Census, the Employment Training Administration, and the Bureau of Labor Statistics. The data cover units of government incorporated through June, 1986. The updated Census data are 1984 population, 1983 per capita income, 1980 housing and poverty (adjusted for boundary changes through 1983), and retail and manufacturing jobs created from 1977 to 1982. The previous Census data were 1982 population, 1981 per capita income, 1980 housing and poverty (reflecting boundary changes through 1982), and 1977–1982 retail and manufacturing jobs. The Bureau of Labor Statistics data are updated from 1984 unemployment rates to 1986 unemployment rates. The updated data from the Employment and Training Administration are Labor Surplus Areas designated as of April 1, 1987. The specified unemployment rate for the 1984—1985 period is 9 percent. A list of eligible labor surplus areas was published in the **Federal Register** on March 26, 1987 (52 FR 9727). The previous Labor Surplus Areas were designated as of October 1, 1984.

1. A large city or urban county must pass three minimum standards of physical and economic distress, except if the percentage of poverty is less than half the minimum standard identified in paragraph 1.F. below, then the city or urban county must pass four standards. The minimum standards of distress for age of housing, per capita income change, population growth lag/decline, unemployment, job lag/decline, and poverty are based on the median for all large cities. The minimum standards of distress for Labor Surplus Area is based on the national average unemployment rate over a two year period. The most current minimum standards of physical and economic distress are:

A. *Age of Housing.* At least 20.2 percent of the applicant's year-round housing units must have been constructed prior to 1940, based on the 1980 U.S. Census data, in order to meet this minimum standard;

B. *Per Capita Income Change.* The net increase in per capita income for the period of 1969–1983 must have been $6,203 or less, based on Census Bureau data, in order to meet this minimum standard;

C. *Population Growth Lag/Decline.* For the period 1960–1984 the percentage rate of population growth (based on corporate boundaries) in 1960 and as of 1984 must have been 25.3 percent or less, based on Census Bureau data, in order to meet this minimum standard;

D. *Unemployment.* The average rate of unemployment for 1986 must have been 6.5 percent of greater, based on data compiled by the Bureau of Labor Statistics, in order to meet this minimum standard;

E. *Job Lag/Decline.* The rate of growth in retail and manufacturing employment for the period 1977–1982 must have increased by 3.3 percent or less, based on Census Bureau data, in order to meet this minimum standard. If data are not available for both retail and manufacturing employment, the percentage used will be the median for either retail employment (8.5 percent) or manufacturing employment (0.0 percent), based upon the data available. If neither data source is available, this standard will not be considered.

F. *Poverty.* The percentage of persons within the applicant's jurisdiction at or below the poverty level must be 12.3 percent or more, based on the 1980 Census Bureau data, in order to meet this minimum standard;

G. *Labor Surplus Area.* The city or urban county must be at least partially within an area which meets the criteria for designation as a Labor Surplus Area as of April 1, 1987. These areas include cities with populations of 25,000 or more, counties, or county balances with an unemployment rate of 9 percent for calendar years 1984–1985.

II. A. The following cities and urban counties meet the current minimum standards of physical and economic distress:

III. A. The following large cities and urban counties which have been added to the list under Section II, above, meet the new standards of physical and economic distress:

State and Place

AR Fort Smith
AR Jacksonville
CA Huntington Park
CA Merced
CA Modesto
CAa Santa Maria
CA Visalia
FL Bradenton
FL Cocoa
FL Titusville
HI Hawaii County
IlL North Chicago
LA Baton Rouge
LA Lafayette
NC Kannapolis
OR Multnomah County
TX Bryan
TX College Station
TX Denison
TX Fort Worth
TX San Antonio
TX Sherman
TX Wichita Falls
WI Sheboygan
PR Humacao Municipio

IV. The following list contains the names of those large cities and urban counties which met the minimum standards of physical and economic distress on February 13, 1986 but which no longer meet those standards. The final date for submission of an application by the cities listed below is March 31, 1988.

State and Place

COMMISSION ON EDUCATION OF THE DEAF

Second Set of Draft Recommendations; Comment Solicitation

AGENCY: Commission on Education of the Deaf.

ACTION: Notice of draft recommendations.

SUMMARY: This notice contains a second set of draft recommendations on which the Commission on Education of the Deaf (Commission) solicits public comment. This set addresses comprehensive service centers and training programs; adult and continuing education; the Department of Education (ED) liaison officer to Gallaudet University (GU), the National Technical Institute for the Deaf (NTID) and the regional programs; program evaluation of GU and NTID; ED's Captioned Films Program; Kendall Demonstration Elementary School and the Model Secondary School for the Deaf; minority and deaf-blind education; language acquisition; early intervention; educational technology; professional certification; educational interpreters; American Sign Language; and employment of deaf persons at GU and NTID. In this notice, the Commission reprints, in amended form, its previous draft recommendation on GU's and NTID's research, development, and evaluation activities. It is also investigating the need for a clearinghouse.

DATE: To be accepted for consideration, comments must be in writing, refer to specific recommendations, and be received in the Commission office on or before November 13, 1987.

ADDRESS: Written comments should be sent to the Commission on Education of the Deaf, GSA Regional Office Building, Room 6646, 7th and D Streets SW., Washington, DC 20407. For further information, contact Pat Johanson, Staff Director, or Robert J. Mather, Staff Counsel, (202) 453–4353 (TDD) or (202) 453–4684 (Voice). These are not toll free numbers.

SUPPLEMENTARY INFORMATION: In this notice, the Commission publishes the second of two sets of draft recommendations for written public input. The first set, published on August 28, 1987, addressed "appropriate education" under the Education of the Handicapped Act (EHA), parents' right to be informed about educational options, early identification of hearing impairment in infants and young children, the Regional Postsecondary Education Programs for the Deaf (RPEPD), student admission policies and research and dissemination activities at Gallaudet University (GU) and the National Technical Institute for the Deaf (NTID), and television captioning services.[1]

Clearinghouse

The Commission at its September meeting decided not to make any draft recommendations on the advisability and feasibility of establishing a national clearinghouse on deafness. Many people have noted a continuing problem in the dissemination and availability of information and materials in the field. Many national organizations provide clearinghouse services, for example: Alexander Graham Bell Association of the Deaf, American Deafness and Rehabilitation Association, American Society for Deaf Children, Gallaudet University, the National Association of the Deaf, Self-Help for Hard of Hearing People, Conference of Educational Administrators Serving the Deaf, Convention of American Instructors of the Deaf, Council on Education of the Deaf, and others.

The EHA Amendments of 1986 authorized two national clearinghouses, one on the education of handicapped children and youth and the other on postsecondary education for handicapped individuals.[2] In light of this information, the Commission asks whether new free-standing clearinghouses should be established or whether the current clearinghouses should be strengthened.

Previous Draft Recommendation on GU and NTID

In response to further inquiry about the previous draft recommendation on direct appropriations to GU and NTID for research, development, and evaluation activities,[3] the Commission decided to reprint this recommendation, along with further information, as *Draft Recommendation 21.* The Commission clarifies its intent that this recommendation applies to GU's pre-college programs (the Model Secondary School for the Deaf (MSSD) and the Kendall Demonstration Elementary School (KDES)), in addition to the other programs. The period for comment on this recommendation is extended to November 13, 1987.

As with the first set, the second set of draft recommendations was developed in part from public input received in response to the Notice of Inquiry and from public meetings held on the status of educational programs.[4] Approximately 4,000 responses were received from over 450 organizations, parents, educators, specialists, and consumers.

Established by the Education of the Deaf Act of 1986,[5] the Commission is directed to study infant, early childhood, elementary, secondary, postsecondary, adult, and continuing education programs for persons who are deaf. It must also study federally assisted programs relating to instructional media and captioning services. It must submit to Congress and to the President, no later than February 4, 1988, a final report of its study together with recommendations, including specific proposals for legislation, as the Commission deems advisable.

The Commission requests all interested persons and organizations to submit written comments and/or counterproposals on the draft recommendations listed below. Comments and counterproposals must be received in the Commission office by November 13, 1987.

I. Comprehensive Service Centers and Training Programs

A. Service Centers

Discussion: At least 500,000 of the estimated 2 million deaf persons in the U.S. became profoundly deaf before the age of 19. As many as 100,000 deaf individuals are severely limited in their ability to find employment or to pursue postsecondary education due to inadequate educational preparation.[6] Studies reveal that about 60 percent of deaf students who graduate or drop out of school every year go directly into the labor market in semi- or un-skilled jobs or remain unemployed. They are likely to have limited formal education, very limited English proficiency, poor vocational preparation, and sporadic employment histories. If intensive specialized training does not become available, a 70 percent rate of labor force nonparticipation or unemployment could be predicted for them as technological advances reduce the number and kinds of jobs they have traditionally filled.[7]

[3] *Draft Recommendation 8,* 52 FR 32735.

[4] 52 FR 10722 (1987).

[5] Pub. L. 99–371, 100 Stat. 781, 786–789 (20 U.S.C. 4341–4344).

[6] Task Force on Rehabilitation Centers for Deaf Individuals. *Guidelines for Rehabilitation Centers for Deaf Individuals. 1973.*

[7] Report of the Steering Committee on Activities for Low Achieving Deaf Post-School Population. Arkansas Rehabilitation Research Training Center. 1969.

Under the Education of the Deaf Act of 1986 (EDA), nearly $74.6 million was allocated in fiscal year 1986 to educate nearly 3,700 students who attended GU and NTID. Conversely, ED's Rehabilitation Services Administration (RSA) estimates it spent about half that amount to rehabilitate 26,200 clients who are deaf.

Since the late 1970s, no comprehensive service center for this under-served population has been funded by RSA. This means that for the past 10 years, over 60 percent of the adult deaf population has not received services appropriate for their unique needs.

Draft Recommendation 1: Congress should establish one comprehensive service center in each of the ten federal regions.

The comprehensive service centers would be funded through a competitive bid process, using a five-year funding cycle. A federal incentive to encourage cooperating states to support these centers after the five-year period has ended would be instituted. To be eligible for initial federal funds, applicants would have to:

(a) Provide comprehensive services, such as initial evaluation and diagnosis, general education, counseling and guidance, vocational training, work transition, supported employment, placement, follow-up, and outreach;

(b) Employ qualified personnel who are able to communicate in the clients' native language or mode of communication;

(c) Disseminate training techniques, instructional materials, results of program evaluations, and public information; and

(d) Demonstrate viability of continuation without direct federal subsidies.

B. Training Programs

Discussion: The pervasive and continuing shortage of qualified personnel to work with the population to be served in the comprehensive centers emphasizes the need for appropriate training programs for rehabilitation counselors.

Draft Recommendation 2: The Department of Education should require rehabilitation counselor training programs, which prepare deafness specialists, to offer additional coursework and internships on counseling the population to be served in the comprehensive centers.

To provide the necessary pool of professionals to staff the comprehensive service centers, the number of training programs offering coursework and internships in counseling this population will have to be increased, or the current programs will need to be expanded. Currently, there are seven training programs for rehabilitation counselors who work with persons who are deaf.

II. Adult and Continuing Education

Discussion: The next recommendation addresses the needs of deaf adults who are functioning fully in the labor market but who require continuing education, as do most adults, in order to keep up with the changes occurring in the workplace. Despite an apparent demand from deaf persons for adult education classes, many adult and continuing education programs do not provide needed support services or utilize teachers who are familiar with the educational, social, cultural, and communication needs of that population. In addition, input and direction from deaf adults in planning adult education courses is often lacking.

Draft Recommendation 3, which follows, recognizes the special considerations inherent in developing and improving programs in adult and continuing education for deaf persons. Such programs should include not only degree programs but also programs in career preparation, personal development, academic skills enhancement, and vocational training.

The Commission's previous draft recommendation on the RPEPD suggested that each of the participating schools provide a "broader range of educational options." [8] The intent of this recommendation was to encourage each RPEPD to provide technical assistance to existing universities and community colleges in order to furnish a full range of postsecondary education opportunities. The Commission now recommends that the mission of each RPEPD in offering postsecondary education to deaf students be expanded to include adult education.

Draft Recommendation 3: Congress should authorize funds for each RPEPD to provide adult and continuing education programs and to assist local educational institutions in providing such programs to adults who are deaf.

To be eligible for additional funding for adult and continuing education components, each RPEPD should meet the following criteria:

(a) Involvement and training of persons who are deaf as administrators, program planners, and instructors;

(b) Provision of adequate support services, including interpreters, notetakers, and tutors;

(c) Provision of outreach services to their communities and schools serving persons who are deaf;

(d) Design of programs to meet the unique needs of adults who are deaf; and

(e) Provision of inservice training on deafness to adult education providers.

III. Department of Education Liaison Officer for Federally Funded Postsecondary Programs

Discussion: The Education of the Deaf Act of 1986 directed ED to designate an individual to serve as liaison between ED and GU, NTID, and the four schools participating in the RPEPD. The duties of the liaison officer are to provide information to the programs regarding ED's activities which directly affect the operation of the institution's programs and to provide such support and assistance as the institutions may request and the Secretary considers appropriate.[9]

The original bill, the Education of the Deaf Act of 1985 (S. 1874), stipulated that this liaison officer: Coordinate the activities of GU, NTID, and the regional programs to ensure the provision of quality education of deaf individuals and avoid unnecessary duplication; to review and comment on plans and other materials submitted by GU and NTID relating to research and demonstration activities, technical assistance, and development of instructional materials; and to assist in the preparation of budget requests.[10] The Senate version was not included in the final bill. To ensure coordination and avoid duplication among the programs, especially in view of the Commission's draft recommendations for the expanding roles of the regional programs, the Commission proposes that the liaison officer should have those additional responsibilities as described in the original Senate bill.

Draft Recommendation 4: Congress should amend the Education of the Deaf Act to direct the Department of Education's liaison officer to: (1) Coordinate the activities of GU, NTID, and the regional programs to ensure quality of the programs and to avoid unnecessary duplication; (2) review and comment on workplans relating to research and demonstration activities, technical assistance, and development of instructional materials; (3) assist in the preparation of budget requests; and (4) serve as an ex-officio member of GU's Board of Trustees and the advisory groups of NTID and the RPEPD.

---

[8] *See Draft Recommendation 4,* 52 FR 32734.

[9] Pub. L. 99-371, § 406, 100 Stat. at 790 (20 U.S.C. 4356).

[10] S. 1874, 99th Cong., 2d Sess. 406 (1986).

VOL
52
ISS
198
OC
14
1987
UMI

It is the Commission's intent that the liaison not be involved in the management, policymaking process, or governance of any of these programs. The person selected for the position of liaison officer should be an acknowledged expert in the field of deafness.

IV. Evaluation of GU and NTID by the Department of Education

Discussion: The General Accounting Office (GAO) reported that although ED generally oversees financial and budgetary matters at GU and NTID, the institutions have not been subject to periodic program evaluation.[11] The Commission is aware that some of the programs are already subject to accreditation evaluation; however, there is still a need for more comprehensive evaluation of those programs that receive federal funds. The liaison officer and advisory boards do not provide evaluative information and do not provide direct information to the Federal government regarding the achievements of these institutions in fulfilling their national missions.

The EDA requires ED to monitor and evaluate the education programs and activities and the administrative operations of GU and NTID. In carrying out these responsibilities, ED is authorized to employ such consultants as may be necessary.[12] The Act does not prescribe how ED should carry out its monitoring and evaluation responsibilities.

Draft Recommendation 5: The Department of Education should conduct program evaluations at GU and NTID on a five-year cycle and submit a report of its evaluation with recommendations, including specific proposals for legislation, as it deems advisable, to the authorizing committees of the Congress. The evaluation team should consist of outside experts in the field of deafness, program evaluation, education, and rehabilitation.

Evaluation should coincide, as much as possible, with the accreditation activities at the two institutions to avoid unnecessary duplication of effort. This recommendation is separate from the other draft recommendations relating to ED's liaison officer [13] and to evaluation of the Kendall Demonstration Elementary School and the Model Secondary School for the Deaf.[14]

V. Membership of GU's Board of Trustees, NTID's National Advisory Group, and RPEPD Advisory Groups

Discussion: The Commission notes that GU's Board of Trustees is currently composed of 21 members, only 4 of whom are deaf; while NTID's National Advisory Group is composed of 16 members, 3 of whom are deaf. Rather than recommending legislative action, the Commission encourages these programs to take the lead by increasing the representation of deaf persons in the governing and policy making bodies which serve this population.[15] If a fifth RPEPD is funded,[16] it would be expected to follow this recommendation as well.

Draft Recommendation 6: At least 51 percent of GU's Board of Trustees and the NTID's National Advisory Group and similar guiding bodies at each school participating in the RPEPD should be deaf.[17]

VI. Captioned Films Program

Discussion: ED's Captioned Films program distributes captioned educational films through 58 depositories free of charge to any school or program that is registered for the service and has at least one child with impaired hearing. ED's 1987 projects include over $5 million for captioning and distributing films. Educational films average about 17,500 showings per month during the school year.

The current process of captioning and distributing films takes almost two years. This process includes: Film selection, negotiations with film producers to caption their films, producing the scripts for captioning, actual captioning of the films, and distribution of the films to the schools.

Draft Recommendation 7: Congress should continue federal funds for the Department of Education's (ED) Captioned Films program (including captioning and distribution of educational and entertainment films). ED should require certain administrative improvements in the program. The use of current technology should be investigated to enhance the production of captioned films and media.

The Commission recognizes the importance of the captioned films program. At the same time, it notes several administrative problems in this program, which could include: Using current technology in the captioning and distribution process; keeping the distribution system on school campuses; lessening the gap between costs incurred and reimbursements; involving the deaf community and other professionals knowledgeable about deafness in all aspects of the program; making more prints available to depositories on the basis of information gathered from unfilled FILMSHARE bookings nationwide; increasing the number of new titles distributed each year; eliminating old films while updating others; and shortening the length of time now required for film distribution. The Commission is also considering a recommendation to ED that an independent contractor conduct a needs assessment on school use of captioned educational films.[18]

VII. Kendall Demonstration Elementary School (KDES) and the Model Secondary School for the Deaf (MSSD)

Discussion: The KDES Act [19] and the MSSD Act [20] directed the two schools to "provide an exemplary educational program to stimulate the development of similar excellent programs throughout the Nation." Both of these programs were established in their present form as a result of the 1964 Babbidge Report, which deplored the lack of systematic education for the majority of preschool deaf children, the limited secondary opportunities for deaf students nationwide, the low level of educational achievement attained by many secondary school graduates who were deaf, and the low allocation of funding for research.[21]

Thus, KDES was authorized to provide elementary-level educational facilities for individuals who are deaf "in order to prepare them for high school and other secondary study,"[22] while

[12] Pub. L. 99–371, 405, 100 Stat. at 790 (20 U.S.C. 4355).

[13] *See Draft Recommendation 4* above.

[14] *See Draft Recommendation 8* below.

[15] As a precedent, at least 5 of the 12 members of the Commission must be deaf. 20 U.S.C. 4341(b)(4). *See also* 29 U.S.C. 796d–1(b) (a majority of the members of state independent living council must be handicapped individuals and parents or guardians of handicapped individuals).

[16] *See* previous *Draft Recommendation 4*, 52 FR 32734 (the Commission proposed a fifth regional program in the Southwest, in addition to the four existing programs).

[17] The Commission has not reached full consensus on this recommendation.

[18] It should be noted that the first notice of draft recommendations contains those relating to closed captioned television. *See Draft Recommendations 12–18*, 52 *FR* 32737.

[19] Pub L. 91–587, 84 Stat. 1579 (1970).

[20] Pub. L. 89–694, 80 Stat. 1027 (1966).

[21] The House report accompanying the MSSD Act cited the Babbidge findings of "significant inadequacies in the educational services for the deaf, particularly noting the lack of a genuine secondary school program for deaf persons." H.R. No. 2214, 91st Cong. 2d Sess. 2, *reprinted in* 1966 U.S. Code & Admin. News 3527, 3528.

[22] 20 U.S.C. 4311(a)(1).

MSSD was authorized to provide day and residential facilities for secondary education for individuals who are deaf "in order to prepare them for college and for other advanced study."[23] In carrying out its function to prepare students for college, MSSD has adopted an admissions policy which stipulates "potential students to demonstrate reading levels of third grade or higher."[24] GU reports that 78 percent of former MSSD students continued their education beyond high school, with nearly one-fourth of that number completing programs of advanced study.[25]

A number of educators stated to this Commission that they are able to adequately serve the academically oriented students, but they expressed a need for programs, products, technical assistance, and outreach efforts designed for students who are not achieving satisfactory academic progress. Such students may be average or above average in terms of intelligence, but due to unsuccessful educational methodology, they are functioning at the first, second, or third grade levels in terms of academic achievement. In addition, many professionals expressed a need for other programs and products which are appropriate for students with secondary disabilities, students from non-English speaking homes, students who are members of minority groups, and parents who have deaf children.

Draft Recommendation 8: Congress should amend the EDA to include the following provisions for setting priorities at KDES and MSSD, and for submitting annual and evaluation reports:

Priorities

KDES and MSSD should provide exemplary programs to stimulate the development of similar programs across the nation. These exemplary programs should be developed to meet the critical needs at the elementary and secondary levels through research, development, training, and technical assistance. The current critical needs identified by the Commission relate to the following special populations:

(a) Students who are lower achieving academically;

(b) Students who have secondary handicaps;

(c) Students who are from non-English speaking homes;

(d) Students who are members of minority groups; and

(e) Parents who have deaf children.

Admission criteria should be changed to be congruent with the special populations addressed. The mission and focus of MSSD should be redefined so that the student population served by the school more closely mirrors the national demographics of secondary school-age deaf children. Materials and other product development of MSSD shall first address the special populations defined above.

Annual Report

KDES and MSSD shall submit an annual report to the President and to Congress which includes a list of the critical needs, a description of programs and activities designed to meet those needs, and an evaluation of their effectiveness.

Evaluation Report

Prior to reauthorization, or at least every five years, KDES and MSSD shall select independent experts, including consumers, from all types of educational programs, including mainstream programs, to provide an objective assessment of the progress made by KDES and MSSD in meeting the identified critical needs. An evaluation report shall be provided to the President and to Congress which includes the names of the experts and consumers conducting the assessment, a presentation of their findings, and the response of KDES and MSSD to the evaluation. In addition, the experts will delineate the critical needs to guide the programs during the next funding cycle.

VIII. Minority and Deaf-Blind Education

Discussion: Currently, nearly one-third of the children in schools and programs for the deaf belong to minority groups and that percentage is likely to increase. Numerous statements to the Commission charged that research, development, and training efforts must confront more than the issue of deafness—future activities must also be responsive to cultural and minority concerns. Topics of concern include: Cultural perspectives on education; development of the individual educational plan; teacher, administrator, and student recruitment; learning styles and strategies; the home language environment; and parent and family counseling.

Draft Recommendation 9: With respect to programs and activities serving students who are deaf, special recognition should be given to the unique needs of students who are members of minority groups, including deaf/blind students and those with secondary disabilities, as well as those who are members of racial and ethnic minority groups. This special recognition should apply to educational programs (from infant and early childhood to adult education), parent education, model/demonstration programs, and research, and should take into consideration cultural factors relating to race, ethnicity, and deafness.

IX. Language Acquisition

Discussion: Since language cannot be taught directly, the acquisition of language by children who are deaf is dependent upon the optimal presentation of relationships between concepts, linguistic signals, and social use. Despite the efforts of researchers and educators, little extensive progress has been evidenced in the acquisition of English by persons who are prelingually deaf. Therefore, the Commission views the acquisition of language and reading skills by children as a preeminent goal in the field of deaf education.

Draft Recommendation 10: Facilitating language acquisition in students who are deaf (including verbal, visual, and written language) should be a paramount concern guiding the implementation of exemplary practices, the establishment of program models, the determination of research priorities, the desion of curricula, materials, and assessment instruments, and the provision of professional and parent training.

Exemplary practices, programs, materials, and assessment instruments should be developed based on findings from the fields of deaf education, psycholinguistics, human cognition, and second language acquisition. Funding should be provided for advancement in various areas, including:

(a) Theoretical and Applied Research
(b) Development and Dissemination
(c) Implementation
(d) Parent and Professional Training

The Commission requests input on subtopics which merit attention under each of the preceding four topics. The Commission does not seek to prescribe a specific communication mode; instead, it wishes to explore various aspects of language acquisition which transcend communication mode preferences.

X. Early Intervention

Discussion: Under the Education of the Handicapped Act Amendments of 1986, states must provide early intervention services to all handicapped preschool students by the year 1991 in

[23] *Id.* at 4321(a).

[24] Gallaudet University. Responses to Questions from the Commission on Education of the Deaf, June 12, 1987, p. IV(b)–15.

[25] Gallaudet University Pre-College Programs. Presentation to Commission on Education of the Deaf, March, 1987, p. 8.

VOL 52 ISS 198 OCT 14 1987 UMI

order to be eligible for federal funds.[26] To ensure that quality services are being provided to children who are deaf, standards for personnel and programs should be developed by parents, specialists in early intervention and deafness, and adults who are deaf. Several states have already taken the initiative to develop such standards and the Commission encourages other states to review those standards as they develop their own. In addition, parents should have access to information about standards, allowing them to assess the quality of individual programs.

Draft Recommendation 11: State education agencies should be required to conduct state-wide planning and implementation activities, including the establishment of program and personnel standards which specifically address the educational and psychological needs of families with young children who are deaf. Individuals working with young, deaf children must be professionally trained to serve this population.

In providing early intervention services, the majority of individuals who work with young children who are deaf have been trained as teachers for the school-aged deaf population, as communicative disorder specialists, as early childhood/special education teachers, or in other unrelated fields. As a result, they would benefit from training relative to the population and age-range with whom they work. In addition, the infusion of deaf persons into home and school settings could also provide opportunities for deaf children to be exposed to deaf adult role models and would allow parents to be introduced at the earliest possible time to deaf persons. Amplification devices, including individual hearing aids, group amplification systems and other assistive listening devices, are integral components of any educational program for hearing-impaired children and youth, yet funding sources for the purchase of these systems are frequently inadequate for hearing aids and are non-existent for group amplification systems and tactile aids. These program practices and devices, as well as other important features, might be incorporated into exemplary program models which would improve approaches to high quality early childhood education.

Draft Recommendation 12: Congress should make available federal funding for states to:

(a) Provide preservice and inservice training to personnel to enable them to work effectively with young children, ages 0 to 5, who are deaf. Training should also be provided to adults who are deaf to prepare them to work as facilitating team members with local intervention programs;

(b) Ensure that appropriate technologies, and particularly amplification devices, are available for the provision of education for all children with hearing impairments; and

(c) Initiate or support a variety of program models which demonstrate improved approaches to high quality infant and early childhood education programs for children who are deaf. Projects must provide direct service to participating individuals and have the potential for wide replication.

XI. Educational Technology

Discussion: Great strides have been made in educational technology, and today's technologies include personal computers, satellite communication systems, video disc systems, robotics, and telecommunication systems. The most prominent of the current technological advancements in the field of computer-assisted instruction for children who are deaf include: speech recognition and synthesis software, language and speech development aids, real-time and closed captioning, telecommunication devices (TDDs), warning systems, and amplification devices. Coupled with the use of personal computers, these advancements have the potential to greatly enhance the education of students who are deaf.

Despite these strides, the Commission finds a compelling need for the development and application of these techniques and devices for improving instruction, for measuring student progress, and for disseminating information to interested persons and organizations.

Draft Recommendation 13: Congress should provide funds for research, development, acquisition, and maintenance of technology to be used for special and vocational education of children and adults who are deaf, including those with secondary disabilities.

The EHA Amendments of 1986 authorize federal funds for the support of research, dissemination, and technical assistance activities related to the development, production, and marketing of technology for use in the education of handicapped children.[27] As an alternative, such funds could appropriately be used to help defray much of the high start-up cost associated with the purchase of technological equipment and products for use in classrooms with children and adults who are deaf.

Draft Recommendation 14: Congress should support new and existing assistive devices resource centers to inform and instruct children and adults on the latest technological advances in the education of persons who are deaf.

Assistive devices resource centers should be established in cooperation with experts in audiology and education. The centers should have mobile units to serve the needs of persons who are deaf, including those living in rural areas. The centers would demonstrate the range of available devices, and would provide training and technical assistance on the use of the devices. The centers are intended to bridge the gap in the delivery of rehabilitation engineering research for school-aged children with severe disabilities. This draft recommendation supports and extends beyond the pending Senate bill entitled, "Technology to Educate Children With Handicaps Act."[28]

Draft Recommendation 15: National symposia on media and technology should be held to provide information on the most recent advances in applied technology for children who are deaf.

The last symposium on media and technology for children who are deaf was held in 1983. The Commission strongly endorses the reinstatement of these national symposia so that professionals in the field of deaf education are knowledgeable about state-of-the-art educational technology.

XII. Professional Certification

Discussion: The lack of uniform standards for adequate professional training and preparation continues to be a pressing problem. A set of uniform guidelines would provide urgently needed standards and eliminate problems associated with employing teachers trained in other states. (Standards for educational interpreters will be discussed in Section XIV.)

Section 613(a)(14) of the EHA Amendments of 1986 requires states to include in their plans "policies and procedures relating to the establishment and maintenance of standards to ensure that personnel necessary to carry out the purposes of * * * [part B] are appropriately and adequately prepared and trained * * *."[29] It also requires

[27] Pub. L. 99-457, title III, 312, 101 Stat. 1169 (20 U.S.C. 1442).

[28] S. 1586, 100th Cong. 1st Sess. (1987).

[29] 101 Stat. 1159, 1174, 20 U.S.C. 1413(a)(14).

states to establish and maintain standards consistent with state approved or recognized certification, licensing, registration, or other comparable requirements which apply to particular professions or disciplines.[30]

In assisting the states to develop personnel standards for professionals in deaf education, ED should consider the Council on Education of the Deaf's standards for the certification of professionals involved in the education of hearing impaired children and youth.

Draft Recommendation 16: The Department of Education should provide guidelines for states to include in their state plans such policies and procedures, which relate to the establishment and maintenance of standards, to ensure that professionals in special programs for students who are deaf are adequately prepared and trained.

XIII. Educational Interpreters

Discussion: Communication in the classroom is crucial not only to the educational process, but also to student participation in the classroom. Utilizing interpreting services is one way of providing communication for students who are deaf in classrooms with hearing peers. The classroom setting presents a challenge for educational interpreters because they must consider: The varying linguistic and cognitive developmental levels of the child; the differing sign/oral systems employed for interpreting; the appropriateness of performing other duties; and the need to work cooperatively with regular classroom teachers, administrators, and other support personnel.

The Registry of Interpreters for the Deaf (RID), the national certifying organization for interpreters, has established guidelines for the professional interpreter's role and functions but has not established special provisions for educational interpreters. In 1985, the National Task Force on Educational Interpreting (NTFEI) was formed to "examine and clarify roles and responsibilities, training and certification, working conditions, and other needs concerning educational interpreters and their services to mainstreamed deaf students at all educational levels." NTFEI is also seeking to establish standards for educational interpreters and to promote "equitable salary ranges as determined by skill level required and advanced training expectations."

Although NTID's 1986 Interpreter Training Programs resource guide lists 48 interpreter training programs in 30 states, none are specifically designed for educational interpreters. Interpreters, themselves, recognize that they do not receive adequate training in such subjects as child and language development, cognitive processing, the various sign/oral systems, and educational settings that require special knowledge and expertise. Serious concern has been expressed about the lack of understanding of the interpreter's role by deaf students, classroom teachers, parents, administrators, and interpreters themselves. Another serious concern is that states and local educational agencies have not treated interpreters as "professionals," in terms of status and salaries.

Draft Recommendation 17: The Department of Education, in consultation with consumers, professionals, and organizations, should provide guidelines for states to include in their state plans such policies and procedures, which relate to the establishment and maintenance of standards, to ensure that interpreters in educational settings are adequately prepared and trained.

This recommendation is intended to include interpreter standards in the personnel standards as required by section 613(a)(14) of the EHA Amendments of 1986. The Commission proposes that ED should recognize interpreters as professionals and should continue working closely with RID, NTFEI, and other groups in developing and providing guidelines to states to establish and maintain standards for interpreters in educational settings. ED should especially define the appropriate role of interpreters in these settings. The Commission emphasizes that the term "educational interpreters" includes sign language, cued speech, oral, and deaf/blind interpreters.

Draft Recommendation 18: Federal funding should be provided to develop training programs, design curricula, and award stipends to recruit and train potential and working educational interpreters.

There are currently no interpreter training programs specifically designed for educational interpreters. Training programs should offer courses addressing special issues, such as: The various sign systems used in educational settings; oral and cued speech interpreting; manual communication with deaf/blind persons; the need for collaboration between teachers, administrators, and counselors; and the cognitive and language development processes of hearing and deaf children. Section 304 of the Rehabilitation Act currently provides an average of $18,000 per state for interpreter training programs. That amount is not enough to pay for even one qualified instructor let alone pay for additional faculty, curriculum development, and support services that would be needed for a quality training program.[31]

Part D of the EHA allocates monies to promote staff development of special education personnel. These monies could be used to provide stipends to potential and working interpreters who seek training in the field of educational interpreting.

Draft Recommendation 19: Congress should fund section 315 of the Rehabilitation Act. The Department of Education should establish standards for interpreters in the field of rehabilitation.

Section 315 of the Rehabilitation Act of 1973, as amended, authorizes the Commissioner of Rehabilitation Services to make grants to states for establishing interpreting services for individuals who are deaf.[32] Interpreters participating in the programs are required to meet minimum standards.[33] Section 315 has never been funded and consequently no interpreter standards have been established for the states by the Commissioner.

XIV. American Sign Language

Discussion: Researchers examining the linguistic characteristics of American Sign Language (ASL) have determined that it is a natural and complete language, comparable in complexity and expressiveness to other languages. ASL should not be confused with manually coded English sign systems (*e.g.*, Seeing Exact English, Seeing Essential English) which are not considered languages but which have become widely used in educational settings. Some educational institutions also recognize ASL as a distinct language and grant foreign/second language credit to students who master ASL.

Approximately 10 percent of deaf children have parents who are deaf and many of these children learn ASL as their native language and acquire English as a second language. Deaf children of hearing parents often choose to learn ASL later in life. Psycholinguists studying second language acquisition have found that language learning is

[30] *Id.*

[31] 29 U.S.C. 774.

[32] *Id.* at 777e(a).

[33] *Id.* at 777e(b)(5).

enhanced when both languages and cultures are viewed positively by the society in which the individual interacts and when there is complementarity, rather than competition, between linguistic systems.[34]

Draft Recommendation 20: The Commission on Education of the Deaf recognizes American Sign Language as a legitimate language.[35]

It is not the intent of the Commission that ASL be used as the primary method of English instruction for all students who are deaf; however, it should be emphasized that this recommendation recognizes ASL as a language in its own right and as an educational tool.

XV. The Role and Impact of Research, Development, and Evaluation Activities at Gallaudet University and the National Technical Institute for the Deaf

Discussion: The Commission examined several related questions concerning the role and impact of research, development, and evaluation activities conducted by GU (including KDES and MSSD) and NTID. The Commission emphasizes that it has not attempted to evaluate the quality of research at GU and NTID; however, it has considered how research, development, and evaluation priorities should be established, whether there has been adequate oversight to ensure cost-effectiveness and quality, and whether research, development, and evaluation projects should be funded through Congressional appropriations, competitive grants, or both.

Funding of Research, Development, and Evaluation Projects

Discussion: GU and NTID are authorized by law to conduct research, development, and evaluation. There is significant value in having extensive and high quality research, development, and evaluation programs at GU and NTID. The Commission commended the valuable contribution to the field made by the Annual Survey of Hearing Impaired Children and Youth and it expressed interest in exploring ways in which the Survey might provide important data about specific groups, such as the rural student pcpulace. However, it recognized that other research centers are also conducting a significant amount of research on deafness and deaf education. These centers would benefit from increased opportunities to compete for larger amounts of funding. Similarly, requiring GU and NTID to participate in more competition for funding could be expected to enhance the quality of GU's and NTID's research, development, and evaluation activities.

The Commission's recommendation is intended to encourage competition, innovation, and diversity in research and development projects on deafness. The Commission certainly does not recommend any reduction of funding for deafness-related research.

Draft Recommendation 21: Only a base level of Congressionally appropriated line-item funding should continue to be allocated to GU and NTID for research, development, and evaluation projects. Specifically, funding should be adequate to provide a robust research agenda which would include the Annual Survey of Hearing Impaired Children and Youth conducted by Gallaudet. An overall reduction in the current funding provided to these two institutions should be made and the remaining monies should then be set aside and used for competitive grants for deafness-related research. Any research center with adequate capacity in the field, including GU and NTID, could compete for the funds on a multi-year basis.[36]

The Commission welcomes comments on how to set the "base level" for GU and NTID: one-third, one-half, two-thirds, or some other proportion of what Congress now appropriates to them for research, development, and evaluation activities. The current appropriations for GU (including KDES and MSSD) and NTID total approximately $8 million for these activities.

XVI. Employment and Advancement of Persons Who Are Deaf at Federally Funded Postsecondary Education Institutions

Discussion: The Commission requested information regarding the employment of deaf persons at GU and NTID, and the employment of blacks and women at Howard University and Wellesley College, respectively. At GU, the overall employment rate for persons who are deaf is 22% (18% executive, 33% professional, 38% technical, 7% secretarial, 7% maintenance, and 6% service positions). At NTID, the overall employment rate is 12% (12% executive, 12% faculty, 15% professional, 20% technical, and 6% secretarial positions). At Howard University, a primarily black university in Washington, DC, the overall employment rate for black persons is 87% (91% administrative, 77% faculty, and 89% staff positions). At Wellesley College, a women's college near Boston, the overall employment rate is 74% for women (50% administrative, 83% faculty, and 91% staff positions).

The Commission recognizes that the pool of deaf applicants is not as extensive as the pool of female and black applicants; however, these federally-funded postsecondary institutions for the deaf should take initiatives to recruit, hire, and promote deaf persons similar to the initiatives taken by Howard and Wellesley. The Commission acknowledges the efforts made by GU and NTID and supports further efforts, by these institutions and others, to employ and advance persons who are deaf.

Draft Recommendation 22: GU, NTID, and the schools participating in the RPEPD should continue to strengthen the positive efforts they have already made in recruiting, hiring, and promoting qualified applicants and employees who are deaf.

Records of the comments received will be available for public inspection at the office of the Commission on Education of the Deaf, GSA Regional Office Building, Room 6646, 7th and D Streets SW., Washington, DC.

Pat Johanson,

Staff Director, Commission on Education of the Deaf.

[Federal Acquisition Circular 84-31]

Small Business Set-Asides; Federal Acquisition Regulation

AGENCIES: Department of Defense (DoD), General Services Administration (GSA), and National Aeronautics and Space Administration (NASA).

ACTION: Interim rule and request for comment.

SUMMARY: Federal Acquisition Circular (FAC) 84–31 amends the Federal Acquisition Regulation (FAR) to implement amendments made to sections 8 and 15 of the Small Business Act by section 921, Pub. L. 99–661. The revisions (i) adopt the statutory prohibition against award of set-aside and 8(a) contracts at a price exceeding fair market price; (ii) require that a fair proportion of Government contracts within each industrial category be awarded to small business concerns, and (iii) implement statutory restrictions concerning the extent of subcontracting permitted under set-aside and 8(a) contracts.

DATES: Effective Date: October 1, 1987.

The revisions made by this interim rule are effective October 1, 1987, except that the revisions made to FAR 19.508(e) and 52.219–14 are effective for those solicitations issued on or after October 1, 1987. Solicitations issued before October 1, 1987, should be amended to incorporate the clause at 52.219–14, unless to do so would unduly delay the contract action.

Comment Date: December 1, 1987.

Comments on the interim rule must be received on or before December 1, 1987, to be considered in the formulation of a final rule. Please cite FAC 84–31 in all correspondence related to this issue.

ADDRESS: Interested parties should submit written comments to: General Services Administration, FAR Secretariat (VRS), 18th & F Streets NW., Room 4041, Washington, DC 20405.

FOR FURTHER INFORMATION CONTACT: Ms. Margaret A. Willis, FAR Secretariat, Telephone (202) 523–4755.

SUPPLEMENTARY INFORMATION:

A. Paperwork Reduction Act

This interim rule does not contain information collection requirements within the meaning of the Paperwork Reduction Act of 1980, 44 U.S.C. 3501, et seq., and regulations prescribed by OMB at 5 CFR Part 1320. Accordingly, OMB approval of the interim rule is not required.

B. Regulatory Flexibility Act

The interim rule may have a significant economic impact upon a substantial number of small entities within the meaning of the Regulatory Flexibility Act of 1980, 5 U.S.C. 601, et seq., principally with respect to its implementation of statutory requirements placing limitations upon subcontracting (section 921(c)).

Pursuant to authority contained in section 608(a) of the Regulatory Flexibility Act (5 U.S.C. 608(a)), a determination has been made that circumstances require delay in preparation of an Initial Regulatory Flexibility Analysis in order to issue regulatory guidance in consonance with the October 1, 1987, effective date of section 921 of Pub. L. 99–661. This determination is based upon the pendency of regulatory implementation by the Small Business Administration (SBA), cited above, and legislation introduced to further amend sections 8 and 15 of the Small Business Act, as amended by section 921 (see 133 Cong. Rec. S 12888 (daily ed., Sept. 26, 1987)). It is anticipated that an Initial Regulatory Flexibility Analysis pertaining to FAC 84–31 will be prepared and submitted to the Chief Counsel for Advocacy of the SBA within 120 days. Comments are invited.

Comments from small entities concerning the affected FAR subparts will also be considered in accordance with section 610 of the Act. Such comments must be submitted separately and cite FAR Case 87–610 in correspondence.

C. Determination to Issue an Interim Rule

A determination has been made under authority of the Secretary of Defense (DoD), the Administrator of General Services (GSA), and the Administrator of the National Aeronautics and Space Administration (NASA) to issue the regulations in FAC 84–31 as an interim rule. This action is necessary to ensure that regulatory guidance is available to contracting officers to implement the statute upon its October 1, 1987, effective date. DoD, GSA, and NASA have determined that compelling reasons exist to promulgate an interim rule without prior opportunity for public comment. However, pursuant to Pub. L. 98–577 and FAR 1.301, public comments received in response to this interim rule will be considered in formulating a final rule.

Government procurement.

Dated: October 8, 1987.

Harry S. Rosinski,

Acting Director, Office of Federal Acquisition and Regulatory Policy.

Federal Acquisition Circular

[Number 84–31]

Unless otherwise specified, all Federal Acquisition Regulation (FAR) and other directive material contained in FAC 84–31 is effective October 1, 1987.

Eleanor R. Spector,

Deputy Assistant Secretary of Defense for Procurement.

Terence C. Golden,

Administrator.

October 7, 1987.

S.J. Evans,

Assistant Administrator for Procurement.

Federal Acquisition Circular (FAC) 84–31 amends the Federal Acquisition Regulation (FAR) as specified below:

Item I—Small Business Set-Asides; Implementation of Section 921 of the National Defense Authorization Act for Fiscal Year 1987 (Pub. L. 99–661)

Section 921 of the National Defense Authorization Act for Fiscal year 1987 (Pub. L. 99–661), entitled "Small Business Set-Asides," amended sections 8 and 15 of the Small Business Act (15 U.S.C. 637; 15 U.S.C. 644) in order to increase participation by small business and small disadvantaged business concerns in the Federal procurement process. Identical amendments to the Small Business Act were contained in the Department of Defense Appropriations Act, 1987 (Pub. L. 99–591). At a later date, technical corrections to the amendments were made by the Defense Technical Corrections Act of 1987 (Pub. L. 100–26). This interim rule revises certain sections of Federal Acquisition Regulation (FAR) Parts 14, 19 and 52 in order to conform FAR procurement procedures with the statutory amendments. Other provisions of section 921 which require rulemaking by the Small Business Administration (e.g., size determination program) are addressed in separate issuances by the Small Business Administration in the **Federal Register** on March 17, 1987 (52 FR 8261), and on August 31, 1987 (52 FR 32870), and, except as noted in paragraph 8 of this item, are beyond the scope of the present rulemaking.

The following summarizes the principal FAR revisions made by the interim rule and provides a parenthetical reference to the Section 921 requirement implemented by the revision:

1. FAR 19.001 is revised to add a definition of "fair market price," consistent with previous use of the term (see former FAR 19.806–1(a)) in order to give effect to the requirement that set-aside and 8(a) contracts not exceed fair market prices. (Sec. 921(b) (1) and (2)). FAR 19.806–1(a) is deleted as surplusage.

2. FAR 19.202–6 is added to provide additional guidance to contracting officers in determining fair market price in view of the statutory award price restriction. (Sec. 921(b) (1) and (2)).

3. FAR 19.501(j) is added as a further reference to the award price restriction (Sec. 921(b) (1) and (2)). The phrase "except as authorized by law" is added to accommodate certain statutory exceptions to the limitation (e.g., Sec. 1207, Pub. L. 99–661 permits payment of a 10 percent price differential in DOD contract awards to small disadvantaged businesses) (see 52 FR 16263; May 4, 1987).

4. FAR 19.501(k) is added to implement statutory direction concerning release of names and addresses of prospective offerors. (Sec. 921(e)).

5. FAR 19.502–1 is amended to reflect statutory guidance that separate industry categories are to be used in ensuring that a fair proportion of contract awards are made to small businesses. (Sec. 921(a)).

6. FAR 19.508(e) is added to prescribe a contract clause relating to the composition of a contractor's labor force, as a limitation upon subcontracting, for use under total and partial small business set-asides and 8(a) contracts. (Sec. 921(c)).

7. FAR 19.805(b) is added to reference the fair market price limitation concerning 8(a) contracts. (Sec. 921(b)(2)).

8. FAR 52.219–14, Limitations on Subcontracting, is added to provide a contract clause for use in set-aside and 8(a) contracts regarding the composition of a contractor's labor force. (Sec. 921(c)). The statute requires in service contracts (except construction) that at least 50 percent of a contractor's personnel costs be expended for employees of the concern. Similarly, in supply contracts (other than those involving regular dealers) 50 percent of the cost of manufacturing supplies, excluding materials, must be performed by the concern. With respect to construction contracts, the statute requires the Small Business Administration to establish similar requirements concerning general and specialty construction contracts. Pending completion of the public comment process (see 52 FR 8261; 52 FR 32870), the Small Business Administration has requested that the FAR Councils adopt the percentage limitations contained in the clause on an interim basis until a final rule is promulgated by the Small Business Administration.

Therefore, 48 CFR Parts 14, 19, and 52 are amended as set forth below:

1. The authority citation for Parts 14, 19, and 52 continues to read as follows:

Authority: 40 U.S.C. 486(c); 10 U.S.C. Chapter 137; and 42 U.S.C. 2473(c).

PART 14—SEALED BIDDING

14.205–5 [Amended]

2. Section 14.205–5 is amended in paragraph (a) by removing the period at the end of the sentence and adding a parenthetical cross reference "(see also 19.501(k))."

PART 19—SMALL BUSINESS AND SMALL DISADVANTAGED BUSINESS CONCERNS

3. Section 19.001 is amended by adding alphabetically a definition to read as follows:

19.001 Definitions.

* * * * *

"Fair market price," as used in this part, means a price based on reasonable costs under normal competitive conditions and not on lowest possible cost (see 19.202–6).

* * * * *

4. Section 19.202–6 is added to read as follows:

19.202–6 Determination of fair market price.

Agencies shall determine the fair market price of small business set-aside and 8(a) contracts as follows:

(a) For total and partial small business set-aside contracts the fair market price to be the price achieved in accordance with the reasonable price guidelines in 15.805–2.

(b) For 8(a) contracts, both with respect to meeting the requirement at 19.805(b) and in order to accurately estimate the current fair market price and business development expense, contracting officers shall follow the procedure at 19.806–2.

5. Section 19.501 is amended by adding paragraphs (j) and (k) to read as follows:

19.501 General.

* * * * *

(j) Except as authorized by law, a contract may not be awarded as a result of a set-aside if the cost to the awarding agency exceeds the fair market price.

(k) After a decision to set-aside a procurement for small business concerns, the contracting officer shall, within five (5) working days after receipt of a written request, provide the requestor with a list of the names and addresses of the small business concerns expected to respond to the solicitation. However, (1) the Secretary of Defense may decline to provide this information in order to protect national security, and (2) the contracting officer is not required to release information that is not required to be released under the Freedom of Information Act (5 U.S.C. 552).

6. Section 19.502–1 is amended by revising paragraph (c) to read as follows:

19.502–1 Requirements for setting aside acquisitions.

* * * (c) assuring that a fair proportion of Government contracts in each industry category is placed with small business concerns, and when the circumstances described in 19.502–2 or 19.502–3(a) exist.

19.508 [Amended]

7. Section 19.508 is amended by adding paragraph (e) to read as follows:

* * * * *

(e) The contracting officer shall insert the clause at 52.219–14, Limitations on Subcontracting, in solicitations and contracts for supplies, services, and construction, if any portion of the requirement is to be set aside for small business, or if the contract is to be awarded under Subpart 19.8

8. Section 19.805 is amended by redesignating the existing text as paragraph (a) and by adding paragraph (b) to read as follows:

19.805 Pricing the 8(a) contract.

* * * * *

(b) An 8(a) contract may not be awarded if the price of the contract results in a cost to the awarding agency which exceeds a fair market price.

19.806–1 [Amended]

9. Section 19.806–1 is amended by deleting paragraph (a) and redesignating the existing paragraphs (b) and (c) as paragraphs (a) and (b).

PART 52—SOLICITATION PROVISIONS AND CONTRACT CLAUSES

10. Section 52.219–14 is added to read as follows:

VOL
52
ISS
198
OC
14
1987
UMI

52.219-14 Limitations on Subcontracting.

As prescribed in 19. 508(e), insert the following clause:

Limitations on Subcontracting (October 1987)

By submission of an offer and execution of a contract, the Offeror/Contractor agrees that in performance of the contract in the case of a contract for—

(a) *Services (except construction).* At least 50 percent of the cost of contract performance incurred for personnel shall be expended for employees of the concern.

(b) *Supplies (other than procurement from a regular dealer in such supplies).* The concern shall perform work for at least 50 percent of the cost of manufacturing the supplies, not including the cost of materials.

(c) *General construction.* The concern will perform at least 15 percent of the cost of the contract, not including the cost of materials, with its own employees.

(d) *Construction by special trade contractors.* The concern will perform at least 25 percent of the cost of the contract, not including the cost of materials, with its own employees.

(End of clause)

34 CFR Part 778

Strengthening Research Library Resources Program; Proposed Rule and Notice Inviting Applications for New Awards

VOL
52
ISS
198
OC
14
1987
UMI

DEPARTMENT OF EDUCATION

34 CFR Part 778

Strengthening Research Library Resources Program

AGENCY: Department of Education.

ACTION: Notice of proposed rulemaking.

SUMMARY: The Secretary proposes to amend the regulations governing the Strengthening Research Library Resources Program. These amendments are needed to implement a program change legislated by Congress in the Higher Education Amendments of 1986. Additionally, the proposed regulations would change the point values assigned to various selection criteria.

DATES: Comments must be received on or before November 13, 1987.

ADDRESSES: All comments concerning these proposed regulations should be addressed to Frank Stevens or Louise Sutherland, U.S. Department of Education, Office of Educational Research and Improvement, Library Programs, 555 New Jersey Avenue, NW., Washington, DC 20208–1430.

A copy of any comments that concern information collection requirements should also be sent to the Office of Management and Budget at the address listed in the Paperwork Reduction Act section of this preamble.

FOR FURTHER INFORMATION CONTACT: Frank Stevens or Louise Sutherland, (202) 357–6315.

SUPPLEMENTARY INFORMATION: This proposed rulemaking is primarily designed to implement a change in program operations required by the Higher Education Amendments of 1986. Prior to these amendments, only an organization that qualified as a major research library under criteria developed by the Secretary in the existing program regulations (34 CFR 778.31) was eligible to compete for a grant. These criteria, which would remain unaffected by the proposed regulations, generally favored organizations with considerable library holdings, as required under the then applicable legislation. An organization with smaller holdings, despite the significance of its library collections to scholars and researchers, could not generally qualify as a major research library.

In the Higher Education Amendments of 1986, Congress enacted a program change directing that the Secretary permit organizations otherwise found ineligible as a major research library under the Secretary's criteria to compete for a grant if additional information provided by the organization demonstrates "the national or international significance for scholarly research of the particular collection described in the grant proposal." The proposed regulations would implement this directive.

Aside from this legislative requirement, the Secretary is also proposing changes in the numerical values associated with certain criteria used to score applications for grants. These changes were recommended by the peer reviewers that the Secretary uses to evaluate applications for grants. The proposed changes are intended to ensure better competition among applicants for grants by increasing the numerical value associated with a project's significance to scholarly research.

Finally, the existing regulations would be revised to conform with the Department's current requirements regarding the style and format of regulatory documents.

Executive Order 12291

These regulations have been reviewed in accordance with Executive Order 12291. They are not classified as major because they do not meet the criteria for major regulations established in the order.

Regulatory Flexibility Act Certification

The Secretary certifies that these proposed regulations would not have a significant economic impact on a substantial number of small entities.

Because these regulations would affect institutions of higher education and public and private non-profit organizations the regulations would not have an impact on small entities. These potential grantees are not defined as "small entities" in the Regulatory Flexibility Act.

Paperwork Reduction Act of 1980

Sections 778.21 and 778.22 contain information collection requirements. As required by section 3504(h) of the Paperwork Reduction Act of 1980, the Department of Education will submit a copy of these proposed regulations to the Office of Management and Budget (OMB) for its review. Organizations and individuals desiring to submit comments on the information collection requirements should direct them to the Office of Information and Regulatory Affiars, OMB, Room 3002, New Executive Office Building, Washington, DC 20503; Attention: James D. Houser.

Intergovernmental Review

This program is subject to the requirements of Executive Order 12372 and the regulations in 34 CFR Part 79. The objective of the Executive Order is to foster an intergovernmental partnership and a strengthened federalism by relying on processes developed by State and local governments for coordination and review of proposed Federal financial assistance.

In accordance with the order, this document is intended to provide early notification of the Department's specific plans and actions for this program.

Invitation To Comment

Interested persons are invited to submit comments and recommendations regarding these proposed regulations. The Secretary specifically invites comments on proposed § 778.22(a), a selection criterion relating to the sufficiency of an applicant's description of its project, and whether the point value ascribed to that section should be diminished by the Secretary.

All comments submitted in response to these proposed regulations will be available for public inspection, during and after the comment period, in Room 402D, 555 New Jersey Avenue, NW., Washington, DC, between the hours of 8:30 a.m. and 4:00 p.m., Monday through Friday of each week except Federal holidays.

To assist the Department in complying with the specific requirements of Executive Order 12291 and the Paperwork Reduction Act of 1980 and their overall requirement of reducing regulatory burden, the Secretary also invites comment on whether there may be further opportunities to reduce any regulatory burdens found in these proposed regulations.

Assessment of Education Impact

The Secretary particularly requests comments on whether the regulations in this document would require transmission of information that is being gathered by or is available from any other agency or authority of the United States.

Dated: September 15, 1987.

William J. Bennett,

Secretary of Education.

(Catalog of Federal Domestic Assistance Number 84.091, Strengthening Research Library Resources Program)

The Secretary proposes to revise Part 778 of Title 34 of the Code of Federal Regulations to read as follows:

PART 778—STRENGTHENING RESEARCH LIBRARY RESOURCES

Subpart A—General

Sec.

778.1 What is the Strengthening Research Library Resources Program?
778.2 Who is eligible for an award?
778.3 What restrictions on eligibility apply?
778.4 What activities may the Secretary fund?
778.5 What priorities may the Secretary establish?
778.6 What regulations apply?
778.7 What definitions apply?

Subpart B—[Reserved]

Subpart C—How Does the Secretary Make an Award?

778.20 How does the Secretary evaluate an application?
778.21 What criteria does the Secretary use to evaluate an applicant as a major research library?
778.22 What criteria does the Secretary use to evaluate the quality of a project?
778.23 What additional factors does the Secretary consider?

Subpart D—What Conditions Must Be Met After an Award?

778.30 What agencies must be informed of activities funded by this program?

Authority: 20 U.S.C. 1021, 1041, 1042, unless otherwise noted.

Subpart A—General

§ 778.1 What is the Strengthening Research Library Resources Program?

The Secretary awards grants under the Strengthening Research Library Resources Program for the purpose of promoting research and education of high quality throughout the United States by providing financial assistance to help the Nation's major research libraries—

(a) Maintain and strengthen their collections; and

(b) Make their holdings available to other libraries whose users have need for research materials.

(Authority: 20 U.S.C. 1021, 1041)

§ 778.2 Who is eligible for an award?

(a) The Secretary awards grants under this program to institutions with major research libraries.

(b) An institution with a major research library is defined as a public or private nonprofit institution, an institution of higher education (including a branch campus), an independent research library, a State or other public library, or a consortium of the above entities, having a library collection available to qualified users that—

(1) Makes a significant contribution to higher education and research;

(2) Is broadly based;

(3) Is recognized as having national or international significance for scholarly research;

(4) Is of a unique nature, containing material not widely available; and

(5) Is in substantial demand by researchers and scholars outside the institution.

(c) The Secretary evaluates an applicant's status as a major research library on the basis of the criteria in §§ 778.20 and 778.21. If the Secretary determines that an applicant meets the criteria of a major research library, the determination is effective for each of the four succeeding fiscal year.

(d) An institution that does not meet the criteria for a major research library in §§ 778.20 and 778.21 may still be eligible to receive a grant, if it demonstrates that the library collection proposed for grant assistance is of national or international significance for scholarly research.

(e) If an applicant is a consortium or a branch campus of an institution of higher education, the library collection of the consortium or the branch campus—rather than the separate library collections of each unit comprising the consortium or the institution of higher education—must satisfy the conditions of paragraphs (b) and (c) of this section.

(Authority: 20 U.S.C. 1021, 1041, 3474)

§ 778.3 What restrictions on eligibility apply?

The Secretary does not award a grant to an applicant otherwise eligible under this program if the applicant—

(a) Receives a grant under section 211 of the Act (College Library Resources Program) during the same fiscal year that it applies for a grant under this part; or

(b) Is eligible to receive a grant under other Federal programs, such as the Medical Library Assistance Act of 1965, for the project it proposes to receive assistance under this part, unless the applicant shows that—

(1) Payments under this part will not duplicate payments under those other Federal programs; and

(2) Special circumstances warrant assistance under this part.

(Authority: 20 U.S.C. 1021, 1041, 3474)

§ 778.4 What activities may the Secretary fund?

Funds provided under this part may be used for one or both of the purposes in § 778.1. Authorized activities include, but are not limited to, the following:

(a) Acquiring books and other materials to be used for library purposes.

(b) Binding, rebinding, and repairing books and other materials to be used for library purposes, and preserving these materials by making photocopies, treating paper or bindings to lengthen their life, or other means.

(c) Cataloging, abstracting, and making available lists and guides of the library collection.

(d) Distributing library materials and bibliographic information to users beyond the primary clientele by mail, or by electronic, photographic, magnetic, optical, or other means.

(e) Acquiring additional equipment and supplies that assist in making library materials available to users beyond the primary clientele.

(f) Hiring necessary additional staff to carry out activities funded under this part.

(g) Communicating with other institutions.

(h) Performing evaluations.

(i) Disseminating information.

(Authority: 20 U.S.C. 1021)

§ 778.5 What priorities may the Secretary establish?

The Secretary may give priority to applications proposing one or more of the following activities:

(a) Adapting, converting, or creating library records for unique research materials which expand or otherwise complement the national bibliographic data base and which conform to highest national standards.

(b) Augmenting unique collections of specialized research materials.

(c) Preserving or maintaining unique research materials in danger of deterioration.

(d) Promoting the sharing of library resources.

(Authority: 20 U.S.C. 1021)

§ 778.6 What regulations apply?

The following regulations apply to the Strengthening Research Library Resources Program:

(a) The Education Department General Administrative Regulations (EDGAR) in 34 CFR Part 74 (Administration of Grants), Part 75 (Direct Grant Programs), Part 77 (Definitions That Apply to Department Regulations), Part 78 (Education Appeal Board), and Part 79 (Intergovernmental Review of Department of Education Programs and Activities).

(b) The regulations in this Part 778.

(Authority: 20 U.S.C. 1021)

VOL
52
ISS
198
OC
14
1987
UMI

§ 778.7 What definitions apply?

(a) *Definitions in EDGAR.* The following terms used in this part are defined in 34 CFR 77.1:

Acquisition	Nonprofit
Applicant	Private
Application	Project
Department	Public
EDGAR	Secretary
Fiscal year	State
Grant	

(b) *Other definitions.* The following definitions also apply to this part:

"Act" means the Higher Education Act of 1965, as amended.

"Branch campus" means a permanent campus of an institution of higher education located in a community of the United States different from that of the parent institution, not within a reasonable commuting distance from the main campus, that is separately accredited, and that provides—through its own budgetary and hiring authority, and faculty and administrative staff—postsecondary educational programs for which library facilities, services, and materials are necessary.

"Consortium" means a nonprofit organization of library institutions established or operated for the purpose of sharing library resources, coordinating collection development, or engaging in similar cooperative activities.

"Institution of higher education" means a public or private nonprofit institution of higher education as defined in 34 CFR 668.2.

"Primary clientele" means students, faculty, or other registered users of the library of the applicant or grantee.

"State agency" means the State agency designated under section 1203 of the Act.

(Authority: 20 U.S.C. 1021)

Subpart B—[Reserved]

Subpart C—How Does the Secretary Make an Award?

§ 778.20 How does the Secretary evaluate an application?

(a) In evaluating applications for new grants, the Secretary uses two sets of criteria.

(b) (1) The Secretary determines an applicant's status as a major research library on the basis of the criteria in § 778.21. An applicant that receives a score of 65 points or more under the criteria in § 778.21 is determined to be a major research library and qualifies to have its project evaluated for an award.

(2) The Secretary notifies an applicant that does not receive a score of 65 points or more under the criteria in § 778.21 that the application will still be considered for funding if additional information or documents are provided to demonstrate the national or international significance for scholarly research of the particular collection described in the grant application.

(c) The Secretary evaluates the quality of the applications from applicants that qualify under paragraphs (b)(1) and (b)(2) of this section, using the criteria in § 778.22.

(Authority: 20 U.S.C. 1021, 3474)

§ 778.21 What criteria does the Secretary use to evaluate an applicant as a major research library?

The Secretary uses the criteria in this section to evaluate an applicant's status as a major research library. The maximum score is 100 points. The Secretary reviews each application to determine the extent to which the applicant's library collection—

(a) Makes a significant contribution to higher education and research as measured by factors such as—(20 points)

(1) The major research projects for which the library has made resources available in the past fiscal year;

(2) The amount the applicant expended in research funds from all sources and the number of projects conducted by the institution with these funds in the past fiscal year; and

(3) Evidence that the institution is established and recognized in the field of advanced research and scholarship;

(b) Is broadly based as measured by factors such as—(20 points)

(1) The number of subject areas covered or the comprehensiveness of special collections;

(2) The number of volumes and titles, manuscripts, microforms, and other types of materials;

(3) The number of volumes and titles and other materials added to the collection in the previous fiscal year; and

(4) The number of current periodical subscriptions;

(c) Is recognized as having national or international significance for scholarly research as measured by factors such as—(20 points)

(1) The number or percentage of interlibrary loans made or copies of materials provided by the applicant during the past year to libraries outside the geographical region in which the applicant is located;

(2) The number of percentage of interlibrary loans made or copies provided during the past year to libraries located outside the United States; and

(3) The extent to which loans of the applicant's materials described in paragraphs (c)(1) and (c)(2) of this section are made under formal, cooperative arrangements;

(d) Is of a unique nature, and contains material not widely available, as measured by factors such as—(20 points)

(1) The number and nature of special collections containing research materials not widely available;

(2) The availability of printed, computerized, or otherwise published catalogs or other guides to the special collections; and

(3) Evidence which demonstrates possession of uncommon library resources necessary to support advanced research and scholarship; and

(e) Is in substantial demand by researchers and scholars not connected with the applicant institution as measured by factors such as—(20 points)

(1) The number or percentage of loan requests coming from users outside the applicant's primary clientele;

(2) The extent to which the applicant lends more on interlibrary loan than it borrows;

(3) The number or percentage of researchers and scholars outside the applicant's primary clientele who use its collection;

(4) The number of institutions with which the applicant has formal cooperative agreements to provide library and information services for researchers and scholars outside the applicant's primary clientele; and

(5) Membership is a major computer-based bibliographic database.

(Authority: 20 U.S.C. 1021, 1041)

§ 778.22 What criteria does the Secretary use to evaluate the quality of a project?

The Secretary uses the following criteria to evaluate the quality of the proposed project. The maximum score is 100 points.

(a) *Description of the project.* (10 points) The Secretary reviews each application to determine the extent to which—

(1) The purpose of the project is clearly stated;

(2) There is a concise description of the project; and

(3) There is a clear statement of the project objectives.

(b) *Significance of the project.* (45 points) The Secretary reviews each application to determine the importance of the project for scholarly research and inquiry by assessing—

(1) The uniqueness of the project;

(2) The size of the audience the project is intended to serve;

(3) The need for the project;

(4) The extent to which the project will increase the availability of the applicant's research collections;

(5) The extent to which the proposed project will help the applicant maintain and strengthen its collections, particularly collections which have national or international significance for scholarly research; and

(6) The extent to which the applicant intends to disseminate the project accomplishments to the scholarly and professional communities.

(7) The extent to which there will be significant project accomplishments as a result of cooperative undertaking when a joint application is submitted by two or more institutions.

(c) *Plan of operation.* (20 points) The Secretary reviews each application to determine the quality of the plan of operation for the project, including—

(1) The design of the project;

(2) The extent to which the plan of management is effective and ensures proper and efficient administration of the project;

(3) How well the objectives of the project relate to the purpose of the program; and

(4) The quality of the applicant's plans to use its resources and personnel to achieve each objective.

(d) *Quality of key personnel.* (7 points)

(1) The Secretary reviews each application to determine the quality of key personnel the applicant plans to use on the project, including—

(i) The qualifications of the project director, if one is to be used;

(ii) The qualifications of each of the other key personnel to be used in the project; and

(iii) The time that these key personnel will commit to the project.

(2) To determine the qualifications of these key personnel, the Secretary considers—

(i) Experience, training, and professional productivity in fields related to the objectives of the project; and

(ii) Any other qualifications that pertain to the quality of the project.

(e) *Budget and cost-effectiveness.* (5 points) The Secretary reviews each application to determine the extent to which—

(1) The budget is adequate to support the project; and

(2) Costs are reasonable in relation to the objectives of the project.

(f) *Evaluation plan.* (5 points) The Secretary reviews each application to determine the quality of the evaluation plan for the project, including the extent to which the applicant's methods of evaluation are—

(1) Appropriate to the project;

(2) Objective; and

(3) Produce data that are quantifiable.

Cross-reference. See 34 CFR 75.590 Evaluation by the grantee.

(g) *Adequacy of resources.* (3 points) The Secretary reviews each application to determine the adequacy of the resources the applicant plans to devote to the project, including facilities, equipment, and supplies.

(h) *Institutional commitment.* (5 points) The Secretary reviews each application to determine the extent of the applicant's commitment to the project, its capability to continue the project, and the likelihood that it will build upon the project when Federal assistance ends.

(Authority: 20 U.S.C. 1021, 1041)

§ 778.23 What additional factors does the Secretary consider?

(a) After evaluating the applications according to the criteria in § 778.22, the Secretary determines whether the most highly rated projects are broadly and equitably distributed throughout the Nation.

(b) The Secretary may select other applications for funding if doing so would improve the geographical distribution of—

(1) Projects funded under this competition; or

(2) Projects funded under this program during the preceding five fiscal years.

(c) In determining whether to select other applications under paragraph (b) of this section, the Secretary considers the impact of that determination on the needs of the research community.

(Authority: 20 U.S.C. 1042)

Subpart D—What Conditions Must Be Met After an Award?

§ 778.30 What agencies must be informed of activities funded under this program?

Each institution of higher education which receives a grant under this part shall annually inform the State agency designated under section 1203 of the Higher Education Act, as amended, of its activities under this part.

(Authority: 20 U.S.C. 1022)

DEPARTMENT OF EDUCATION

[CFDA No. 84.091]

Invitation of Applications for New Awards Under the Strengthening Research Library Resources Program for Fiscal Year 1988

Purpose: Provides grants to the nation's major research libraries to maintain and strengthen their collections and make their holdings available to other libraries whose users have need for research materials.

Deadline for Transmittal of Applications: December 21, 1987, except for institutions having established significance as a major research library in fiscal year 1984 or later, who may submit applications until January 4, 1988.

Deadline for Intergovernmental Review Comments: March 11, 1988.

Applications Available: October 28, 1987

Available Funds: The Administration's budget request for fiscal year 1988 does not include funds for this program. However, applications are being invited to allow sufficient time to evaluate applications and complete the grant process before the end of the fiscal year, should the Congress appropriate funds for this program.

Estimated Average Range of Awards: $35,000–$350,000.

Estimated Average Size of Awards: $150,000.

Estimated Number of Awards: 30.

Project Period: 15 months.

Applicable Regulations: (a) Regulations governing the Strengthening Research Library Resources Program as proposed to be codified in 34 CFR Part 778. Applications are being accepted based on the notice of proposed rulemaking which is published in this issue of the **Federal Register**. If any substantive changes are made in the final regulations for this program, applicants will be given the opportunity to revise or resubmit their applications.

(b) The Education Department General Administrative Regulations, 34 CFR Parts 74, 75, 77, 78, and 79.

For Applications or Information Contact: Frank A. Stevens or Louise Sutherland, U.S. Department of Education, Office of Educational Research and Improvement, Library Programs, 555 New Jersey Avenue, NW., Room 402M, Washington, DC 20208–1430. Telephone: (202) 357–6315.

Program Authority: 20 U.S.C. 1021 *et seq.*

Dated: September 14, 1987.

Chester E. Finn, Jr.,

Assistant Secretary of Educational Research and Improvement.

Environmental Protection Agency

21 CFR Part 193
40 CFR Part 180

Carbon Disulfide, Ethylene Dichloride, Chloroform, and Carbon Tetrachloride; Pesticide Tolerance and Food Additive Provisions; Proposed Rules

VOL 52 ISS 198 OCT 14 1987 UMI

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 180

[OPP-300155; FRL-3276-6]

Carbon Disulfide, Ethylene Dichloride, and Chloroform; Proposed Revocation of Exemptions From Requirement of Tolerance

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed rule.

SUMMARY: This document proposes to amend 40 CFR Part 180 by removing regulations to exempt from the requirement of a tolerance the pesticide chemicals carbon disulfide, (§ 180.1004), ethylene dichloride (§ 180.1007), and chloroform (§ 180.1009). This Agency-initiated regulatory action will remove the exemptions for which related pesticide uses have been cancelled. Elsewhere in this issue of the **Federal Register**, EPA is also proposing revocation of the food additive regulations for carbon disulfide and ethylene dichloride as fumigants when used on grain-mill machinery and grains for fermented malt beverage production.

DATE: Written comments, identified by the document control number [OPP-300155], should be received on or before December 14, 1987.

ADDRESS: By mail, submit comments to:
Information Services Section, Program Management and Support Division (TS-767C), Office of Pesticide Programs, Environmental Protection Agency, 401 M Street, SW., Washington, DC 20460.
In person, deliver comments to: Rm. 236, CM #2, 1921 Jefferson Davis Highway, Arlington, VA.

Information submitted as a comment concerning this notice may be claimed confidential by marking all or part of that information as "Confidential Business Information" (CBI). Information so marked will not be disclosed except in accordance with procedure set forth in 40 CFR Part 2. A copy of the comment that does not contain CBI must be submitted for inclusion in the public record. Information not marked confidential may be disclosed publicly by EPA without prior notice. All written comments will be available for public inspection in Rm. 236 at the address given above, from 8 a.m. to 4 p.m., Monday through Friday, except legal holidays.

FOR FURTHER INFORMATION CONTACT:
Mark T. Boodee, Registration Division (TS-767C), Environmental Protection Agency, 401 M Street, SW., Washington, DC. 20460
Office location and telephone number: Rm. 1014, CM #2, 1921 Jefferson Davis Highway, Arlington, VA, (703-557-7400).

SUPPLEMENTARY INFORMATION: The residues resulting from use of carbon disulfide (also named carbon bisulfide), ethylene dichloride, and chloroform as fumigants after harvest are currently exempted from the requirement of a tolerance for the following grains: Barley, corn, oats, popcorn, rice, rye, sorghum (milo), and wheat. These exemptions were granted in 1956 based on available toxicology studies and the conclusion that the 5 to 10 parts per million (ppm) levels of these pesticide residues which resulted in the ready-to-eat grain products did not have any toxicological significance. These residue levels were determined by the less sophisticated analytical methodology available at the time which was not capable of detecting carbon disulfide, ethylene dichloride, and chloroform per se. Currently available analytical methods are now capable of detecting these fumigants per se down to a limit of detection of 1 part per billion (ppb).

On September 28, 1983, the Administrator issued a notice published in the **Federal Register** of October 11, 1983 (48 FR 46234), of intent to cancel registrations of the grain fumigant ethylene dibromide (EDB) for use as a fumigant on harvested grains and grain and flour-milling equipment. Many EDB grain fumigant products, now cancelled, also contained one or more of several other active ingredients registered for use as grain fumigants. One of these chemicals, chloroform, was only used in formulations that also contained EDB and registrations containing this chemical were canceled together with other EDB registrations.

On taking action to eliminate the use of EDB on grains, EPA began a comprehensive review of EDB substitutes to ensure that continued and, in some cases, expanded use of these chemicals would not present unreasonable risks from either occupational or dietary exposure. Because significant data were lacking in key areas for two grain fumigant active ingredients, carbon disulfide and ethylene dichloride, EPA required submission of product chemistry data, analytical methodologies, residue studies, chronic feeding studies, oncogenicity studies, teratogenicity studies, and reproductive studies through its Data Call-In program. Data Call-In notices were mailed to the registrants of these two pesticides on March 16, 1984. None of the registrants agreed to supply the data required for continued registration. Subsequently, all registrations of grain fumigants containing carbon disulfide and ethylene dichloride were either suspended under section 3(c)(2)(B) of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) for failure to submit the required data or were voluntarily canceled by the registrants.

All suspended registrations have now been canceled. A list of all grain fumigant products containing carbon disulfide, ethylene dichloride, and chloroform that have been cancelled was published in the **Federal Register** of October 23, 1985 (50 FR 42997), and the notice of December 31, 1986 (51 FR 47305).

EPA now proposes to revoke the exemptions from the requirement of a tolerance for carbon disulfide (§ 180.1004), ethylene dichloride (§ 180.1007), and chloroform (§ 180.1009), for residues on barley, corn, oats, popcorn, rice, rye, sorghum (milo), and wheat resulting from use of these pesticides as fumigants for grain stored in bulk, because the registrations of all products containing these chemicals have been canceled.

The limited data available to the Agency indicate that carbon disulfide, ethylene dichloride, and chloroform are not particularly persistent in the environment. EPA does not expect significant residues resulting from the last allowable treatment of grain stocks, on or before June 30, 1986. Consequently, the Agency anticipates no need to establish action levels for unavoidable residues of these fumigants in or on grain to replace the established tolerance exemptions upon their revocation.

However, small amounts of residue may occasionally remain in grain and grain-based consumer products due to legal application of grain fumigants to grain stocks on or before June 30, 1986. It is doubtful that the presence of low levels of residues of these grain fumigants for this short-term period would pose a risk to the public health. The Agency has recommended to the Food and Drug Administration (FDA) that enforcement action not be taken if residues are detected in grain or grain-based consumer products after the exemptions are removed if such residues were incurred as a result of legal application of the fumigants on or before June 30, 1986. FDA has agreed to this approach.

Elswhere in this issue of the **Federal Register**, a related proposed regulatory action, [OPP-300156], revoking food

additive regulations for carbon disulfide and ethylene dichloride, is also pulished.

Any person who has registered or submitted an application for the registration of a pesticide under the Federal Insecticide, Fungicide, and Rodenticide Act, as amended, which contains any of these chemicals may request within 30 days after publication of this notice in the **Federal Register** that this proposal to revoke the exemptions from the requirement of a tolerance for these chemicals be referred to an advisory committee in accordance with section 408(e) of the Federal Food, Drug, and Cosmetic Act.

Interested persons are invited to submit written comments on this proposed revocation of the exemptions from the requirement of a tolerance for these chemicals. Comments should bear the notation indicating the document control number [OPP–300155]. Three copies of the comments should be submitted to facilitate the work of the Agency and of others interested in reviewing the comments. All written comments filed pursuant to this notice will be available for public inspection in the Program Management and Support Division at the above address between 8:00 a.m. to 4:00 p.m., Monday through Friday, except legal holidays.

In order to satisfy requirements for analysis as specified by Executive Order 12291 and the Regulatory Flexibility Act, the Agency has analyzed the costs and benefits of the revocation of the exemptions from tolerances for these chemicals. Documents containing these analyses are available in the Information Services Section at the address identified elsewhere in this notice.

Executive Order 12291

Under Executive Order 12291, the Agency must determine whether a proposed regulatory action is "Major" and therefore subject to the requirements of a Regulatory Impact Analysis. The Agency has determined that this proposed regulatory action is not a major regulatory action, i.e., it will not have an annual effect on the economy of at least $100 million, will not cause a major increase in prices, and will not have a significant adverse effect on competition or the ability of U.S. enterprises to compete with foreign enterprises.

This proposed rule has been reviewed by the Office of Management and Budget as required by section 3 of Executive Order 12291.

Regulatory Flexibility Act

This proposed rule has been reviewed under the Regulatory Flexibility Act of 1980 (Pub. L. 96–354 94 Stat. 1165, 5 U.S.C. 60 *et seq.*) and it has been determined that it will not have a significant economic impact on a substantial number of small businesses, small governments, or small organizations.

The revocation of exemptions from tolerances would potentially affect firms in the grain-milling and bakery products industries as well as grain farmers. Products found to contain carbon disulfide, ethylene dichloride, or chloroform may be subject to enforcement action. However, since FDA has agreed not to take enforcement unless residue levels are at a level of public health concern or residues resulted from treatment after June 30, 1986, it is anticipated that little or no economic impact would occur.

Accordingly, I certify that this regulatory action does not require a separate regulatory flexibility analysis under the Regulatory Flexibility Act.

List of Subjects in 40 CFR Part 180

Administrative practice and procedure, Agricultural commodities, Pesticides and pests, Reporting and recordkeeping requirements.

Dated: September 28, 1987.

J.A. Moore,

Assistant Administrator for Pesticides and Toxic Substances.

Therefore, it is proposed that 40 CFR Part 180 be amended as follows:

PART 180—[AMENDED]

1. The authority citation for Part 180 continues to read as follows:

Authority: 21 U.S.C. 346a.

§ 180.1004 [Removed]

2. By removing § 180.1004.

§ 180.1007 [Removed]

3. By removing § 180.1007.

§ 180.1009 [Removed]

4. By removing § 180.1009.

21 CFR Part 193

[OPP–300156; FRL–3276–7]

Carbon Disulfide and Ethylene Dichloride; Proposed Revocation of Food Additive Regulations

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed rule.

SUMMARY: This document proposes to amend 21 CFR Part 193 by removing the food additive for carbon disulfide and ethylene dichloride for fumigation of (1) grain-mill machinery (§ 193.225) and (2) processed grains used in the production of fermented malt beverages, when used in various mixtures (§ 193.230). This Agency-initiated regulatory action removes food additive regulations for which related pesticide uses have been cancelled. Elsewhere in this issue of the **Federal Register**, DEPA is also proposing revocation of the exemptions from the requirement of a tolerance for carbon disulfide, ethylene dichloride, and chloroform as post-harvest fumigants on various grains.

DATE: Written comments, identified by the document control number [OPP–300156], should be received on or before December 14, 1987.

ADDRESS: By mail, submit comments to:

Information Services Section, Program Management and Support Division (TS–757C), Office of Pesticide Programs, Environmental Protection Agency, 401 M St., SW., Washington, DC 20460.

In person, deliver comments to: Rm. 236, CM #2, 1921 Jefferson Davis Highway, Arlington, VA.

Information submitted as a comment concerning this notice may be claimed confidential by marking any part or all of that information as "Confidential Business Information" (CBI). Information so marked will not be disclosed except in accordance with procedures set forth in 40 CFR Part 2. A copy of the comment that does not contain CBI must be submitted for inclusion in the public record. Information not marked confidential may be disclosed publicly by EPA without prior notice. All written comments will be available for public inspection in Rm. 236 at the address given above, from 8 a.m. to 4 p.m., Monday through Friday, except legal holidays.

Mark T. Boodee, Registration Division (TS–767C), Environmental Protection Agency, 401 M St., SW., Washington, DC 20460.

Office location and telephone number: Rm. 1014, CM #2, 1921 Jefferson Davis Highway, Arlington, VA, (703–557–7400)

SUPPLEMENTARY INFORMATION: Section 193.225(a) of 21 CFR currently provides that fumigants may be safely used in or on grain-mill machinery with the following prescribed conditions, among others:

VOL
52
ISS
198
OC
14
1987
UMI

The fumigants consist of one or more of the following: Carbon disulfide, carbon tetrachloride, ethylene dichloride, methyl bromide.

Section 193.230(a)(1) of 21 CFR provides that fumigants for processed grains used in production of fermented malt beverages may be safely used in accordance with the following conditions, among others:

They consist of one of the following mixtures: Carbon tetrachloride with either carbon disulfide or ethylene dichloride, with or without pentane.

On September 28, 1983, the Administrator issued a notice, published in the **Federal Register** of October 11, 1983 (48 FR 46234), of intent to cancel registrations of the grain fumigant ethylene dibromide (EDB) for use as a fumigant on harvested grains and grain and flour-milling equipment. Many of these cancelled EDB grain fumigant products also contained one or more of several other active ingredients registered for use as grain fumigants, including carbon disulfide and ethylene dichloride.

On taking action to eliminate the use of EDB on grains, EPA began a comprehensive review of EDB substitutes to ensure that continued and, in some cases, expanded use of these chemicals would not present unreasonable risks from either occupational or dietary exposure. Because data were lacking in key areas for the grain fumigants carbon disulfide and ethylene dichloride, EPA required submission of product chemistry data, analytical methodologies, residue studies, chronic feeding studies, oncogenicity studies, teratogenicity studies, and reproductive studies through its Data Call-In program. Data Call-In notices were sent to the registrants of these two pesticides on March 16, 1984. None of the registrants agreed to supply the data required for continued registration. Subsequently, all registrants of grain fumigants containing carbon disulfide and/or ethylene dichloride were either suspended under section 3(c)(2)(B) of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) for failure to submit the required data or were voluntarily cancelled by the registrants.

All suspended registrations have now been cancelled. A list of all grain fumigant products containing carbon disulfide and ethylene dichloride that have been cancelled was published in the **Federal Register** of October 23, 1985 (50 FR 42997), and the notice of December 31, 1986 (51 FR 47305).

The limited data available to the Agency indicate that carbon disulfide and ethylene dichloride are not particularly persistent. EPA does not anticipate significant residues resulting from the last allowable treatment of grain stocks, on or before June 30, 1986. Consequently, the Agency anticipates no need to establish action levels to replace the established tolerance exemptions upon their revocation.

Elsewhere in this issue of the **Federal Register**, EPA has issued a related document [OPP–300155] which proposes the revocation of exemptions from the requirement of a tolerance in 40 CFR Part 180 for residues resulting from the use of carbon disulfide (§ 180.1004), ethylene dichloride (§ 180.1007), and chloroform (§ 180.1009) as post-war fumigants on a variety of grains.

Based on the information considered by the Agency and discussed in detail in the cited **Federal Register** documents, the Agency now proposes to revoke (1) the food additive regulation in 21 CFR 193.225(a) for use of carbon disulfide and ethylene dichloride as fumigants for grain-mill machinery, and (2) the food additive regulation in 21 CFR 193.230(a)(1) for use of carbon disulfide and ethylene dichloride in mixtures with certain other pesticides, as a fumigant for processed grain used in the production of fermented malt beverages. The Agency is proposing that the words "carbon disulfide" and "ethylene dichloride" be removed from 21 CFR 193.225(a) and from 21 CFR 193.230(a)(1).

Interested persons are invited to submit written comments on this proposal to revoke the food additive regulations in 21 CFR 193.225(a) and 193.230(a)(1) for carbon disulfide and ethylene dichloride. Comments must bear a notation indicating the document control number [OPP–300158]. Three copies of the comments should be submitted to facilitate the work of the Agency and of others interested in reviewing the comments. All written comments filed pursuant to this notice will be available for public inspection in Rm. 236, CM #2, 1921 Jefferson Davis Highway, Arlington, VA, between 8 a.m. and 4 p.m., Monday through Friday, except legal holidays.

This document has been reviewed by the Office of Management and Budget as required by section 3 of Executive Order 12291.

This proposed action has been analyzed under the Regulatory Flexibility Act, and the requirements of Executive Order 12291. The analysis contained in the proposals for the revocation of the exemption from the requirement of a tolerance in 40 CFR 180.1004 and 180.1007 for carbon disulfide and ethylene dichloride residues in a variety of grains resulting from post-harvest fumigation, applies equally to the proposed action set forth in this document. Accordingly, I certify that this proposed regulation does not require a separate regulatory flexibility analysis under the Regulatory Flexibility Act.

List of Subjects in 21 CFR Part 193

Food additives, Pesticides and pests, Reporting and recordkeeping requirements.

Dated: September 28, 1987.

J.A. Moore,

Assistant Administrator for Pesticides and Toxic Substances.

Therefore, it is proposed that 21 CFR Part 193 be amended as follows:

PART 193—[AMENDED]

1. The authority citation for Part 193 continues to read as follows:

Authority: 21 U.S.C. 348.

2. Section 193.225(a) is revised to read as follows:

§ 193.225 Fumigants for grain-mill machinery.

* * * * *

(a) The fumigants consist of one or more of the following: Carbon tetrachloride and methyl bromide.

* * * * *

3. Section 193.230(a)(1) is revised to read as follows:

§ 193.230 Fumigants for processed grains used in production of fermented malt beverages.

* * * * *

(a) * * *

(1) Carbon tetrachloride, with or without pentane.

21 CFR Part 193

[OPP–300158; FRL–3276–8]

Carbon Tetrachloride; Proposed Revocation of Food Additive Regulations

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed rule.

SUMMARY: This document proposes to amend 21 CFR Part 193 by removing the food additive regulations for carbon tetrachloride for fumigation of (1) grain-mill machinery (§ 193.225) and (2) processed grains used in the production of fermented malt beverages, when used in various mixtures (§ 193.230). This

proposed Agency-initiated regulatory action will remove food additive regulations for which related pesticide uses have been cancelled. Elsewhere in this issue of the **Federal Register**, EPA is also proposing revocation of the exemption from the requirement of a tolerance for carbon tetrachloride as a post-harvest fumigant on various grains.

DATE: Written comments, identified by the document control number [OPP–300158], must be received on or before December 14, 1987.

ADDRESS: By mail, submit comments to:

Information Services Section, Program Management and Support Division (TS–757C), Office of Pesticide Programs, Environmental Protection Agency, 401 M St., SW., Washington, DC 20460.

In person, deliver comments to: Rm. 236, CM #2, 1921 Jefferson Davis Highway, Arlington, VA.

Information submitted as a comment concerning this notice may be claimed confidential by marking any part or all of that information as "Confidential Business Information" (CBI). Information so marked will not be disclosed except in accordance with procedures set forth in 40 CFR Part 2. A copy of the comment that does not contain CBI must be submitted for inclusion in the public record. Information not marked confidential may be disclosed publicly by EPA without prior notice. All written comments will be available for public inspection in Rm. 236 at the address given above, from 8 a.m. to 4 p.m., Monday through Friday, except legal holidays.

FOR FURTHER INFORMATION CONTACT: By mail:

Mark T. Boodee, Registration Division (TS–767C), Environmental Protection Agency, 401 M St., SW., Washington, DC 20460.

Office location and telephone number: Special Review Branch, Rm. 1014, CM #2, 1921 Jefferson Davis Highway, Arlington, VA (703–557–7400).

SUPPLEMENTARY INFORMATION: On September 30, 1980, the Administrator issued a notice, published in the **Federal Register** of October 15, 1980 (45 FR 68534) of Special Review (previously referred to as Rebuttable Presumption against Registration) of all pesticide products containing carbon tetrachloride (CCl_4), including those CCl_4 products registered for use as grain fumigants. The Special Review was initiated because the Agency determined that continued use of carbon tetrachloride posed a risk of oncogenic, mutagenic, and other adverse effects and that it satisfied the criteria for commencing a Special Review set forth at 40 CFR 154.7. Position Document 1 on CCl_4 was also published in the **Federal Register** of October 15, 1980 (45 FR 68551), outlining pertinent background information, references, and a summary of the evidence to support a Special Review.

In 1983, EPA began to examine the risks posed by the grain fumigant ethylene dibromide (EDB). On September 28, 1983, the Administrator issued a notice, published in the **Federal Register** of October 11, 1983 (48 FR 46234), of intent to cancel registrations of EDB for use as a fumigant of grain stored in bulk and as a fumigant for spot treatment of grain-milling equipment. On taking action to eliminate the use of EDB on grains, EPA began a comprehensive review of EDB substitutes to ensure that continued and, in some cases, expanded use of these chemicals would not present unreasonable risks.

Because data were lacking in key areas for carbon tetrachloride, EPA required submission of product chemistry data, analytical methodologies, residue studies, teratogenicity studies, and reproductive studies through its Data Call-In program. Data Call-in notices were sent to the registrants of CCl_4 products on March 16, 1984. None of the registrants agreed to supply the data required for continued registration. Subsequently, all registrations of grain fumigants containing carbon tetrachloride were either voluntarily cancelled by the registrants or were suspended under section 3(c)(2)(B) of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) for failure to submit the required data.

A list of many grain fumigant products containing carbon tetrachloride that have been voluntarily cancelled was published in the **Federal Register** of October 23, 1985 (50 FR 42997).

On November 3, 1986, the Administrator issued a final notice, published in the **Federal Register** of November 12, 1986 (51 FR 41004), of intent to cancel registrations for those remaining CCl_4 grain fumigant products. The basis for the Agency's action was that risks posed to humans by CCl_4, including both a risk of acute and subacute poisoning and an oncogenic risk, outweighed its limited benefits. Since no registrants challenged this action within the statutory time frame, the remaining registrations for the CCl_4 grain fumigant products were cancelled by operation of law.

Section 193.225(a) of 21 CFR currently provides that fumigants may be safely used in or on grain-mill machinery with the following conditions, among others:

> The fumigants consist of one or more of the following: Carbon tetrachloride, and methyl bromide.

Section 193.230(a)(1) of 21 CFR provides that fumigants for processed grains used in production of fermented malt beverages may be safely used in accordance with the following conditions, among others:

> They consist of one of the following mixtures: Carbon tetrachloride, with or without pentane.

Based on the information considered by the Agency and discussed in detail in the **Federal Register** documents cited in the preceeding paragraphs, the Agency now proposes to revoke (1) the food additive regulation in 21 CFR 193.225 for use of carbon tetrachloride as a fumigant for grain-mill machinery, and (2) the food additive regulation in 21 CFR 193.230 for use of CCl_4 as a fumigant for processed grain used in the production of fermented malt beverages. The Agency is proposing that all references to "carbon tetrachloride" be removed from 21 CFR 193.225(a) and from 21 CFR 193.230(a)(1).

Elsewhere in this issue of the **Federal Register**, EPA has issued a related document [OPP–300159], which proposes the revocation of the exemption from the requirement of a tolerance in 40 CFR Part 180 for residues resulting from the use of carbon tetrachloride (§ 180.1005) as a post-harvest fumigant on a variety of grains.

Available data indicate that residues of carbon tetrachloride in or on raw grain treated prior to June 30, 1986, the last day of legal use of the fumigant, ranged from less than 10 ppb to 300 ppm. For intermediate grain products, e.g., flour, the CCl_4 levels ranged from less than 10 ppb to 10 ppm. Ready-to-eat grain products contained CCl_4 residues in the range of less than 10 ppb to 0.5 ppm. The Agency has no data on the rate of decline of CCl_4 residues in grain and derived grain products treated prior to the date of cessation of use, i.e., June 30, 1986. However, the Agency anticipates, and available data suggest, that any remaining residues will dissipate with time and that the treated grain and grain products will be used within a period of several years. It is doubtful that the presence of low levels of CCl_4 for this short-term period would pose a risk to the public health. Residue data presently available to the Agency on CCl_4 are not considered adequately validated for the purposes of setting action levels. At a minimum these data would need to be supported with: (1) Full documentation of sample collection, preparation, and storage prior to

analysis; (2) a full description of the analytical method used to generate the data, to indicate the method's limit of detection; (3) the analysis of appropriate control and recovery samples; and (4) storage stability data reflecting the actual storage of the samples prior to analysis. Therefore, the Agency has recommended to the Food and Drug Administration (FDA) that enforcement action not be taken if residues are detected in grain or grain-based consumer products after the exemptions are removed if such residues were incurred as a result of legal use of the fumigant on or before June 30, 1986. FDA has agreed to this approach.

Interested persons are invited to submit written comments on this proposal to revoke the food additive regulations in 21 CFR 193.225 and 193.230 for carbon tetrachloride. Comments must bear a notation indicating the document control number [OPP-300158]. Three copies of the comments should be submitted to facilitate the work of the Agency and of others interested in reviewing the comments. All written comments filed pursuant to this notice will be available for public inspection in Rm. 236, CM No. 2, 1921 Jefferson Davis Highway, Arlington, VA, between 8 a.m. and 4 p.m., Monday through Friday, except legal holidays.

This document has been reviewed by the Office of Management and Budget as required by section 3 of Executive Order 12291.

This proposed action has been analyzed under the Regulatory Flexibility Act, and the requirements of Executive Order 12291. The analysis contained in the proposals for the revocation of the exemption from the requirement of a tolerance in 40 CFR 180.1005 for carbon tetrachloride residues in a variety of grains resulting from post-harvest fumigation, applies equally to the proposed action set forth in this notice. Accordingly, I certify that this regulation does not require a separate regulatory flexibility analysis under the Regulatory Act.

40 CFR Part 180

[OPP-300159; FRL-3276-9]

Carbon Tetrachloride; Proposed Revocation of Exemption From Requirement of Tolerance

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed rule.

SUMMARY: This document proposes to amend 40 CFR Part 180 by removing regulations to exempt from the requirement of a tolerance the pesticide chemical carbon tetrachloride (§180.1005). This proposed Agency-initiated regulatory action will remove the exemption for which related pesticide uses have been cancelled. Elsewhere in this issue of the **Federal Register**, EPA is also proposing revocation of the food additive regulations for carbon tetrachloride as a fumigant when used on grain-mill machinery and grains for fermented malt beverage production.

DATE: Written comments, identified by the document control number [OPP-300159], should be received on or before December 14, 1987.

ADDRESS: By mail, submit comments to:

Information Services Section, Program Management and Support Division (TS-757C), Office of Pesticide Programs, Environmental Protection Agency, 401 M Street, SW., Washington, DC 20460.

In person, deliver comments to: Rm. 236, CM #2, 1921 Jefferson Davis Highway, Arlington, VA.

Information submitted as a comment concerning this notice may be claimed confidential by marking any part or all of that information as "Confidential Business Information" (CBI). Information so marked will not be disclosed except in accordance with procedures set forth in 40 CFR Part 2. A copy of the comment that does not contain CBI must be submitted for inclusion in the public record. Information not marked confidential may be disclosed publicly by EPA without prior notice. All written comments will be available for public inspection in Rm. 236 at the address given above, from 8 a.m. to 4 p.m., Monday through Friday, except legal holidays.

FOR FURTHER INFORMATION CONTACT: By mail:

Mark T. Boodee, Registration Division (TS-767C), Environmental Protection Agency, 401 M St., SW., Washington, DC 20460.

Office location and telephone number: Special Review Branch, Rm. 1014, CM #2, 1921 Jefferson Davis Highway, Arlington, VA (703-557-7400).

SUPPLEMENTARY INFORMATION: On September 30, 1980, the Administrator issued a notice, published in the **Federal Register** of October 15, 1980 (45 FR 68534), of Special Review (previously referred to as Rebuttable Presumption against Registration) of all pesticide products containing carbon tetrachloride (CCl_4) including those CCl_4 products registered for use as grain fumigants. The Special Review was initiated because the Agency determined that continued use of carbon tetrachloride posed a risk of oncogenic, mutagenic, and other adverse effects and that it satisfied the criteria for commencing a Special Review as set forth at 40 CFR 154.7. Position Document 1 on CCl_4 was also published in the **Federal Register** of October 15, 1980 (45 FR 68551), outlining pertinent background information, references, and a summary of the evidence to support a Special Review.

In 1983, EPA began to examine the risks posed by the grain fumigant ethylene dibromide (EDB). On September 28, 1983, the Administrator issued a notice, published in the **Federal Register** of October 11, 1983 (48 FR 46234), of intent to cancel registrations of EDB for use as a fumigant of grain stored in bulk and as a fumigant for spot treatment of grain-milling equipment. On taking action to eliminate the use of EDB on grains, EPA began a comprehensive review of EDB substitutes to ensure that continued and, in some cases, expanded

use of these chemicals would not present unreasonable risks.

Because data were lacking in key areas for carbon tetrachloride, EPA required submission of product chemistry data, analytical methodologies, residue studies, teratogenicity studies, and reproductive studies through its Data Call-In program. Data Call-in notices were sent to the registrants of carbon tetrachloride products on March 16, 1984. None of the registrants agreed to supply the data required for continued registration. Subsequently, all registrations of grain fumigants containing carbon tetrachloride were either voluntarily cancelled by the registrants or were suspended under section 3(c)(2)(B) of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) for failure to submit the required data.

A list of those grain fumigant products containing carbon tetrachloride that have been voluntarily cancelled was published in the **Federal Register** of October 23, 1985 (50 FR 42997).

On November 3, 1986, the Administrator issued a final notice, published in the **Federal Register** of November 12, 1986 (51 FR 41004), of intent to cancel registrations for those remaining CCl_4 grain fumigant products. The basis for the Agency's action was that risks posed to humans by CCl_4 including both a risk of acute and subacute poisoning and an oncogenic risk, outweighed its limited benefits. Since no registrants challenged this action within the statutory time frame, the remaining registrations for the CCl_4 grain fumigant products were cancelled by operation of law.

The residues resulting from use of carbon tetrachloride as a fumigant after harvest are currently exempted from the requirement of a tolerance for the following grains: barley, corn, oats, popcorn, rice, rye, sorghum (milo), and wheat. This exemption was granted in 1956 based on available toxicology studies and the conclusion that the 5 to 10 parts per million (ppm) residue levels which resulted in the consumed food did not have any toxicological significance. These residue levels were determined by less sophisticated analytical methodology than that available today. Currently available analytical methods are now capable of detecting carbon tetrachloride per se down to a limit of detection of 1 part per billion (ppb).

EPA now proposes to revoke the exemption from the requirement of a tolerance for residues of carbon tetrachloride (§ 180.1005) in barley, corn, oats, popcorn, rice, rye, sorghum (milo), and wheat resulting from the use of carbon tetrachloride as a fumigant after harvest because the registrations for all products used as fumigants for stored grain or for grain-milling equipment containing this chemical have been cancelled.

Available data indicate that residues of carbon tetrachloride in or on raw grain treated prior to June 30, 1986, the last day of legal use of the fumigant, ranged from less than 10 ppb to 300 ppm. For intermediate grain products, e.g., flour, the CCl_4 levels ranged from less than 10 ppb to 10 ppm. Ready-to-eat grain products contained CCl_4 residues in the range of less than 10 ppb to 0.5 ppm. The Agency has no data on the rate of decline of CCl_4 residues in grain and derived grain products treated prior to the date of cessation of use, i.e., June 30, 1986. However, the Agency anticipates, and available data suggests, that any remaining residues will dissipate with time and that the treated grain and grain products will be used within a period of several years. It is doubtful that the presence of low levels of CCl_4 for this short-term period would pose a risk to the public health. Residue data presently available to the Agency on CCl_4 are not considered adequately validated for the purposes of setting action levels. At a minimum these data would need to be supported with: (1) Full documentation of sample collection, preparation, and storage prior to analysis; (2) a full description of the analytical method used to generate the data, to indicate the method's limit of detection; (3) the analysis of appropriate control and recovery samples; and (4) storage stability data reflecting the actual storage of the samples prior to analysis. Therefore, the Agency has recommended to the Food and Drug Administration (FDA) that enforcement action not be taken if residues are detected in grain or grain-based consumer products after the exemptions are removed if such residues were incurred as a result of legal use of the fumigant on or before June 30, 1986. FDA has agreed to this approach.

Elsewhere in this issue of the **Federal Register**, EPA has issued a related document [OPP–300158], which proposes the revocation of food additive regulations for carbon tetrachloride.

Any person who has registered or submitted an application under the Federal Insecticide, Fungicide, and Rodenticide Act, as amended, for the registration of a pesticide which contains carbon tetrachloride may request within 30 days after publication of this document in the **Federal Register** that this proposal to revoke the exemption from the requirement of a tolerance be referred to an advisory committee in accordance with section 408(e) of the Federal Food, Drug, and Cosmetic Act. Requests should bear the document control number [OPP–300159], and should be submitted to the mailing address provided above.

Interested persons are invited to submit written comments on this proposed revocation for the exemption from the requirement of a tolerance for carbon tetrachloride. Comments should bear a notation indicting the document control number [OPP–300159]. Three copies of the comments should be submitted to facilitate the work of the Agency and of others interested in reviewing the comments. All written comments filed pursuant to this notice will be available for public inspection in Rm. 236, CM #2, 1921 Jefferson Davis Highway, Arlington, VA, between 8 a.m. and 4 p.m., Monday through Friday, except legal holidays.

In order to satisfy requirements for analysis as specified by Executive Order 12291, the Regulatory Flexibility Act, and the Paperwork Reduction Act, the Agency has analyzed the costs and benefits of this proposal. Documents containing these analyses are available for public inspection in the Information Services Section at the address given above.

Executive Order 12291

Under Executive Order 12291, the Agency must determine whether a proposed regulatory action is "Major" and therefore subject to the requirements of a Regulatory Impact Analysis. The Agency has determined that this proposed regulatory action is not a major regulatory action, i.e., it will not have an annual effect on the economy of at least $100 million, will not cause a major increase in prices, and will not have a significant adverse effect on competition or the ability of U.S. enterprises to compete with foreign enterprises.

This proposed rule has been reviewed by the Office of Management and Budget as required by section 3 of Executive Order 12291.

Regulatory Flexibility Act

This proposed rule has been reviewed under the Regulatory Flexibility Act of 1980 (Pub. L. 96–354; 94 Stat. 1165, 5 U.S.C. 60 *et seq.*) and it has been determined that it will not have a significant economic impact on a substantial number of small businesses, small governments, or small organizations.

The revocation of the exemption from the requirement of a tolerance would potentially affect firms in the grain-milling and bakery products industries

VOL
52
ISS

1987
UMI

as well as grain farmers. Products found to contain carbon tetrachloride may be subject to enforcement action. However, since FDA has agreed not to take enforcement action unless residue levels are at a level of public health concern or residues resulted from treatment after June 30, 1986, it is anticipated that little or no economic impact would occur.

Accordingly, I certify that this regulatory action does not require a separate regulatory flexibility analysis under the Regulatory Flexibility Act.

List of Subjects in 40 CFR Part 180

Administrative practice and procedure, Agricultural commodities, Pesticides and pests, Reporting and recordkeeping requirements.

Dated: September 28, 1987.

J.A. Moore,

Assistant Administrator for Pesticides and Toxic Substances.

Therefore, it is proposed that 40 CFR Part 180 be amended as follows:

PART 180—[AMENDED]

1. The authority citation for Part 180 continues to read as follows:

DEPARTMENT OF EDUCATION

34 CFR Part 690

Pell Grant Program

AGENCY: Department of Education.

ACTION: Final regulations.

SUMMARY: The Secretary of Education amends the regulations for the Pell Grant Program. The regulations are amended as a result of statutory changes made to the Higher Education Act of 1965 (HEA), as amended by the Higher Education Amendments of 1986 (Pub. L. 99–498).

EFFECTIVE DATE: These regulations take effect either 45 days after publication in the **Federal Register**, or later, if Congress takes certain adjournments.

These regulations are effective for and apply to award years beginning on or after July 1, 1987. The Secretary does not consider that the December 1, 1986 publication deadline imposed by section 482(c) of the HEA applies to these regulations because (1) these regulatory changes are being made to conform the Pell Grant Program regulations to statutory changes that apply to the award year beginning July 1, 1987, and (2) the change in the name of the Electronic Pilot Project does not affect the general administration of the HEA Title IV student financial assistance programs. If you want to know the effective date of these regulations, call or write to the contact person listed below.

FOR FURTHER INFORMATION CONTACT: Sister Bernardine Hayes or Ms. Cheryl Leibovitz, Office of Student Financial Assistance, U.S. Department of Education, (ROB–3, Room 4318), 400 Maryland Ave., SW., Washington, DC 20202. Telephone number (202) 732–4888.

SUPPLEMENTARY INFORMATION: These regulations are being issued to implement the major program changes mandated by Congress under the Higher Education Amendments of 1986 (Pub. L. 99–498). A discussion of the major changes follows:

Section 690.2 General definitions.

The Secretary is amending the regulations to change the name of the Pell Grant Program Electronic Pilot Project. The Electronic Pilot Project is a project under which students attending an institution participating in the project are able to correct or verify information contained on their Student Aid Reports by using computer terminals at the institution. The Secretary is now making this method of processing data available to all institutions participating in the Pell Grant Program. As result, the Secretary is changing the name of this electronic exchange system to the Pell Grant Electronic Data Exchange.

Section 690.6 Duration of student eligibility.

For a student who receives his or her first Pell Grant award in the 1987–88 or a subsequent award year, the Higher Education Amendments of 1986 amended the HEA to limit the duration of a student's eligibility for a Pell Grant to the full-time equivalent of 5 academic years of study, if the student is enrolled in an undergraduate degree or certificate program of 4 years of less, or the full-time equivalent of six academic years if the student is enrolled in an undergraduate program that normally requires more than 4 years of study to complete. If a student is enrolled in a noncredit or remedial coursework or program, the program does not count against this limitation.

The institution may waive this limitation if an undue hardship on the student resulting from the death of a relative of the student, an illness or injury of the student, or other special circumstances as determined by the institution prevents the student from completing his or her academic program within the above time constraints.

The Secretary is, therefore, revising § 690.6 to implement this new statutory requirement.

Section 690.61 Submission process and deadline for student aid report.

The Secretary is revising § 690.61 to allow an institution to make one disbursement of a student's Pell Grant without receiving a valid Student Aid Report (SAR) from the student if it follows the procedures described in § 690.77.

Section 690.77 Initial disbursement of a Pell Grant in an award year without a valid SAR.

Under the Pell Grant Program, an institution receives the information included on a student's application to have his or her student aid index (SAI) determined in one of several ways. That information is included on the SAR, and the institution receives that information when the student submits the SAR to it. The institution may also receive that information when it receives a "full data tape" from the Pell Grant Central Processor or, beginning with the 1988–89 award year application cycle, it may receive that information from an organization that has a contract to transmit application data to the Secretary. A "full data tape" includes the application information of all students attending the institution who have applied to have a student aid index determined for the Pell Grant Program and who have granted permission to the Secretary to transmit that information to the institution they are attending or expect to attend.

Under the current Pell Grant Program regulations, an institution may not make a disbursement to a student until it has received a valid SAR. The institution then calculates and disburses the student's Pell Grant based on the SAI and the application information contained on the SAR.

Under the verification process set forth in 34 CFR Part 668, Subpart E, an institution may make one disbursement to a student before completing the verification of the information contained in the student's aid application if the institution does not have documentation that indicates that the information is inaccurate. Under a similar procedure the Secretary is permitting an institution, under the following conditions, to make the initial award year disbursement of a Pell Grant award to a student before receiving a valid SAR based on the receipt of the application information from the Secretary or, beginning with the 1988–89 award year application cycle, an organization that has a contract to transmit application data to the Secretary.

If the institution receives the student's SAI and the application information from the Pell Grant Central Processor in the 1987–88 award year or, beginning with the 1988–89 award year application cycle, from an organization that has a contract to transmit application data to the Secretary, an institution may make an initital disbursement without a valid SAR if—

a. The institution does not have documentation that indicates that the application information received on the full data tape is incorrect; or

b. The institution has documentation that indicates that the application information received on the SAR submitted by the student or on the full data tape is incorrect but the institution (1) reconciles the inconsistent information, (2) recalculates the student's SAI based upon the reconciled information, (3) disburses the Pell Grant based upon the recalculated SAI, and (4) reports the change in the student's application information and SAI to the Pell Grant Central Processor. An institution may not make another Pell Grant disbursement for that award year to that student without receiving a valid SAR from the student.

The institution is not limited to one recalculation of the student's SAI. Therefore, if the institution does recalculate an SAI, subsequently receives additional conflicting information, and determines other data elements are incorrect, it may recalculate the SAI to correct the inconsistency.

If the institution chooses to make a disbursement without receiving a valid SAR, the institution and the student are liable for any overpayment resulting from that disbursement that cannot be adjusted with other Pell Grant disbursements for that award year.

The Secretary is adding § 690.77 to the Pell Grant Program regulations to accommodate this process.

Section 690.78 Method of disbursement by check to a student's account.

The Secretary is amending § 690.78 to reflect changes made in the Pell Grant statute by the Higher Education Amendments of 1986. The new statutory provision specifies that the amount of a grant which an institution may disburse by crediting a student's institutional account is limited to tuition, fees, board, if the student contracts with the institution for board, and housing, if the student contracts with the institution for housing. The new statutory provision further specifies that a student may, at his or her option, permit the institution to disburse the Pell Grant by crediting his or her account for other goods and services provided by the institution.

Waiver of Rulemaking

In accordance with section 431(b)(2)(A) of the General Education Provisions Act, 20 U.S.C. 1232(b)(2)(A), and the Administrative Procedure Act, 5 U.S.C. 553, it is the practice of the Secretary to offer interested parties the opportunity to comment on proposed regulations. However, these changes do not implement substantive policy, but merely reflect statutory changes required by the Higher Education Amendments of 1986. Therefore, the Secretary finds that publication of proposed regulations is unnecessary and contrary to the public interest under 5 U.S.C. 553(b)(B). The Secretary has also determined that the change in the procedures to the electronic transmission of data is exempt from the requirements for public comment under 5 U.S.C. 553(b)(A) as a rule of agency procedure.

Executive Order 12291

These regulations have been reviewed in accordance with Executive Order 12291. They are not classified as major because they do not meet the criteria for major regulations established in the order.

Regulatory Flexibility Act Certification

The Secretary certifies that these regulations will not have a significant economic impact on a substantial number of small entities. The regulations would not have a significant economic impact on the small entities affected because the regulations would not impose excessive regulatory burdens or require unnecessary Federal supervision. The regulations would impose minimal requirements to ensure the proper expenditure of program funds. These regulations are being issued to implement the changes required by the Higher Education Amendments of 1986.

Assessment of Educational Impact

The Secretary has determined that the regulations in this document do not require transmission of information that is being gathered by or is available from any other agency or authority of the United States.

List of Subjects in 34 CFR Part 690

Administrative practice and procedure, Education, Education of disadvantaged, Grant programs—education, Student aid.

Dated: October 8, 1987.

William J. Bennett,

Secretary of Education.

(Catalog of Federal Domestic Assistance: No. 84.063, Pell Grant Program)

The Secretary amends Part 690 of Title 34 of the Code of Federal Regulations as follows:

PART 690—PELL GRANT PROGRAM

1. The authority citation for Part 690 is revised to read as follows:

Authority: 20 U.S.C. 1070a through 1070a–6, unless otherwise noted.

§ 690.2 [Amended].

2. In § 690.2, paragraph (b), in the definitions of the "Electronic Pilot Project" and "Valid Student Aid Report," remove the words "Electronic Pilot Project" and add, in their place, the words "Pell Grant Electronic Data Exchange, and alphabetize the definitions accordingly."

3. Section 690.6 is revised to read as follows:

§ 690.6 Duration of student eligibility.

(a) A student is eligible to receive a Pell Grant for the period of time required to complete his or here first undergraduate baccalaureate course of study.

(b) An institution shall determine when the student has completed the academic curriculum requirements for that first undergraduate baccalaureate course of study.

(c) Except as provided in paragraph (d) of this section, for a student who receives his or her first Pell Grant on or after July 1, 1987, the period of time required to complete his or here undergraduate baccalaureate course of study may not exceed the full-time equivalent of—

(1) Five academic years for an undergraduate degree or certificate program that normally requires four academic years or less of study to complete; or

(2) Six academic years for an undergraduate degree or certificate program that normally requires more than four academic years of study to complete.

(d)(1) The institution a student is attending may waive the limitations contained in paragraph (c) of this section if it determines that the student's failure to complete his or her undergraduate program in the time set forth in that paragraph resulted from an undue hardship caused by—

(i) The death of a relative of the student;

(ii) An injury or illness of the student; or

(iii) Other special circumstances.

(2) The institution must support with appropriate documentation any determination of undue hardship made under this paragraph.

(e) For the purpose of paragraph (c) of this section, any noncredit or remedial course taken by a student, including a course in English language instruction, is not included in determining that student's period of Pell Grant eligibility.

(Authority: 20 U.S.C. 1070a)

4. In § 690.61, paragraph (a) is revised to read as follows:

§ 690.61 Submission process and deadline for student aid report.

(a) *Submission process.* (1) Except as provided in paragraph (a)(2) of this section, in order to receive a Pell Grant at an institution, a student shall submit a valid Student Aid Report (SAR) to that institution.

(2) An institution may make one disbursement of a student's Pell Grant without a valid SAR if it follows the procedures described in § 690.77.

(3) An institution is entitled to rely on SAR information except under conditions set forth in § 668.16(f) and 668.60.

5. A new § 690.77 is added to Subpart G to read as follows:

§ 690.77 Initial disbursement of a Pell Grant in an award year without a valid SAR.

(a) An institution may make one disbursement within an award year of a student's Pell Grant before receiving the student's valid SAR if the institution—

(1) Receives a student's application information;

(2) Does not have documentation that indicates that the application information is inaccurate; and

(3) Receives an SAI—

(i) From the Secretary; or

(ii) Beginning with the 1988–89 award year application cycle, from an organization that has a contract to transmit application data to the Secretary.

(b) If an institution receives a student's application information and his or her SAI from the Secretary or, beginning with the 1988–89 award year application cycle, from an organization that has a contract to transmit application data to the Secretary, but the institution has documentation that indicates that the application information is inaccurate, the institution may make one disbursement within an award year of a student's Pell Grant before receiving the student's valid SAR if the institution—

(1) Resolves the inconsistencies between its documentation and the student's application information;

(2) Recalculates the student's SAI based on correct information;

(3) Makes the disbursement of the student's Pell Grant for the first payment period based on the recalculated SAI; and

(4) Reports the changes in the student's application information and the recalculated SAI to the Secretary within deadline established by the Secretary.

(c)(1) If an institution chooses to make a disbursement under paragraph (a) or (b) of this section, it shall be liable for that disbursement if it does not receive a valid SAR for the student for that award year.

(2) If an institution chooses to make a disbursement under paragraph (b) of this section, the institution and the student shall be liable for any overpayment caused by an incorrect recalculation of the student's SAI.

(3) If a student receives an overpayment as a result of a disbursement made under paragraph (a) or (b) of this section, the institution shall eliminate the overpayment by following the procedures described in 34 CFR 668.61(a).

(Authority: 20 U.S.C. 1070a)

(Approved by the Office of Management and Budget under OMB Control No. 1840-0536)

6. In § 690.78, paragraph (a) is revised to read as follows:

§ 690.78 Method of disbursement—by check or credit to a student's account.

(a)(1) The institution may pay a student directly by check or by crediting his or her institutional account.

(2) Unless a student has agreed otherwise, the amount an institution may credit to a student's account may not exceed the amount the student is required to pay the institution for—

(i) Tuition and fees;

(ii) Board, if the student contracts with the institution for board; and

(iii) Housing, if the student contracts with the institution for housing.

(3) An institution may not require a student to grant permission to credit his or here account for the costs of other goods and services the institution provides to the student.

(4) The institution shall notify the student of the amount he or she can expect to receive and how that amount will be paid.

Apples and Pears From Europe; Proposed Rule

VOL 52 ISS 198 OCT 14 1987 UMI

DEPARTMENT OF AGRICULTURE

Animal and Plant Health Inspection Service

7 CFR Part 319

[Docket No. 87-145]

Apples and Pears From Europe

AGENCY: Animal and Plant Health Inspection Service, USDA.

ACTION: Proposed rule.

SUMMARY: We are proposing to amend the Fruits and Vegetables regulations to relieve restrictions on the importation of apples or pears from certain European countries. Our proposed rule would allow these fruits to be imported under multiple safeguards, including inspections in the exporting country. These safeguards would ensure that the fruits could be imported without significant risk of introducing insect pests into the United States.

DATES: Consideration will be given only to comments postmarked or received on or before October 29, 1987.

ADDRESSES: Send an original and two copies of your comments to Steven B. Farbman, Assistant Director, Regulatory Coordination, APHIS, USDA, Room 728, Federal Building, 6505 Belcrest Road, Hyattsville, MD 20782. Please state that your comments refer to Docket No. 87-145. Comments received may be inspected at Room 728 of the Federal Building between 8 a.m. and 4:30 p.m., Monday through Friday, except holidays.

FOR FURTHER INFORMATION CONTACT: Frank Cooper, Staff Officer, Regulatory Services Staff, Plant Protection and Quarantine, APHIS, USDA, Room 637, Federal Building, Hyattsville, MD 20782; 301-436-8248.

SUPPLEMENTARY INFORMATION:

Background The regulations in 7 CFR 319.56 (the regulations) prohibit or restrict the importation of fruits and vegetables into the United States because of the risk that the fruits or vegetables could introduce insect pests that could damage domestic plants.

Apples from Belgium, Denmark, France, Great Britain, Italy, the Netherlands, Northern Ireland, Norway, Portugal, the Republic of Ireland, Sweden, Switzerland, and West Germany; and pears from Belgium, France, Great Britain, Italy, the Netherlands, Portugal, and Spain present a risk of introducing various insect pests, including the pear leaf blister moth

(Leucoptera malifoliella).

Under § 319.56-2, these fruits may be imported only under certain conditions that, in general, require the fruits to come from pest-free areas or require that the fruits be treated to destroy insects known to attack them. The presence of the pear leaf blister moth in Europe, and the lack of an effective treatment to destroy this pest, preclude importation of these fruits under § 319.56-2. Under § 319.56(c):

> * * * whenever the Deputy Administrator for the Plant Protection and Quarantine shall find that existing conditions as to pest risk involved in the importation of the articles to which the regulations supplemental hereto apply, make it safe to modify, by making less stringent, the restrictions contained in any of such regulations, he shall publish such findings in administrative instructions, specifying the manner in which the regulations shall be made less stringent * * *

We are proposing administrative instructions modifying the regulations concerning the importation of apples from Belgium, Denmark, France, Great Britain, Italy, the Netherlands, Northern Ireland, Norway, Portugal, the Republic of Ireland, Sweden, Switzerland, and West Germany; and pears from Belgium, France, Great Britain, Italy, the Netherlands, Portugal, and Spain. The administrative instructions prescribe multiple safeguards, including inspections in the exporting country. It would appear that apples or pears imported under the conditions prescribed in the proposed administrative instructions would not present a significant risk of introducing insect pests into the United States. The specific requirements contained in the proposed administrative instructions are discussed below.

Importations Allowed

The proposed administrative instructions would apply only to the following fruits: Apples from Belgium, Denmark, France, Great Britain, Italy, the Netherlands, Northern Ireland, Norway, Portugal, the Republic of Ireland, Sweden, Switzerland, and West Germany; and pears from Belgium, France, Great Britain, Italy, the Netherlands, Portugal, and Spain.

The administrative instruction does not include apples or pears from European countries other than those specified because we do not have adequate information on the pest risk associated with apples or pears from other countries. We assess the pest risk associated with specific fruits from specific countries as we receive requests to import those fruits from those countries. Manpower and budgetary constraints limit our ability to conduct broader studies. However, if we were to receive an application to import apples or pears from a European country not specified in this proposal, we would initiate a study of the pest risk associated with the apples or pears from that country. If it appeared that the fruit could be safely imported from that country, we would consider amending the regulations to allow the requested importations.

Preclearance in the Exporting Country

We are proposing, for most importations of apples and pears from the European countries named above, to require that the fruit be inspected in the exporting country by inspectors of Plant Protection and Quarantine (PPQ). This inspection, to determine the eligibility of the fruit for shipment to the United States, would be called a preclearance inspection to distinguish it from similar inspections performed by PPQ inspectors at ports of arrival in the United States. We are proposing a preclearance inspection to minimize the risk that the apples and pears will arrive in the United States contaminated with pests that could harm domestic plants. The preclearance inspection would also benefit importers, since time and money would not be wasted in shipping fruit at that might not qualify for importation into the United States. The proposed details of how the preclearance inspection would be conducted are discussed later in this supplementary information.

Inspection in the United States

With few exceptions, we anticipate that apples and pears imported under this proposed rule would be "precleared" for shipment into the United States in the exporting country. However, we propose to allow inspection of the fruit a port of arrival in the United States, in lieu of the preclearance inspection, if the Deputy Administrator determines that inspection can be accomplished at the port of arrival without increasing the risk of introducing insect pests into the United States. The following conditions would apply to inspections performed at the port of arrival:

(1) The Deputy Administrator would first have to determine that a sufficient number of inspectors were available at the port of arrival to perform the services required;

(2) Each pallet of apples or pears would have to be completely enclosed in plastic, to prevent the escape of insects, before being offloaded at the port of arrival;

(3) The entire shipment of apples or pears would have to be offloaded and

moved to an enclosed warehouse, where adequate inspection facilities are available, under the supervision of inspectors of Plant Protection and Quarantine;

(4) The method of inspection would be the same as in preclearance inspections.

These conditions would ensure that inspections could be conducted at the port of arrival in a manner that would prevent the escape of insects, prevent pilferage of the fruit, and ensure that insect pests that may be present on the fruit would be discovered.

Trust Fund and Cooperative Agreements

Except as explained above for inspections in the United States, we are proposing that the national plant protection service of the exporting country (referred to below as the plant protection service) enter into two agreements with PPQ before apples or pears from that country could be imported into the United States.

(1) A trust fund agreement would require the plant protection service to pay in advance all estimated costs incurred by PPQ in providing preclearance inspections during a shipping season. These costs would include administrative expenses incurred in conducting the inspection services; and all salaries (including overtime and the federal share of employee benefits), travel expenses (including per diem expenses), and other incidental expenses incurred by the inspectors in performing these services. The plant protection service would be required to deposit a certified or cashier's check to the Animal and Plant Health Inspection Service (APHIS) for the amount of these costs, as estimated by PPQ. If the deposit did not meet all costs incurred by PPQ, the agreement would further require the plant protection service to deposit with APHIS a certified or cashier's check for the amount of the remaining costs, as determined by PPQ, before completion of the inspection.

Requiring payment of costs in advance is necessary to help defray the costs to PPQ of providing inspection services in the exporting country.

(2) A cooperative agreement would require the plant protection service to ensure that certain conditions for importation of the fruit are met before the fruit is shipped to the United States. These conditions, which are discussed below, are intended to ensure that apples and pears presented to PPQ for preclearance inspection have a very low rate of rejection because of insect pests. The cooperative agreement woud help ensure that these conditions are met by placing responsibility with the plant protection service.

Requirements of the Cooperative Agreement

Under the proposed cooperative agreement between PPQ and a plant protection service, the plant protection service would agree that:

(1) Officials of the plant protection service will survey each orchard producing apples or pears for shipment to the United States at least two times between the time of spring blossoming and harvest and:

If the officials find any leaf mines that suggest the presence of *Leucoptera malifoliella* in an orchard, they must reject any fruit harvested from that orchard during that growing season for shipment to the United States. This requirement would help ensure that fruit presented for importation into the United States would be free of *Leucoptera malifoliella.*

If the officials find evidence in an orchard of any other plant pest referred to in proposed paragraph (g), they must ensure that the orchard and all other orchards within 1 kilometer of the orchard are treated for that pest with a pesticide approved by the United States Environmental Protection Agency, in accordance with label directions and under the direction of the national plant protection service. We believe this treatment, if applied as required, would be sufficient to significantly reduce pests in the producing orchard for that growing season.

If the officials determine that the treatment program has not been applied as required or is not controlling a plant pest in the orchard, they must reject any fruit harvested from that orchard during that growing season for shipment to the United States. This requirement would help ensure that fruit presented for shipment to the United States does not present a significant risk of carrying insect pests.

(2) The apples or pears must be identified with the orchard from which they are harvested (the producing orchard) until the fruit arrives in the United States. This requirement would enable us to trace the source of any insect pests to an orchard and to reject all other fruit from that orchard for the remainder of that shipping season.

(3) The apples or pears must be processed and inspected for insects in packing sheds as follows:

A grower lot is all fruit delivered for processing from a single orchard at a given time. Packing shed technicians must inspect each grower lot upon arrival of the grower lot at the packing shed. They must examine all fruit in one carton on every third pallet (there are approximately 42 cartons to a pallet), or at least 80 apples or pears in every third bin (if the fruit is not in cartons on pallets). This sampling procedure would help ensure a high probability that any insect pests on the fruit would be discovered. If the technicians find any live larva or chrysalis of *Leucoptera malifoliella,* they must reject the entire grower lot for shipment to the United States and the plant protection service must reject for shipment any additional fruit from the producing orchard for the remainder of the shipping season. Rejection is the only alternative upon finding *Leucoptera malifoliella* since no treatment exists that will eradicate this pest. This requirement would help ensure that apples and pears presented for shipment to the United States are free of that pest.

(4) The apples or pears must be sorted, sized, packed, and otherwise handled in the packing sheds on grading and packing lines used solely for fruit intended for shipment to the United States, or, if on grading and packing lines used previously for other fruit, only after the lines have been washed with water. This requirement would help ensure that apples and pears presented for shipment to the United States are not contaminated in the packing shed by pests that may carried by other fruit.

(5) During packing operations at the packing sheds, all apples and pears must be inspected for insect pests as follows:

All fruit in each grower lot must be inspected at each of two stations on the packing line by packing shed technicians. In addition, one carton from every pallet in each grower lot must be inspected by officials of the plant protection service. If the inspections reveal any live larva or chrysalis of *Leucoptera milifoliella,* the entire grower lot must be rejected for shipment to the United States, and the plant protection service must reject for shipment any additional fruit from the producing orchard for the remainder of the shipping season. If the inspections reveal any other insect pest referred to in proposed paragraph (g), and a treatment authorized in the Plant Protection and Quarantine Treatment Manual is available, we propose to allow the fruit to remain eligible for shipment to the United States if all the fruit in the grower lot is treated for that pest under the supervision of a PPQ inspector, because the pests would be destroyed. However, if the grower lot is not treated in this manner, or if a plant pest is found for which no treatment authorized in the Plant Protection and

Quarantine Treatment Manual is available, each grower lot would be rejected for shipment to the United States.

Again, these requirements would help ensure that fruit presented for shipment to the United States would not present a significant risk of carrying injurious plant pests.

(6) Apples or pears that pass inspection at approved packing sheds must be presented to PPQ inspectors for preclerance inspection or for inspection in the United States, as explained above. This requirement is necessary to ensure that the fruit qualifies for shipment to the United States.

(7) Apples and pears presented for inspection must be identified with the packing shed where they were processed and this identity must be maintained until the apples or pears arrive in the United States. This requirement would enable us to trace infested fruit to a particular packing shed. Tracing to the packing shed is necessary because repeated interceptions of infested fruit from a particular packing shed would indicate an unacceptable pest risk associated with fruit from that packing shed and may lead to disqualification of the packing shed for the remainder of the shipping season.

(8) Facilities for preclearance inspections must be provided in that country at a site acceptable to PPQ. This requirement is necessary to ensure that PPQ inspectors have adequate inspection facilities in which to perform the required services.

(9) Any apples or pears rejected for shipment to the United States may not, under any circumstances, be presented again for shipment to the United States. These apples or pears would present an unacceptable risk of introducing insect pests into the United States.

Pre-clearance Inspection

As explained earlier, we propose to usually require apples and pears to be inspected in the exporting country by PPQ inspectors. We propose to require that inspection units contain a minimum of 6,000 cartons of apples or pears, which may represent multiple grower lots from different packing sheds. To send PPQ inspectors to Europe for fewer than 6,000 cartons would not be economical; also, inspection units of at least 6,000 cartons would give exporters ample reason to ensure that their product is pest free, since a finding of even one carton infested with a live larva or chrysalis of *Leucoptera malifoliella* would cause PPQ to reject the entire inspection unit for shipment to the United States.

We propose to allow apples or pears in any inspection unit to be shipped to the United States only if the inspection unit passes inspection as follows:

(1) Inspectors would examine, fruit by fruit, a biometrically designed statistical sample of 250 cartons drawn from each inspection unit.

This sample would ensure a very high probability that any insect pests in the inspection unit would be discovered by PPQ inspectors.

If the inspectors were to find any live larva or chrysalis of *Leucoptera malifoliella*, they would reject the entire inspection unit for shipment to the United States. The inspectors also would reject for shipment any additional fruit from the producing orchard for the remainder of the shipping season. However, fruit from other orchards represented in the rejected inspection unit would not be affected for the remainder of the shipping season since there would be no reason to believe that these orchards were infested with *Leucoptera malifoliella*.

Additionally, if inspectors reject any three inspection units because of *Leucoptera malifoliella* on fruit processed by a single packing shed in a single shipping season, no additional fruit from that packing shed would be accepted for shipment to the United States for the remainder of that shipping season. This requirement would ensure that fruit presented for shipment to the United States has a low risk of introducing insect pests into the United States.

If the inspectors find evidence of any other insect pest referred to in proposed paragraph (g), and an authorized treatment is available, we propose to allow the fruit to be shipped to the United States if all the fruit in the inspection unit is treated for that pest under the supervision of a PPQ inspector because the authorized treatments would destroy the pest. However, if the entire inspection unit is not treated in this manner, or if a plant pest is found for which no authorized treatment is available, the inspectors would reject the entire inspection unit for shipment to the United States. Rejection of an inspection unit because of pests other than *Leucoptera malifoliella* would not be cause for rejecting additional fruit from an orchard or packing shed.

Apples and pears precleared for shipment to the United States would not be inspected again in the United States (except as necessary to ensure that the fruit has been precleared) unless the preclearance program with the exporting country were terminated in accordance with proposed paragraph (e). If the preclearance program were terminated with any country, precleared fruit in transit to the United States at the time of termination would be spot-checked by PPQ inspectors upon arrival in the United States for evidence of insect pests referred to in proposed paragraph (g). If any live larva or chrysalis of *Leucoptera malifoliella* is found in any carton of fruit, the inspectors would reject that carton and all other cartons in the same shipment that are from the same producing orchard. In addition, the remaining cartons of fruit in the shipment would be reinspected as an inspection unit in accordance with the preclearance procedures in proposed paragraph (d).

Termination of Pre-Clearance Program

Rejection of fruit because of pests found during preclearance inspections could be cause for termination of the preclearance program in a country. We propose to terminate the preclearance program in a country based on rates of rejection, specified in proposed paragraph (e), of inspection units. These rates are statistically designed and indicate that conditions for shipment of apples or pears are not being met in the exporting country. Terminating the preclearance program would stop shipments of apples or pears from that country for the remainder of that shipping season. This action would ensure that fruits with an unacceptable risk of introducing insect pests are not allowed into the United States.

Treatment for Mediterranean Fruit Fly

In addition to all other requirements for importation, apples and pears would be eligible for importation into the United States from France, Italy, Portugal, or Spain only if the fruit were cold treated for the Mediterranean fruit fly in accordance with § 319.56–2d of this subpart. This requirement is necessary because the Mediterranean fruit fly is known to attack apples and pears in these countries. Cold treatment as required would destroy this pest.

Executive Order 12291 and Regulatory Flexibility Act

We are issuing this proposed rule in conformance with Executive Order 12291, and we have determined that it is not a "major rule." Based on information compiled by the Department, we have determined that this proposed rule would have an effect on the economy of less than $100 million; would not cause a major increase in costs or prices for consumers, individual industries, federal, state, or local government agencies, or geographic regions; and would not cause a significant adverse

effect on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

Based on interest expressed in importing apples from Europe, we anticipate that approximately 15 million pounds of apples will be imported from France during fiscal year 1988 if this rule is adopted. We expect no apples from other countries covered by this proposed rule and no pears. Apple production in the United States is estimated at approximately 8 billion pounds per year. Although there are probably many small business entities in the United States that grow, pack, or sell apples, we do not believe this proposed rule would have a significant economic impact on them because the volume of French apples expected to be imported is relatively low and the French apples would compete equally in the market place with U.S.-produced apples. We believe that importers of French apples also import a variety of other fruits and vegetables and that importations of the French apples would constitute a small portion of their total importations.

Under these circumstances, the Administrator of the Animal and Plant Health Inspection Service has determined that this action would not have a significant economic impact on a substantial number of small entities.

Executive Order 12372

This program/activity is listed in the Catalog of Federal Domestic Assistance under No. 10.025 and is subject to the provisions of Executive Order 12372; which requires intergovernmental consultation with state and local officials. (See 7 CFR Part 3015, Subpart V.)

Paperwork Reduction Act

This proposed rule contains no information collection or recordkeeping requirements under the Paperwork Reduction Act of 1980 (44 U.S.C. 3501 *et seq.*).

Comment Period

Mr. William F. Helms, Deputy Administrator, Plant Protection and Quarantine, has determined that this rulemaking proceeding should be expedited by allowing a 15-day comment period on the proposal. Importers in the United States have expressed interest in importing apples from France this season, and the shipping season for those apples has already begun. Meanwhile, exporters in France must quickly determine whether their fruit will be marketed. A longer comment period could cause substantial economic losses for importers.

List of Subjects in 7 CFR Part 319

Agricultural commodities, Fruit, Imports, Plant diseases, Plant pests, Plants (agriculture), Quarantine, Transportation.

PART 319—FOREIGN QUARANTINE NOTICES

Accordingly, we propose to amend 7 CFR 319.56 as follows:

1. The authority citation for Part 319 continues to read as follows:

Authority: 7 U.S.C. 150dd, 150ee, 150ff, 151–167; 7 CFR 2.17, 2.51, and 371.2(c).

2. In § 319.56, a new section, § 319.56–2r, would be added to read as follows:

§ 319.56–2r Administrative instructions governing the entry of apples and pears from certain countries in Europe.

(a) *Importations allowed.* Pursuant to § 319.56(c), the Deputy Administrator has determined that the following fruits may be imported into the United States in accordance with this subsection and other applicable provisions of this subpart:

(1) Apples from Belgium, Denmark, France, Great Britain, Italy, the Netherlands, Northern Ireland, Norway, Portugal, the Republic of Ireland, Sweden, Switzerland, and West Germany;

(2) Pears from Belgium, France, Great Britain, Italy, the Netherlands, Portugal, and Spain.

(b) *Trust fund agreement.* Except as provided in paragraph (h) of this section, the apples or pears may be imported only if the national plant protection service of the exporting country (referred to in this subsection as the plant protection service) has entered into a trust fund agreement with Plant Protection and Quarantine (PPQ) for that shipping season. This agreement requires the plant protection service to pay in advance all estimated costs incurred by PPQ in providing the preclearance inspections prescribed in paragraph (d) of this section. These costs will include administrative expenses incurred in conducting the inspection services; and all salaries (including overtime and the federal share of employee benefits), travel expenses (including per diem expenses), and other incidental expenses incurred by the inspectors in performing these services. The agreement requires the plant protection service to deposit a certified or cashier's check with the Animal and Plant Health Inspection Service (APHIS) for the amount of these costs, as estimated by PPQ. If the deposit is not sufficient to meet all costs incurred by PPQ, the agreement further requires the plant protection service to deposit with APHIS a certified or cashier's check for the amount of the remaining costs, as described by PPQ, before the inspection will be completed.

(c) *Cooperative agreement.* The apples or pears may be imported only if the plant protection service has entered into a cooperative agreement with PPQ for shipping season. Under the cooperative agreement, the plant protection service agrees that:

(1) Officials of the plant protection service will survey each orchard producing apples or pears for shipment to the United States at least two times between the time of spring blossoming and harvest. If the officials find any leaf mines that suggest the presence of *Leucoptera malifoliella* in an orchard, the officials must reject any fruit harvested from that orchard during that growing season for shipment to the United States. If the officials find evidence in an orchard of any other plant pest referred to in paragraph (g) of this section, they must ensure that the orchard and all other orchards within 1 kilometer of that orchard will be treated for that pest with a pesticide approved by the United States Environmental Protection Agency, in accordance with label directions and under the direction of the plant protection service. If the officials determine that the treatment program has not been applied as required or is not controlling the plant pest in the orchard, they must reject any fruit harvested from that orchard during that growing season for shipment to the United States.

(2) The apples or pears must be identified with the orchard from which they are harvested (the producing orchard) until the fruit arrives in the United States.

(3) The apples or pears must be processed and inspected in the approved packing sheds as folows:

(i) Upon arrival at the packing shed, the apples or pears must be inspected for insect pests as follows: For each grower lot (all fruit delivered for processing from a single orchard at a given time), packing shed technicians must examine all fruit in one carton on every third pallet (there are approximately 42 cartons to a pallet), or at least 80 apples or pears in every third bin (if the fruit is not in cortons on pallets). If they find any live larva or chrysalis of *Leucoptera malifoliella*, they must reject the entire grower lot for shipment to the United States, and the plant protection service must reject for shipment any additional fruit from the

producing orchard for the remainder of the shipping season.

(ii) The apples or pears must be sorted, sized, packed, and otherwise handled in the packing sheds on grading and packing lines used solely for fruit intended for shipment to the United States, or, if on grading and packing lines used previously for other fruit, only after the lines have been washed with water.

(iii) During packing operations, apples and pears must be inspected for insect pests as follows: All fruit in each grower lot must be inspected at each of two inspection stations on the packing line by packing shed technicians. In addition, one carton from every pallet in each grower lot must be inspected by officials of the plant protection service. If the inspections reveal any live larva or chrysalis of *Leucoptera malifoliella*, the entire grower lot must be rejected for shipment to the United States, and the plant protection service must reject for shipment any additional fruit from the producing orchard for the remainder of that shipping season. If the inspections reveal any other insect pest referred to in paragraph (g) of this section, and a treatment authorized in the Plant Protection and Quarantine Treatment Manual is available, the fruit will remain eligible for shipment to the United States if the entire grower lot is treated for the pest under the supervision of a PPQ inspector. However, if the entire grower lot is not treated in this manner, or if a plant pest is found for which no treatment authorized in the Plant Protection and Quarantine Treatment Manual is available, the entire grower lot will be rejected for shipment to the United States.

(4) Apples or pears that pass inspection at approved packing sheds must be presented to PPQ inspectors for preclearance inspection as prescribed in paragraph (d) of this section or for inspection in the United States as prescribed in paragraph (h) of this section.

(5) Apples and pears presented for preclearance inspection must be identified with the packing shed where they were processed, as well as with the producing orchard, and this identity must be maintained until the apples or pears arrive in the United States.

(6) Facilities for the preclearance inspections prescribed in paragraph (d) of this section must be provided in the exporting country at a site acceptable to PPQ.

(7) Any apples or pears rejected for shipment into the United States may not, under any circumstances, be presented again for shipment to the United States.

(d) *Preclearance inspection.* Preclearance inspection will be conducted in the exporting country by PPQ inspectors. Preclearance inspection will be conducted for a minimum of 6,000 cartons of apples or pears, which may represent multiple grower lots from different packing sheds. The cartons examined during any given preclearance inspection will be known as an inspection unit. Apples or pears in any inspection unit may be shipped to the United States only if the inspection unit passes inspection as follows:

(1) Inspectors will examine, fruit by fruit, a biometrically designed statistical sample of 250 cartons drawn from each inspection unit.

(i) If inspectors find any live larva or chrysalis of *Leucoptera malifoliella*, they will reject the entire inspection unit for shipment to the United States. The inspectors also will reject for shipment any additional fruit from the producing orchard for the remainder of the shipping season. However, other orchards represented in the rejected inspection unit will not be affected for the remainder of the shipping season because of that rejection. Additionally, if inspectors reject any three inspection units in a single shipping season because of *Leucoptera malifoliella* on fruit processed by a single packing shed, no additional fruit from that packing shed will be accepted for shipment to the United States for the remainder of that shipping season.

(ii) If the inspectors find evidence of any other plant pest referred to in paragraph (g) of this section, and a treatment authorized in the Plant Protection and Quarantine Treatment Manual is available, fruit in the inspection unit will remain eligible for shipment to the United States if the entire inspection unit is treated for the pest under the supervision of a PPQ inspector. However, if the entire inspectional unit is not treated in this manner, or if a plant pest is found for which no treatment authorized in the Plant Protection and Quarantine Treatment Manual is available, the inspectors will reject the entire inspection unit for shipment to the United States. Rejection of an inspection unit because of pests other than *Leucoptera malifoliella* will not be cause for rejecting additional fruit from an orchard or packing shed.

(iii) Apples and pears precleared for shipment to the United States as prescribed in this paragraph will not be inspected again in the United States (except as necessary to ensure that the fruit has been precleared) unless the preclearance program with the exporting country is terminated in accordance with paragraph (e) of this section. If the preclearance program is terminated with any country, precleared fruit in transit to the United States at the time of termination will be spot-checked by PPQ inspectors upon arrival in the United States for evidence of plant pests referred to in paragraph (g) of this section. If any live larva or chrysalis of *Leucoptera malifoliella* is found in any carton of fruit, inspectors will reject that carton and all other cartons in that shipment that are from the same producing orchard. In addition, the remaining cartons of fruit in that shipment will be reinspected as an inspection unit in accordance with the preclearance procedures prescribed in paragraph (d) of this section.

(e) *Termination of preclearance programs.* Rejection of fruit because of pests found during preclearance inspections may be cause for termination of the preclearance program in a country. Termination of the preclearance program will stop shipments of apples or pears from that country for the remainder of that shipping season. Termination of the preclearance program in any country will be based on rates of rejection of inspection units as follows:

(1) Termination because of findings of *Leucoptera malifoliella*. The preclearance program will be terminated with a country when, in one shipping season, inspection units are rejected because of *Leucoptera malifoliella* as follows:

(i) 5 inspection units in sequence among inspection units 1–20, or a total of 8 or more of the inspection units 1–20,

(ii) 5 inspection units in sequence among inspection units 21–40, or a total of 10 or more of the inspection units 1–40;

(iii) 5 inspection units in sequence among inspection units 41–60, or a total of 12 or more of the inspection units 1–60;

(iv) 5 inspection units in sequence among inspection units 61–80, or a total of 14 or more of the inspection units 1–80;

(v) 5 inspection units in sequence among inspection units 81–100, or a total of 16 or more of the inspection units 1–100; or

(vi) 5 inspection units in sequence among inspection units 101–120, or a total of 18 or more of the inspection units 1–120.

(Sequence can be continued in increments of 20 inspection units by increasing the number of rejected inspection units by 2.)

(2) Termination because of findings of other plant pests. The preclearance

program will be terminated with a country when, in one shipping season, inspection units are rejected because of other insect pests as follows:

(i) 10 or more of the inspection units 1–20;

(ii) 15 or more of the inspection units 1–40;

(iii) 20 or more of the inspection units 1–60;

(iv) 25 or more of the inspection units 1–80;

(v) 30 or more of the inspection units 1–100; or

(vi) 35 or more of the inspection units 1–120.

(Sequence can be continued in increments of 20 inspection units by increasing the number of rejected inspection units by 5.)

(f) *Cold treatment.* In addition to all other requirements of this subsection, apples or pears may be imported into the United States from France, Italy, Portugal, or Spain only if the fruit is cold treated for the Mediterranean fruit fly in accordance with § 319.56–2d of this subpart.

(g) *Plant pests; authorized treatments.* (1) Applies from Belgium, Denmark, France, Great Britain, Italy, the Netherlands, Northern Ireland, Norway, Portugal, the Republic of Ireland, Sweden, Switzerland, and West Germany; and pears from Belgium, France, Great Britain, Italy, the Netherlands, Portugal, and Spain may be imported into the United States only if they are found free of the following pests or, if an authorized treatment is available, they are treated for the pest under the supervision of a PPQ inspector: the pear leaf blister moth (*Leucoptera malifoliella* (O.G. Costa)), the plum fruit moth (Cydia funebrana (Treitschke) (Tortricidae)), the summer fruit tortrix moth *Adoxophyes orana* (Fischer von Rosslertamm)(Tortricidae)), a leaf roller (*Argyrotaenia pulchellana* (Haworth) (Tortricidae)), and other insect pests that do not exist in the United States or that are not widespread in the United States.

(2) Authorized treatments are listed in the Plant Protection and Quarantine Treatment Manual. The Plant Protection and Quarantine Treatment Manual is incorporated by reference. For the full identification of this standard, see § 300.1 of this chapter, "Materials incorporated by reference."

(h) *Inspection in the United States.* Notwithstanding provisions to the contrary in paragraphs (c) and (d) of this section, the Deputy Administrator may allow apples or pears imported under this subsection to be inspected at a port of arrival in the United States, in lieu of a preclearance inspection, under the following conditions:

(1) The Deputy Administrator has determined that inspection can be accomplished at the port of arrival without increasing the risk of introducing insect pests into the United States;

(2) Each pallet of apples or pears must be completely enclosed in plastic, to prevent the escape of insects, before it is offloaded at the port of arrival;

(3) The entire shipment of apples or pears must be offloaded and moved to an enclosed warehouse, where adequate inspection facilities are available, under the supervision of PPQ inspectors.

(4) The Deputy Administrator must determine that a sufficient number of inspectors are available at the port of arrival to perform the services required.

(5) The method of inspection will be the same as prescribed in paragraph (d) of this section for preclearance inspections.

Done in Washington, DC, this 13th day of October, 1987.

W.F. Helms,

Deputy Administrator, Plant Protection and Quarantine, Animal and Plant Health Inspection Service.

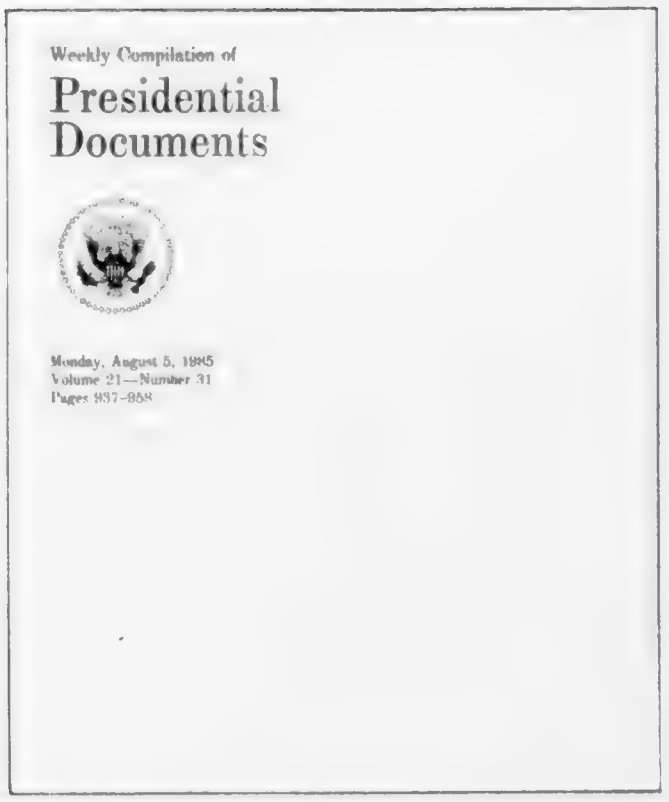
The authentic text behind the news . . .

The Weekly Compilation of **Presidential Documents**

Administration of Ronald Reagan



This unique service provides up-to-date information on Presidential policies and announcements. It contains the full text of the President's public speeches, statements, messages to Congress, news conferences, personnel appointments and nominations, and other Presidential materials released by the White House.

The Weekly Compilation carries a Monday dateline and covers materials released during the preceding week. Each issue contains an Index of Contents and a Cumulative Index to Prior Issues.

Separate indexes are published periodically. Other features include lists of acts approved by the President and of nominations submitted to the Senate, a checklist of White House press releases, and a digest of other Presidential activities and White House announcements.

Published by the Office of the Federal Register, National Archives and Records Administration

FEDERAL REGISTER Published daily, Monday through Friday, (not published on Saturdays, Sundays, or on official holidays), by the Office of the Federal Register, National Archives and Records Administration, Washington, DC 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402.

The **Federal Register** provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders and Federal agency documents having general applicability and legal effect, documents required to be published by act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The **Federal Register** will be furnished by mail to subscribers for $340.00 per year, or $170.00 for 6 months, payable in advance. The charge for individual copies is $1.50 for each issue, or $1.50 for each group of pages as actually bound. Remit check or money order, made payable to the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402.

There are no restrictions on the republication of material appearing in the **Federal Register**.

Questions and requests for specific information may be directed to the telephone numbers listed under INFORMATION AND ASSISTANCE in the READER AIDS section of this issue.

How To Cite This Publication: Use the volume number and the page number. Example: 52 FR 12345.

Rules and Regulations

Federal Register
Vol. 52, No. 199
Thursday, October 15, 1987

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect, most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.
The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each week.

OFFICE OF PERSONNEL MANAGEMENT

5 CFR Parts 315 and 316

Noncompetitive Appointment of Certain Former Overseas Employees

AGENCY: Office of Personnel Management.

ACTION: Final regulations.

SUMMARY: The Office of Personnel Management (OPM) is issuing final regulations to permit eligible family members of U.S. Government personnel who have served overseas to be appointed noncompetitively to Stateside civil service positions upon their return. The regulations implement E.O. 12585, which modified the eligibility criteria for appointment.

EFFECTIVE DATE: November 16, 1987.

FOR FURTHER INFORMATION CONTACT: Ed McHugh or Ellen Russell, (202) 632–6817.

SUPPLEMENTARY INFORMATION: On April 30, 1987, OPM published interim regulations in the **Federal Register** (52 FR 15705) to implement Executive Order 12585 of March 3, 1987. The order expands the eligibility of family members for noncompetitive appointment which was first provided under E.O. 12362 in May 1982.

The new Executive order revises the eligibility criteria for noncompetitive appointment. The Order:

- *Reduces* the amount of overseas employment needed to qualify for noncompetitive appointment from 24 months to *18 months;*
- *Increases* the period during which the family member can be hired after returning to the United States from 2 to *3 years* (with provision for further extension in hardship cases);
- Makes family members of *nonappropriated fund employees* who have worked overseas eligible for Stateside employment on the same basis as family members of civilian employees and military personnel; and
- Allows Federal agencies in the United States to waive requirements for a written test when hiring family members for jobs that are similar to those they held overseas.

Eligible candidates for this program must also be U.S. citizens at the time they apply for appointment in the United States and must have received a fully successful or better performance rating for their overseas service. They must provide documentation of their overseas service and family member status when applying for employment in the United States.

The provisions of Executive Order 12585 were effective upon publication of the interim regulations on April 30, 1987. During the comment period we received comments from one agency and one union. Both comments concerned the provision in § 315.608(f) for extending the normal 3-year period of eligibility in situations where a family member is incapacitated for employment or is stationed in an area with no significant Federal employment opportunities. The agency suggested OPM delegate to agencies the authority to make such extensions. The regulation already contains this provision. The union suggested the regulations contain a maximum time limit on such extensions. OPM does not believe this approach is consistent with delegating to agencies the authority to make decisions in individual cases. In addition, since the regulations clearly delineate the conditions under which an individual's period of eligibility can be extended, we do not believe it is necessary to set a maximum time limit.

E.O. 12291, Federal Regulation

I have determined that this is not a major rule as defined under section 1(b) of E.O. 12291, Federal Regulation.

Regulatory Flexibility Act

I certify that this regulation will not have a significant economic impact on a substantial number of small entities because the regulations will only apply to Federal employees.

List of Subjects in 5 CFR Parts 315 and 316

Civil Service Retirement, Federal Employees Group Life Insurance, and Federal Employees Health Benefits Coverage for DC Government Employees

AGENCY: Office of Personnel Management.

ACTION: Final regulations.

SUMMARY: The Office of Personnel Management (OPM) is revising its regulations to reflect the exclusion of the District of Columbia (DC) Government employees first hired on or after October 1, 1987, from Civil Service Retirement coverage, Federal Employees' Group Life Insurance coverage and Federal Employees Health Benefits Program coverage. The Federal Employees' Retirement System Act of 1986 excluded these employees from these and other benefits normally accruing to Federal employees. These final regulations will update OPM's regulations and make them conform with the law as recently amended.

EFFECTIVE DATE: October 15, 1987.

FOR FURTHER INFORMATION CONTACT: John Ray, (202) 632–4634.

SUPPLEMENTARY INFORMATION: Subsections (f), (k), and (l) of section 207 of title II of Pub. L. 99–335, the Federal Employees' Retirement System Act of 1986, enacted on June 6, 1986, specifically excluded individuals "first employed by the government of the District of Columbia" on or after October 1, 1987, from coverage under the Civil Service Retirement System, (CSRS), the Federal Employees' Group Life Insurance (FEGLI) Program, and the

Federal Employees Health Benefits (FEHB) Program, respectively. Therefore, on May 8, 1987, OPM published interim regulations in the **Federal Register** (52 FR 17387) effective on June 8, 1987, to conform the existing regulations to the exclusions cited in the recently enacted law

Two written comments were received during the 60-day comment period. One comment was from a Federal agency. The other comment was from the DC government. Both respondents pointed out that Pub. L. 98–621, enacted on November 8, 1984, the "St. Elizabeths Hospital and District of Columbia Mental Health Services Act", afforded the Federal employees of St. Elizabeths Hospital statutory protection of many of the benefits of Federal employment they enjoyed if they accepted offers of employment with the new administrator to that facility, the DC government.

OPM was aware of this legislation and of the transfer of responsibility for St. Elizabeths Hospital from Federal authority to the DC government. We did not specifically address the Federal employees of St. Elizabeths Hospital in our interim regulations since we knew that the Department of Health and Human Services and the DC government were working together to accomplish this transition and that both parties were aware of the specificity of the law concerning the continuation of certain benefits. However, in view of the concerns expressed by both parties that the lack of a direct reference to St. Elizabeths Hospital employees in our interim regulations might lead to misunderstanding by the affected employees, we are amending the final regulations to address the continuation of retirement and health and life insurance coverage for these employees.

Waiver Of 30-Day Delay In Effective Date Of Final Regulations

Pursuant to section 553(d)(3) of title 5 of the U.S. Code, I find that good cause exists for making these amendments effective in less than 30 days. The general exclusions cited in these regulations were contained in Pub. L. 99–335 that was enacted on June 6, 1986, and have been a matter of law since that time. The specific exemptions for Federal employees of St. Elizabeths Hospital have been in effect since the enactment of Pub. L. 98–621 on November 8, 1984. These regulations are being made effective immediately so that OPM regulations will conform with these laws and to remove any areas of uncertainty concerning the benefits entitlements of Federal employees of Saint Elizabeths Hospital who might be considering job offers from the DC Government.

E.O. 12291, Federal Regulation

I have determined that this is not a major rule as defined under section 1(b) of E.O. 12291, Federal Regulation.

Regulatory Flexibility Act

I certify that these regulations will not have a significant economic impact on a substantial number of small entities because they affect future employees of the District of Columbia government only.

Accordingly, OPM's interim regulations published on May 8, 1987 (52 FR 17387), are adopted as final with the following changes:

PART 831—RETIREMENT

Subpart B—Coverage

1. The authority citation for Subpart B of Part 831 continues to read as follows:

Authority: 5 U.S.C. 8347.

2. In § 831.201, paragraph (g) is revised to read as follows:

§ 831.201 Exclusions from retirement coverage.

* * * * *

(g) Individuals first employed by the government of the District of Columbia on or after October 1, 1987, are excluded from subchapter III of chapter 83 of title 5, United States Code. However, employees of St. Elizabeths Hospital who were hired before January 1, 1984, and who were covered under subchapter III of chapter 83 of title 5, United States Code, and accept offers of employment with the District of Columbia government without a break in service, as provided in section 6 of Pub. L. 98–621, continue to be covered by this Part.

PART 870—BASIC LIFE INSURANCE

Subpart B—Coverage

3. The authority citation for Part 870 continues to read as follows:

Authority: 5 U.S.C. 8716.

4. In § 870.202, paragraph (a)(8) is revised to read as follows:

§ 870.202 Exclusions.

(a) * * *

(8) An individual first employed by the government of the District of Columbia on or after October 1, 1987. However, this exclusion does not apply to employees of St. Elizabeths Hospital who accept offers of employment with the District of Columbia government without a break in service, as provided in section 6 of Pub. L. 98–621.

PART 890—FEDERAL EMPLOYEES HEALTH BENEFITS PROGRAM

5. The authority citation for Part 890 continues to read as follows:

Authority: 5 U.S.C. 8913; Sec. 890.102 also issued under 5 U.S.C. 1104 and sec. 3(5) of Pub. L. 95–454, 92 Stat. 1112; Sec. 890.301 also issued under 5 U.S.C. 8905(b); Sec. 890.302 also issued under 5 U.S.C. 8901(5) and 5 U.S.C. 8901(9); Sec. 890.701 also issued under 5 U.S.C. 8902(m)(2); Subpart H also issued under Title I of Pub. L. 98–615, 98 Stat. 3195, and Title II of Pub. L. 99–251, 100 Stat. 20.

6. In § 890.102, paragraph (c)(8) is revised to read as follows:

§ 890.102 Coverage.

* * * * *

(c) * * *

(8) An individual first employed by the government of the District of Columbia on or after October 1, 1987. However, this exclusion does not apply to employees of St. Elizabeths Hospital who accept offers of employment with the District of Columbia government without a break in service, as provided in section 6 of Pub. L. 98–621.

BILLING CODE 6325–01–M

FEDERAL RETIREMENT THRIFT INVESTMENT BOARD

5 CFR Part 1660

Allocation of Fiduciary Responsibility

AGENCY: Federal Retirement Thrift Investment Board.

ACTION: Interim rule with request for comments.

SUMMARY: The Federal Retirement Thrift Investment Board (the Board) was established by Pub. L. 99–335 (June 6, 1986), the Federal Employees' Retirement System Act of 1986 (codified principally at 5 U.S.C. 8401 through 8479), as amended by Pub. L. 99–509, the Omnibus Budget Reconciliation Act of 1986, and Pub. L. 99–556, the Federal Employees' Retirement System Technical Corrections Act of 1986, to administer the Thrift Savings Plan for federal employees. Regulations of the Board are contained in Title 5, CFR, Chapter VI, Parts 1600–1699. The Executive Director of the Board is publishing in Part 1660 interim regulations concerning the procedures for allocation of fiduciary responsibilities by Fiduciaries of the Plan.

DATES: Interim rules effective October 15, 1987; comments must be received on or before November 15, 1987.

ADDRESS: Comments may be sent to: James B. Petrick, Federal Retirement Thrift Investment Board, Post Office Box 18899, Washington, DC 20036.

FOR FURTHER INFORMATION CONTACT: James B. Petrick, (202) 653–2573.

SUPPLEMENTARY INFORMATION: Section 1660.1 contains definitions of the terms used in this Part. Section 1660.2 contains general provisions as to the powers, duties and responsibilities of Plan Fiduciaries. Section 1660.3 provides that a Fiduciary may allocate one or more fiduciary responsibilities to persons described in 8477(a)(3) (C) and (D). Section 1660.4 prescribes the procedures for an allocation under § 1660.3. Section 1660.5 describes the legal effect of an allocation.

Regulatory Flexibility Act

I certify that these regulations will not have a significant economic impact on a substantial number of small entities. The regulations will affect only internal government procedures related to the Thrift Savings Plan.

Paperwork Reduction Act

I certify that these regulations do not require additional reporting under the criteria of the Paperwork Reduction Act of 1980.

Waiver of Notice of Proposed Rulemaking and 30-day Delay of Effective Date

Pursuant to 5 U.S.C. 553(b)(B) and (d)(3), I find that good cause exists for waiving the general notice of proposed rulemaking and for making these regulations effective in less than 30 days. These regulations are being published as interim regulations because the Thrift Savings Plan is now in operation and it is necessary to have procedures in place as soon as possible for the allocation of fiduciary responsibilities by Fiduciaries of the Plan.

List of Subjects in 5 CFR Part 1660

Employee benefit plans, Government employees, Retirement, Pensions.

Federal Retirement Thrift Investment Board.

Francis X. Cavanaugh,

Executive Director.

Title 5 of Code of Federal Regulations is amended to add Part 1660 to Chapter VI to read as follows:

CHAPTER IV—FEDERAL RETIREMENT THRIFT INVESTMENT BOARD

PART 1660—ALLOCATION OF FIDUCIARY RESPONSIBILITY

Subpart A—General

1660.1 Definitions.
1660.2 General.

Subpart B—Allocation Procedures

1660.3 Allocation of fiduciary duties.
1660.4 Procedures for allocation.
1660.5 Effect of allocation.

Authority: 5 U.S.C. 8477(e)(1)(E), 8474(b)(5); Section 114(a) of Pub. L. 99–556 (Oct. 27, 1986).

Subpart A—General

§ 1660.1 Definitions.

Terms used in this Part shall have the following meanings:

"Act" means the Federal Employees' Retirement System Act of 1986, as amended.

"Allocation of fiduciary duty" means the process whereby the allocating Fiduciary is legally relieved of reponsibility for the errors and omissions of the receiving Fiduciary in carrying out the allocated duty or duties.

"Board" means the Federal Retirement Thrift Investment Board established pursuant to 5 U.S.C. 8472.

"Executive Director" means the Executive Director of the Federal Retirement Thrift Investment Board as defined in 5 U.S.C. 8401(13) and 5 U.S.C. 8474.

"Fiduciary" means a fiduciary as defined in 5 U.S.C. 8477(a)(3) (A), (B), (C), and (D).

§ 1660.2 General.

Any Fiduciary shall exercise only the powers, duties, responsibilities and obligations specifically provided under the provisions of the Act and the regulations issued pursuant thereto, or properly allocated pursuant to this Part. A Fiduciary may act in more than one fiduciary capacity. A Fiduciary shall be solely responsible for the proper exercise of that Fiduciary's own powers, duties, responsibilities and obligations only to the extent provided by the aforesaid Act and regulations or as properly allocated pursuant to this Part, and shall not be responsible for any act or failure to act of any other Fiduciary or other person except as provided therein. A Fiduciary may rely on any other Fiduciary to meet the obligations and responsibilities and exercise all duties and powers in accordance with the provisions of the aforesaid Act and regulations, and is not required, except as provided by the aforesaid Act and regulations, to inquire into the propriety of any action or lack thereof by any other Fiduciary. No Fiduciary guarantees the Thrift Savings Fund against investment loss or depreciation in asset value.

Subpart B—Allocation Procedures

§ 1660.3 Allocation of Fiduciary Duties.

Subject to the limitations contained in this Part, a Fiduciary may allocate one or more fiduciary responsibilities to a person or persons described in subparagraph (C) or (D) of 5 U.S.C. 8477 (a)(3).

§ 1660.4 Procedures for Allocation.

An allocation permitted by § 1660.3 shall be accomplished only in accordance with the following procedures:

(a) The allocation shall be in writing and shall be signed by the Executive Director and acknowledged by the receiving Fiduciary.

(b) The allocation shall set forth the duties and responsibilities allocated, either in the body of the allocation, or by reference to another ducument.

§ 1660.5 Effect of Allocation.

A Fiduciary who allocates a responsibility to another Fiduciary pursuant to this Part shall not be liable for the acts or omissions of such other Fiduciary in carrying out the allocated duties and responsibilities, except as otherwise provided in the Act.

DEPARTMENT OF AGRICULTURE

Agricultural Marketing Service

7 CFR Parts 932 and 944

Olives Grown in California; Establishment of Grade and Size Requirements for Limited Use Styles of Processed Olives for the 1987–88 Season, Changes in Incoming and Outgoing Size Requirements, and Conforming Changes in the Olive Import Regulation

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Interim final rule with request for comments.

SUMMARY: This rule establishes grade and size requirements for processed olives used in the production of limited use styles of olives such as wedges, halves, slices or segments. The olives to be used for these purposes are too small to be desirable for use as whole or pitted processed olives. However, they are satisfactory for use in the production of limited use styles where the form of the olives is changed, and their use can help the California olive industry meet the increasing market needs of the food service industry. This action also changes certain incoming and outgoing size ranges to allow smaller olives to be included in limited use styles and whole and pitted olives. Similar changes will be made in the import regulation to conform with the domestic requirements.

DATES: Interim final rule effective upon publication. Comments which are received by November 16, 1987 will be considered prior to issuance of the final rule.

ADDRESSES: Written comments concerning this rule should be submitted in triplicate to the Docket Clerk, F&V Division, AMS, USDA, P.O. Box 96456, 2085–S, Washington, DC 20090–6456. All comments submitted will be made available for public inspection in the above office during regular business hours. Comments should reference the date and page number of this issue of the **Federal Register**.

FOR FURTHER INFORMATION CONTACT: Ronald L. Cioffi, Chief, Marketing Order Administration Branch, F&V Division, AMS, USDA, P.O. Box 96458, Room 2523–S, Washington, DC 20090–6456; telephone 202–447–5697.

SUPPLEMENTARY INFORMATION: This interim final rule is issued under Marketing Order No. 932 (7 CFR Part 932), as amended (the order), regulating the handling of olives grown in California. This order is effective under the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601–674), hereinafter referred to as the Act.

This rule has been reviewed under Executive Order 12291 and Departmental Regulation 1512–1 and has been determined to be a "non-major" rule under criteria contained therein.

Pursuant to requirements set forth in the Regulatory Flexibility Act (RFA), the Administrator of the Agricultural Marketing Service has considered the economic impact of this action on small entities.

The purpose of the RFA is to fit regulatory actions to the scale of business subject to such actions in order that small businesses will not be unduly or disproportionately burdened. Marketing orders issued pursuant to the Act and rules issued thereunder, are unique in that they are brought about through group action of essentially small entities acting on their own behalf. Thus, both statutes have small entity orientation and compatibility.

There are approximately seven handlers of California olives subject to regulation under the olive marketing order and approximately 1,390 producers in California. Approximately 26 importers of olives will be subject to the olive import regulation. Small agricultural producers have been defined by the Small Business Administration (13 CFR 121.2) as those having annual gross revenues for the last three years of less than $100,000, and small agricultural service firms are defined as those whose gross annual receipts are less than $3,500,000. Most but not all of the olive producers and importers may be classified as small entities. None of the olive handlers may be classified as small entities.

Nearly all of the olives grown in the United States are produced in California. The growing areas are scattered throughout California with most of the commercial production coming from inland valleys. About 75 percent of the production comes from the San Joaquin Valley and 25 percent from the Sacramento Valley.

Olive production has fluctuated from a low of 24,200 tons in the 1972–73 crop year to a high of 146,500 tons in the 1982–83 crop year. Last year's production totaled 107,900 tons. The various varieties of olives produced in California have alternate bearing tendencies with high production one year and low the next. Because of this and the extreme variance in the size of the 1987–88 crop the industry expects the crop to be slightly more than 63,000 tons.

The primary use of California olives is for canned ripe olives which are eaten out of hand as hors d'oeuvres or used as an ingredient in cooking. The canned ripe olive is essentially a domestic market. Very few California olives are exported.

This action allows the use of small olives in limited use styles such as slices, wedges, and halves rather than whole or pitted processed olives. It has long been accepted and established by the industry that these smaller sizes are not desirable for whole or pitted use because their flesh to pit ratio is too low. For the 1987–88 crop year, handlers will be permitted to use a higher percentage of undersize olives than last year to meet increasing needs for sliced, wedged, chopped, and halved olives.

Natural condition (unprocessed) olives received from growers must meet incoming sizes requirements. The sizes and quality of olives delivered by growers form the basis by which they are paid for their olives. Processed olives must meet outgoing size and quality requirements to assure consumers of a product of uniform size and quality. This action will allow handlers to market more olives than would be permitted in the absence of these relaxations in size requirements. This additional opportunity is provided to maximize the use of the California olive supply, facilitate market expansion, and benefit both growers and handlers.

This action modifies §§ 932.151, 932,152, and 932.153 of Subpart—Rules and Regulations (7 CFR 932.108–932.161) and establishes grade and size regulations for 1987–88 crop year limited use size olives and allows more small olives to be used in certain sizes of canned whole or pitted olives. These rules are issued pursuant to §§ 932.51 and 932.52 of the order. This action also makes necessary conforming changes in the olive import regulation (Olive Regulation 1, 7 CFR 944.401). The import regulation is issued pursuant to section 8e of the Act. Section 8e provides that whenever grade, size, quality, or maturity provisions are in effect for specified commodities, including olives, under a marketing order the same requirements must be imposed on the imports. It is AMS's view that this action will benefit importers because this action permits importers to use larger percentages of undersized limited use size olives and allows more small olives to be used in certain sizes of canned whole pitted olives.

Section 932.52(a)(3) provides that processed olives smaller than the sizes prescribed for whole and pitted styles may be used for limited uses if recommended annually by the

committee and approved by the Secretary. The sizes are specified in terms of minimum weights for individual olives in the various size categories. The section further provides for the establishment of size tolerances.

To enhance supplies and allow handlers to take advantage of the strong market for halved, segmented, sliced, and chopped canned ripe olives, the committee recommended that grade and size requirements again be established for limited use olives for the 1987–88 crop year (August 1–July 31). The grade requirements are the same as those applied during the 1986–87 crop year, as are the sizes. However, the size tolerances have been increased for the various categories to make more undersize olives available for use in the production of limited use styles. The size tolerance specified in §§ 932.153(b)(2), and (3) are increased from 25 percent to 35 percent; the tolerances in §§ 932.153(b)(4) and (5) are increased from 20 percent to 35 percent. Permitting handlers to use larger percentages of undersized fruit in limited use style canned olives will have a positive impact on industry returns. In the absence of this action, undersized fruit would have to be used for noncanning uses, like oil, for which returns are lower.

Section 944.401(b)(12) of the olive import regulation allows imported bulk olives which do not meet the minimum size requirements for canned whole and pitted ripe olives to be used for limited use styles if they meet specified size requirements. The preceding changes authorizing certain olives to be used in limited use styles during the 1987–1988 crop year, and the changes in the limited use size tolerances require similar changes in § 944.401(b)(12) to bring the import regulation into conformity with the applicable domestic requirements.

Section 932.51 of the order specifies size designations in addition to those contained in the U.S. Standards for Grades of Canned Ripe Olives (7 CFR Part 52). This action adds a new paragraph (g) to § 932.151 which modifies these designations to change the approximate count per pound of petites and extra large Sevillano "L" 's from 160 and 82, to 166 and 86, respectively, and changes the average count range (per pound) for extra large Sevillano "L" from 76–88, inclusive to 76–90, inclusive. This eliminates a gap between the smallest Sevillano canning size (average count 65–75) and undersize Sevillano olives (average count above 91) and also allows more small olives to be utilized.

In addition, this action also changes certain average count ranges contained in Tables I and II in § 932.152 in order to permit smaller olives to be included in the various size designations in conformity with the committee's recommendations to allow more small olives to be used for limited use styles and smaller olives to be used for whole and pitted styles. This is expected to have a positive effect on industry returns and benefit both growers and handlers.

The average count ranges per pound in Table I for Extra Large Ascolano, Barouni, and St. Agostino olives in Variety Group 1 and all Extra Large olives in Variety Group 2 are changed from 65–88 to 65–90. Because of the change in Table I, this action also makes necessary conforming changes in the olive import regulation, § 944.401(b)(3) which provides size requirements for Ascolano, Barouni, and St. Agostino olives in Variety Group 1. The minimum weight for such olives would be changed from 1/88 pound to 1/90 pound each.

In Table II, which is redesignated as Table III by this action, the average count ranges per pound for Large and Extra Large variety Group 2 olives are changed from 89–105 and 65–88 to 91–105 and 65–90, respectively. Table III is contained in § 932.152(g)(2). These changes bring the average count ranges per pound into conformity with those specified in Table I and the U.S. Standards for Grades of Canned Ripe Olives (7 CFR Parts 52.3751–52.3764) that establishes a count of 91–105 for "large" canning size olives.

This action also establishes a new Table II in § 932.152(g)(1) with average count ranges per pound for Variety Groups 1 and 2 limited use size olives for easier reference.

Based on the above, the Administrator of AMS has determined that this action will not have a significant economic impact on a substantial number of small entities.

After consideration of all relevant matter presented, including the recommendation of the committee, it is determined that grade and size requirements for limited use olives for the 1987–88 crop year should be established, and that the use of small olives for such purposes during the 1987–88 crop year will tend to effectuate the declared policy of the Act.

Pursuant to 5 U.S.C. 553, it is found that it is impracticable, unnecessary, and contrary to the public interest to give preliminary notice and engage in further public proceedings with regard to this action and that good cause exists for not postponing the effective date of this action until 30 days after publication in the Federal Register because: (1) The 1987–88 crop year has already begun; (2) handlers are aware of this action as proposed by the California Olive Committee; (3) compliance with this regulation will require no special preparation by handlers or importers; (4) this action relieves restrictions on handlers and importers; and (5) the rule provides a 30-day comment period, and any comments received will be considered prior to issuance of a final rule.

List of Subjects in 7 CFR Parts 932 and 944

Marketing agreements and orders, Olives, California, Imports.

For the reasons set forth in the preamble, Parts 932 and 944 are amended as follows:

PART 932—OLIVES GROWN IN CALIFORNIA

1. The authority citations for 7 CFR Parts 932 and 944 continue to read as follows:

Authority: Secs. 1–19, 48 Stat. 31, as amended; 7 U.S.C. 601–674.

2. Section 932.153 is revised to read as follows:

§ 932.153 Establishment of grade and size requirements for processed 1987–88 crop year olives for limited use.

(a) *Grade.* On and after August 1, 1987, any handler may use processed olives of the respective variety group in the production of limited use styles of canned ripe olives if such olives were processed after July 31, 1987, and meet the grade requirements specified in § 932.52(a)(1) as modified by § 932.149.

(b) *Sizes.* On and after August 1, 1987, any handler may use processed olives in the production of limited use styles of canned ripe olives if such olives were harvested during the period August 1, 1987, through July 31, 1988, and meet the following requirements:

(1) The processed olives shall be identified and kept separate and apart from any olives harvested before August 1, 1987, or after July 31, 1988.

(2) Variety group 1 olives, except the Ascolano, Barouni, or St. Agostino varieties, shall be of a size which individually weighs 1/90 pound: *Provided,* That not to exceed 35 percent of the olives in any lot or sublot may be smaller than 1/90 pound;

(3) Variety Group 1 olives of the Ascolano, Barouni, or St. Agostino varieties shall be of a size which individually weighs 1/40 pound: *Provided,* That not to exceed 35 percent of the olives in any lot or sublot may be smaller than 1/40 pound;

(4) Variety Group 2 olives, except the Obliza variety, shall be of a size which

individually weighs 1/180 pound: *Provided,* That not to exceed 35 percent of the olives in any lot or sublot may be smaller than 1/180 pound;

(5) Variety Group 2 olives of the Obliza variety shall be of a size which individually weighs 1/140 pound: *Provided,* That not to exceed 35 percent of the olives in any lot or sublot may be smaller than 1/140 pound.

3. Section 932.151 is amended by adding a new paragraph (g) as follows:

§ 932.151 Incoming regulations.

* * * * *

(g) *Additional Marketing Order Size Designations.* Pursuant to the authority in § 932.51(a)(1)(ii), the following additional size designations are established:

Designation(s)	Approximate count (per pound)	Average count range (per pound)
Subpetite		181 and up.
Petite	166	141–180, inclusive.
Extra Large Sevillano "L"		76–90, inclusive.
Extra Large Sevillano "C"	70	65–75, inclusive.

* * * * *

4. Section 932.152 is amended by revising paragraphs (f) and (g) to read as follows:

§ 932.152 Outgoing regulations.

* * * * *

(f) *Size designations.* (1) In lieu of the size designations specified in § 932.52(a)(2), except as provided in § 932.51(a) (1) and (2), canned whole ripe olives, other than those of the "tree-ripened" type, shall conform to the marketing order size designations listed in Table I contained herein, and shall be of a size not smaller than the applicable size requirements, tolerances, and percentages listed in paragraphs (a)(2) (i), (ii), (iii), and (iv) of § 932.52.

TABLE I.—CANNED WHOLE RIPE OLIVE SIZES AVERAGE COUNT RANGES (PER POUND)

Size designation	Variety Group 1		Variety Group 2	
	Except Ascolano Barouni St. Agostino	Ascolano Barouni St. Agostino	Obliza	Except obliza
Small	N.A.	N.A.	N.A.	128–140
Medium	N.A.	N.A.	106–121	106–121
Large	N.A.	N.A.	91–105	91–105
Ex. Large	65–75	65–90	65–90	65–90
Jumbo	51–60	51–60	51–60	51–60
Colossal	41–50	41–50	41–50	41–50
Sup. Colossal	(1)	(1)	(1)	(1)

N.A.—Not Applicable.
[1] 40 or fewer.

(2) The size of the canned whole olives shall conform with the applicable count per pound range indicated in Table I of paragraph (f)(1) of this section. When the count per pound of whole olives falls between two count ranges, the size designation shall be that of the smaller size. The size of the other styles of canned ripe olives shall be determined prior to pitting. The average count for canned whole ripe olives is determined from all containers in the sample and is calculated on the basis of the drained weight of the olives.

(g) *Size certification.* (1) When limited size olives for limited use styles are authorized during a crop year and a handler elects to have olives sized pursuant to § 932.51(a)(2)(i), any lot of limited use size olives may be used in the production of packaged olives for limited use styles without an outgoing inspection for size designation if such olives are within the average count range in Table II contained herein for that variety group, and meet such further mid-point or acceptable count requirements for the average count range in each size as approved by the committee.

TABLE II.—LIMITED USE SIZE OLIVES

Variety	Average count range (per pound)
Group 1, except Ascolano, Barouni, and St. Agostino.	76–90, inclusive.
Group 1, Ascolano, Barouni, and St. Agostino.	91–140, inclusive.
Group 2, except Obliza.	141–180, inclusive.
Group 2, Obliza	128–140, inclusive.

(2) When limited use size olives are not authorized for limited use styles during a crop year and a handler elects to have olives sized pursuant to § 932.51(a)(2)(ii), any lot of canning size olives may be used in the production of packaged olives for whole, pitted, or limited use styles without an outgoing inspection for size designation if such olives are within the average count range in Table III contained herein for that variety group, and meet such further mid-point or acceptable count requirements for the average count range in each size as approved by the committee.

TABLE III.—AVERAGE COUNT RANGES (PER POUND)

Size designation	Variety Group 1		Variety Group 2	
	Except Ascolano, Barouni, St. Agostino	Ascolano, Barouni St. Agostino	Obliza	Except obliza
Small	N.A.	N.A.	N.A.	128–140
Medium	N.A.	N.A.	106–121	106–121
Large	N.A.	N.A.	91–105	91–105
Ex. Large	65–75	65–90	65–90	65–90
Jumbo	51–60	51–60	51–60	51–60
Colossal	41–50	41–50	41–50	41–50
Sup. Colossal	(1)	(1)	(1)	(1)

N.A.—Not Applicable.
[1] 40 or fewer.

PART 944—FRUITS; IMPORT REGULATIONS

5. Section 944.401(b) is amended by revising paragraph (b)(3) and the introductory text of paragraph (b)(12) to read as follows:

§ 944.401 Olive Regulation 1.

* * * * *

(b) * * *

(3) Canned whole ripe Variety Group 1 olives of the Ascolano, Barouni, and St. Agostino varieties shall be of such size that not more than 25 percent, by count, of the olives may weigh less than 1/90 pound (5 grams) each except that not more than 10 percent, by count, of the olives may weigh less than 1/98 pound (4.6 grams) each:
